The second French steamer (the *Labourdonnais*) arrived at Suez on 31st Dec. with a portion of the cargo engaged for the present mail. The next mail, with dates from Hong Kong to 1st Dec., will be delivered on the 11th or 12th inst. Telegrams in advance of the mail of 15th Dec., via Galle, are now due.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer, Nyanza, from Southampton, Dec. 20.—To Yokohama: Mr. H. [illegible]. To Hong Kong: Mr. Webb, Mr. A. E. Cooper, Mrs. Aitken. To Ceylon: [illegible] Thomas, Mr. Colin Macinlay, Mr. Sydney Fuller, Mr. Harry Maule Finch, Mr. [illegible]er Wren, and three second-class passengers. To Singapore: Capt. Furgge- Penang: Mr. A. Eglesham. To Calcutta: Miss E. Cunningham, Mrs. Graine, [illegible]eid, Capt. A. C. Bruce, Mrs. Raymond and three children, Miss Dennis, Mr. Mr. T. Horsford, Capt. and Mrs. Arbuckle, Miss A. Macpherson, Mrs. Richard, [illegible] Elton, Mr. R. D. E. Spottiswoode, Mr. J. Ditmas, Mr. J. Man, Mr. H. Gray. [illegible]. Surgeon Fergusson, Mr. T. H. Gould, Mr. and Mrs. Mosley and child, and [illegible]d-class passenger. To Madras: Dr. and Mrs. Morton, child, and ayah, Mrs. Miss Hayne, Lieut.-Col. Forde, Mr. Waters, the Rev. J. H. Walton, Mr. A. M. [illegible]r. G. J. Curran, Mr. J. W. Vas, Mr. J. J. Roberts, and three second-class [illegible].

Per P. and O. steamer, from Marseilles, Dec. 28.—To Hong Kong: Mr. C. Morgan. To Yokohama: Mr. [illegible] Thorel. To Penang: Sir W. and Lady Hackett. To Singapore:—Mr. A. J. [illegible]ode. To Calcutta: Miss Freer, Dr. T. B. Farncombe, Rev. Mr. and Mrs. [illegible]ieut. W. Grant, Mr. and Mrs. T. C. Hersey, Mr. R. L. Upton, Capt. Swinton, Mrs. W. Smith, Mr. D. Lucy, Mr. and Mrs. Parry, Mr. Elliot and one second- [illegible]anger. To Madras: Mr. C. A. Ainslie, Major and Mrs. Marsach, Mr. and [illegible]. Swinton and child, Major Cannon, Mr. Vertue.

Per P. and O. steamer, from Southampton, Jan. 4.—To Yokohama: Mr. J. S. Barber, [illegible]Mrs. Jaquenot, Mrs. Dissez. To Ceylon: Mr. and Mrs. G. Vetch, Mr. and [illegible]. Mr. L. P. Thomas, Miss Willisford, Mrs. Allen and child, Mr. T. Holland. [illegible] Kong: Mr. Ridgway, Mr. Mahon, Mr. W. J. Hooper, R.N., Rev. C. Chapman, [illegible]To Singapore: Miss Gale, Mr. G. T. and Mrs. Ricketts.

[illegible]Marseilles, Jan. 12.—To Ceylon: Mr. & Mrs. Boustead, Mr. E. Byrde. To Hong [illegible] Still, Mr. S. L. Prior, Mr. T. J. Gardner, Mr. J. B. Taylor, Mr. H. C. Low.

Per P. and O. steamer, from Marseilles, Jan. 20.—To Hong Kong, via Bombay: Mr. Hitchcock.

Per P. and O. steamer, from Southampton, Jan. 20.—To Ceylon: Lieutenant and Mrs. A. Hansard, Miss Adams, Mrs. Wormald. To Singapore: Mr. W. H. Newman.

From Marseilles, Jan. 28.—To Shanghai: Dr. and Mrs. C. Powles. To Singapore: Sergeant-Major J. Rose. To Hong Kong: Mr. and Mrs. J. Cromton.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Advices from this port extend to the 17th Nov. The English and French mails of 10th and 17th September arrived out on the 4th and 13th November respectively. The *Duplein* with the present homeward mail was announced for Suez direct, calling only at coaling stations, and had in consequence an unusually heavy freight-list.

Regarding Japanese politics, the *Japan Herald* says:—From Osaca we hear that the new Shiogoon, Stotsbashi, is devoting to the public business of Japan an amount of intelligence, energy, and earnestness, seldom, if ever, exhibited by rulers in this country. He is a great favourite with the Mikado, and the sanction of the Celestial sovereign attends all his efforts for the public good. Already a suspense of hostilities, which we hope may lead to final peace, has been arranged with Nagato; and the Shiogoon is preparing at Kioto for a meeting of all the great Daimios having territorial rights of their own. Before that meeting, and in the presence of the Mikado, Stotsbashi will, we understand, lay frankly his whole policy; which is no other, we are assured, than the faithful and complete execution of the treaties with foreign nations, and the advancement of the country in the ways of modern civilisation; he will also call upon all present to make a similar declaration of their views on the great topics of the times.

From Osaca we hear little else of importance. It is reported among well-informed Japanese circles, that Stotsbashi has ordered that in future all his cavalry are to use European saddles; and that after a certain time Japanese officials are to dispense with their two swords in the streets. Whether this applies to all, or only to those in the immediate neighbourhood of foreigners or not is uncertain. The idea gains ground that there will be no more fighting between Nagato and the Shiogoon.

There is no further account of rice riots, but we are pleased to find that the Japanese Government have sent an agent by the last mail to Saigon to obtain 40,000 piculs of rice. On a former occasion, when a cargo of rice was imported, its sale though not prohibited was rendered impossible. The reason it appears was that the Samourai and others obtain their pay in this esculent, and as they have to sell a portion to supply other wants, they object to the importation as tending to cheapen their commodity. Pressure and want, however, has compelled the Government to sanction the removal of all impediments.

On the 2nd inst. a meeting took place at the British Legation, by invitation of his Excellency Sir Harry Parkes, at which a committee was formed to draw up a prospectus of an institute or association for providing a public library and reading room, combined with such other amusements as would be likely to obtain universal support, and prove beneficial and useful to all classes of the community. The committee has already been at work, and a goodly number have put down their names as subscribers.

A few days before the departure of the mail (says the

Digitized by Google

Herald) one of the members of the Gorogio, Inabe Mino no kami, paid a visit to Yohohama. He was present on the 12th November at the distribution of prizes at the Franco-Japanese College. On the same day he paid a visit to H.M.S. *Princess Royal;* and on the 13th a special parade of H.M. 2-9th regiment took place before him and his Excellency Sir Harry Parkes, both accompanied by a brilliant suite. The hour appointed for the review was 10 A.M., but at that hour Inaba Mino-no-kami was engaged with another Minister, and perhaps ignorant of the great value set upon punctuality by Europeans, was too late to witness the commencement of the operations. Whether on his arrival he was as much interested as he was expected to be, is rather doubtful; for, except when his attention was particularly called to any particular movement, he seemed to be more taken up with the suite of his Excellency and with the crowd, than he was with the soldiering; but to him everything was so novel, that we are not surprised that his eyes were everywhere. Of course he expressed himself much gratified. We wish we could see the members of the Japanese aristocracy among us more frequently so that the sight of Europeans in numbers and of European settlements were no longer curiosities to them.

We (*Japan Times*) have to note the departure of Sir Harry Parkes and the staff of his legation to Yedo, where they will most probably remain for a couple of months. No particular reason is assigned for this move. We have also to note the arrival of H.M.S. *Adventure*, with Admiral King on board from Shanghai and Nagasaki. She left the latter port on the 7th Nov., and came by the Inland Sea. She stayed a day at Simonoseki, where she found the *Argus*, and reports everything quiet in that quarter, the armistice, which we mentioned some time back, being still unbroken. There were no signs on either side of the Straits of any warlike operations, and it is believed that the war is virtually over.

A case involving a principle important to the mercantile community had been tried in the British Consular Court, before F. G. Myburgh, Esq. This was a claim made by Messrs. R. Lindan and Co., merchants in Yokohama, for $156.47, upon the manager of the Hong Kong and Shanghai Banking Company, under the following circumstance. On Friday, 27th Oct., plaintiffs paid into the Oriental Bank a cheque of Messrs. Walsh, Hall and Co.'s for $12,000, drawn upon the Hong Kong and Shanghai Bank, which being presented for payment after office hours, the manager endorsed "good for $12,000" with his initials. On the 28th Oct. plaintiff sent to the Oriental Bank a cheque for $3,370.50 drawn upon the Hong Kong and Shanghai Bank by Messrs. Randon and Co., the two cheques being specially intended as payments for 42,600 boos belonging to plaintiffs, deposited in the Oriental Bank, and sold by them for delivery on the 28th ult. After banking hours on Saturday, the 28th, the plaintiffs had a letter from the manager of the Oriental Bank, stating that the cheques had been twice presented and payment refused. Plaintiffs made immediate inquiry at the Hong Kong and Shanghai Bank, accompanied by Mr. Walsh, and ascertained that both drawers had ample funds in the bank's hands. As they had to deliver the boos that afternoon, they were compelled to borrow $42,600 of Messrs. Walsh, Hall, and Co., and now claimed $15.37, three days' interest on $15,370.50, being for the time that elapsed between the presentation of the cheques and their ultimate payment; and 426 boos from 306, equal to $141.10, being 1 per cent. commission on boos 42,600.

The defendant pleaded as follows:—1st. That Messrs. R. Lindan and Co. are not constituents of the Hong Kong and Shanghai Bank; and that "a banker is under obligation only to his customer, who may maintain an action at law against him for non-payment of his cheque; but the person in whose favour the cheque is drawn has no such remedy against the banker;" and 2nd.—That the accuracy of the statements in the said petition is not admitted.

The evidence taken was very lengthy, but its general tenor will be gathered from the decision of the Court, which was as follows:—

"DECISION.—The question which, in the opinion of the Court, it is necessary to determine in the case is, 'whether the plaintiffs were the holders of the cheques in dispute when these were presented for payment on Saturday, the 27th of October, at the Hong Kong and Shanghai Bank, of which the defendant is the manager.'

"It appears that on the afternoon of Friday, the 26th of October, the plaintiffs sent to the Oriental Bank for collection the cheque for $12,000 which is the one more prominently noticed in the evidence adduced. After banking hours on that day it was sent, bearing the stamp of the Oriental Bank, to the Hong Kong and Shanghai Bank, with a request to the defendant to send in return a cheque on the Chartered Mercantile Bank, or, if too late, to initial it. He not only initialed it, but also wrote on the face of it 'good for $12,000,' thus binding himself to the Oriental Bank for that sum. Thus accepted, it was received back by the Oriental Bank as satisfactory security for the amount. Of this there can be no doubt, for on the following morning, the 27th October, this amount, together with that of the other cheque for $3,370.50, was placed to the credit of the plaintiffs in the books of the Oriental Bank, which, thus ceasing to be the agent of the plaintiffs, constituted itself their debtor for these amounts, regarding the bills as so much money, and becoming the actual proprietor or holder of the bills; for a banker would hardly be so rash as to credit a customer with a sum of money if he had not that sum, or what he deemed equivalent security for it, in his hands. And the subsequent conduct of the Oriental Bank leaves no room to doubt this conclusion, for when the cheques were presented at the Hong Kong and Shanghai Bank at half-past-ten, and payment was not made—the defendant deferring the time of payment till one o'clock—the Oriental Bank, exercising its own discretion, agreed to such postponement by raising no objection to it—and thereby not only assumed a responsibility of all that might occur during this postponement, but virtually acknowledged itself as the holder and owner of the bills. Let it be supposed, for the sake of argument, that during the interval intelligence had arrived that the Hong Kong and Shanghai Bank had failed, causing the branch of the bank here to stop payment; in such an event, the plaintiffs would surely not have been the sufferers.

"It would have been otherwise if the Oriental Bank had simply acted as an agent, and with a desire to be relieved of all responsibility for any damage that might occur from the delay in the payment, if, on failing to obtain payment on the first presentation, it had immediately given notice to the plaintiffs—which could have been done in a few minutes—and thus enablsd them to obviate the difficulty which had given rise to the present action—but the Oriental Bank only appears to have thought it necessary to do so and to return the bills to the plaintiffs on failing a second time to obtain payment, and after banking hours on Saturday, when it was too late to be of any avail that day. On the Monday following the bills were cashed by the defendant. While, then, the action of the defendant cannot be held to be altogether blameless, the decision at which the Court has arrived is that the plaintiffs have no cause of action against the defendant. They must, therefore, be nonsuited, and the costs of the Court paid by them."

Among the passengers conveyed by the *Dupleix* on her present voyage we observe the name of Koide Yama-tono-kami, Japanese Ambassador to Russia, and his suite, composed of eleven officers and seven servants, to Shanghai.

Regarding the company of Japanese performers mentioned in our last, the *Herald* says—"Professor Risley and his troupe of Japanese leave in the *Archibald* for San Francisco in a day or two. We wish we could detail to our readers the paraphernalia they take with them. Suffice it, that in all respects it is superb; and the artists they have engaged are of such a quality as will make their fame resound throughout all the States they visit, whether in Europe or America."

A sad accident is reported to Captain Eaton, R.N., of the gunboat *Firm*. It occurred on his return from a ride to Kanasawa, in which he was accompanied by Mr. Whitfield. On the road, about four miles from Yokohama were some pack-horses, one of which was laden with timber. In passing rapidly the pack-horse started and brought his load heavily against Captain Eaton, who, after passing about a dozen yards, rolled over the side of his horse into a paddy-field. Being unable to raise himself, his companion, with the assistance of some labourers, removed him to a small tea-house about 100 yards from the spot, on a door. On examination it was found his leg was broken just below the knee. Mr. Whitfield immediately dispatched a coolie to Yokohama, on his own pony, with a note to Mr. Smith, at the club, who immediately sent for medical assistance. The Japanese were extremely kind. Some sailors had passed some little time before, and Mr. Whitfield writing on a piece of paper that they would be of service if they returned, the men vied as to who should take it; they overtook the sailors, who hastened at once to the place, and about an hour after the accident, on the sailors reaching the tea-house, Mr. Whitfield, doubtful lest his note should have miscarried, requested them to stay with Captain Eaton, whilst he, mounting the other horse, rode into the settlement. He found Dr. Jenkins and Dr. Dunwoodie both proceeding to the spot, the latter accompanied by six marines with a stretcher. On examination it was found to be a severe compound fracture. Captain Eaton was ultimately conveyed to the Naval Hospital, where everything was done to alleviate his sufferings, and it is hoped amputation will be unnecessary.

The following commercial report is from the overland *Japan Times:*—

IMPORTS.—A sensible improvement has taken place in business since our last report was issued, and although the amount of transactions is not what we ought to expect at this time of the year, we trust that the better feeling is an indication that the war has been brought to a close and the first symptom of a return of trade to its normal activity. *Grey Shirtings* have continued to attract attention, and our quotations show that a further advance has been established. We hear, indeed, of sales at still higher prices than those stated below, but presume that the quality was somewhat superior to ordinary importations, and do not therefore

Digitized by Google

consider them as establishing a market rate. Settlements are estimated at about 20,000 pieces. *Cotton Yarn* is also in somewhat better demand, but the inquiry is almost exclusively for 16-24 S. and 38-42 S., of which the supply is limited. Holders are disposed to be firm, as the probable failure of the native *Cotton* crop will greatly increase the value of foreign *Yarn*. *Black Velvets* continue scarce, and arrivals bring full rates; purple are unsaleable except when assorted with black. *Chintzes* are dull and the stock extremely large; we hear from Nagasaki that the market there is also considerably overstocked. *Taffachellas* have found buyers to a limited extent and deliveries are rather better; with the present excessive supply it is hopeless however to expect higher rates. We hear of sales of some 4,000 pieces *S S Camlets* at our quotations. During the fortnight several parcels of Ningpo *Cotton* have been imported, and have been readily taken by the trade at our quotations, which show a fair margin upon Shanghai rates. The greater portion was sold to arrive under contract, and we may judge from these operations that the native crop will this season prove extremely deficient. We also have to notice an arrival of *Rice* from Shanghai which was sold at $5.85 per picul. It is stated that large orders have been sent to Saigon by the Government, under the auspices of the officials of one of the Treaty Powers, but we trust that there is no foundation for the report that a monopoly of so important a trade has been virtually granted to any individual firms. The Heroes of Alma had arrived with a general cargo.

EXPORTS.—*Silk:* By the last mail we reported slight symptoms of weakness in prices. This continuing, business was actively resumed immediately, which soon had the effect of hardening the market; the news per Cadiz then induced buyers to operate so eagerly as to raise the demands of holders, and all classic silks immediately went up to the top prices of the season, a rise on these sorts being established of fully $30 to 40. Several lots of *Mybash* have found buyers, for instance, at $940 to 960. *Ida* has appeared in loose hanks, and is saleable at $750 to 800. *Oshus* have been sold at $840 to 870, and *Koshus* at $790 to 810—all the best qualities. Such has been the demand (about 1,400 bales going forward by the two steamers) that inferior and unclassed silks have shared most disproportionately in the rise. Arrivals have been pretty free, but the proportion of good silk on the market is very much reduced. Stocks of all kinds are estimated at 530 piculs, settlements about 1,100.

In *Silk Eggs* the business has been unimportant, but about 1,100 boxes go forward by the Dupleix. *Cocoons* are still inquired for, and taken at rates.

TEA.—Throughout the fortnight the demand we noticed as commencing as soon as dealers brought forward the finer sorts has continued. Arrivals have been freer, but all fine teas were taken so eagerly that prices at first rather stiffened than otherwise; but we do not change our quotations, as we notice a slightly easier feeling during the last three days. Mr. R. E. Price estimates settlements at 2,400 piculs and unsold stock about 7,300 piculs.

NAGASAKI.

The *John Bunyan* has sailed for London, despatched by Messrs. Rainbow, Lewis, and Co., with the following cargo:—Tea, black, 44,995 lbs.; Uncoloured Japans, 970 lbs.; Coloured Japans, 442,664 lbs.; and 715 packages sundries, of which 169 contained curios shipped to the Paris Exhibition by the Prince of Satsuma.

The following is from Messrs. Alt and Co.'s "Market Report:"—

IMPORTS.—The improvement in imports recorded in our last continues, and a fair inquiry exists for most articles. Grey and White Shirtings and T-Cloths are in moderate demand, and of the latter there are no stocks. White and Dyed Spots and White Brocades are dull of sale. Dyed Brocades are wanted, and stocks light. Fancy Prints and Taffechellas are in heavy stock, with only a small inquiry for the latter. Turkey Red Prints (heavy goods) and Cambrics are in good demand, with no stocks. Quotations for Cotton Yarn are nominal, there having been no supplies for some time past. Camlets are in good stock, with but moderate inquiry at quotations, which show a loss of about 10 per cent. on cost. Long Ells are, however, readily saleable at quotations. For Black and Scarlet Spanish Stripes there is a small demand. Figured Orleans are much wanted, also Lustre Orleans. Camlet Cords, Crape Lastings and Velvets are saleable at quotations. In Metals, Lead and Spelter are wanted, but Tin Plates and Iron are very dull of sale. Coal is in small demand, at 18 to 19 dollars per ton with moderate stocks.

EXPORTS.—Supplies of produce have arrived freely, and a good business has been done in most staple articles during the month. Vegetable Wax and Tobacco are in less demand, present high rates checking business. Galls are wanted and scarce. Camphor is in less demand, with a tendency to lower rates. Small settlements of Sulphur have been made at quotations. Tea: Although fine leaf continues scarce, medium to good qualities are accumulating, and prices are again lower. Settlements are estimated at about 1,500 piculs. The John Bunyan for London is full, and the Christian Rankin has laid on for New York. Silk: About 100 piculs have been received, but no settlements are effected yet.

EXCHANGE.—6 months' bills on London, 4s. 7½d. to 4s. 8d. On Shanghai, 10 days, par. On Hong Kong, nominal. Itzibous have fluctuated during the month from 298 to 310; present rates are 302 to 305. Freights to London, £2 10s. New York, £2 10s. per ton of 40 feet. Shanghai, $3 to 3.50. Hong Kong, nominally, $3.50 to 4. Tonnage continues plentiful. Vessels loading: Carnarvonshire and John Bunyan, London; Christian Rankin, New York; Kaffir Chief, Shanghai.

HAKODADI.

A great fire took place in Hakodadi on the 29th October; upwards of 500 houses were burnt down, and all business was suspended for two days. There is no other news from this port.

KOREA.

The present mail brings further intelligence regarding the recent important events in Korea. The actual fate of the crew and passengers of the *General Sherman* is still uncertain, for two French missionaries who have escaped state that they were all decapitated on the 2nd of September, before the vessel was burnt.

It is stated that among the papers which Mr. Thomas had with him on board the *General Sherman* was a despatch from Prince Kung to the Korean authorities, instructing them to treat the foreigners with respect, stating that it was useless to oppose them, and that Mr. Thomas would explain the object of their mission satisfactorily. In the outrage committed upon the vessel and its occupants, it therefore now appears that the Koreans have been guilty of offering defiance to the Chinese with whom hitherto they have been upon friendly terms. The peculiar nature of their relations to China renders it difficult to know the exact bearing of this disrespect; as though they are nominally tributary, their allegiance does not involve any political dependence or protection.

A correspondent at Chefoo gives the following particulars regarding the departure of Mr. Thomas in the ill-fated vessel:—"Not more than a month after the French men-of-war had been here and gone south to attend to some trouble in Saigon, Mr. Thomas arrived from Peking. He said he was going with the French to Korea and that he had been deputed to go by the French Minister, I do not know in what capacity; and I was disappointed at having been unable to obtain any information before the French Admiral took his departure for Saigon, this latter event having taken place a short time before Mr. Thomas's arrival. However, either directly or indirectly, he conveyed the impression that he should probably remain here until the French vessels returned; none of us suspected that he would go to the Korea in any other way. While Mr. Thomas was thus apparently awaiting the return of the French there arrived from Tientsin Mr. Hogarth, of the firm of Meadows and Co. He said he had come by steamer from Tientsin and intended going to Pasiette in the American vessel *General Sherman*, which vessel he had left nearly ready to leave Tientsin, with the understanding that she should call at Chefoo and take him on board for Pasiette. Mr. Thomas and Mr. Hogarth appeared to have no "oneness" of purpose while here. But when the *General Sherman* arrived, Mr. Thomas bade us a mysterious sort of goodbye and then we expected the *General Sherman* would go to Korea, for why should Mr. Thomas care to go to Pasiette? The vessel scarcely stopped here half a day. No one here unless Messrs. Meadows and Co. knew that Mr. Thomas would go in the *General Sherman*. But now I think it is generally believed that Mr. Thomas while yet at Tientsin on his way here made an arrangement to go in that vessel. The rest of the story is known to your readers."

A private letter from the Korea gives the following additional information:—

"In addition to what I have already written, I have now to report the loss of the American schooner *General Sherman*, and the murder of the whole of her crew, so that if France would not attach much interest to the murder of French subjects, there is another nation to push on matters as regards their own subjects. Owing to the long period of inaction on the part of the foreigners, the mandarins appear to have lost all fear of them, and consequently are sure to carry out the orders to exterminate all Christians, orders so often acted upon only partially, but that now may take effect actually by wholesale since they are no longer apprehensive of any danger. Naturally enough a question may be asked as to the real cause of the murder of the whole crew of the unfortunate schooner, and the answer is that it was a simple bravado of the Koreans, treating with defiance a secret despatch from the Peking Government, with reference to their imprudence of action as regards Europeans, and warning them at the same time to avoid getting into any difficulties with them. This dispatch was received in Korea on the 15th August. The Regent, instigated by his Ministers, replied that it was not the first time that the Koreans had put Europeans to death, that China was not to meddle in the matter, and that what the Koreans had done before they would continue doing! The text of both documents was widely circulated throughout Korea. We had them ourselves, but we overlooked, in the hurry of getting away, to keep them. After the disaster to the unfortunate crew of the schooner, the Koreans visited two Chinese junks, and searched them thoroughly expecting to meet with some more Europeans secreted on board; not finding them, however, and under the pretence that the junks were carrying on contraband trade, because some shirtings, contraband articles, were found on board, they put both crews to death."

SHANGHAI.

The P. and O. mail of the 26th September, arrived out on the 13th Nov. The dates, owing to the detention of the steamer, are up to the 24th instead of the 20th.

A few weeks ago we drew attention to the preponderating power in the empire held by the Viceroy of the two Kiangs, and pointed out that the result of a coalition between him and Tsenkwo-fan would be to make these two mandarins virtual masters of Central China. Moreover, Chekeang overawed, Fohkien poor, Kwantung and Kwansi exhausted by chronic rebellion, could offer them no assistance while the North-West was disaffected. The effort of the Government to sow permanent dissention between them had failed as their temporary misunderstanding had been removed, and a *rapprochement* effected. Whether or not they contemplated using this power for their own aggrandisement was an open question, but there is no doubt that the power existed, and that the fact was causing uneasiness in the Councils of the Emperor.

We now hear of a scheme which, whether promoted by the Imperial Government or emanating from the local mandarins, bears every appearance of being intended as a counterpoise to the Tseng-Li coalition. The Viceroys of Fohkien and Chekeang, and Kwantung and Kwangsi, have agreed to club funds for the construction at Foochow of a foundry and dockyard, which shall place not only guns but gunboats at their disposal. About tls. 3,000,000 is the estimated outlay, a sum which will not, however, we suspect, permit the attainment of so great results as are hoped for. Shipbuilding is rather an expensive luxury, and the importation of workmen and material from France is an expensive commencement. Two French gentlemen, Messrs. Giquel and d'Aiguebelle, are, we believe, at the head of the scheme, and purpose to carry it out with the aid of skilled foreign labour. Ten gunboats are to be built and the Chinese to be instructed in working them, during a period of six years, at the conclusion of which it is assumed that they will be able to do without foreign superintendence—to carry on their own foundry, and to navigate their own craft. Theoretically no scheme could be better devised or more praiseworthy. Practically, the likelihood of the latter portion being realised is most remote. There is no reason why the gentlemen in question, aided by European workmen, should not attain the same success which Macartney has earned at Soochow. But that every foreigner concerned will disinterestedly retire at the end of six years, or that the Chinese will be able to dispense with their aid, is in the highest degree improbable.

However this may be, we sincerely wish them success. The weakness of the authorities has been frequently pointed out as one cause of the frequent disturbances with China; and among the tubulent populations of Fokhien and Kwantung the influence of the local mandarins is notoriously small. People who go out armed to till the fields, and indulge in skirmishes with the inhabitants of another village with which their own is at enmity by way of occasional recreation, are somewhat difficult to control. As a rule, we believe, the officials are constrained to leave them much to their own devices, and these are generally inconsistent with even Chinese notions of order and propriety. The possession of a few guns may perhaps enable the mandarins to curb some of these eccentricities, and to exercise more than a nominal authority. Besides, however, a desire to improve the condition of the people, we have a direct interest in strengthening the hands of the authorities, in the prospect of enabling them to place some restrictions on the pirates who swarm on these coasts. The satisfaction, too, with which, for these reasons, we regard the initiation of the scheme in question is unalloyed by the slightest apprehension that any military knowledge foreigners may impart to the Chinese will ever be used with effect against themselves. At first, possibly, the latter may imagine that the possession of foreign guns will enable them to compete successfully with a foreign force. But should such a foolish impression ever lead to collision, their enlightenment will be speedy and effectual.

The following items are from the *North China Herald* of the 17th and 24th Nov.:—

A meeting of the amateur performers of Shanghai has been held, at which it has been resolved to join their forces and constitute themselves a dramatic company, placing their theatrical property at the common disposal of the members. Sufficient money has been subscribed to fit up a godown as a theatre for a short time, at the expiration of which the property would have to be sold; but a strong opinion has been expressed in favour of, if possible, erecting a wooden building at a slightly increased cost, instead of expending a sum in fitting up a godown. The meeting was adjourned to enable the committee to ascertain whether they could raise the necessary funds for the enlarged scheme,—estimated at 6,000 taels, of which 3,500 taels are already subscribed.

A meeting of members of the gymnasium has also been held, at which a satisfactory state of finance was exhibited; the treasurer being able to place $250 as a reserve fund, after having paid $213.64 for new appliances. But though the monetary affairs of the gymnasium are flourishing, the daily attendance is hardly commensurate with the number of members on the list. It is essential to enjoyment of an afternoon at a gymnasium that there should be a number of men present to join in the exercises, and stimulate each other by competition. We are glad to learn that some "Shanghai games" on the model of the "Olympian" are shortly to be held, and have no doubt they will give a fresh impulse to this very healthy means of recreation.

Mr. F. B. Johnson has been unanimously elected chairman of the Municipal Council.

It was thought likely that the first paper hunt of the season would take place to-day. The cotton stalks, however, are not yet nearly all cut, and the country is consequently so blind that it would be impossible to find the scent. The weather is now everything that can be desired, so it is likely that the opening will not be delayed longer than another week.

We are glad to learn that there is at length a prospect of something being done to the Yang-king-pang Creek. About 10,000 tls. are required to complete cleansing its channel and to reconstruct the bridges. Half of this sum the English and French Consuls have agreed to divide between them, if the Taotai will contribute the remainder. As he bore a half share of the expense incurred in the spring, there is little doubt that he will agree to this proposal. A robbery was committed last week in the city which created some excitement amongst the inhabitants, and brought the Taotai in person to the scene of the exploit. The thieves escaladed the city wall, near Porte Montauban, robbed a house a short distance inside of about $1,000 worth of gold ornaments, and returned by the way they had come.

A meeting of volunteers has also been held, to discuss the advisability of re-arming the corps. Considerable difference of opinion prevailed, as will be seen from the report, and we do not imagine that it will be found possible to give effect to the resolution adopted, for the purchase of 100 rifles on the Snider principle, as we doubt the collection of half the requisite funds.

We are glad to learn that the Municipal Council have decided on paying the outstanding debts of the Bubbling Well Road, amounting to tls. 935.62, out of the balance of funds at their disposal, after paying the repairs of the road and bridges. The title deeds of the road will then be handed over by H.B.M. Consul to the Council, and a regular transfer of the property effected.

The steamer *Whampoa*, which left for Nagasaki on the 18th, has been obliged to put back through stress of weather, experienced on the following day. The decks, we learn, leaked so badly that water poured through on the boilers, causing the steam to condense as soon as it was generated.

Great commotion has been excited in the opium market by heavy failures among native dealers. Fifteen hundred packages of tea saved from the *Ellen Rodger* have been sold, realising tls. 9,500.

The success which has followed the revivification of the North China branch of the Asiatic Society has fully equalled, if not exceeded, the hopes of those who were instrumental in raising it from its ashes; and has practically contradicted the apprehensions expressed that the supply of contributions would soon be exhausted. Thus far, at least, no symptom of such a calamity has become apparent; every successive meeting giving proof rather of increasing strength than of decadence. No opportunity has been lost to enlist new recruits, and most of the gentlemen whose long residence in the country and acquaintance with the inhabitants and the language especially fit them for contributors, have been induced to enrol themselves as members. By many of these papers of high interest and value have already been contributed—witness the names of Williams, Edkins, Martin, Wylie, &c.; and many others on the list are well able to enrich its records. The sources of the information which it is the object of the society to accumulate are well-nigh inexhaustible; and its career, hitherto, is an earnest that it will worthily fulfil its object.

The following on the credit given by foreign merchants to the Chinese is from the *Recorder* :—

It is a significant circumstance and strikingly illustrative of the unsoundness of the system of trade in China, that a claim for no less a sum than tls. 80,000 was brought by Messrs. Jardine, Matheson, and Co. *versus* the Tuck-Sing-Hong for amounts due on account of goods consigned to the defendants. That goods worth such a sum as this should be placed at the disposal of a Chinese merchant upon his own credit is certainly an evidence of the trustworthiness of the natives which we should scarcely expect in an ordinary way to meet with; and it may become a question whether in the face of the constant warnings which have been received in one way and another, such an action does not rather betray an over eagerness for trading and an over-speculativeness on the part of the consignor, than respectability and trustworthiness on that of the consignee; the more especially as the event proves some serious reasons to have become apparent for suspecting that the Tuck-Sing-Hong have rendered account sales at lower prices than the goods were sold at. It is clear that abstractly considered there is no reason why goods to the amount of £20,000 or £30,000 should not be consigned to a Chinaman as well as to a foreigner; but we must own there appears to be a somewhat comical inconsistency in the first trusting a man to such an amount and then not hesitating to entertain suspicions of him such as a few people would lay to the charge of the veriest pettifogger in mercantile affairs.

The remedy suggested is equally characteristic. Upon the bare assertion that account sales have not been rendered and that they suspect foul play on the part of the consignee of the goods, they ask the Mixed Court, a mere magisterial tribunal, to take steps for seizing the defendant's books at Newchwang, Tientsin, and at other ports, as well as at Shanghai. The request is certainly a strong one; and, no less than amount of the suit, gives evidence of strange notions as to the way in which business can be conducted with a Chinaman, It seems to show that blind confidence at the outset and arbitrary compulsion when a difficulty arises, are considered to form the rule of conduct which should guide the mercantile relations between foreigners and the natives. The Court, we think very justly, ordered the plaintiffs to produce evidence of injury in one special case, and this we presume they will endeavour to do at its next sitting, though we question very much whether more good will result from this suit than from so many other similar matters which are brought before that tribunal. The fact, however, of the well known difficulty in obtaining redress from the natives ought to make people the more cautious in trusting them, and it is certainly anomalous to find on the contrary that more credit is accorded to Chinese than would be given by a prudent man of business, even to foreigners of standing and respectability.

If the present were a single instance of the over-confidence placed by foreigners in Chinese it would be scarcely necessary to allude to the subject; but matters have gone such a length in this respect, that every opportunity should be seized of pointing out the pernicious tendency of confiding implicitly in the natives. There are constant complaints of the dishonesty of the Chinese; but, notwithstanding, people go on trusting them as much as ever. As long as the eager competition which characterises business in China exists, and which seems to blind people to every dictate of prudence, we cannot hope that the trade will be anything less than delivering ourselves bound into the hands of the natives, who, by combining together, are easily able to work the markets as they choose. Credit to a certain extent must be given in order that business may be conducted at all; but to give it in the reckless way in which it is granted in China, must tend to undermine anything like sound trade. If there were no other, there is one very forcible reason why the Chinese are not fit persons to entrust with large sums of money in business. Whether they are more or less dishonest than foreigners is perhaps doubtful, but it is certain they are very much more speculative; and there can, therefore, be no security against a native hong of the highest standing one day being broken up the next. Only within the last week one of the oldest Chinese dealers, doing an enormous business, has become a bankrupt; and we make not the slightest doubt that the same persons who are losing money by Eu-Tong will lose it again by the next failure of a similar description. How long it will take to make people understand that in the long run prudent trade is the most profitable here no less than in other places, is a difficult question; but sooner or later this principle must become recognised and acted upon if business in China is to be anything else than a grand game of chance, with a rapid fortune for those who win, and bankruptcy for those who lose.

A correspondent writing from Tientsin under date of 2nd Nov. notes the arrival of the Hon. Anson Burlingame, Minister for the United States, at that port, on the 1st. He also mentions that another French Missionary, who had escaped from the Corea, brought news confirming the murder of the crew and passengers on board the *General Sherman;* and that it was reported the unfortunate men had been beheaded, not burnt in the vessel, as formerly stated.

The Inspector-General of Customs has since his return commenced a vigorous investigation into the efficiency of the office. Within the last few days he appeared suddenly among the various employes at the Custom-house and submitted the Chinese students to an examination in the language. This unexpected proceeding was, we imagine, designed with the view of preventing the possibility of "craming up."

From Newchwang the *Shanghai Recorder* is advised as follows, under date Oct. 21:—We are now enjoying the most delicious autumn weather, sometimes a trifle too warm in the afternoon, and sometimes cold at night; but the temperature is as pleasant as any one need desire. The great sensation of the year, that caused by the murder of General Pwan, Commander of the Tientsin soldiers, on the 11th ult., has pretty well subsided. Five of the assassins are on their trial at Kaichow; but common report is tolerably unanimous that the sword-rack leader Sun-le-fang ought to make one of the party. He would have been arrested long ago but for the friendship and support of a certain official, said to possess Court influence, who shall be nameless, but whose office is not unknown to foreign merchants and shipmasters. The successor of Sun's victim, General Wang, has just gone off to a place in the eastern part of the province called Takoo-shan, where the rebels under Wangwoo Hochang ("the priest") have been repeating their little games, and has taken away every soldier in Yingtazse! It is rumoured that some British troops are to be posted here for the winter; if they are coming, they should lose no time about it. The British Consul has proposed a plan, which I believe is to be carried out, for the conveyance of our mails during the winter from Chefoo across the Miautaou Straits. In a sanitary point of view we are all flourishing, but for the prevalence of impecuniosity (a disease which sometimes proves fatal), which has appeared most conspicuously in the eastern or foreign quarter of the town.

At the sale of Messrs. Jarvie, Thorburns and Co.'s property, on the 13th Nov., the senior hong, with the out-houses, compradore's rooms, &c., and flower garden, realised Tls. 9,100; the junior hong and three godowns, silk room and shed, Tls. 6,900. Twelve lots of land on the Bubbling Well Road, containing 23 mow, went for Tls. 450. Hall, a piece of land measuring about 10 mow, near the Ningpo joss-house, Tls. 65. Two lots of property in the concession at Chinkiang, measuring about 70,000 square feet, went for Tls. 215; three others, aggregating about 10 mow, Tls. 185.

The Volunteer meeting extending over three days has been favoured with tolerably fine weather. During the three days the following prizes were shot for:—The Merchant's Prize, value 150 taels, won by Sergeant Pearson; the Taoutai's Prize, value 150 taels, won by Trooper Evans; a Claret Jug, value 15 guineas, presented by Edw. Morriss, Esq., won by Ensign Kidner; the Challenge Cup, presented by R. J. Ashton, Esq., also won by Ensign Kidner; the Banker's Prize, presented by the bankers of Shanghai, valued at 100 taels, won by Sergeant Pearson; and the three Consolation Prizes, presented by the merchants of Shanghai and valued at 50 taels, 30 taels, and 20 taels respectively, these were for unsuccesful competitors for the former prizes, and were won by privates Kidner, Turner, and Anderson.

HONG KONG.

The P. and O. mail of 10th October, arrived out on the 22nd Nov. The latest date is the 29th. The French mail of 17th October was expected on that day, but by telegrams up to the 1st December she had not arrived.

(FROM OUR OWN CORRESPONDENT.)

As usual, the French mail is delayed for several days beyond its advertised date of departure, owing to the non-arrival of the Shanghai steamer. Some alarm prevailed in the colony for upwards of a week, in consequence of the discovery of a suspected plot for a piratical attack on the island. About the 16th inst. a Chinese from the mainland appeared in Hong Kong and stated to one of the departments of the Government that he had in his possession a letter from one Chun Kwei Tsik, who was notorious during the war of 1856-57 for his exploits in the way of kidnapping foreigners, in which a conspiracy to make a descent upon the colony on the night of the 23rd inst. was revealed. This letter had fallen into the bearer's possession in the following manner. Two Chinese had entered his sugarcane patch at his native village and stolen some of the cane. On his seizing them with the help of his neighbours he found the suspicious letter on the person of one of them, and had at once resolved to lay the matter before the authorities of Hong Kong. This was a somewhat unusual though highly praiseworthy resolve for a Chinese villager, but as the document appeared to be genuine, and gave minute details as to the armament for the nocturnal foray, the Government of the colony thought it as well to be on their guard. Gunboats were sent out to scrutinise the adjacent coast, and detachments of the troops were kept constantly under arms. It so happened that the Regatta Ball was fixed for the night of the 23rd inst., which was also the date assigned for the projected attack, and a military guard occupied the ante-room of the club, in which the ball took place, thus giving a new zest to the "gay and festive scene." *En revanche*, however, many of the officers were prevented from leaving barracks, thus depriving the room of gay uniforms and causing the detained sufferers, no doubt, to emulate in respect to objurgations "our army in Flanders." The night, however, passed off in peace, and investigations instituted by an officer specially despatched to Hong Kong by the Viceroy of the Two Kwang, at the instance of H.M.'s consul at Canton, have since then proved that the intercepted letter was no more than an ingenious device on the part of one body of villagers to injure, if possible, a rival clan.

The alarm, if it may be so designated, has at least had the effect of showing the Chinese that we can be on the alert if necessary. Among the measures taken was a military (or rather naval) promenade inland by Commodore Jones, who landed with a body of blue jackets, and reconnoitred the suspected part of the coast for some five or six miles inland.

The navy has been very active of late, and the *Osprey* and *Opossum* have again started on a pirate hunt, information having been received of the appearance of a piratical fleet in the Straits of Hainan. A military mandarin accompanies the expedition. It is satisfactory to be able to note the conviction and sentence to death of one of the ringleaders in the shocking piracy and murder case of the *Lubra*, the captain of which (Howes) was shot in cold blood by the side of his wife. It is hoped that another of the gang may shortly be taken.

In my last I mentioned the disappearance of two brothers, natives of Hamburg, lately trading here as a commission firm. They effected their escape to Macao, but were given up by the Portuguese authorities and brought back to Hong Kong. Their affairs are now being investigated, and will not, it is said, show so bad a result as might have been expected. They absconded under ill-judged advice. The new Chief Justice, Mr. Smale, has taken his seat on the Bench. It is rumoured that Mr. Whyte, the present First Police Magistrate, a highly efficient officer, is about to resign his post for the purpose of resuming the functions of a barrister. This will entail sundry official changes. Two important cases have been before the Courts lately,—both connected with the kidnapping trade. In the one case a Russian vessel (in reality an American ship merely using Russian colours for the purpose), was found with 550 coolies on board, at anchor at the back of the island, and was brought into harbour by a gunboat. No explanation could be elicited as to her mysterious appearance in Hong Kong waters, after clearing only a few hours previously from Macao, and on investigation seven coolies were found on board who had actually been kidnapped away from Hong Kong, taken to Macao, and there embarked. The captain was prosecuted for false imprisonment, but the prosecution was eventually dropped by the Government out of courtesy to that of Macao, and the vessel was sent back thither for further inquiry.

The second case arose from the transactions of Mr. W. Lobscheid, the gentleman whose abandonment of the missionary profession for the more lucrative trade of coolie dealing has called forth much animadversion in the local press. As you will have learned by previous mails, some agents of this ex-reverend gentleman were found in the act of detaining certain women who had been decoyed from Canton under false pretences, preparatory to placing them on board the ship *Portland* for transportation to Dutch Guiana, and these men were prosecuted for false imprisonment at the opening of the present sessions. The Chief Justice, in sentencing them to one year's imprisonment, regretted that their employers had not appeared before him instead of themselves.

The attention of the Government has been drawn by these recent cases to the evils of the present loose system under which so-called "emigration" can be carried on in Hong Kong, and the energetic Sir R. MacDonnell will doubtless take steps towards remedying them. His Excellency increases in popularity in the colony in measure as the substantial wisdom of his actions in official matters is recognised · and even the opponents of his financial policy are becoming daily more reconciled to his administration.

In commercial matters there is nothing worthy of particular notice.

Quotations: Exchange on London, Bank, at 6 months' sight, 4s. 6¼d.; Credit, 4s. 7d. to 4s. 7¼d. Grey Shirtings, 8.4 lbs., 3.60 to 3.65.; do., 7 lbs., 3.35 to 3.40.

The following items are from the *Mercury*:—"The colonial Government, might, we think, avail themselves of the presence in the colony of Dr. Macgowan and his staff to lay down one or two short lines of telegraphic communication in this island. Government-house, the central police-station, head-quarter house and the naval yard might be united. A line from the signal station at the Peak to the harbour master's office has frequently been advocated. And if the coast and harbour ordnances become law, it will be found absolutely necessary to unite by a line of wire the harbour master's out-stations with the head office in Victoria and with the Water Police-station. Communication thus facilitated between station and station, a much smaller force would be found requisite at each.

"The enlargement of the reservoir at Pokfolum is now nearly completed. The bridge to the north of the Tiffin house may be said to form the northern boundary of the new reservoir, which is thus about four times the size of the old one. We may now hope to have a plentiful supply of the pure element winter and summer, instead of having, as of yore, an empty reservoir in the dry weather, and during the rains the prodigious waste of water that inevitably resulted from the smallness of the place constructed to retain it. The water that comes through the pipes at present is so very muddy as to be almost useless. So soon as the works at Pokfolum are finished, and the water in the reservoir has settled, all that in the tanks on the Bonham-road and in the pipes ought to be allowed to run off.

"A persecution on a small scale has been commenced against the Roman Catholic Christians on the opposite mainland. Three catechists residing with Father Volenteri, of the Italian Mission, in a small Christian village at the head of Mirs Bay, have been arrested and imprisoned by a party of fanatics from a neighbouring village, stirred into action by the gentry and literati. Father Volenteri, whose name was very favourably mentioned in an account published some short time ago in the

THE RUSSO-AMERICAN TELEGRAPH AND PROSPECTIVE RUSSIAN TELEGRAPH EXTENSIONS.

WE have from time to time recorded in a fragmentary manner the gradual progress made with this important undertaking, but now that it approaches completion it may be serviceable to recapitulate some of the details, and generally to review the entire scheme, as well as others which are in contemplation to follow it.

The line properly called the "Western Union Telegraph, Russian Extension," commences at Nicolaefsk, at the mouth of the River Amoor, Oriental Siberia, and terminates at New Westminster, British Columbia. The whole route has been surveyed and found practicable. The greatest difficulties are met with between Nicolaefsk and Okhotsk, where it is necessary in some instances to transport timber twenty or thirty miles across high mountain ranges. From the town of Okhotsk to Yamsk, in the Gulf of Ghijinsk, the line will run along the coast of the Sea of Okhotsk, keeping in some instances inside of the coast range of mountains. From Yamsk to Ghishigga (or Ghijigga) the line runs along the shore of the Gulf of Ghijinsk, which is also called Ghishigga Bay. Ghishigga has been selected by Lieut.-Col. Abasa, H.I.M.'s Chief of the Asiatic Division, as his headquarters and base of operations. From Ghishigga the line will extend to the Pengina River, following its course to the mountain range which divides the Pengina from the River Main, a tributary of the Anadyr, and thus along the River Anadyr to its mouth, whence a cable 200 miles long will be run across to Cape Shpauberg. From Cape Shpauberg a land line will be laid to Semavine Straits, whence a cable 180 miles in length will cross Behring's Straits to Grantly Harbour, in the Bay of Port Clarance, Russian America. Here the land line commences, and extends to the southern bend of the Kvickpack River, north of Michaelefski; on reaching the Kvickpack it follows up that stream to Lewis River, along whose banks it continues to its head waters. Crossing a dividing range of mountains to the River Streekeen, it follows that stream to its western bend, and then strikes through an open country along a chain of lakes in British Columbia, where the Frazer River takes its rise; after which it keeps the banks of that river to its mouth, and terminates at New Westminster.

Captain Mayhood and Lieutenant Bush, of the company's service, explored the route between Nicolaefsk and Okhotsk last winter. Between Okhotsk and Ghishigga the survey was made by Lieut.-Col. Abasa, Captain Kennons, who accompanied Col. Abasa in a land journey through Kamschatka, from Petropaulofski to Ghishigga, explored from the latter point to Anadyrskol, on the River Anadyr; Lieut. Macrae, who had been landed with an exploring party at the mouth of the Anadyr, made a circuitous journey in the country of the Tchuckchus to Anadyrskoi. In the meantime Captain Kennon continued his explorations to the mouth of the Anadyr, and returned to Anadyrskoi in time to meet Mr. Macrae.

There is no timber on the Anadyr; a strip or belt of larch trees, extending half a mile on either side of the River Main, yields suitable poles for telegraph purposes; a sufficient number have been cut and distributed ready for erection for a distance of 400 miles along the banks of the Main and the Anadyr. Contracts have been made and men are at work at the several principal points along the coast of the sea of Okhotsk, particularly at Penjina, Ghishigga, Yamsk, Okhotsk and Ayan, and a large body of workmen is expected to arrive from Yakutsk during the winter. One of the company's vessel's reached Ghishigga in July laden with material and carrying as passengers American employés. Two other vessels with material and between forty and fifty employés were daily expected at Ghishigga, and other vessels had sailed from San Francisco for Anadyr Bay, Michaelofski, and other points. Nearly a thousand miles of line is already completed in America, north of New Westminster, under the superintendence of Capt. Conway, and the work of construction is being rapidly forwarded.

Col. Bulkely and Lieut.-Col. Knox sailed from San Francisco in June last for the coast of Asia, in the company's steam-ship *Wright*. At Petropavlofski Col. Bulkely received the reports of the operations that had been carried on on this continent, and then made for Behring's Sea and Michaelofski, at which latter place he expected to meet Major Kennicott, who has charge of the explorations and construction in Russian-America, he having been left last year at the mouth of the river Kvichpick with an exploring party and a small screw-steamer to ascend that river, which it has been ascertained is navigable for a distance of 1,500 miles, a fact which will greatly facilitate the construction of the line. The cables for Behring's Sea and Anadyr Bay were shipped from England in Feb. last, and have probably ere this reached their respective destinations.

The fleet of the company consists of one ocean and four river steamers, one clipper-ship of 2,000 tons and five barques. This number of vessels will probably be increased during this winter. The United States Government has assigned a war-ship to the service of the company, and the Russian Government has placed H.I.M.'s corvette *Variag* at the disposition of the company during the present year.

Mr. Anosoff, on the staff of the Governor-General of Oriental Siberia, who had received a commission from H.I.M.'s Government to proceed to New York, the head-quarters of the company, returned *via* San Francisco, whence he was accompanied by Col. Bulkely to Petropavlofski; thence he started for Nicolaefsk by way of Ghishigga and Okhotsk with Col. Knox, who arrived here *en route* for St. Petersburg on the 2nd instant.

The Russian Telegraph in Oriental Siberia, passing from St. Petersburg to Kiachta, on the frontier of Mongolia and Siberia, was completed in 1865. From the town of Verkin Udinsk, about sixty miles to the east of Lake Baikal, the poles are erected, with the exception of a few breaks, as far as Stretijinsk, on the Amoor, the terminus of the steamers plying to and from Nicolaefsk, which is situated at the mouth of the Amoor. In the vicinity of all the villages within three hundred miles to the east of Stretijinsk poles are now being fixed—as well as at Blazoneychinsk, and contracts are being made at the villages beyond the last mentioned town. All the material for the line has been received at Nicolaefsk from Cronstadt, and a large part of it is already dissributed on the banks of the Amoor. Between Nicolaefsk and Khabarofka the line is already in working order; the latter town is situated at the junction of the Usuri and the Amoor; a branch runs off from Marinsk to De Castries Bay. The line from Khabarofka runs along the banks of the Usuri to Lake Hinka, whence it extends to the harbours of Vladivastok and Passiah, the most southern parts of the recently acquired Russian possessions in Mandjuria.

It is said that the whole system will be completed next year.

SAM MENDEL'S EXPORT TABLES.

The annual tables issued by Mr. Sam Mendel, detailing the quantity of cotton goods exported from the ports of London, Liverpool, Southampton, and the Clyde, during the twelve months ended 17th December, 1866, as compared with the exports in the same periods of the three previous years, have been published. The following figures are from the tables relating especially to the exports to the several countries in the Far East:—

HONG KONG AND WHAMPOA.—Of Plain Cottons the export for the twelve months ended 17th December, 1866, was 40,710,497 yards; for same period 1865, 35,079,084; same period 1864, 21,105,189; same period 1863, 12,741,894. Of Coloured Cottons the export during the twelve months of 1866, was 8,821,468; for 1865, 3,194,242; for 1864, 1,812,138; and for 1863, 2,028,412 yards. Of Printed Cottons the export for 1866 was 857,448; for 1865, 376,696; for 1864, 540,374; and for 1863, 1,186,842 yards. Of Cotton Yarn the twelve months exports for 1866, was 4,669,620; for 1865, 1,292,030; for 1864, 1,505,410; and for 1863, 2,640,531 lbs.

SHANGHAI.—During the twelve months the export of Plain Cottons was, for 1866, 120,515,754; for 1865, 74,755,375; for 1864, 38,694,425; and for 1863, 23,717,959 yards. Of Coloured Cottons the quantity for 1866 was 11,251,436; for 1865, 5,064,776; for 1864, 6,266,009; and for 1863, 6,927,911 yards. Of Printed Cottons the quantity exported during the twelve months of 1866 was 5,820,696; of 1865, 2,491,558; of 1864, 2,717,597; and of 1863, 1,547,867 yards. Of Cotton Yarn the export for 1866 was 70,800; for 1865, 99,000; for 1864, 135,249; and for 1863, 758 lbs.

JAPAN.—The returns are given only for 1866 and 1865. During the twelve months of 1866 the export of Plain Cottons was 23,460,228, and for 1865, 17,081,280 yards. Of Coloured Cottons the export for 1866 was 2,717,244; and for 1865, 1,410,285 yards. Of Printed Cottons the quantity was, for 1866, 2,381,721; and for 1865, 1,886,477 yards. Of Cotton Yarn the export for the twelve months of 1866 was 1,480,260; and of 1865, 537,300 lbs.

SINGAPORE.—The export of Plain Cottons for the twelve months of 1866 was 48,053,318; for 1865, 34,688,162; for 1864, 20,988,416; and for 1863, 19,602,892 yards. Of Coloured Cottons the export was, for 1866, 8,470,761; for 1865, 5,024,398; for 1864, 2,987,029; and for 1863, 4,351,307 yards. Of Printed Cottons the quantity was, for 1866, 4,438,580; for 1865, 2,151,728; for 1864, 2,031,043; and for 1863, 1,360,081 yards. Of Cotton Yarn the export for 1866 was 1,817,777; for 1865, 1,112,185; for 1864, 1,209,392; and for 1863, 1,819,110 lbs.

BATAVIA.—The export of Plain Cottons during the twelve months of 1866 was, 35,010,863; for 1865, 14,709,721; for 1864, 7,996,535; and for 1863, 7,544,084 yards. Of Coloured Cottons the export for 1866 was, 12,318,990; for 1865, 5,961,327; for 1864, 4,264,245; and for 1863, 3,750,688 yards. Of Printed Cottons the quantity for 1866 was, 11,276,978; for 1865, 7,546,064; for 1864, 7,221,988; and for 1863, 4,762,069 yards. Of Cotton Yarn the quantity was, for 1866, 744,416; for 1865,496,400; for 1864, 258,355; and for 1863, 672,805 lbs.

MANILA.—The export of Plain Cottons during the twelve months of 1866 was 12,078,512; for 1865, 13,352,943; for 1864, 8,245,292; and for 1863, 6,484,608 yards. Of Coloured Cottons the export was, for 1866, 14,626,518; for 1865, 14,104,391; for 1864, 10,410,504; and for 1863, 7,126,054 yards. Of Printed Cottons the quantity was, for 1866, 613,628; for 1865, 1,124,025; for 1864, 1,015,082; and for 1863, 306,496 yards. Of Cotton Yarn the export was, for 1866, 89,318; for 1865, 104,502; for 1864, 117,580; and for 1863, 42,250 lbs.

CEYLON.—The export during the twelve months of 1866 of Plain Cottons was 19,570,688; of 1865, 12,331,128,; of 1864, 9,100,926; and of 1863, 14,310,260 yards. Of Coloured Cottons the quantity for 1866 was 1,579,151; for 1865, 1,238,197; for 1864, 1,742,780; and for 1863, 1,379,972 yards. Of Printed Cottons the quantity was, for 1866, 4,463,935; for 1865, 2,182,525; for 1864, 3,418,370; and for 1863, 4,066,809 yards. Of Cotton Yarn the quantity was, for 1866, 812,922; for 1865, 302,090; and for 1864, 261,472; and for 1863, 691,116 lbs.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of November, and for the period of eleven months ended 30th November, 1866, have been published. The exports from the United Kingdom during the month of November amounted in value to £15,080,430; in the same month of 1865 their value was £15,567,742, and in November, 1864, £12,065,213. These figures show that the value of the exports in Nov., 1866, was £487,312 less than the value for the same month of 1865, and £3,015,217 above the value for the corresponding month of 1864. The value of the exports during the eleven months of 1866 ended 30th November shows a total of £173,913,222, against £150,832,344 for the same period of 1865, and £148,340,865 for the eleven months of 1864. The increase in value for 1866 over 1865 is thus shown to be £23,080,878, and over 1864, £25,572,357. Of the enumerated imports into the United Kingdom the returns are given up to the 31st October. Their total value for that month is as follows:—October, 1866, £19,530,442; October, 1865, £23,606,789; and October, 1864, £20,309,746, showing an increase in value for 1865 over 1866 of £4,076,347, and for 1864 over 1866 of £779,304. For the ten months ended 31st Oct., 1866, the value of the imports was £193,698,047, against £160,909,954 during

Digitized by Google

the corresponding period of 1865, and £181,283,856 in the ten months of 1864. Although the imports for October 1866 present a decrease in value as compared with those of the two preceding years, yet for the periods of ten months a steady increase is shown amounting to £12,414,191 for 1866 over 1864 and £33,388,093 for 1866 over 1865. The extent and value of the trade between the ports and countries in the Far East and those of the United Kingdom is shown in the following figures :—

EXPORTS TO CHINA AND HONG KONG.

	1864.	1865.	1866.
Quantity for the Month ended 30th Nov.

RULES.

1. The Association shall be called "The East India Association," to be supported by Annual Subscriptions and Voluntary Donations.

2. The Association shall be for the independent and disinterested advocacy and promotion by all legitimate means of the interests and welfare of India generally. As an Institution, the Association will, so soon as the funds permit, provide a Library and Reading Room, and will always afford Members of Parliament, and the Public generally, information and assistance on all Indian subjects within its power. As a Body, it will receive communications, direct or through its Local Committees, on all those questions of local or public interest which there are at present no adequate means of bringing to the notice of the Public or Legislature.

3. The Association shall not take any notice of complaints of individuals against the Governments in India or their Civil and Military Servants; unless a question of public importance be involved therein; nor will it undertake to act in any matters that can be decided by Law Courts, or by Appeal to the Judicial Committee of the Privy Council.

4. The Association shall consist of Resident and Non-Resident Members. Those residing in the United Kingdom shall be called Resident, and all others Non-Resident Members.

5. There shall be an Annual Meeting of the Association, to be held during the Session of Parliament, Ten Members to form a Quorum at all Meetings of the Association.

6. The President and Six Vice-Presidents of the Association shall be elected at the Annual General Meeting.

7. Special Sub-Committees of Members, selected on account of their knowledge of the subjects under reference, of whom Three shall form a quorum, shall be appointed at the Annual Meeting, to take into consideration all matters referred to the Association by the Local Committees and individuals.

8. At the Annual Meeting a General Managing Committee shall be appointed, of whom Four shall form a quorum, composed of a Chairman, Six Members, and the Chairman of each of the Special Committees, by whom a Secretary and Treasurer shall be appointed, and the entire affairs of the Association managed.

9. Local Committees shall be appointed in India by the General Managing Committee; and the co-operation of independent Local Associations in India is invited by the "East India Association."

10. After the 1st January, 1867, any person desirous of becoming a Member of the Association shall be proposed and seconded, and after Election by the Managing Committee shall be required to pay an Annual Subscription, in advance, on the 1st of January in each year, of One Sovereign or Ten Rupees. The payment of Ten Sovereigns or One hundred Rupees in lieu of Annual Subscription, shall constitute Life-Membership.

11. The Election of every Member shall be notified to him in writing by the Secretary, who shall transmit to him, at the same time, a copy of the Rules of the Association.

12. Subscriptions unpaid on the 1st May in each year involve cessation of Membership, subject to appeal to the General Managing Committee.

13. At the desire of Five Members of the General Managing Committee, or on the written requisition of Ten Members of the Association, the Secretary shall convene a Special Meeting of the Association.

14. The General Managing Committee shall have power to make and alter any bye-laws for the management of the Association.

15. No addition to or alteration in these Rules shall be made, except at the Annual Meeting of the Association.

Subscriptions and Donations can be paid at the LONDON AND WESTMINSTER BANK, St. James's-square, London; Messrs. GRINDLAY and Co., 55, Parliament-street, S.W.; Messrs. SMITH, ELDER, and Co., 45, Pall-mall, S.W.; and their Agents in India.

Gentlemen wishing to become Members of the Association are requested to communicate with the SECRETARY, at 3A, King-street, St. James's-square, S.W.

HOLLOWAY'S PILLS.—This medicine has resisted every test which time, prejudice, and vested interest could impose upon it, and it at length stands forth triumphant as the most reliable remedy for those derangements of the system so common at the change of seasons. When the air grows cooler and the functions of the skin are retarded, an occasional dose of Holloway's Pills will call on the liver and kidneys for greater activity, and compensate the system for diminished cutaneous action. As alteratives, aperients, and tonics, these Pills have no equals. To every aged and delicate person whose appetite is defective, digestion infirm, and tone of health low, this medicine will be a precious boon, conferring both ease and strength.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

SMITH'S PATENT DISINFECTING CLEANSING POWDER

FOR

SCRUBBING, WHITENING, & PURIFYING SHIPS' DECKS (SURPASSING HOLYSTONE), CLEANSING PAINT, FLOORS, CABINS, &c.

NO Soap or Soda required; is a preventive of fever and contagious diseases, and effectually destroys insects. In use by the Army and Navy (by special appointment), and all the Hospitals and Asylums in England, and forwarded to the Naval Stores abroad for the use of H.M.'s Ships. It is far superior to Soft Soap or any other article yet introduced. To be had in any sized packages.

Also SMITH'S PATENT DEODORISING POWDER, under distinguished Medical patronage, is the cheapest and most efficacious remedy in removing offensive smells and preventing disease. Is much cheaper and more effective than Chloride of Lime. Parish and other authorities are ordering its use for foul drains, streams, alleys, and houses.

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,
Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York; and 37, Gracechurch-street, London.

PRIZE MEDAL
SODA-WATER MACHINERY.

THE Book for 1863, containing twenty-eight leaves of Illustrations descriptive of all the Machines now in use, with advice before purchasing, to be obtained of any of the Agents of this Paper, price 6d., and through whom Orders can be sent.

Prize Medal 1862.

HARMONIUMS.

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

Prize Medal 1862.

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).
No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).
No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).

No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guinea
(Tinned Packing-case, and delivery at any home port, 45s. extra).
No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas
(Tinned Packing-case, and delivery at any home port, 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

Are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances. Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 28, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

THE CAPE, INDIA, AND CHINA AGENCY.

Office, 2, Cowper's-court, Cornhill (over the Jerusalem), London E.C.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.
The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE
is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE
is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE
EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE.
CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.
AGENT: Hong Kong, Mr. A. S. WATSON.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

The Greatest Luxury in a Hot Climate!

THE SHORTEST ROUTE TO AND FROM MANILA AND THE PHILIPPINES.

NOTICE to SHIPPERS and PASSENGERS by the OVERLAND ROUTE:—

The CHINA STEAM and LABUAN COAL COMPANY (Limited), in pursuance of an agreement entered into with the Government of Manila, have arranged to despatch the steamships "MONA" and "JAPAN," or other of their first-class steamers, with the mails and passengers monthly between Singapore and Manila, and Manila and Singapore, in correspondence with the Messageries Imperiales Over-and Route.

By a special permit all goods by these steamers from the 1st August, 1866, will be admitted into Manila at the reduced duty of 10½ per cent.

The Company's agents at Singapore will take charge of goods for transhipment. For further particulars apply at the Offices of the Company, Ethelburga-house, 70 and 71, Bishopsgate-street, London, E.C.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT.—From SOUTHAMPTON and MARSEILLES.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, China, and Japan (Yokohama), by their steamers leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month. The steamers leave Marseilles on the 5th, 12th, 20th and 28th of the Month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C., or Oriental-place, Southampton.

OVERLAND ROUTE VIA MARSEILLES.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

FRENCH MAIL STEAM PACKETS.

MESSINA, ALEXANDRIA, ADEN, POINT DE GALLE (Ceylon), PONDICHERRY MADRAS, CALCUTTA, SINGAPORE, BATAVIA, SAIGON HONG KONG, SHANGHAI, and JAPAN.

The 9th of every Month for—

MESSINA, ALEXANDRIA, ADEN, SEYCHELLES REUNION, MAURITIUS

For passage, freight, and information apply to B. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., Liverpool; at the offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to SMITH and Co., Rotterdam.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 5th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month.

For particulars of Freight, through passage rates, &c., &c., apply to H. STARK and Co., General European Agents, 145, Cheapside, London.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT. BRINDISI to ALEXANDRIA—Contract Passage, 82 hours

It is frequently done in 72 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 6 A.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions, 1st class, 275f.; 2nd class, 200f.; third class, 90f., and *vice versa*.

For further particulars apply to FLORENCE, via Montebello, 42; PARIS, Rue de L'Universite, 105; LONDON Messrs. PALMER, 44, Eastcheap, E.C.

OPENING OF THE NEW CHINA STEAM ROUTE FROM LIVERPOOL.

VIA THE ISTHMUS OF PANAMA AND SAN FRANCISCO.

THE WEST INDIA and PACIFIC STEAMSHIP COMPANY (Limited) have the pleasure to announce that they have concluded arrangements with the PACIFIC MAIL STEAMSHIP COMPANY for the conveyance, by the latter's new mail line of steamers, of Passengers, Goods, and Specie between LIVERPOOL, YOKOHAMA (Japan), HONG KONG, and SHANGHAI.

THE NEXT DEPARTURE WILL BE:—

From Liverpool	... 5th February.
Leaving San Francisco ...	... 3rd April.
Due at Yokohama ...	... 23rd April.
Due at Hong Kong ...	... 2nd May.

Making a connection at Yokohama to and from Shanghai.

The steamers will be despatched at regular intervals so soon as those building for the Pacific Mail Company, specially for the service, are ready.

RATES OF PASSAGE FROM LIVERPOOL.

To Yokohama	First Cabin, £110 10s.
To Hong Kong	„ £120 10s.
To Shanghai	„ £120 10s.

FREIGHT, FREE OF PRIMAGE.

Liverpool to Yokohama, Hong Kong, and Shanghai, £18 5s. per ton of 40 cubic feet.

The homeward rates of freight will be fixed by the Agent of the Pacific Mail Steamship Company at the above Ports.

ARTHUR B. FORWOOD, Managing Director.

OFFICES:—LIVERPOOL, The Temple, Dale-street LONDON, 117, Leadenhall-street; HAVRE, J. M. Currie.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world, Baggage collected and shipped, insurances effected, &c.

CALCUTTA, MADRAS, CEYLON, and ADEN—Overland, 4th and 20th of every month.

BOMBAY and ADEN—Overland, 12th and 27th.

CHINA, JAPAN, SINGAPORE, and EASTERN EAS—Overland, 4th and 20th.

AUSTRALIA, TASMANIA, and MAURITIUS—Overland, 20th.

NEW ZEALAND and AUSTRALIA via PANAMA, 2nd

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope, Clipper Ships, weekly.

Prospectuses, with through rate to a thousand places free on application.

INDIA, CHINA, AND JAPAN.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations:—

Destination.	Ships.	Class.	Dock.	To Sail
Shanghai ...	Vigil ...	AA 1	W.I.D.	With des.
Hong Kong ...	Burdwan ...	A1 14 yr.	W.I.D.	With des.
Kanagawa and Yokohama ...	Philomena ...	A1 14 yr.	W.I.D.	With des.
Nagasaki ...	Chanticleer .	A1 10 yr.	W.I.D.	With des.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

CHINA and JAPAN.—The following splendid first-class CLIPPER SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	Last Shipping Day.
Shanghai ...	Challenger	A1 12 yr.	E.I.D.	Jan. 10
Shanghai ...	Wild Deer	A1 14 yr.	E.I.D.	Feb. 1
Hong Kong & Whampoa ..	Pak Wan...	A1 14 yr.	E.I.D.	With des.
Kanagawa (Yokohama)	Anazi ...	A1 14 yr.	E.I.D.	With des.

For Freight or Passage apply to KILLICK, MARTIN and Co., 10, George-yard, Lombard-street, E.C.

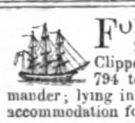
FROM LIVERPOOL.

Destination.	Ships.	Tons	Class.	To Sail.
Batavia & Singapore ...	Archos ...	449	A 1 10 yrs.	Jan. 15
Batavia and Sourabaya ...	Susan Eliza-beth ...	739	A 1 —	Imm.
Hong Kong & Whampoa ...	Everest ...	571	A1 13 yrs.	„
Calcutta ...	James Cross-field ...	—	—	„
Capetown ...	Logan ...	533	—	„

For terms of Freight or Passage apply to MCDIARMID, GREENSHIELDS, and Co., Liverpool.

FOR HONG KONG AND WHAMPOA, to sail, on the 20th Jan., the well-known clipper FALCON, A 1 thirteen years, 793 tons register, J. J. GUNN, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, AND MAXTON, 2, Royal Exchange-buildings, London E.C.



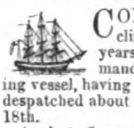
FOR SHANGHAI, to sail on the 23rd January, the celebrated Aberdeen Clipper STAR of CHINA, A 1 fourteen years, 794 tons register, JAMES HODGE, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Line of Packets for Japan.

FOR YOKOHAMA (KANAGAWA).—(In lieu of Finzel.)—Has three-fourths of her cargo engaged, and will have prompt despatch. Loading West Side Salthouse Dock.—The magnificent clipper barque, BARRACOUTA, T. GORDDARD, Commander; 610 tons, AA at Lloyd's, and twenty years in red in Liverpool Registry; only two years old; built at this port by Messrs. R. and J. Evans and Co., and has proved herself to be one of the fastest vessels belonging to the port, and as a conveyance for fine goods cannot be surpassed.

For Freight or Passage applying to Messrs. VINING, KILLEY, and Co.; or to E. C. FRIEND and Co.



COLOMBO Direct, the beautiful clipper ship RAVENSBOURNE, A 1 11 years, 440 tons register, J. COOPER, commander, West India Docks. This fast sailing vessel, having nearly all her cargo engaged, will be despatched about the 21st inst., last shipping day the 18th.

Apply to JOHN C. CAMPBELL, 22, or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, E.C.

With quick Despatch.

FOR CALCUTTA, the celebrated China clipper MELBREK, A 1, fourteen years, 870 tons register, JOHN TAGGART, Commander; lying in the London Docks. This ship has proved to be one of the fastest afloat, and is strongly recommended to shippers of fine goods.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Telegrams have been received from Shanghai (via Kiachta) to Dec. 1st, quoting exchange a shade higher; also tea. Telegrams via Galle of Dec. 8th and Hong Kong Dec. 15th are now overdue. A telegram turned up, dated Galle Dec. 17th, quoting Exchange at 5s. 10¼d., but was not credited. One telegram from Shanghai of 30th Nov. (via Kiachta) states that the news in reference to Messrs. Dent and Co. had been received from London, and a panic ensued.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O. steamer Nyanza, arrived Jan. 9.—From Galle: M. de Pevry, Mr. McBane, Mr. and Mrs. Daniell, child and two servants, Mr. Watson. From Singapore: Mr. Wilkinson, Mr. and Mrs. Davidson and child, Mr. C. H. Harrison. From Penang: Mr. Van der Meidan.

To Malta.—From Hong Kong: Mr. L. Fogo.

Per P. and O. steamer Delta, to Southampton, expected to arrive Jan. 17.—From Galle: Mr. McDowell, Mr. Jolley. From Singapore: Mr. Shaw, Mrs. Williams and two children, Capt. Luxton. From Penang: Capt. Macbeth. From Yokohama: Mr. West. From Shanghai: 9 Japanese Officers. From Hong Kong: Mr. White, Commander Doughty, Mr. Hogg, Mr. Cook, Mr. Easther, Capt. Cates, Mr. Boucher.

By last Bombay mail to Marseilles, per P. and O. steamer Tanjore, arrived Jan. 3.—From Hong Kong: Lieut. Foster. From Galle: Mr. Cairns.

From Hong Kong (via Bombay): Lieut. Foster.

Per French mail steamer Peluse, arrived at Marseilles, Jan. 5.—From Yokohama: Kiroe-Ymato-no-Kami, Japanese ambassador and suite, Messrs. Dell'Oro, Verneroni Brerva, Varcetisch, Begnotti, Danioli, La Perouse, Clinet, Dumarcet, De Rotrie, Pim. From Hong Kong: Messrs. D'Orbeta, Ojeda, Pela, Barbier, Nicolas, Pujolas, Bourgeois-Lertronniere, Martin, Bellomo, Zocolo, Hidalgo, Romano, Mr. and Mrs. Eme and child. From Saigon: Messrs. Dubois, Larrier, and Michael.

PASSENGERS OUTWARD.

Per P. and O. steamer China, from Southampton, Jan. 4.—To Yokohama: Mr. and Mrs. Jaquenot, Mrs. Dissez, and servant. To Ceylon: Mr. and Mrs. G. Vetch, Mr. and Miss Allen, Mr. L. P. Thomas, Miss Williaford, Mrs. Allen and child, Mr. L. Holland. To Hong Kong: Mr. Ridgway, Mr. Mahon, Mr. W. J. Hooper, R.N., Mr. and Mrs. J. Gibson and servant, Capt. J. C. Peters, and one second-class passenger. To Singapore: Miss Gale, Mr. G. T. and Mrs. Ricketts, and servant. To Calcutta: Mr. W. N. Campbell, Mrs. A. Stewart, Capt. and Mrs. May, Mr. E. Southwell, Mr. M. Chapman, Miss McGregor, Mrs. Close and child, Mr. W. Schlich, Mr. B. Ribbentrop, Rev. J. W. Adams, Miss Adams, Mr. Fleming, Rev. R. and Mrs. Winter and ayah, Mr. McNeil Miss Crofts, Capt. P. E. Hill, Mrs. Greme, Mr. Boulger, and one second-class passenger. To Madras: Major and Mrs. H. A. Hare, Mr. H. Adam, Major N. F. Hutton, Mrs. Fleming, child, and ayah, Mrs Hannan, Mr. Malthy.

From Marseilles, Jan. 12.—To Ceylon: Mr. & Mrs. Boustead, Mr. E. Byrde. To Hong Kong: Mr. Still, Mr. S. L. Prior, Mr. T. J. Gardner, Mr. J. B. Taylor, Mr. H. C. Low. To Calcutta: Sir. E. and Lady Leeds, Mr. P. Hordem, Mr. C. A. Kelly, Mr. Ridge, Mr. Adland, Mr. M'Gregor, Mr. and Mrs. J. Stalkhard, Mr. and Mrs. A. K. Reed, Mr. and Mrs. C. J. Cooke, Rev. and Mrs. J. Mathews, Lieutenant and Mr. Hopkinson, Colonel McMahon, Capt. Gardyne, Rev. D. F. Mazanchelli, Lieut. Blake, Major Dawson, Mr. Brancker, Mr. G. W. Martin. To Madras: Capt. Lidderdale, Major Rutherford, Capt. J. C. W. Bruce, Lieut.-Colonel and Mrs. C. P. Taylor, two children, and two servants, Lieut. F. W. Buller, Miss Harris, Mr. Gepp, Capt. J. P. and Mrs. Warlow, Mr. H. Trylor, Mr. H. Gale, Mr. T. Miller.

Per P. and O. steamer, from Marseilles, Jan. 20.—To Hong Kong, via Bombay: Mr. Hitchcock.

Per P. and O. steamer, from Southampton, Jan. 20.—To Ceylon: Lieutenant and Mrs. A. Hansard, Miss Adams, Mrs. Wormald, Ensign Perkins. To Singapore: Mr. W. H. Newman.

From Marseilles, Jan. 28.—To Shanghai: Dr. and Mrs. C. Powles. To Singapore: Sergeant-Major J. Rose. To Penang: Mr. de Munnick. To Ceylon: Mr. W. G. Inglis.

Per P. and O. steamer, from Southampton, Feb. 4.—To Singapore: Colonel Ord.

Per Lauderdale, to Shanghai, Mr. Robert Willis.

Summary of News from the Far East.

KOREA.

Were any further confirmation needed of our announcement of the repulse sustained by the French forces, its accuracy is now amply verified by the report of the Messageries Imperiales steamer *Dupleix*. This vessel spoke the steam corvette *Primauguet* and three other French war steamers off Woosung and they reported that "the expedition had sustained a severe repulse at the hands of the Koreans on its attacking Saoul, forty men having been killed and wounded on the side of the French. One gunboat got ashore in the river owing to the tremendous fall of the tide, which is stated at about forty-two feet; she was for some time left thirty feet out of water on a flat rock. Fortunately she was eventually got off. The French Admiral in the *Laplace*, and the remainder of the squadron consisting of the *Guerriere*, *Kinshan*, and others had gone to Yokohama." Here we have a distinct statement of the disastrous nature of the reverse, from the best possible authority—that of French officers engaged in the operations. The despatches received by the French Government from Admiral Roze do not, however, quite coincide with this account. The following is a summary of them—or of such portion of them as it has been deemed advisable to make public:—

"After the occupation of Kanghoa by the disembarking companies of the ships of the division, the Vice-admiral established himself in a strongly fortified position, taking care to have the environs of the city searched by detachments and exploring the opposite banks of the Corean peninsula, destroying all the junks that were found in the channel.

"In one of these explorations the shallop of *La Guerriers* at the moment of touching the coast was received almost at point-blank distance by a discharge of musketry, that killed three sailors. Our marines leapt ashore and dislodged the Coreans who had fired from the brushwood, and led on by First-class Naval Cadet Chatel, put them to flight after having killed some of their number.

"Vice-Admiral Roze wishing to ascertain the state of the country, a detachment, under the naval Captain Ollivier left Kanghoa, and encountered, some kilometres from the town, Coreans in large force entrenched in a fortified pagoda. The enemy made a sortie, but was repulsed, and hastened to return to his entrenchments, leaving his dead behind. After a very lively fire, in which we had no killed, but unfortunately some wounded, the column returned the same night to Kanghoa.

"Some days afterwards Vice-Admiral Roze, finding that the Corean Government did not follow up the overtures he had expected upon receiving a letter from the King, determined to leave Kanghoa. The approach of winter was already beginning to be felt, and fears were entertained that all navigation on the river Salée might soon be interrupted. He therefore ordered the destruction of all the Government establishments, with the King's palace, and our sailors returned on board the ships moored in front of the island of Boisee. The coffers, containing silver bars representing

Digitized by Google

the amount of 197,000 francs, with manuscripts and books that may be interesting to science, were sent to Shanghai, whence they will be forwarded to France.

"Vice-Admiral Roze also announces that he has been joined by the two missionaries who had remained in Korea, they having succeeded in getting on shore at Tche-fou.

"The destruction of Kanghoa, an important war position, and of the powder magazines and public establishments that town contained must have shown the Korean Government that the murder of the French missionaries was not to remain unpunished."

Such is the *Moniteur's* version, on which the *Liberte* has the following comments:—"To destroy Kanghoa, and carry away on leaving it 197,000 francs in silver ingots, with manuscripts and books, by way of punishing the murder of missionaries who knew when they went to Korea to what fate they exposed themselves, that is what we call making the French name respected! A few more distant expeditions like this, and we shall have taught the Chinese how to fight. What shall we do then? what could we do, a handful of men at that distance against three hundred and sixty millions of Chinese? Already their pirates dare to show themselves, and to attack European vessels. Let us leave the Chinese at peace in their own country, and let our missionaries be contented with preaching in ours."

The following is from the *Shanghai Recorder*. We cannot yet endorse the opinion deduced by the writer from the fact of the *Pelorus* having been intercepted to convey despatches: "The advices which have been received from Chefoo to the effect that H.B.M. Minister had issued instructions that the *Pelorus* should be intercepted on her way to this port would seem to point to the fact that Great Britain is likely to join with the United States in demanding satisfaction for the murder of the crew and passengers on board the *General Sherman*. As yet no definite information as to the course likely to be pursued has been revealed; but upon the arrival of the United States' flag ship *Hartford*, now daily expected from Japan, we presume some measures of a definite description will be decided upon. That a severe and summary reparation for the barbarous act which has been committed will have to be obtained, there can be very little doubt; and the circumstance that France is also engaged in demanding a similar recompense on account of the outrage upon the missionaries, points to the possibility of the warlike steps which will be taken resulting in the opening up of the country. Thus there seems no little likelihood that European Governments will be called upon to establish some relations with the Korea of a similar description to those which exist in China. As it is scarcely to be imagined that they will be content to remain without some guarantee for future security from outrage, the more especially as the immediate cause of the murder of the French missionaries appears to have been the enmity to foreigners which has been excited by Russian encroachments. The jealousy with which one European nation naturally regards any extension of power and territorial jurisdiction in the East on the part of another, must naturally tend to cause them all to demand admittance by fair means into countries where there seems a chance of any Power obtaining undue influence by underhanded encroachment; and should it prove true that Russia is pursuing a policy of annexation in the direction of the Korea, it can scarcely be imagined that other European Powers will stand by quietly and permit her by degrees to obtain possession of so powerful a position in those parts. Thus we may find ourselves in the present instance as in so many similar cases, compelled to force relations upon an unwilling people, and in the course of time Korea will in all probability stand in the same position as regards foreigners as China does at the present day. Whether as a place of trade, the same inducements to extend foreign intercourse with the country as is the case in China may be found, is a question upon which in our present state of knowledge of the place it is impossible to decide; but the importance of its position in regard to the North of China and also to Japan is such that the relations of all foreign Governments with Korea, must become a matter for serious consideration so soon as one European nation has gained a footing in the kingdom.

The following is the text of Admiral Roze's official notification of the blockade of the Seoul:—

Shanghai, October 31st, 1866.—I, the undersigned, Rear-Admiral Commander-in-Chief of the Naval Forces of H.M. the Emperor of the French in the Seas of China and Japan, being desirous of obtaining redress for the murder by the order of the Korean Government of a great number of French missionaries, and in virtue of the power vested in me as Commander-in-Chief,

Declare:—That on and after the 15th inst. the river Seoul and all its mouths shall be held in a state of effective blockade by the naval forces under my command.

All vessels attempting to break the blockade will be proceeded against in accordance with the provisions of International Law and of the Treaties in force with the neutral Powers.—On board the *Guerriere*, Cheefoo Harbour, Oct. 5, 1866.—(Signed) G. ROZE.

CHINA.

HANKOW.

On the 14th November (says the *Hankow Times*) Mons. Giquel paraded the men of the Chinese Contingent in front of their camp on the Woochang side, for the purpose of taking leave of the corps previous to his embarkation for Shanghai *en route* for Europe. The entire force, comprising some six hundred men, were present, and we were much interested by the very creditable manner in which they performed the few manœuvres through which they were put by their colonel, Mons. de Marbin, in honour of the occasion. Considering the short time under which the men have been in training, and the fact that every one of them commenced as a raw recruit, it was wonderful to see how readily and accurately they obeyed the words of command—always given in French—and how well they moved in unison, both in manœuvring and the handling of their arms. In one point alone they failed sadly, and that was in the keeping of step. Do what they would their officers seemed utterly powerless to bring their "left" "right," "left" "right" to fall together, and the consequence was confusion, which materially interfered at times with the proper working of the corps. They look upon "step" at present as an objectless piece of absurdity, peculiar to the foreigner, and not worthy of Chinese imitation as compared to the expenditure of powder and the prod with the bayonet. Skirmishing the men appeared to enter into with great glee, scampering into their allotted places, firing their pieces, and retiring, as if they really enjoyed the fun. After the parade was over, just about sunset, Mons. Giquel called the officers together and made them a farewell speech, complimenting them on the cordial co-operation which he had always received from them in the prosecution of his difficult task, and encouraging them to further exertions in the future pending his own return from Europe. The Chinese officers were then invited to come forward, and were addressed in Chinese, much to their satisfaction, if we might be allowed to judge by the hearty chin-chins which the oration elicited from their uplifted hands, still, we observe, deep in the sleeves of their jackets. At this juncture the Mandarin suggested a volley. The commandant begged to be excused. "You must," returned No. 1; and forthwith some one was despatched to fetch the ammunition. It was amusing to see the entire contingent brightened up at the prospect of a little noise, and it spoke volumes for their readiness to go into powder with ball on the right side of it if necessary. Mons. Giquel, we are informed, has left the Customs to be commander of a naval brigade he has been commissioned to organise under the orders of the Viceroy at Foo-chow-Foo. He is a gentleman gifted with a most liberal mind, and an intimate acquaintance with the Chinese and their language; and in whatever capacity he may serve the Imperial Government we feel assured that, whilst paying due regard to the obligations he may owe to the Government which he is serving, he will at the same time take care to promote the interests not only of his own beloved France, but of Western nations in general.

When the settlement of Hankow was threatened by the Nienfei at the beginning of last year, application was made to the Commander-in-Chief for the use of two field pieces wherewith to protect the settlement, and much indignation is expressed at the long delay in replying to this request. The *Hankow Times* says:—"It will be remembered by most of our readers that on the morning of Sunday, the 21st January last, it became known that Hankow was threatened by a large body of revolted Chinese soldiers; and that the Nienfei, taking advantage of the confusion which would inevitably ensue when this was discovered, were advancing on the city in considerable force. This startling intelligence received further confirmation on the following day. There was no British gunboat in port at the time, and but one small French war steamer. The foreign residents, therefore, being left in a great measure to their own resources, considered it necessary to adopt some means to protect themselves. Accordingly, on Tuesday, the 23rd, a large and influential public meeting was held, to take into consideration the best means of defending the settlement. Among other measures adopted on that occasion, a resolution was passed that, with a view to the better and more systematic protection of the settlement in case

Digitized by Google

of danger, application should be made to the Commander-in-Chief for the use of two light field pieces. It had been previously ascertained that there were men in the community who were able and willing to work the guns if they could be procured. The advantages of such a measure were obvious. The Chinese have a most wholesome dread of artillery, and the class of gun asked for was particularly well adapted for the work it would be required to perform. A six-pound gun could be easily and rapidly transported by four or even two Hankow ponies, and these are always obtainable on the shortest notice. The ground on the concession and its neighbourhood offers few obstacles to artillery manœuvres, and there is probably no port in China where field-pieces could be used with better effect. Considering that the residents here undertook to provid men and horses and to pay for such ammunition as might be expended, the request for a couple of guns does not appear unreasonable. At all events there is nothing positively absurd or unusual in the idea of a number of British merchants trying to defend their lives and property, and nothing savouring of presumption in their appealing to the only source from which their wants could be legitimately supplied. In the simplicity of their hearts people imagined that an answer to their application might come by the return steamer. Merchants have a vulgar habit of being prompt and business-like; and had the request gone to a merchant instead of to one of those wonderful jossess who preside over and control the destinies of Britons abroad, an affirmative or negative reply would have arrived immediately, and the matter would have been at an end. But some of our governing officials manage these things differently. There is no indecent haste in making their intentions known, and it must not excite surprise that it has taken nine and-a-half months to convey the intelligence contained in the notification that the application for guns 'has been met by a decided refusal.' Our suspense is at an end. We have been 'put out of pain.' But, knowing the worst, our spirits rise with the occasion, and we trust they will shortly regain their wonted elasticity. Nearly a year has been lost by this delay. In the interval which has elapsed between the forwarding of the application and receiving a final answer to it, guns might have been procured from England *via* the Cape."

SHANGHAI.

The P. and O. mail of Sept. 26 arrived out on the 13th Nov. Telegraphic news to 23rd Oct. had been received. The latest dates are to the 27th Oct. per extra French steamer *Labourdonnais*.

The *North China Herald* has the following remarks on the extent to which smoking is carried on in Shanghai:—"If the Royal author of 'The Counterblast to Tobacco' could by some magic revisit the glimpses of the moon and wake up in Shanghai, he would in all probability hurry back as soon as possible to the 'World of Spirits.' For, everywhere, he would see the sparkling gleam and sniff the detested scent of the weed that he so abominated in the days of his flesh. It is doubtful whether any community (except that of Hamburg) smokes more than the Model Settlement. Cheroots are here necessaries of life. They are in everybody's mouth. The whole population are, in this respect, worthy followers of the late Rev. Robert Hall, of whom it was asserted that he was always, during his waking hours, 'smoking or preparing to smoke.' We are not, like Bobadil, content with 'a pipe of tobacco to close the orifice of the stomach;' but we smoke after every meal, frequently early in the morning, and generally far into the night. There are of course amongst us some non-smokers, but these are a conspicuous minority; and if we allow the moderate number of four cheroots *per diem* to each man in the settlement, we shall come to the conclusion that, on the average, eight thousand cigars a day or two millions nine hundred and twenty thousand cigars a year are smoked in Shanghai. This enormous consumption of tobacco cannot fail to affect the character and health of the community, and smoking assumes the dignified position of an institution, the importance of which only escapes our attention because we are so accustomed to it."

The sale of property noticed in our last, belonging to the estate of Messrs. Jarvie, Thurburn, and Co., was, we understand, partly resold at a profit of five thousand taels, and that the present holders, Messrs. Bower, Hanbury, and Co., had overtures made for it at somewhat its old value. There is a fine opportunity now for investing here, for the recovery in the value of property, ultimately, can scarcely be doubted. The position of Shanghai must always secure for it the chief seat of the China trade.

The ports of Newchwang and Chefoo, in the extreme north of China, appear to be gaining in importance. At Newchwang during one month the arrivals have been fourteen vessels, while fifty vessels have sailed. At Cheefoo the arrivals and departures have numbered forty-five vessels.

A rumour of a strange description has been current among the Chinese with respect to the case brought by the owners of the steamer *Williamette* against the *Plymouth Rock*, the decision in which we published in our last. It is asserted that the Taoutai intended or intends to squeeze the Chinese shareholders in the Shanghai Steam Navigation Company out of an amount to cover the loss sustained by the steamer *Williamette*. We are disposed to place little credence upon the rumour, as it is scarcely probable that were such an intention really entertained, the fact would have been allowed to leak out; while on the other hand, there is every likelihood of the idea having originated among the native shareholders themselves, who knowing the practice of their authorities under ordinary circumstances, may have expressed their fears that such would be resorted to in the present instance. For a long time rumours of a similar description have been current. One was to the effect that, should a decision be given adverse to the Chinese Government as owners of the *Williamette*, natives would be employed to burn the whole of the steamers on the river. It has been seriously believed in some quarters that such a plan might be resorted to; but we have heard so many idle rumours of the same kind that we can only regard them as the emanations of an excited imagination. It is quite possible that the Chinese authorities might be desirous to instigate such an action, but highly improbable that they would have the temerity to put their wishes into execution.

A case between C. Thorne and Hogg Bros. with regard to the right of way down Maiden-lane was brought forward at the Supreme Court before Mr. Goodwin; but in consequence of the absence of Mr. James Hogg, who Mr. Myburgh, the counsel for the defence, stated was an important witness in the case, it was postponed. Mr. Lawrance, the counsel for the plaintiff, urged the damage which delay did to his client's interests, and complained that it was anomalous that Mr. Edward Hogg should be able to knock down the walls built by the plaintiff by virtue of instructions received from his brother; but that at the same time the case could not be settled on account of his brother's absence. He begged to inquire of the Court whether there would be any objection against his client's rebuilding the wall, and was informed, in reply, that pending the postponement of the case, the Court could not prevent his building the wall, but could also not interfere with Messrs. Hogg's right of way, provided that in preserving it no breach of the peace were committed. Mr. Myburgh guaranteed the orderly conduct of his client; and either the scheme of building the wall will have to be abandoned by Mr. Thorne's representatives pending the return of Mr. Hogg, or the portion built one day will continued to be kicked down the next, as heretofore.

The *Simoda*, a British vessel, 650 tons register, and ready for sea, was sold at auction and fetched only 2,450 taels, while the *Euxine*, 398 tons register, only realised 1,300 taels on being similarly disposed of.

An unfortunate catastrophe occurred on board the *Peter Denny*, on the 11th of November, while on her passage from London to this port. It appears that the Rev. David Mason being on the forecastle of the ship with some other passengers, in the heavy weather which she experienced during the latter part of her passage, was washed overboard, and sank immediately. From the high sea running at the time, and from there being no signs of the unfortunate gentleman after he was seen to sink, the lifeboat was not lowered.

HONG KONG.

The P. and O. mail of the 10th Oct. arrived out on the 22nd Nov. The French mail of 17th Oct., which arrived and left Singapore on 22nd Nov., had not arrived when the present mail left on the 1st Dec. The telegraphic advices from London reached up to the 27th Oct.

On the rumoured establishment of a Chinese arsenal at Foochow, the *Overland Trade Report* has the following:—"The most interesting intelligence which has come down from the north by the mail, points to the establishment of a Chinese dockyard at Foochow. Nothing very definite is stated, but there are rumours to that effect, which add that M. Giquel and

Digitized by Google

another French gentleman were to be engaged by the Government to render their assistance in carrying out the undertaking. The Chinese General Tseng-kwo-fan and Governor Li of the Two Kiang, were supposed to have concocted this plan between them. There would probably be little reason for European residents in China to feel jealous of the undertaking were it really to be set on foot. An improved capacity to deal with pirates would naturally ensue from the possession by the Chinese of a dockyard and gunboats built on a European model, and there would be little reason to distrust any increase in their strength as possible antagonists in the future, which might arise simultaneously."

On the scheme of the American telegraph is the following:—"A gentleman is now in the colony of Hong Kong who has come here as the agent and pioneer of an American company formed for the purpose of introducing electric telegraphs to China. It is not a little surprising that a company should have been formed anywhere but amongst the European residents of China themselves for this purpose. Certain considerations might lead to the conclusion that one or two lines entirely devoted to serving the European and American trade at Hong Kong and the various open ports might pay, but it seems in the wildest degree improbable that the Chinese themselves would prove to any profitable extent supporters of so startling an innovation as an electric telegraph in the heart of China. The company was formed, it seems, some two years ago, without any more definite plan of operations before it than that of extending the advantages of electric telegraphy to China generally, in any way which might be found feasible. Strange to say the company not only floated, but shares were *bona fide* taken up, deposits paid, and the directors placed in command of money. What to do next under these circumstances seems to have been a hopelessly puzzling question, and for two years the company slumbered, but at last, only a few months ago, the manager fell in with a medical gentleman, Dr. Macgowan, then arranging to come out to China, and suited from his great familiarity with the language and the interior to ventilate the underdertaking. He was at once entrusted with powers, apparently of a somewhat vague and unlimited extent, and has now arrived in Hong Kong, expecting a consignment of assistants, wire, and needful instruments by an early ship but rather in the dark as to where to send them when they arrive. He is said to be meditating an application through the American Minister at Peking to the Chinese Government for permission to construct an experimental line from Hong Kong to Canton, and he is described as nourishing a project for the ultimate union by an electric telegraph of Canton and Peking. While it is not unreasonable to suppose that a sub-marine telegraph cable between Hong Kong, Foochow and Shanghai, which should be out of the control of the Chinese Government, and subservient to the wants of a large civilised commerce would pay its constructors, it is difficult to see how any business whatever, for a purely Chinese line, can possibly arise.

Some changes are about to be made in the arrangements at the Hong Kong magistracy. Mr. Whyte has resigned, to take up private practice at the bar, and merely remains on the bench till a substitute can be found. Mr. Cecil Smith, in view of the inauguration of the new Registration Ordinance, returns to his legitimate functions as Registrar-General. Mr. Mitchell, the Postmaster-General, is to act at the Police Court for the present, and until Mr. May returns it is intended to appoint some other gentleman in the Government service to act as his colleague, so as to leave Mr. Whyte at liberty to retire at the end of the year.

From Nagasaki we have some news of Admiral King's movements. He arrived at that port in the *Adventure* on the 3rd November, and he was to leave again in the same vessel on the 7th for Yokohama, via Simonoseki. The *Argus*, it is stated, will convey him from the last named place, there being no longer any need of a vessel there in consequence of the convention concluded between Choshu and the Shiogoon. The gunboat *Bustard* had arrived at Nagasaki, *via* the Inland Sea; she had to coal at Hiogo, but found some difficulty in doing so in consequence of the obstructiveness of Japanese officials. H.B.M. gunboat *Serpent*, was surveying the Inland Sea at the time the *Bustard* passed, and will be so engaged for some time. The *Bustard* will proceed to Shanghai, it is said, for the purpose of going on to relieve the *Hardy* at Ningpo.

In our issue of the 27th of December we noticed the decision of the Supreme Court in the case of the Hong Kong Hotel Company *versus* Douglas Lapraik. It appears that during Mr Lapraik's absence in England his nephew, who held his power of attorney, subscribed to a certain number of shares in the proposed company. On the arrival of Mr. Lapraik at Hong Kong he refused to pay the amount so subscribed, and allowed himself to be sued for the amount. This course was pursued not for the purpose of disputing his nephew's act or power, but it was done *pro bono publico* in consequence of information Mr. Lapraik obtained as to the manner in which the company was "got up." Had the buildings alleged to be bought of Messrs. Dent and Co. been really a *bona fide* purchase by the promoter of the company, there would have been no dispute, but it appears that they were bought at one price and sold to the company at an enormous advance; in fact it was an attempt to introduce the system so disastrously practised in London of late, of establishing companies for the benefit of one or two persons styled solicitors, promoters, &c. Anything worse than the introduction of this system in a small community like Hong Kong could not be, and it was simply to counteract this that Mr. Lapraik allowed the case to go to court. The decision of Mr. Smale, the Chief Justice, would we think not hold good if appealed against in a Court of Equity.

In our issue of the 27th December we commented on the Chinese petition presented to Governor MacDonnell. We now give a memo issued by Sir Richard, which certainly looks like meeting any reasonable grievance the Chinese can bring, but it is equally clear that he is to be Governor and not the inhabitants.

I have inquired according to my promise into the statement of certain Chinese residents in their memorial of the 2nd instant, as to the inconvenience and possible extortion in Chinese ports so which the carriage of large painted numbers on licensed vessels might give rise. The whole subject has at my desire been carefully considered by the Chinese authorities who are anxious to aid the legislation undertaken by this colony for suppressing piracy—an object which the British and Imperial Governments have equally at heart.

I have much pleasure therefore in now stating that I have just received information officially that the highest Chinese authorities in the neighbouring provinces do not consider the objections of memorialists to be well founded, but that, nevertheless, as a proof of goodwill and of their anxiety to promote the views of this Government, circular orders have been issued to all authorities at the Chinese coast harbours to prevent attempts at extortion, or molestation of vessels having Hong Kong licences.

If any Chinese Regulation requires a vessel to carry Nos. denoting Registry in a Chinese port according to an old law, the renewal of which is contemplated with a view to assimilating the laws of Hong Kong and China in all that regards the coasting trade, there nevertheless need be no apprehension of embarrassment arising from the two sets of figures. On the contrary, a vessel carrying both will enjoy a double security.

I take this opportunity of making an explanation to those memorialists who have quite recently expressed their hope that I would not enforce all restrictions of the ordinance on the passenger and provision boats that make frequent visits to Hong Kong, and which restrictions they state "have been regarded even by the local journals as likely to cause disproportionate expense and inconvenience."

I am not responsible for explanations or views by others of the intended action of this Government. Yet though those strictures may be either erroneous or incomplete, Chinese residents must have been gratified by observing the tendency of such remarks to uphold, as far as possible, the freedom of their coasting trade from all but the most necessary restrictions, and so far they anticipate the wishes of this Government.

It will suffice, however, to state that there never was an intention to subject ordinary passenger and provision junks to the inconvenience and expense of procuring the numerous passes, notices, and clearances required of other vessels.

The "Special Permit" mentioned in clause 16 of the Ordinance is intended to meet such cases,—and a licence of the first or second class—at a lower rate—according to tonnage—will be granted to every boat of that description which finds moderate security for good conduct and observance of the law. At the foot of such licence it is intended to add a special permit dispensing until further notice with the observance of some or all those restrictions, as the case may be, which are only meant to apply when the vessels are less known. All such licences and special permits will of course be liable to forfeiture for misconduct, and violation of the law—but, otherwise, it will probably be found by experience that such vessels will practically suffer no greater inconvenience than at present.

Whatever may be necessary to effect the leading object of the Ordinance, in tracing the conduct and pursuits of every vessel that visits the port, *will be inflexibly carried out.* It is however not intended and would be most unwise to harass with needless restrictions vessels already well-known and not suspected.

We extract the following from the report of the China Traders' Insurance Company (Limited) which will be found more at length in our advertising columns:—

"The company was registered under the Company's Ordinance of 1865, on the 12th Oct., 1865, its shares being all taken, and the first call of $1,000 per share fully paid up. The amount of premiums collected in Hong Kong and China, from the 1st of November, 1865, to the 21st of October, 1866, and the amount collected at the foreign agencies within that period, of which

Digitized by Google

the general agents have received advice, after deducting all sums paid as bonus and commissions, and adding interest, amounts to $271,282.13. This result must be gratifying to the shareholders as it proves that the expectations upon which the company was founded were well grounded. The losses which have been paid by the company amount to $81,488.02, and there are further claims not yet settled to the amount of $41,712.98 (the latter may however be considerably reduced). The committee have been fortunate in securing the services of Mr. W. Kaye and Mr. A. Sassoon, as auditors for the year, who have examined the accounts which the committee have now the pleasure to submit for the consideration of the shareholders.

"The committee, upon the assumption that the shareholders will adopt this as the rule of appropriation of risks in the company, recommend that the sum of $118,000 be declared available for distribution as profits of the company for the year. The apportionment of this sum, if appropriated as being so distributable, will, under the 132nd clause of the articles of association be as follows:—the sum of $29,500, to be carried to the reserve fund and invested by the committee:—the sum of $29,000, to be divided *pro rata* among contributing shareholders, and the sum of $59,000, or $295 per share to be paid to shareholders as general dividend."

The following are the returns of average amounts of notes in circulation, and specie in reserve at the undermentioned banks respectively, for the month ending October 31:—

	Notes.	Specie.
Oriental	$224,000	$200,000
Chartered Mercantile	253,715	150,000
Chartered of India	29,100	29,100
Hong Kong and Shanghai	650,334	350,000

The barque *Avon*, a British vessel bought and placed under the Russian flag for the conveyance of coolies to Havana, was seized, and the captain brought before the magistrate on the charge of kidnapping coolies, or rather, we suppose, conveying them against their will. The case was referred to the authorities at Macao where the vessel loaded. As a guarantee that justice will be done the Russian Consul has proceeded to Macao, and the new action will probably take the form of a prosecution on the part of the owners and captain of the vessel, against the charterers who have thus violated the charter party under which the ship was engaged for her voyage.

On the return passage of the *Avon* to Macao, under circumstances noticed in our last, eight of the unfortunate coolies jumped overboard and were drowned. Three or four of the bodies were drawn under the wheels of the steamer accompanying the *Avon*, and were fearfully smashed. The coolie trade has been rather fruitful this year in sensational incidents, but this last would have been spared, perhaps, had the coolies known that an opportunity for release, without death, was before them.

The action for libel brought by the Rev. Mr. Lobscheid against the *Evening Mail* has been heard before the magistrate, but judgment was deferred until 3rd December.

COCHIN CHINA.

We regret to record that a sad accident has happened in Saigon roads, Cape St. James. Captain Bowman, of the British ship *Union*, with the captain of the *Stirlingshire*, and eight of the crew of the *Union* were returning to their ship, when the boat was suddenly struck by a squall, and instantly upset. Fortunately the boat of the *Oleander* was close by, and her captain having seen the accident ordered his men to pull to the spot to render assistance. They succeeded in saving Captain Bowman and six of the crew, but sad to say the captain of the *Stirlingshire* and the rest of the crew were drowned.

SIAM.

BANGKOK.

We have news from this port to the 27th November. The *Bangkok Recorder* gives the following items:—

A birthday dinner party had been given by the King of Siam to the Consuls, and Roman Catholic Bishop, but had well nigh become an utter failure, not for the want of attendance on the part of the guests, but from want of what was thought due attention on the part of the King; and but for extraordinary efforts which his Majesty afterwards made to recall the dispersing Consuls he would scarcely have had any but the French to represent the Western Powers. We hear also that the second day dinner party of Europeans and Americans was sadly slim both in going and returning, and that only one American attended it. The truth is his Majesty's peculiar ideas of *Absolutism* and *Imperialism* are not at all popular with the large majority of his Western friends residing at his capital.

His Majesty left Bangkok on the 25th October for a trip up the river to the ancient city and province of Pitsanuloke, and was expected to return on the 2nd November. This city was one of the early capitals of Siam, and there are many historical reminiscences connected with it. The river at this season of the year is full to overflowing, and the tour was made in steamers. No King of Siam has visited this city, so far as we can learn, for a hundred years or so, and it must be quite an event for the people to see their Sovereign in those regions. For this royal visit they are indebted to the introduction of steam, which has already wrought wonders in Siam as well as in other countries. The first steamer built in Siam was launched on the 25th September, 1855, and was built by his Excellency the Prime Minister, with the assistance of J. H. Chandler, Esq., who has the honour of introducing steamboats and steam machinery into the country.

One of his Siamese Majesty's gunboats sailed on the 31st Oct. for Cochin-China to take home two Cochin-Chinese subjects, who had several months since been taken from a wreck of a Cochin-Chinese vessel near P'ooteinat. This vessel was bringing homeward several Siamese subjects who had escaped from a wreck at Hainan last year. P'ooteinat is a Siamese port, if we mistake not, on the eastern coast of the gulf not far from Campoot. It is gratifying to see Siam and Cochin-China, so long the bitterest enemies, now seeking to please each other.

We are very glad to learn that the Siamese Government have at length employed a gentleman of Dutch nationality born in Java, but educated in Europe, to serve them as civil engineer. He arrived from Singapore on the 27th Oct. with two assistants as passengers on board the Siamese barque *Hera*, Captain Buckhold. It appears that the Government has especially in view by his services a survey of the River Mekong, independent of course of the survey which the French have undertaken, but no further, probably, than where the river is in Siamese territory. We wish the Government every success in this noble enterprise.

We learn that the Siamese Government are introducing a quantity of improved rifles for their army.

The following advertisement lately appeared in the *Recorder*. There is something peculiarly Chinese in an injured husband consoling himself for his dishonour by proclaiming it in a public advertisement:—

"NOTICE.—This is to inform the public that during my absence in China on business, about seven months, in the fore part of the present year, my wife, Nang In, called by me Jennie, was enticed, through the influence of Me Lai, wife of Arnal Duclos, to leave my house, taking with her jewels, necklaces, finger rings, &c., valued at 900 dollars, all belonging to me, and went to live as the wife of Mr. Fisher, an Englishman, employed as foreman in the printing-office of the King of Siam. I am myself a British subject, born and educated at Penang.—CHONG LEONG, Chinese Baker."

This curious accusation was speedily followed by the appended disclaimer on the part of the rival baker:—

"NOTICE.—This is to inform the public that the notice which appeared in the *Bangkok Recorder*, of the 10th and 18th October, stating that "Nang In" called by Chong Leong,—"Jennie, was by the influence of my wife Me Lai enticed from his house;"—was nothing less than calumny, and for which false statement I sued Chong Leong, the author of the said notice, for $200 (dollars) damages. On the 29th October the case came on for trial before Her Britannic Majesty's Consul, and after the case had been clearly proved the Consul gave judgment for $100 (dollars) damages, together with permission to insert a notice contradicting the one inserted by Chong Leong, the Chinese baker, established on the New-street, Charon Kroong.—ARNAL DUCLOS, French baker."

MALACCA STRAITS.

SINGAPORE.

From this port dates are to the 8th December. The English mail of 26th October reached Singapore on the 2nd December. The following summary is from the *Straits Times*:—

Little of public interest has occurred since our last, except the publishing in the *Government Gazette* of an Act of the Supreme Government which has been talked about since 1861, extending the jurisdiction of the Court of Requests from $32 to $50, nominally to take effect from the passing of the Act, but we have not heard when the alteration will really be made. The fate of the Kassang Territory is, as far as we have heard, still unsettled. The late typhoons in the China Sea have sent about twenty vessels into our port, more or less disabled, which has caused an unwonted degree of activity amongst those whose business enables them to profit by these misfortunes. The Agri-Horticultural Society have published their report, which

Digitized by Google

shows a favourable result. The Amateurs, (Corps Dramatique) gave their promised performance at the Town Hall on the 4th instant. which was well attended, and taken all in all, may be considered a success.

The following items are from the *Singapore Free Press* :—

At eight o'clock on the night of the 22nd Nov. a fire broke out in the Arsenal of Pearl's-hill. It began in one of the smith's shops from some live coals that had by some extraordinary means got into the bellows, which thus took fire. It soon spread to the roof; but fortunately was quickly extinguished by the prompt measures taken by the officers belonging to the arsenal, who live close at hand. Inspector Cox and Deputy Inspector Moore, on receiving news of the fire came to the spot, but on arriving they found that the fire had been entirely extinguished.

We believe that the steamer *Chedtuba*, brought news from the Governor-General of India in Council to the Straits Government. that the Settlements would pass from under the Indian rule to that of the Colonial on the 1st January, 1867. We may therefore expect shortly to see a Legislative Council formed, for the purpose of making laws for the new-made colony, and we hope that things of minor importance will not be overlooked by the Council when assembled for business. Although we hear that the Indian penal code is to come into force in the Settlements at the beginning of the New Year, yet there are a great many additions required to be made to it, which will be applicable to this place. No doubt this code will be a basis for our legislators to be guided by, but still we trust that they will examine it with great discrimination, and those laws which are not requisite, nor fit for Singapore, reject and at once discard. We would suggest that the Indian Code should be taken more as a guide to the framing of the laws for the new colony, and that the Council should abstract from it those which they think essential for the government of the place. If there is anything wanting they will be able according to the authority invested in them to supply the deficiency. It would be better also to change the title from that of Indian Code, to any other appellation which they may seem fit to call it.

The *Straits Times* has the following on the late shipping disasters in the China Sea and their effect on the various dock companies of Singapore :—"The late typhoons in the China Sea have caused more than the usual amount of destruction to property. No less than seventeen or eighteen vessels have put into Singapore alone, more or less seriously injured. One of these. an American vessel, is to be sold for the benefit of the concerned, but all the others are repairing, causing an unusual amount of activity at the docks and among the ship carpenters. Had the time been selected, none better could have been chosen for opening the Bon Accord Dock at Pulo Brani; for not only has the Patent Slip and Dock Company full employment for some time to come, but the new dock has also as much work as can be attended to. Even the shareholders of the long constructing Tanjong Paggar Dock are beginning to get some of the good things, for, although the dock will not be ready till the next year at soonest, they have their fair share of such repairs as can be effected afloat, and their wharves are sufficiently advanced to accommodate several vessels alongside. The second dock of the Patent Slip and Dock Company is progressing fast, and will doubtless be finished before that of Tanjong Paggar. When the latter is completed, there will be four docks in Singapore, whereas until last month there was but one, but we expect there will be work for all. Increase of accommodation, and the reduced prices attendant on competition, will bring more business to the port and benefit everybody connected with the place. Two years ago, for instance, we had no tug steamer, while now we have two and a steam water boat also employed in towing, all finding a fair amount of employment, as well as another tug boat building, so that in fact while everyone is complaining of bad times, the prosperity of Singapore is steadily increasing."

Mr. Pollard, the Hong Kong barrister, was expected in Singapore, he having taken a heavy retainer from the prosecutors in the alleged barratry case of the *Erin*, to be re-tried at the next sessions.

The British steamer *Achilles*, Captain Russell—the third of the ocean line of steamers—arrived at Tanjong Paggar on the afternoon of the 7th Dec. Her dates of sailing are as follow: —Liverpool, 29th Sept.; Mauritius, 7th Nov.; Penang, 23rd Nov. She brings about 600 tons of cargo for this port, and was to leave for China at daylight on the 13th. She has proved herself to be a good sea boat, for although she encountered a heavy cyclone two days after leaving Mauritius, she sustained no damage.

PENANG.

Dates from this port are to the 10th December. The English mail of 26th October was received on the 30th November. The following items are from the *Penang Gazette* :—

This season's crop of betelnut will be a heavy one. The quantity of nuts on some of the trees is almost incredible, amounting to nearly 2,000 in some instances. Five or six hundred upon a tree is not an uncommon return. We learn that the renters of some estates will make a large profit upon their leases. When a cent is paid for ten or twelve nuts, this is nothing improbable.

A very serious fraud had been discovered this week in connection with opium, when a chest on being opened was found to be full of balls of mud instead of opium. The history of this affair appears to be as follows :—Two Chinese merchants promised to sell to the Chitties 25 chests of opium on arrival of the Calcutta steamer, delivery to be taken five days after; of these 25 chests, 10 were bought by a Chitty of the name of Verapa and the remaining 15 by various other parties. In the meantime the above Chinese merchants had received from another Chitty 5 chests of opium, which Chitty, not having them at the time in his possession, borrowed from another Chitty (a thing often done in dealing with opium). The Chinese merchants in delivering the 10 chests, as according to agreement five days after arrival of the steamer, to Verapa, offered, as part of the 10, those above mentioned five chests. Verapa refused to receive the 10 chests without seeing them opened. The Chinese merchants of course did not refuse to do so, but at the same time expressed their surprise at the request. The chests were opened, and one, the fourth, was found to contain balls of mud. This chest was one of the five bought by the Chinese from the Chitty, and had the mark of one Raman Chitty. In Singapore cocoa nuts and Dutch cheeses are said to have been substituted for opium; in Hong Kong mud has taken the place of the drug, and that not very long ago. We are told also that in the latter place coal was found in the opium chests. In the present case, from the appearance of the mud (and this is backed by the opinion of people who have had considerable experience in the matter), it is pretty certain that the mud is not Penang mud. There is another circumstance which might be noticed here, that is, the very careless way in which chests are packed. Formerly, within two years, the chests were secured with screw nails, now they are only fastened with short iron nails, the result being that the lids can often be raised by the hand with the slightest possible exertion; in fact, the wood is almost rotten where the fastenings are placed. We trust the Bengal Government will see the necessity of returning to the former method of securing the chests. Opium is too valuable an article to be neglected for the paltry economy of a few screw nails.

The coroner held an inquest lately touching the death of one Chin Ah Choon, who died shortly after being wounded by some Malays in the Kidah territory. Four Chinamen from this place were sent to the Kidah territory to cut timber, and while fastening the logs together, previous to rafting them to Penang, a boat with six or seven Malays came down the river from the interior, but not being able to pass, in consequence of the raft's blocking up the way, they began to cut the lashings, when a quarrel ensued, and Chin Ah Choon received a stab in the left leg, and died at noon the same day. Another Chinaman was wounded in the back at the same time. A coroner's jury brought in a verdict of "Manslaughter against some persons unknown." From the nature of the wound, which, according to medical evidence, was not likely *per se* to have alone caused death, it is supposed that the weapon was poisoned.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

EXPORTS FROM MANILA.

Per BELVEDERE to BOSTON.—Hemp 16,592 piculs, sapanwood 400 piculs, cigars, 10 mils.

Per VICKSBURG to CORK or FALMOUTH.—Sugar 22,400 piculs.

Per SAN JULIAN for SINGAPORE and BATAVIA.—Cordage 254 piculs, cigars 3,417 mils.

Per NUEVO CONSTANTE to AMOY.—Sugar 80 piculs.

Per CONGRESS to LONDON.—Sugar 16,000 piculs, hemp 4,436 piculs, sapanwood 500 piculs, mother-o'-pearl shells 358 piculs, gum mastic 349 piculs, cigars 2,870 mil., tortoiseshell 191 catties.

Per PANTHER to NEW YORK.—Sugar 4,800 piculs, hemp 13,820 piculs, sapanwood 888 piculs, hide cuttings 195 piculs.

Per CORRIENTES to SAN FRANCISCO.—Sugar 12,868 piculs, hemp 1,200 piculs.

Per SHANGHAI to HONG KONG.—Sugar 340 piculs, cordage 475 piculs, sapanwood 100 piculs, buffalo hides 10 piculs, hide cuttings 14 piculs, cigars 2,160 mils, paddy 1260 piculs.

Per HONG KONG to SINGAPORE.—Cordage 241 piculs, cigars 1,200 mils.

The total exports from 1st January to 23rd November were as follows:—sugar, 63,201 piculs; hemp, 349,212 piculs; coffee, 30,806 piculs; cordage; 13,358 piculs; sapanwood, 54,122 piculs; buffalo hides, 3,500 piculs; hide cuttings, 4,706 piculs; mother-o'pearl shells, 1,126 piculs; gum mastic, 2,630 piculs; tobacco, 97,281 piculs; cigars, 91,885 mil.; tortoiseshell, 652 catties; rice, 40,845 catties.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

TEA.—Nowhere but in Japan has any active business been carried on in tea during the past fortnight. In Shanghai there have been some purchases at rates above the London value of the tea, but this deliberate sacrifice seems to have grown wearisome at last at some of the ports.

CANTON.—Country Congous: The stock of 33 chops continues as last advised, but holders of some of the chops are evincing rather more anxiety to quit their teas, intending buyers however are firm, and refrain from making any offers at present that are at all likely (with teamen's ideas) to lead to business. At the same period last year out of 37 chops that arrived at market only two remained in stock, while this year of the forty-seven chops that arrived thirty-three chops or 21,819 packages remain unsold. Country Greens: The musters of the five chops or 2,800 packages have been put on the market, and quality appears to rule superior to that of last season. There are no further arrivals to report.

Digitized by Google

Canton-made Teas: For the English market these kinds have been exceedingly quiet during the fortnight; some 2,000 boxes Scented Orange Pekoe have been taken at from 20 to 34 taels, showing a decline of about a tael on previous settlements advised. In Capers nothing whatever has transpired; about 200 half-chests packed Congou have been settled at 17 taels, and 1,500 boxes Gunpowder, ranging in price from 21 to 30 taels, partly for the Continent, have been taken. A settlement of 2,500 boxes Gunpowder, also for the Continent, is reported, costing 18½ to 17 taels per picul. Sales, &c., are reported as follows:—Country Congous, none; Scented Orange Pekoe, 2,000 boxes at tls. 20 to 24; Scented Caper, none; Canton Packed Congou, 200 half-chests at 17; Gunpowder, 1,500 boxes at 21 to 30; Imperial, 2,500 at 18½ to 17.

AMOY.—Oolong: Supplies from the country have come down freely, and consist mainly of common Ankoi kinds with a small proportion of Fine Teas. There are not more however than about 7,000 packages still to arrive, and the total crop is now estimated as being about 1,000,000 lbs. in excess of that of last year. Settlements for the fortnight comprise 11,262 packages at rates which show no material change from last quotation, and may be called, for common Ankoi kinds, $13½ to 15, common to good common $18 to 23, fair to good $24 to 27, fine $30 to 32. Congou arrivals for the season are now completed, and with the exception of about 250 packages there is none in the market.

SHANGHAI.—Black Teas: The cessation of business last reported continued until shortly after the departure of the mail, when purchases were resumed at a reduction equivalent to last home rates. Taels 16¼ to 22 being paid for common Oonam to fair Ningchow teas. The subsequent entry of several buyers into the market rendered holders firmer, and later settlements were made at an advance of 1 to 2 taels, or nearly 1d. above their London value. Settlements for the fortnight have been as follows:—12,900 chests common to fair Hohow, at taels 16¼ to 22 per picul; common to good Oopack, at taels 23 to 27 per picul. Green Teas: There has been a large increase in business in Fychows and Moyunes, again confined to the American market. Prices have been somewhat irregular, finest teas showing an advance of nearly two taels, while medium Teas have recovered the declines established in the previous fortnight. Four chops Pingsuey comprise the settlements for the English market. The yield of this class of tea will be much under that of last year, but that of Fychows and Moyunes, on the other hand, will be greatly in excess. Owing however to much of the leaf having been packed out of season, the bulk of the crop is of an inferior description, the supply of fine teas being considerably within that of last year. Settlements have been as follows:—33,600 half-chests common Fychow to finest Teenkai and Moyune, at taels 28½ to 47. 2,700 half-chests fair to good Pingsuey, at taels 33 to 36.

NINGPO.—Twenty chops of Fychow have gone forward. Teamen are offering to lay down good chops of Pingsuey at the equivalent of 29 taels re-exported in Shanghai.

HANKOW.—Business in tea has almost entirely ceased, 1,100 chests only having been settled during the fortnight; common Oonams at tls. 13.6 to 14. Holders remain firm, notwithstanding the decline established in Shanghai, and were storing their teas under advance. The stock comprised 12,750, chests consisting of low Oonams and a few third crop Oopacks.

KIUKIANG.—Advices are to the 19th instant. Black Teas: The nominal quotations, taels 16 to 23 for common to medium Ningchows, and taels 14 to 18 for common to medium Hohows, remain unchanged, the stock consisting exclusively of common Teas, which are being gradually shipped off to Shanghai on native account. Green Teas: About 15,000 packages had arrived, and at first teamen were more ready to sell, about 8,000 packages finding buyers; latterly holders had grown firmer, and had shipped on to this market. Quotations were—Moyunes, fine to finest, taels 35 to 39; common medium, taels 30 to 35. Arrivals, 1866: Black, 114,200; Green, 91,400. Do. 1865: Black, 87,200; Green, 50,300. Settlements, 1866: Black, 112,400; Green, 68,800. Do. 1865: Black, 87,200; Green, 49,000. Stock, 1866: Black, 1,800; Green 22,600. Do. 1865: Black, nil.; Green, 1,300.

YOKOHAMA.—The Tea market continues active under the influence of a good demand, which in most places has been met freely, the stocks being very heavy, and the teamen, although willing to part with their produce, resist any attempt at a decline; at the same time there are only two or three buyers in the market; when these purchasers are satisfied a reduction is to be expected, orders being in most instances under present ruling rates. The quality of the purchases has been fine, and the greater part for the American market. The quotations and stocks are as follows:—Good Common, $18 to 26, 800 piculs; Medium, $28 to 32, 4,000 piculs; Good Medium, 33 to 36, 7,000 piculs; Fine to Finest, 37 to 46, 4,000 piculs.

RAW SILK.—CANTON.—At the earlier part of the fortnight the heavy stocks that had accumulated caused a general depression on the market, and holders were becoming more inclined to lower their ideas for the better classes especially, but a few native brokers speculating on renewed fuller limits from foreigners bought up a considerable quantity of the staple, and when operations again commenced, after receipt of mail news, rates were forced up at once $25 on account of eager settlements; the present outgoing mail again takes precisely the same class and quality of Silk, at a difference of 25 to 30 dollars in price per picul. Settlements have been on a large scale, as will be seen in quotations herewith. Settlements: Tsatlee No. 1, 300 bales, $580 to 610; Loong-kong, No. 1, 100 bales, $580 to 595; Kowkong, 100 piculs, $515 to 535; Lacklow and Cumchuck, no sales, $580; Seulam, 100 piculs, 470; Re-reeled Cumchuck, 500 boxes, $630 to 645; Pierced Cocoons, 50 piculs, $90; Waste Silk, 100 piculs, $80 to 90; stocks include 100 bales of No. 1 Tsatlee, 200 of Loongkong, and 1,300 of other kinds.

SHANGHAI.—The extreme tightness of money amongst the native merchants, rendering it almost impossible for them to hold high costing silk with any probability of a favourable result, has induced the Chinese to become anxious sellers, and a considerable decline has taken place in prices, especially for the lower descriptions. The fall would have been much greater, were it not that about 1,200 bales, included in the settlements for the past fortnight, are said to go forward on native account. There is still no reason to think that the supply of China silk for this season has been under estimated. Tsatlees, chops, No. 1, tls. 620 to 635 per picul; do., No. 2, 610 to 615; do., No. 3, 590 to 595; do., market, No. 3, 550 to 560; do., No. 4, 520 to 540; do., No. 5 and com., 460 to 500. Tayasams, chops, No. 1, 510 to 525; do., No. 2, 490 to 500; do., No. 3, 440 to 470; do., No. 4, 5, and com., 380 to 420. Yuenfas, No. 1, 540 to 550; do., No. 2,510 to 520; No. 3, 470 to 500; do., No. 4 and com., 450 to 460. Hainins, 450 to 540; Hangchow Tsatlees, 490 to 495; Sewhings, 380 to 430; Laeyongs, 380 to 385.

YOKOHAMA.—Under the influence of the news brought here by the mail of 10th of September transactions became more active; prices, which had slightly receded after the departure of the Ganges, advanced, and now close at from $10 to 20 higher than last quotations. There has been some improvement in the quality of supplies, and the settlements of the fortnight, which amount to 900 piculs, including a larger percentage than usual of such Hank silk, Oshio and Echizen, as fairly come up to the mark of best. Total settlements since the beginning of the season amount to 5,400 bales, against 5,500 in 1865, and 6,100 in 1864 at the same date. Not without venturing an opinion on the probable figure of the total export for this season, it may be reported that some Japanese dealers, confident in a further advance of prices, as a consequence of the scarcity of the staple, have made deposits of their silk against loans wherewith to renew their purchases in the interior. Ever since the end of June pierced Cocoons have been brought in daily increasing quantities to this market, and about 2,000 piculs have been settled since then, at prices ranging from $80.120 the quality has been found much superior to that of last year, and this confirms the formerly expressed opinion that Silkworm's eggs have been this year the produce of the Spring crop and therefore are likely to give in 1867 a far more satisfactory result than was the case with the enormous export of 1865. Mybash and Sinchu, best, $910 to 960 per picul; do. medium, $840 to 900 do.; do. inferior, $760 to 820 do.; Hatchojee Mybash, $750 to 820 do.; do. Shimada, $650 to 680 do.; Ida, best, none: do. medium, none; do. inferior, $730 to 780 do.; Ooshio, best, $840 to 880 do.; do. medium, $770 to 820 do.; do. inferior, $670 to 710 do.; Koshio, best, none; do. medium, $710 to 760 do.; do. inferior, $650 to 700 do.; Sodai, best, $775 do.; do. medium, $745 to 760 do.; do. inferior, $700 to 730 do.; Echizen, best, $720 to 750 do.; do. medium $680 to 710 do.; do. inferior, $650 to 670 do.

DRUGS, &c.—CANTON.—Cassia Lignea remains firm at $19.25 per picul, purchases amount to 1,000 piculs and the stock is reduced to 1,000 piculs, forming, with about 1,500 to 2,000 piculs in the interior, the balance of the season's supplies. Cassia Buds: $42 quoted with a stock of 80 piculs, no sales. Galangal: $1.80 and 400 piculs continue offering. China Galls $13.35 with 100 piculs on the market which are firmly held. China Root $3.50 neglected, supplies amounting to 400 piculs. Rhubarb of superior or even middling qualities not procurable, and inferior kinds are kept at prices far beyond the idea of exporters. Essential Oils and Staraniseed out of stock.

CAMPHOR.—HONG KONG.—A parcel of 800 piculs has arrived from Formosa and about 2,000 piculs are to follow shortly. Notwithstanding the holders here are asking 30 dols. per picul, unpacked, which purchasers are not willing to pay, and consequently no sale has been effected since the issue of last report.

CHINA GRASS.—SHANGHAI.—The transactions in this article have again been confined to the supply of native demand, prices in Europe being too low to induce shipments at present quotations. Best quality remains scarce, at taels 14 to 14.5.0 per picul; No. 2 at taels 12 per picul; Green at taels 9 to 10 per picul. No change has been reported from Hankow, where stocks are very small, and holders firm.

COTTON.

AMOY.—No further arrivals of new crop Shanghai have come to hand. Old Cotton has experienced a further decline in value, but sales of 600 bales Tientsin have been made at $23¼. Latest quotations are, Shanghai, $22½ to 23½; Tientsin, $22½ to 23; Chefoo, $22½ to 24½; Ningpo, 23¼ to $24½. Stocks in foreign and native hands, 1,923 bales.

NINGPO.—The shipments of the fortnight have been on a very fair scale of magnitude, and amount to 4,800 bales, principally to Hong Kong direct, besides about 1,500 bales, shipped by native craft. The market has been closed owing to absence of unsold stock, nominal quotations still being $27 per bale, which lays down in Hong Kong at about $25.20 per picul, showing a fair margin on last quotations from that market.

SHANGHAI.—Has been in demand for shipment both to Japan and Handow, and at one time best Shanghai staple could not be bought under taels 16.5.0 per picul; the demand for Hankow however falling off, the price receded to taels 15.7.5 to 16 per picul, but better accounts having been received two days since from Japan, the rate has rallied again to taels 16.2.0 per picul. Of Tientsin there is little or no stock.

HANKOW.—The heavy stocks at departure of last mail caused a further decline; but as the quantity taken off has been on an extensive scale, and imports have been less heavy, prices have again advanced. Quotations are for old Tientsin tls. 15 to 15.70, best new Shanghai tls. 18.50 to 18.60, and Tung-chow tls. 19 to 19.20 per picul.

CHINA AND JAPAN IMPORTS.

COTTON.—HONG KONG.—A considerable business which was transacted shortly after the last mail left was checked by the increased demands of holders, and during the latter portion of the fortnight settlements have been made on a very much reduced scale. The concluding quotations are as follows, somewhat in advance of those last noticed:—Tientsin, $21 to 22.50 per picul; Shanghai, $22.50 to 23.50; Ningpo, $26 to 26.50; Bengal, $22 to 24. The transactions of the fortnight have amounted to between 7,500 and 8,000 bales.

CANTON.—The past fortnight has been characterised by favourable transactions, quotations having advanced about one tael. The sales and rates have been as follows:—Shanghai, 200 bags at tls. 18 to 19; Ningpo, 200 at 19 to 20; Shantung and Tientsin, 1,200 at 16 to 18; Bengal, 2,500 bales at 15 to 19. The stocks include only 1,400 bags of Shantung and Tientsin and 2,000 bales of Bengal.

HONG KONG.—A small business at rates which have had rather a tendency to improve, has been transacted during the fortnight. In Cotton Yarn, though the transactions have fallen off, the stocks of 16-24, which counts are most in demand, are low, so that former rates have been maintained. In Grey Shirtings the make shortest in supply is 7 lbs., which

Digitized by Google

has, consequently, commanded better prices than the others. Moderate sales of 8⅓ lbs. have taken place at $3.60 to 3.67½. There has been but a feeble demand for White Shirtings, directed chiefly to the lower qualities. 6 lbs. Grey T-Cloths have been in fair inquiry at former rates, but 7 lbs. have declined a few cents. There has been a tolerable demand for Spanish Stripes, which have been placed to the extent of about 450 pieces, and Lastings have improved. Bar Iron has been inquired for, and about 1,000 tubs of steel have been placed at $3.80 per tub. Other metals are neglected.

CANTON.—Yarn has advanced five dollars, and Metals remain as last quoted, 24 pieces superfine Black Cloth have been placed at $3.28, 200 piculs of Common Lead at $6.60 to 6.70 leaving 7,000 piculs on stock, 100 piculs W.B. mark at $7 to 7.10 leaving 400, and 60 flasks of Quicksilver at $72 to 73 with 800 flasks still on the market.

AMOY.—Cotton Yarn has been in fair inquiry, and sales of 50 bales good 16 to 24's have been made at $72. Latest quotations are rather lower, say $70 to 72; stocks 29 bales. Grey Shirtings dull. Sales of 1,000 pieces have been made at $3.78 to 3.80. Quotations 7¼ lbs., $3.60; 8¼ lbs., $3.80; 9 lbs., $4.10; stock, 6,400 pieces. T-Cloths no sale, 6 lbs. may be quoted at $2.90. White Shirtings no sales, 60 reed, $3.40; 64's, $4.10; 66's, $4.40; stock 3,250 pieces. White Brocades $5; stock 250 pieces. Dyed Brocades $5.70; stock 250 pieces. T. R. Cambrics $3.40 to 3.90; no stock. Camlets, Scarlet $23.50, Assorted $22.50; no stock. Long Ells, Scarlet $9 to 12; Assorted $8 to 11; no stock. Spanish Stripes $1 to 1.10 per yard; no stock. Metals, Tin, $24; stock 3,142 slabs. Lead, 7 dols.; stock 200 pigs. Quicksilver $72.50.

SHANGHAI.—The market has been fairly active during the fortnight the demand being principally for shipments to Tientsin prior to the closing of that port during the winter months. Grey Shirtings have maintained their late level. White Shirtings have attracted some attention at their low values. T-Cloths are slow of sale, but prices are steady. Turkey Reds are in good demand at quotations. Spanish Stripes still continue very dull of sale. Scarlet Long Ells have further declined in price. Camlets are quoted lower, and difficult to move at the reduction. Lastings are most difficult of sale. Nail Rod Iron has been in good request at higher prices, but other kinds met with no inquiry. Lead has been dull of sale, at last quotations. Quicksilver has not been asked for, but quotations remain nominally the same as last given. G. E. Grey Shirtings, sales 50,000 to 60,000 pieces; steady trade demand. G. E. White Shirtings, sales 15,900 pieces; fair inquiry at the reduced rates. American Drills, quotations nominal; American Sheetings, no sale; English Drills, auction sales of damaged goods; T-Cloths, sales 4,000 pieces, prices steady; Handkerchiefs, sales 1,000 dozen; Spottep Shirtings and Brocades, sales 3,000 pieces Spots, and 2,500 pieces Brocades; Dyed Goods in fair demand; Damasks, sale 400 pieces; Chintz, good inquiry, sales 2,500 pieces; Turkey Reds, sales 2,400 pieces; Velvets, sales 300 pieces at extreme quotations; Muslins, no sales; Dimities, wanted, sales 200 pieces; Union Spanish Stripes, no stocks; Spanish Stripes, sales 360 pieces; Medium, Broad, and Habit Cloths, sales 300 pieces at quotations; Camlets, sales 1,000 pieces at rather low rates; Long Ells, sales 1,500 pieces, market very dull; Lastings, 200 pieces sold at quotations; Crape Lastings, sales 350 pieces; Orleans, Figured and Plain, sales 3,000 pieces Figured and 1,000 pieces Plain. Iron: Flat and Round, no demand; Nail Rod, wanted; Pig, no transactions lately; Lead and Tin Plates, dull; Quicksilver, stocks small, no business doing; Flints, stock small, little demand; Window Glass, not inquired for.

HANKOW.—Grey Shirtings: The demand continues good for the better makes of 8lbs. 4.6oz., and an advance of 5 to 10 candareens per piece has been established. Stocks are light, and prices close firm at tls. 280 to 2.90 for 8lbs. 4.6oz., and tls. 2.65 to 2.75 per piece for 7lbs. White Shirtings are in no demand, and quotations are 1 to 3 mace per piece lower for all kinds. T-Cloths have also given way in value. Ordinary makes are 1 mace, and inferior about 2 mace per piece lower. Drills are very difficult to move at a further decline of 2 to 3 mace per piece. American are quoted tls. 5.30 to 5.40, and English tls. 4.50 to 5 per piece. Dyed Spots, Brocades, and Damasks have fully sustained the quotations in last report, and there is a very fair demand. Chintzes, good designs are still in request at full prices. Camlets and Lastings continue dull of sale, and prices have ruled easier. Long Ells, a fair business has been done in these goods, but rates have given way somewhat, HH Scarlet being worth only tls. 7.70 to 7.80 per piece. Good assortments have suffered the least decline. For Dark Blue there is no demand at tls. 7.00 to 7.20 per piece. Spanish Stripes and other Woollens have been little sought after, but as yet no decline has been accepted. Figured Orleans of approved assortment and design are in good demand, and the stock is very small. Plain are not in so much favour, but suitable assortments meet with ready sale. Lead continues dull of sale, and the value is nominally unaltered. Quicksilver: The only transaction has been 100 flasks at tls. 55 per picul, which seems to have supplied the immediate wants of buyers, and the present quotation is tls. 53 to 54 per picul. In Tin and Nail Rod Iron there is no change to report.

YOKOHAMA.—The improved demand for imports noticed in the last report has continued during the past fortnight, and Grey Shirtings are 10 to 15 cents higher. Cotton Yarn, 16 to 24 and 38 to 42, is saleable at quotations, but 28 to 42 is not in so much demand. Black Velvets and Turkey Reds are scarce and wanted. Dyed Spots and Brocades are rather difficult of sale at the moment. Chintzes and Camlets keep depressed; for the latter there is little more demand, but without any improvement in price. Metals remain dull. Lead is saleable at quotations.

COALS.—HONG KONG.—There has been again no accession to the stocks of English or Welsh Coals, arrivals during the fortnight (about 2,000 tons) consisting entirely of Australian. Prices remain unchanged, but firm at 13½ dols. for English and Welsh and 8½ dols. for Australian.

SHANGHAI.—The market is firm, but transactions have been limited, chiefly owing to the small supplies arrived since the 7th instant. There is but one cargo afloat of English steam coal offering for sale, and sales from godowns have been effected only to a small extent. American coals are in less demand at tls. 13.0.0 per ton from godown. Sydney coals have been sold to arrive by the cargo at tls. 7.7.5 and tls. 8.0.0 per ton. Arrivals since the 7th instant have been: from Great Britain, 600 tons; from Australia, 769 tons; from Japan, 538 tons,—in all, 1,907 tons. The quotations are:—English, tls. 10.0.0 per ton; Cardiff, tls. 11.0.0 per ton; American Anthracite, tls. 12.0.0 per ton; Sydney, tls. 8.0.0 to 8.2.5 per ton; Japan, tls. 6.0.0 per ton; Formosa, tls. 5.0.0 per ton.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months' sight.	4s. 6½d.	4s. 7½d. to 4s. 7¼d.
At Shanghai (per Tael.)	6 ditto	6s. 3d. to 6s. 4d.	6s. 4½d. to 6s. 5d.
At Canton, At Hong Kong, At Macao	6 ditto	4s. 6¼d.	4s. 7d.
At Singapore	ditto	4s. 6½d. to 4s. 6¾d.	4s. 6¾d. to 4s. 7d.
At Manila	ditto	4s. 1d.	4s. 2d.

At Shanghai, bills on India, Rs. 299 to 301 per 100 taels. At Hong Kong, Rs. 220 per $100. Bar Silver at Shanghai, tls. 111·5; at Hong Kong, 11 per cent. prem. Mexican dollars at Shanghai, tls. 73·4 per 100; and exchange on Hong Kong, 26⅛ discount. Hong Kong and Shanghai Bank shares, old, par, new, 1 per cent. dis.; Gas Company, 10 per cent. prem.; Hong Kong and Whampoa Dock, 13 to 20 per cent. prem.; Steam Shares, 8 per cent. dis.; Union Dock Company, 18 per cent. dis.; China Traders Insurance, 6 per cent. prem.

The following is from Messrs. Sharp and Co.'s Circular.

GOLD.—The amount of gold passing through the colony has been larger than usual. The arrivals amount to $748,000, and the total exported, including last mail, and excluding this, is, $618,000.

SILVER.—The total received, principally from Shanghai en route to India, is 844,000 dols., and that sent away inclusive and exclusive as above is 850,000 dols.

DOLLAR CURRENCY.—It is to be hoped that the trifling advance in the rupee rate on India may tend to attract attention again to the old method of remittance, which has been for so long time discouraged by advices thence. There have come to hand from the coast and Callao $410,000. Of these about a lac are in Peruvian sols. And there have been sent away, almost entirely to India, $660,000. These remittances of Peruvian coin are for the purchase of Chinese coolies, and now frequently take the place of the credits which were more generally used.

EXCHANGE.—There has been a very slight advance in rates, chiefly owing to the business done in the North. Local transactions have been upon a smaller scale.

DISCOUNT AND MORTGAGES.—Discount is easier, money having been placed at 8 per cent. Money is wanted on mortage at extreme rates, say 12 per cent. The value of property however is not proportionably affected, a worthless house in the Chinese quarter having nothing at all to recommend it, but locality, having only fourteen feet frontage, realised yesterday by public auction $6,700.

SHARES.—Bank are rather better, and China Traders' also. In others but very little has been done.

SHIPPING INTELLIGEN E.

ARRIVALS.

At YOKOHAMA.—None.

At NAGASAKI.—From Cardiff: Oct. 4, Carnarvonshire.

At SHANGHAI.—None.

At HONG KONG and CANTON.—From Newcastle: Nov. 18, Hindu; 28, Ocean; from Hamburg, Alsen.

At MANILA.—From Glasgow: Nov. 19, Jesus; from Cadiz, 22, Tetuan

At SINGAPORE.—From Glasgow: Dec. 2, Roslin Castle; from Shields Nov. 29, Louis Meyer; from Newport, Salamander.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—None.

From NAGASAKI.—For London, John Bunyan; for Havre, Nov. 18, Jeanne and Joseph; for New York, Margaret Campbell.

From SHANGHAI.—For New York, Nov. 16, Renown.

From FOOCHOW.—For London, Nov. 10, Gauntlet; 17, John C. Munro.

From AMOY.—For New York, Nov. 24, Florence Nightingale.

From HONG KONG and CANTON.—For England, via Singapore, Nov. 27, Queen of England; for Havana, 22, Dos Hermanos; for New York, 18, Albert Victor; 30, Powhattan.

From MANILA.—For London, Nov. 19, Congress; for Cork or Falmouth, 14, Vicksburg; for New York, 20, Panther; for Boston, 10, Belvedere.

From SINGAPORE.—None.

From PENANG.—For New York, via Singapore, Dec. 6, Elizabeth.

VESSELS LOADING.

At YOKOHAMA.—For London, Corea, Birch Grove; for New York, Lorton, Banda, Hugh Fortescue, Chaasze.

At NAGASAKI.—For London, Carnarvonshire; for New York, Christian Rankin.

At SHANGHAI.—For London, Cissy (full), Southern Cross, Dundonald, Harlaw, Tamerlane; for New York, Andreas, Antelope, Lady Louisa, Assyrian.

At FOOCHOW.—For London, John Temperley (full), Banian (full), Weymouth, John Lidgett.

At AMOY.—For New York, The Brothers, Freya.

At HONG KONG and CANTON.—For London, Bankside; for New York, Charger.

At MANILA.—None.

At SINGAPORE.—For London, John Rennie, Sree Singapura, Edmund Graham; for Liverpool, Bothwell Castle; for New York, Chili.

At PENANG.—For London, Amersham.

VESSELS EXPECTED.

From YOKOHAMA.—Thomas Dryden, Conference.

From NAGASAKI.—George, Wm. Mitchell, John Bunyan.

From HANKOW.—Mary Nicholson.

From SHANGHAI.—Nelly, Illimani, Lansdowne, John Paul, Knight

Digitized by Google

of Snowdon, Marquis of Argyle, Trebolgan, Queen of the East, Antipodes, Ann Adamson, Dartmouth, Polmaise, John Bull, Agamemnon, General Caulfield, Sir W. F. Williams, Juanpore, Red Deer, Onsuri, Janet Mitchell, Scindia, City of Quebec, Camilla, Elizabeth Nicholson.

From FOOCHOW.—Monarchy, Naomi, Veronica, Louisa, Northfleet, Invincible, Gauntlet, J. C. Munro, Beautiful Star, Scawfell, Dunmail, Ellenborough, Fontenaye.

From CANTON.—Island Queen, Victoria, Kelso, Solent, Samuel, Passing Cloud, Cora Linn, Chetah.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea £2 10s. to £3 per ton; Silk £4 to £4 10s.

At SHANGHAI.—To London, the rate has advanced to £2; and to New York to load at Foochow, £2 10s. per ton; little inquiry exists for tonnage for the coast.

At FOOCHOW.—To London, £2 per ton.

At HONG KONG.—No improvement has taken place in the freight market for Europe or coasting, to New York a fair business has been done at £2 and £1 15s. per ton of 40 cubic feet. We quote the following settlements, &c., from the circular of George Holmes:—Orion, 360 tons, Whampoa and Macao to United Kingdom at £2 2s. 6d. per ton, if to Continent £1 17s. 6d.; per ton; Peter Godefroy, 350 tons, Rice Ports to United Kingdom or the Continent £3 per ton; Tavistock, 534 tons, on the berth at Foochow for London at £2 per ton; Tynedale, 583 tons, Foochow to New York at £2 per ton, of 40 feet; Galatea, 424 tons, Whampoa to New York at £1 15s. per ton, of 40 feet; Amaranth, 375 tons, Whampoa to New York at £1 15s. per ton, of 40 feet; Ernst and Maria, 320 tons, Whampoa to New York, Disengaged tonnage in harbour (exclusive of Siamese) 21,535 tons.

At MANILA.—In the absence of transactions rates to the United Kingdom are quoted nominally £2 for sugar, and £2. 10s. for hemp, at which a moderate quantity of cargo could be secured.

At SINGAPORE.—Vessels on the berth for England are filling up slowly at £1. 15s. for dead weight. and £2 for light cargo.

CASUALTIES.

HONG KONG.

The Hanoverian brig J.G. Fichte reports having bad weather throughout the passage.—November 24th, at 8 P.M., off Pedro Blanco, with a light breeze about seven miles off the shore a junk approached and asked if we wanted a pilot, we answered no. Then they lowered their mainsail, and got alongside, we made all sail and run away from her. She chased us till morning and had about 100 men on board.

The Hamburg barque Picciola reports having experienced a heavy gale after leaving Newchwang, which lasted twenty-four hours, then experienced calms for two days. November 9th, 10th, and 11th experienced a severe gale from the northward and eastward, the barometer at the time indicating fair weather, from thence strong N.E. winds till within 40 miles of Hong Kong, the rest of the passage light N.E. till arrival.

The British barque Burlington reports having left Hong Kong on the 1st of November, wind from the eastward. In seven days she got to the South Cape of Formosa; on the 8th strong north-east breeze, under double reef topsails, split jib, and fore-topmast stysail; wind increasing to a gale, close-reefed the topsail. On the 9th wind hauled from north-east to north, barometer 29.90, gale increasing, with a high sea; split the main-topsail; kept the ship hove to under the fore-topsail and mizen stay-sail; noon, barometer 29.70, with increasing gale and sea, split the fore-topsail, barometer still falling. Bore up to get to leeward of the South Cape; after getting there it came on a north-west gale; bent fresh topsail. Wind hauled to the northward, beat up for Hong Kong; strong double-reef breeze all the way to the land; latter part wind E.N.E., moderate and clear.

The Josefita, Almira, which sailed from Macao with 537 emigrants on the 26th of January, reports having landed 528 on the 15th of May at Havana after a good voyage. Sailed for Hong Kong on the 1st July, crossed the line on the 17th of August. Passed meridian of the Cape on Sept. 9th. Spoke the Denmore, from Barbadoes to London, the Napier, the Newcastle, the Maasilius, the Guy Mannering, and the Windsor Castle.

The schooner Hindu reports having experienced strong south-westerly winds after leaving port, which lasted to the line, crossed it October 24th in long. 62 37 E. from thence light winds with a very heavy rain, which lasted for 3 days, sighted Caroline Islands. October 28th got a strong S.E. wind till lat. 21 00 N. long. 152E.—from thence strong N.E. breezes till the arrival.

FOOCHOW.

The British steamer Undine reports having towed the British ship John Temperly to sea from Foochow.

NEWCHWANG.

The Prussian schooner China struck on the West Bank, when going out, and had to discharge part of her cargo to get off again.

SINGAPORE.

The Dutch barque Patriarch Samhiri, from Cardiff for Singapore (coal), grounded in Banka Straits, Dec. 7, but by heaving overboard about 30 tons of cargo she got off without damage. The ship Agamemon, George, from Shanghai for London (tea) struck on a reef in Carramata Straits, and hove off at high water, making about six inches per hour. She put in to Singapore Nov. 30, and is discharging cargo preparatory to docking.

COMMERCIAL POSTSCRIPT.

TEA.—The market to-day continues with an upward tendency, and importers are offering very sparingly.

SILK.—Tsatlees, Nos. 1 and 2, at 32s. to 34s.; Nos 3, at 31s. 6d. to 32s. Canton, 18s. to 24s. Taysaams, 26s. 6d. to 29s. 6d. Maibash, 33s. 6d. to 36s. The demand both for export and home consumption is very limited, and buyers are no doubt waiting to see the effect of the large arrivals. The quality of the Silk now unloading is most unsatisfactory, and unless there be a larger proportion of good and fine Silk in the next arrivals, available parcels of both Tsatlee and Taysaam will be scarce indeed. Some of our leading throwsters complain much of the careless reeling and deterioration in quality of even Chop Silk, and suggest that steps should be taken in China to obviate this evil for the coming season. Japan Silk is now almost completely neglected, and the stock is accumulating; still importers, looking at the high cost on the other side, and having confidence in a short supply, do not press sales. Deliveries from 1st to 8th inclusive: China, 544 bales; Japan, 122; total, 666 bales. The Japan brought by the last French mail stands to lose about 4s., the China about 1s. About 7,000 bales are expected in this month.

ARRIVALS NOT IN THE TABLES.—Jan. 4, at Alicante, from Manila, Concepcion; 10, in the Downs, from Penang, Victor; Jan. 8, at Waterford, from Maulmain, Viscount Canning; at Cuxhaven, from Singapore, Henriette; Jan. 11, in the downs from China, Wm. Melhuish.

LAID ON.—At Liverpool for Manila, Adair y Eva.

SPOKEN.—Holland (Dutch barque), Batavia to Holland, Nov. 3, off Cape Agulhas; Packet (Dutch brig), from Batavia, Nov. 26, 3 N. 23 W.; Devonshire, London (?) to Batavia, Nov. 18, 15 S., 28 W.; Ocean Rover, Batavia to Boston, Dec. 23, lat. 34, lon. 73.

CASUALTIES.—The Taymouth Castle, Dobbie, which sailed from Glasgow Jan. 5, for Singapore, with a general cargo, was driven ashore Jan. 6, at Torhead, near Ballycastle, and became a total wreck: crew supposed to have been lost.—The Rangoon (ship), from Java to New York, went ashore at Chincotreague, Dec. 26.

THE TEA TRADE.

(*Produce Markets' Review.*)

The course of events in the tea market during the past year has been very remarkable. The decline in prices, to the present extremely low point, has been almost uninterrupted, and yet without stimulating consumption to the extent that might naturally have been expected to be the case. At the same time shipments from China have been larger than ever; and, although rates here are lower than they have been for many years, much better prices have been realised by the Chinese. It is impossible that so unequal an exchange can be carried on for any length of time; and, although the attempt has now been made for two consecutive years to fix the price in China, it becomes yearly more and more evident that it will in future be London, and not China, that is ultimately to determine value. The price of each kind of tea is evidently to be regulated by the tastes and wants of the public here, and in order to ascertain the qualities for which the best return may be expected, the Chinese should themselves take the initiative, and consign their produce direct to this country, without the intervention of middlemen or agents. There would then be a better chance of reaching the lowest possible cost compatible with a fair profit for the merchant. The old system of holding large quantities for a market has in more instances than one been weighed in the balance and found wanting. In the course of a few years a new system of commerce will be inaugurated, and the consumers brought more closely into relation with the original growers of the produce. Thus the cost of the article will be smaller, many intermediate expenses being swept away. No previous period within our recollection could have better exemplified the futility of any speculation in produce than the year 1866. It commenced with an apparently favourable condition of the market for purchases in advance; for in reality the state of the tea market at the close of the year 1865 was such as might fairly have encouraged a hope of an improvement in prices for the ensuing year, and a sure, though perhaps only gradual revival of what was looked upon as a somewhat drooping trade.

It was hardly to be expected that any great animation would have resulted from the adverse settlement of the question; but it is by no means improbable that holders would have shown a much less eager disposition to realise, and that a much greater briskness would have ensued, had it not been for the terrified condition of people at this period, and the almost total suspension of business short of actual requirements in consequence of the money panic. It is true that no very considerable fall was at first admitted to have occurred in first-hand teas, these being for the most part withdrawn from the market, but the decline on the second-hand parcels, which were pressed for sale in considerable quantities, was very severe. It must be borne in mind that the effect of extreme prices, high or low, is twofold; they exercise an immediate influence, of course, on the present condition of the market, but they also have an influence to a greater degree than would at first sight be imagined on the speculative changes to which all articles of produce, and tea as much or more than any, are invariably liable. Any unusual rise or lowering of prices extends the limits within which speculation operates; and the fact that rates have on some occasions fallen to a very low point, or the reverse, may be the actuating cause of a certain reluctance in buyers to purchase on the one hand, or of sellers to realise on the other. It is argued by the sanguine that that which has occurred may occur again; but exceptional valuations, in times of unusual panic or speculation, can never be considered as proper bases of comparison, and any views founded on such imperfect groundwork are liable to be entirely upset almost as soon as they are formed, because they are destitute of that *viel-seitigkeit*, or many-sidedness, which can alone give the conditions of stability. The partial restoration of confidence in commercial circles, subsequent to the panic, was

Digitized by Google

not reflected in the tea market, as the first-hand parcels which had been kept off the market during the height of the panic were now offered *en masse*, and forced sales, almost unprecedented in size, were held, succeeded, as might have been expected, by extreme quietude during the months of May and June, and a fall of 6d. per lb., as compared with the prices paid at the corresponding period of the previous year. This fall resulted in one good effect, in that it successfully operated as a check upon the system of buying forward, the risks attendant upon which have been so frequently pointed out by all those who have at heart the real interests of the trade. At this time, too, the long-expected falling off in the amount of our stocks appeared, although to a far less extent than had been anticipated. On the 31st of January the stocks were estimated at eighty-eight millions; on the 28th of February they were nearly ninety-one millions. On the last days of March, April, May, and June, they were ninety-six millions, ninety-eight-millions, ninety-nine millions, and one hundred and seven millions respectively. The following month witnessed a fall from one hundred and seven millions to ninety-seven millions, whilst the imports, which, during the months of April, May, and June, stood at twelve millions, fifteen millions, and nineteen millions respectively, fell off during July to one and a-half millions.

On the commencement of the shipments of new tea, with the view of anticipating the regular tea season, and of obtaining a priority in the market for the sales of China produce, the costly experiment was again tried of sending tea overland; the results, however, were far different to those anticipated, and as the prices obtained for these teas were only slightly, if at all, in advance of the rates paid for old teas of similar qualtity, there is less likelihood of this speculative movement being repeated. By the middle of August the shipments from China had amounted to the unprecedented size of thirty-two million lbs., and on the knowledge of this fact reaching England the large public sales contributed to keep down the low level of prices. Thus, in remarkable contrast to the dullness of the tea trade in England, the market in China opened, or was reported to have been opened, at an advance of from 6d. to 9d. over the extreme rates of the year previous. The anomaly is worth recording, though, as might have been expected, it was utterly without effect on prices in the English market. It is indeed difficult to see how, under any circumstances, a permanent advance of the London market could have been expected through reports of high prices paid abroad, unless from an utter ignorance on the part of the speculating merchants in China of the fact that excessive shipments might be looked for from Chinese ports; as circumstances turned out, these mad speculations, happening concurrently with the severe monetary pressure in England, and unusual imports, appear absurd enough.

The effect on the market of the reduction of the Bank rate from 10 to 8 per cent. was shown more in the feeling of general confidence established than in any actual improvement in prices, or any increased activity in trade. Again, a revival was, no doubt, anticipated by many on the arrival of the new cargoes; but it seems pretty clearly proved by the experience derived from the past year, that comparatively little excitement will be felt on the arrivals of the new season's teas for the future. In fact, it is probable that all distinction between old and new teas will be gradually obliterated, as the communication between London and the Chinese ports seems likely to be continuous throughout the year. Occasionally, during the months of September and October last, there was an apparent approach to a larger amount of business, but this must be considered due, not so much to any increased competition on the part of buyers, as to the abatement from the original high valuations made by importers, who now found it impossible to maintain extreme rates in the face of a falling market and overwhelming stocks. The general tendency to a decline was never more strongly marked than during the month of November and this month. When a perfect race to realise has been exhibited by many classes of the holders of tea, extraordinary variations in prices have occurred, some stoutly maintaining that fine teas preserve their value, others that all kinds had suffered most severely, and numerous sales had occurred at prices that could only argue a determination to realise at almost any sacrifice. Indeed, the whole course of events during the past year—so far, at least, as the tea market is concerned—has been such as to prove how erroneous any anticipations are likely to be when based only on narrow inferences drawn from the experience of one or two years immediately preceding, or from reports from a far distant country, from interested sources. The occurrences of the past year have brought into greater prominence the wisdom of holding the lightest possible stocks, and of buying for immediate requirements only. The increasing estimation in which public sales are held as the real criterion of value is also remarkable. The Chinese have done well this year, and there is no fear, therefore, of any want of supply, even if there were not nearly twelve months' stock in London. We cannot expect better prices under these circumstances.

THE HONG KONG GARRISON.

(ARMY AND NAVY GAZETTE.)

What have the Horse Guards to do with Hong Kong? Why are there any British regiments at Hong Kong at all? The answer to the first question is simple. The answer to the second is very simple too, but it involves most serious considerations. What the Horse Guards have to do with Hong Kong is to furnish indirectly a regiment, or regiments, as may be required for the station, at the request or order of departments over which they have no control, and to see that the roster of service is properly carried on. It was so unjust on the part of the leading journal to attack, the Horse Guards in this matter that we must suppose the name of that particular department was used generally for the words "the authorities," which have the merit of vagueness, as a peg on which to hang any weight of censure. In the first place we believe the leading journal has been misinformed as to the sanitary condition of the 2nd battalion of the 20th Regiment to which it refers; in the second place, we are quite certain that the leading journal is altogether wrong in supposing the *Goldes Fleece* (now taking out the 73rd Regiment) to be a sailing ship. She ih on the contrary, a fast and spacious screw steamer. Now as to what Britise regiments do in Hong Kong full information can no doubt be given by the tea, opium, and silk houses in the City and elsewhere. We have no more natural right to have English regiments in Hong Kong than the Emperor of China has to have his battalions of braves in the Isle of Wight. It was not to serve any purpose of the Army or Navy or Horse Guards that wars were carried on against the Chinese, and concessions of land won from them in order to make settlements which have to be garrisoned by British soldiers. Horse Guards and War Office would alike be glad to escape from Hong Kong and its cognate stations, but what would the Chinese merchant say? The subject is part of a very much larger question. How is Great Britain, with a population of 30,000,000, without a conscription to find volunteers for the service of her Army in every part of the world, healthy or unhealthy? How are we to stand the drain of India alone? *The Times* suggests, nay, orders the employment of Sikh soldiery or Indian mercenaries in unhealthy places such as Hong Kong. Now, the present drain on Great Britain from India is caused by the great military mutiny, which showed it would not be safe to trust India to a native army. But that lesson in itself was but a page out of the great book of history, which has in every chapter wherein it deals of the decay of empires the one stereotyped passage to show the fatal results of trusting remote dependencies or conquered provinces to foreign mercenaries. It would be a most hazardous experiment to confide the honour of our flag and the safety of our possessions to Sikh mercenaries. The Punjaubee, with all his fine qualities, is not a model of virtue, honesty, or self-denial, and abroad, and from his own people, he looks on all mankind as enemies, against whom his normal state is war. The British merchant would protest very loudly, after a year or so of Sikh protection, that it was impossible to live with him; and the contact of the Sikhs and Chinese would give rise to endless squabbles, and thence to serious complications. As a smaller evil, why not employ Chinese? A body drilled as police, in European hands, and with such officers as Gordon, who is not the only Gordon in the Army, might do all that was required to protect our commerce, and to preserve peace, and maintain the status of the British merchant. It would not be half so expensive a force as the Sikhs; and, indeed, it remains to be seen if the Sikhs would engage at all for lengthened service across the sea; although they will go anywhere for a brief campaign, in the hope of "glory," which in Punjaubee is "loot." It is quite impossible to fix the depots of trade, and the great emporiums of commerce, with regard to sanitary laws. Just as great ports are often found at the head of intricate navigations, great markets are oftentimes situated in the very midst of pestilence and maladies. New Orleans is the head-quarters of the cotton trade and yellow jack; Hong Kong is what the 11th and 20th know it to be, and what many a millionaire knows it to be too. Shall we, when a station is found to be dreadfully destructive to life, abandon it, saying to our merchants, "If you like to live there you must not expect us to peril the lives of our soldiers with you;" or shall we try, on a gigantic scale, the system of native mercenaries?" We believe the former would be almost the safer course of the two, but if it be not approved of there is a simple application which can be tried with effect. Money will do anything, and special corps for service in unhealty stations can be raised, the expenses over and above the usual cost being defrayed out of the revenue to be derived from local taxation on profits of trade. For the poor women and children we feel the deepest commiseration. It is cruel to husbands and fathers to separate them from their families, and it is crueller still to send the latter to hotbeds of disease. The British Army is too domestic and cultivates family affections too much for its own happiness; but with care healthy sites might be found for the women and children at all events. It is possible to diminish mortality in unhealthy stations, but a murderous outbreak of disease may occur in an instant, despite every human care or precaution. Even Sikhs die of cholera, dysentery, and fever; even Sikhs have feelings and families; and although they are raw material, and may be used up in a great colonial and imperial engine as so much waste, they may at last demand compensation or insurance, and they are very like to do it when we are least in the condition to refuse their demands or resist their excesses.

THE SCUTTLING OF THE SHIP "SEVERN." — The prisoners Holdsworth, Berwick, Dean, and Webb have undergone a final examination at the Mansion House, before Mr. Alderman Finnis, on the charge of casting away the ship *Severn*, with intent to defraud the underwriters of £18,000, insurance effected on the ship and cargo. Four additional witnesses were examined. Two adduced evidence showing that Holdsworth and Berwick were at Newport together before the sailing of the *Severn*, evidently superintending business together, up to the vessel sailing; Messrs. Douglas and Lupton, insurance brokers, proving effecting insurances at Lloyd's on the *Severn*, as well as the London and Caledonian Marine offices, and in the Friend-in-Need office. Mr. Lupton received his instructions from Holdsworth at Messrs. Smith and Simpson's office in George-yard, Lombard-street. This closed the case for the prosecution. The prisoners were then committed to Newgate there to await their trial at the February sessions of the Central Criminal Court.

THE LOSS OF THE SHIP "WESTMINSTER."—It is to be hoped that when the new China and Japan mail route *via* San Francisco is opened, our transatlantic friends will be enabled to give us something better, in the way of telegraphic news than a *rechauffe* of intelligence published in London six weeks back. The loss of the ship *Westminster*, bound from Shanghai to London, on the Pratas shoal, the capture of the wreck by Chinese pirates, and the rescue of a portion of her crew by the ship *China* and gunboat *Osprey*, were all duly recorded in the *London and China Telegraph* of the 28th November. By way of a bit of startling news, however, the Atlantic cable now brings us the following telegram:—"The ship *Westminster*, from Calcutta for London, was captured in the Pacific Ocean in September by Chinese pirates. A portion of the crew were murdered, and the remainder were set adrift, but were subsequently rescued." And this piece of absurdity is reproduced by most of the daily papers in a paragraph headed "Chinese Pirates." It is hardly necessary to point out that if the *Westminster* had been going from Calcutta to London, instead of from Shanghai, the Pratas shoal must have entirely changed its position, and the ship must have got several thousand miles out of her course, to give even a shadow of probability to these statements. Fortunately the news is so very stale that this entirely erroneous version can do no mischief.

The London & China Telegraph.

LONDON, FRIDAY, JANUARY 11, 1867.

—o—

THE EAST INDIA TELEGRAPH COMPANY.

WE have already had occasion to notice the arrival in China of Dr. MACGOWAN as commissioner of a company which proposes to construct lines of telegraph to connect the treaty ports on the coast. We have now received from New York the prospectus of the "East India Telegraph Company," incorporated by Act of Congress, which announces the immediate commencement of operations. The authorised capital of the company (which, being American, is *not* "limited"), is $5,000,000, in $100 shares; and we understand that the scheme will shortly be formally introduced in London, as a considerable quantity of the stock is said to be held here, and it is proposed to place a further portion in this market. The names of some English merchants will shortly be added to the board of directors, and the board of local management in China will also be revised in order to secure the moral support of all the treaty Powers.

The prospectus sets forth that owing to the rapid progress made with the Russo-American Telegraph, only some 850 miles of wire are now needed to complete the direct communication between Peking, New York, and San Francisco; and that a line connecting Peking with the treaty ports will thus at no distant date place them all in direct communication with the whole of the Western World. It then proceeds to show that when the English line of telegraph to India is extended to Canton, the company will have under their control two distinct lines of communication with Europe and America. And until these missing links are supplied, it is assumed that there will be ample local employment for the system of lines which are to be commenced immediately, starting from Canton, and touching successively at Macao, Hong Kong, Amoy, Foochow, Ningpo, Shanghai, Nanking, and Peking. The entire distance to be thus traversed is estimated at 1,435 miles, and the subsequent extension to Kiachta at 850 miles. There will also be branch lines to Newchwang and Kiukiang. The prospectus states that no difficulty is apprehended in carrying out the proposed works, as an exclusive right has been granted to this company by the Chinese Government, and men and materials are already on the way to commence operations. It will be observed, however, that beyond this we have no record of any active progress being made, and whether the undertaking will ever be successfully achieved still remains a matter of uncertainty. The *New York Herald* has the following remarks on this project:—

A company has been formed—"The East India Telegraph Company"—in this city, under the energetic action of Mr. Perry McD. Collins, the original projector of the Russian-American Telegraph and the well-known Amoor River explorer, to extend branches of this line to China and India. The privilege of establishing a telegraph along the coast of China has already been obtained from the Chinese Government, and efforts are now being made to obtain the further privilege of carrying it into the heart of the Celestial empire. The parties engaged in the enterprise have reason to believe that they will soon be able to extend the telegraph among the hundreds of millions of Chinese, and to Peking itself. The Chinese merchants of San Francisco have taken the deepest interest in the matter, and have memorialised the Government in China to favour it. When this network of telegraphs shall penetrate, as it doubtless will soon, the four hundred millions of people in the "Flowery Kingdom" and the other vast populations of Asia, what a revolution will be produced! The annual external commerce of Eastern Asia is estimated at sixteen hundred millions of dollars. This enormous amount will be vastly increased under the influence of the telegraph, and Americans may reap the greatest advantage from it. The old barriers of exclusiveness and separation among the races and nations of mankind will be broken down, the highest civilisation will spread over the whole earth, and the prophetic era of universal brotherhood may be realised. At all events this is a wonderful age of progress, in which the telegraph is a mighty power, and it would hardly be safe to conjecture as to how far we may go or what may yet be performed by the genius of man and modern science.

THE FRENCH KOREAN EXPEDITION.

(FROM OUR PARIS CORRESPONDENT.)

The *Moniteur* left us all in the dark concerning the expedition of Admiral Roze until you published the unpleasant news which reached you by way of Kiatcha, then only, on the 28th December, the official journal gave the October and November accounts of the affair with considerable details. It appears that the squadron consisted of one frigate, two screw corvettes, two despatch boats, and two gunboats, and that the Admiral took up his position on the 13th of October before the island of Boisee, eighteen miles from Kanghoa, and, on the following day, the gunboats towed the boats containing the marines belonging to the squadron and a detachment of marine fusiliers from Yokohama, but no numbers are given, entered the Salt River, and encamped without meeting any resistance at about three miles from Kanghoa. On the 15th a reconnoitring party headed by Captain d'Osery reached a fort which commanded the town, and was there received by a well-sustained fire of musketry and of two small guns; in a few minutes however, the Koreans fled and the fort and one standard remained in the hands of the French. On the 16th the Admiral arrived with all his forces in front of the town, which is surrounded by a crenulated wall more than twelve feet high. When about a hundred yards from the chief gate they were received with a smart fire, but the wall was quickly mounted and the place taken. The magazines are described as immense, and containing ten thousand muskets and ammunition of all kinds; when an inventory was made it appeared that there were eighteen chests containing silver in ingots and official documents. The Admiral then issued a proclamation stating that he came to seek redress from the Government but that the people would not be molested. The blockade of the river of Seoul, says the *Moniteur*, and the capture of Kanghoa, must produce a deep impression on the Korean Government, for the town, situated at the embouchure of the river commands the chief road by which the capital receives its provision of rice and other articles. On the 19th the Admiral received a letter from the King, who inquired what satisfaction the former demanded in the name of the Emperor his master. On the 22nd October Admiral Roze was still in Kanghoa waiting for interpreters from Shanghai.

Later despatches, dated 6th November, state that a few days after the negotiations had taken a favourable turn, and the news of the results, "up to this time favourable," had produced the best impression in the various European settlements in China. The first negotiations, we are told, were retarded by the fact that the interpreters with Admiral Roze only understood current Chinese and not the Mandarin tongue used in Korea for official purposes. A corvette was therefore despatched to Shanghai as stated above. Nothing is said about the unfavourable news received in England, though it is difficult to conceive that the Imperial Government should have been kept in the dark. Some of the Paris journals insinuate that the London papers seem much delighted with the rumours of defeat, but we do not know where they found any evidence of such a feeling, especially as the despatch by way of Kiachta expresses the unfortunate effect of the news as regards European prestige. The *Moniteur*, and after it the other Paris journals, have reproduced the account which appeared in the *London and China Telegraph* of the 13th of December, and in so doing bear evidence against the insinuations mentioned above, for the concluding paragraph runs as follows:—"This act of piracy of the Koreans has led the English journals of the Far East to desire that France may punish severely the natives of the peninsula for the massacre of our missionaries."

THE TEA TRADE.*

THE writer of an article in the *Produce Markets Review*, in reviewing the course of the market for the past year, recommends that the Chinese should themselves consign to London direct. This would of course have the effect of abolishing the

* The demand for our last issue having exceeded the number printed, we reproduce this article in order to supply orders.

Digitized by Google

China firms now engaged in the trade, it would be an unprecedented thing in almost any trade, and certainly not one suited to the interests of English merchants generally. If the native owners and growers of the produce of India and China adopt such steps, it is certainly bringing trade to a curious pass. No doubt great blame is to be attached to the representatives of houses in China who allowed such prices to be given, and it is of the last importance that such mistakes should not be repeated; it must however be remembered, that these high prices have been mainly produced by the prices given by the London dealers last year. This has caused immense ruin to the trade, and has of course increased the difficulty with the Chinese holders for the next year, as they will come with the same story when the season opens, about high prices, short crops, &c. We quite agree with the statement that all the information gained by our merchants in China as to the real condition of things "up country" is unreliable and to a great extent a pack of lies; they are not blind to all these dodges and certainly do not put the faith in them which the writer assumes. We can quite appreciate the intentions of the writer, which are simply to put an end to the late high prices and consequent losses; and we can assure him that he will be able to buy on pretty well his own terms if the competition between the foreign houses in China ceases, seeing that no man more appreciates the nimble dollar than a Chinaman. They are very averse to "consigning," and will only do so under peculiar circumstances, involving other advantages from the firm through whom they ship. Independent of the high rates given in England last season, the buyers in China for the present one had before them the expected increase of consumption, the total estimated at twelve million pounds a month; and the consumption with the export has actually averaged this year about eleven and a-half million pounds, while the export from all China in last season was only about 115 millions, and for this season, according to the latest accounts, it will not exceed 120. This combined with the fact that orders had been sent out to buy on Russian and other account at extreme limits, caused the high prices we have had so seriously to lament. A great deal of the mischief is caused by the keen competition for the first chops which come to market, and the houses who are acting on commission, in many cases outbid the merchants operating on their own account, and once the price is conceded it is most difficult to obtain any reduction. It is quite evident that there is plenty of tea for every operator in China if they would only wait, but of course they cannot be all supplied at once; and the Chinese seeing the great avidity which exists to get off the first clipper ships, would be very soft indeed if they did not hold out for extreme rates. This haste to get off the ships is at the root of the evil. Instead of sweeping away the China merchants, we say sweep off the commission orders, and the credits granted by brokers and others to Tea tasters and people of no means. Leave the trade to those who properly represent it, and they will manage it to their own profit and to the advantage of the trade and consumer at home. The prices lately ruling are not low except by comparison, they are much higher than those ruling ten and fifteen years since, and with the large increase in production in China it is only fair to assume that the cost is less and not more now than then. An opinion, we know, obtains in Mincing-lane that prices will rise at the end of the present month. The importers are holding off, and rates are already 1d. higher. We shall be curious to watch the result, for in the present condition of the market there is opportunity for speculating on the deliveries and arrivals for the next few months. There is certainly room for doubt on the subject whether the trade will not be disposed to increase their stocks, while importers will increase their demands as a natural response to such a movement, and then comes the point,—will the dealers give in? Another change in the tea trade is also talked of, which is a reduction in the prompt from three months to one. This is partly owing to the proposed alteration in the usance of bills drawn in China against shipments, which it will be remembered the banks notified would be from the 1st instant, only purchased at four instead of six months' sight. To attempt this alteration would be simply transferring the financial difficulty to the buyers, which would restrict business, and soon tell against the importer.

THE TANJONG PAGAR DOCK COMPANY AT SINGAPORE.

By the last mail we learn that this company's premises are in a forward state, and the dock will be ready for opening in September next together with an extensive machine shop. During the past few months the wharves have accommodated shipping to a very considerable extent, and the net income as a return for the outlay is already equal to about £10,000 per annum. The wharves are connected with the town by a good road and a line of telegraph. Railway communication is also contemplated.

There are two distinct schemes involved, 1st, Wharfage and storage accommodation for coals and general merchandise; 2nd, A graving dock capable of receiving the largest merchantmen, and machine shops for effecting the repairs required by steam vessels. More than 750 feet of wharfage is now completed, and forms the frontage to coal sheds for upwards of 10,000 tons of coal, and warehouses for the storage of produce and manufactured goods.

The charges to vessels for the use of the wharves, which are to be fitted with every appliance for the rapid loading and discharge of vessels, are about 1s. per ton on merchandise, and 6d. per ton on coal, and the cost of transit to the town is no more than the boat hire incurred from the open roadstead. Considering that vessels are sometimes detained in the roads two months in unloading and receiving their homeward cargo, a considerable saving to both shipowners and merchants is effected by this company. The works are all under the management of Mr. W. J. Duport, late resident engineer of the Birkenhead Docks, and are being pushed forward rapidly.

AN embassy from Japan, consisting of 19 persons, of whom two are ambassadors, ten officers, secretaries, and interpreters, and seven servants, has arrived at Paris, *en route* to Berlin and St. Petersburg, and thence to the United States. These commissioners will not remain in France more than a short time at present, but are expected to be in Paris for the opening of the coming Exhibition.

WE have reason to believe that the Stamp Act introduced by the Governor of Hong Kong, which has formed such a fruitful theme for discussion and dissatisfaction, will receive the sanction of H.M.'s Government, as also the Junk and Harbour Ordinance. Sir Richard MacDonnell will of course be gratified at this result; no doubt the opposition will vanish when the measures get into working order, and any vexatious clause removed by the Governor.

THE Colonial Statistics of 1864 have been published, and *The Times* of the 9th inst. gives some interesting extracts from the report of Sir Hercules Robinson, the Governor of Ceylon. The detention in the publication is owing to the non-arrival of the Australian reports. We trust that the Colonial-office will in future publish these returns as they are received.

WHEN noticing the "Hong Kong Garrison" in our last issue, we omitted to state that permission had been granted to the local authorities to raise a Special Chinese Corps. If these Chinese are used for keeping guard over stores, &c., it will be on the principle of setting one thief to catch another.

MR. G. T. RICKETTS, the newly appointed Consul for Manila, proceeded to his destination by the last mail.

COLONEL ORD, C.B., the Governor of the Straits Settlements, proceeds to Singapore by the mail of 4-10th Feb.

CAPTAIN THOMAS BLACK has been appointed Superintendent of the P. and O. Company at Southampton, *vice* Mr. Davidson, who resigns the service through ill-health.

Literature

Japanese Odes, with Translations; being Stanzas by a Century of Poets translated into English. By F. V. DICKINS, M.B. London: Smith, Elder and Co.—This little volume embodies a praiseworthy attempt to bring to the knowledge of the English public a collection of lyrical stanzas so popular among the Japanese that they are in truth "familiar in their mouths as household words," and are committed to memory even by young children, just as are our own time-honoured but invariably idiotic nursery rhymes. These poems appear to have an antiquity of from 600 to 1,000 years. They do not claim to represent the highest class of Japanese poetry, but are simple metrical renderings of pleasing sentiments, generally of a descriptive or amatory nature; and viewed in this light are well worthy of perusal, especially by those who take an

Digitized by Google

interest in the poetry of the East. Translations of verse in which neither the beauty nor the vigour of the original is sacrificed to the pedantry of the translator are very rare, and in this respect the work before us deserves high commendation; for without any attempt to preserve a uniform metre a truthful, pleasing, and rythmical version has been produced of each ode. An appendix contains the text in Japanese, a literal rendering of each ode in English, and an index so copious that it might have been more appropriately termed a glossary. In his preface the translator pays a graceful compliment to Professor Summers, to whose aid he avows himself greatly indebted. The volume is got up in very characteristic style.

In general Literature there are few additions to note. In History and Biography, Mr. Espinasse (the successor, we believe, of Mr. Hannay, editor of the *Edinburgh Courant*) publishes the first volume of a new *Life of Voltaire*, to be completed in 3 vols.; Mr. Fox Bourne gives us two volumes devoted to *Memoirs of Great English Merchants*, from early to recent times; and Mr. John Bond, a *Handy Book of Rules and Tables*, for Verifying Dates of Historical Events. In Geography and Travel, Lady Herbert narrates, in one volume containing 15 illustrations, her *Impressions of Spain in* 1866; Mr. Thomas Hodgkin publishes a *A Narrative of a Journey to Morocco in* 1863 *and* 1864, with geological annotations; Mr. J. MacGregor follows up his Rob Roy adventures with a new volume entitled *The Rob Roy on the Baltic*, which is a narrative of a canoe cruise through Denmark, Schleswig-Holstein, the North Sea, and the Baltic, with numerous illustrations, maps, and music; Mr. C. R. Weld, who is an annual contributor to this section of our summary publishes a volume descriptive of *Florence, the New Capital of Italy*, the result of a recent sojourn there; under the title of *Yesterday and To-day in India*, Mr. Sidney Laman Blanchard republishes from "All the Year Round" and other publications a number of sketches, chiefly of Anglo-Indian life; and we find a new volume of Oriental travel, entitled *My Pilgrimage to Eastern Shrines*, by Eliza C. Bush. In Fiction we have a new novel by Mr. George Meredith, entitled *Vittoria*, in 3 vols.; also, *The Clives of Burcot*, by Hesba Stretton, 3 vols.; *The Fortunes of Fairstone*, by R. W. Baddeley, 3 vols.; *A Woman's Confession*, by Lady Campbell, 3 vols.; *My Sister Dagmar*, a tale, by C. A. M. W.; and *Great Hartefield*, a story in 1 vol.

Messrs. Longmans and Co. will publish in a few days, *The Wild Elephant, its Structure and Habits*, with the Method of Taking and Training it in Ceylon, by Sir J. Emerson Tennent, with woodcuts.

Messrs. Smith, Elder, and Co. have re-issued a large portion of their "Cornhill Gallery" of last year in three separate sections, each comprising the works of Mr. Millais, twenty-nine designs; Mr. Leighton, twenty-five designs; and Mr. F. Walker, twenty-seven designs, as drawn on wood for the "Cornhill Magazine," to illustrate "Framley Parsonage," "The Small House at Allington," "Romola," "The Adventures of Philip," &c. By inserting fragments of the texts to which the designs are applicable their interest is greatly increased.

Naval and Military.

The Rodney, 78, 500-horse power, Mr. W. H. Harris, master-in-charge, will be ready for commission next month, when she will proceed to China, as the flagship of Vice-Admiral the Hon. Sir Henry Keppel, K.C.B., relieving the Princess Royal, which returns to England.

The Royal gun factories at Woolwich are engaged night and day with orders now on hand for the present financial year 1866-7. The sum required for the department in the estimates of the ensuing year will be about £600,000.

The following vessels have been ordered home from the stations named:—Sutlej, 35, 3,066 tons, 500-horse power, Capt. T. P. Coode, flag-ship of Vice-Admiral the Hon. J. Denman, Commander-in-Chief of the Pacific squadron; the Barossa, 21, 1,700 tons, 400-horse power, Capt. H. Boys, China: the Curaçoa, 23, 1,571 tons, 350-horse power, flag-ship of Commodore Sir W. S. Wiseman, C.B., Australia; the Scylla, 21, 1,467 tons, 400-horse power, Captain R. W. Courtenay, China; the Cossack, 20, 1,296 tons, 250-horse power, Captain R. D. White, Mediterranean; the Eclipse, 4, 700 tons, 200-horse power, Commander E. R. Fremantle, Australia; Osprey, 4, 682 tons, 200-horse power, Commander W. Menzies, China; Coquette, 4, 677 tons, 200-horse power, Commander A. G. R. Roe, China; Rapid, 11, 672 tons, 150-horse power, Acting-Commander W. B. Stubbs, Cape of Good Hope; Royalist, 11, 669 tons, 150-horse power, Commander H. E. G. Earle, North America; Shearwater, 4, 669 tons, 150-horse power, Commander T. E. Smith, Pacific; Pantaloon, 11, 574 tons, 150-horse power, Commander G. L. Sullivan, East Indies; Snipe, 5, 431 tons, 80-horse power, Commander H. A. Trollope, West Coast of Africa; Pandora, 5, 426 tons, 80-horse power, Commander E. Stubbs, West Coast of Africa.

Her Majesty's iron-clad ship Northumberland, 26 guns, 6,621 tons, 1,350-horse power (nominal), which arrived in the Medway from the Victoria Docks, had been inspected by Vice-Admiral Sir Baldwin W. Walker, K.C.B., Commander-in-Chief at the Nore, at her moorings in the harbour, where she will remain until the officials at Devonport-yard are ready to receive her. There is comparatively little to be done in the way of completing her for the pennant, and an expenditure of about £5,000 will render her complete to proceed to sea. During the run round from the Thames her engines, which were in charge of Mr. Anderson, representing Messrs. Penn and Sons, the makers, worked with remarkable regularity and smoothness. The new machinery for mounting and dismounting heavy guns is to be tested on board the Northumberland.

The following promotions in the corps of Royal Marines Light Infantry have been announced at headquarters, Chatham:—First-Lieut. and Quartermaster W. G. Hale, of the Chatham Division, to be Captain, and appointed to the Woolwich Division, vice Capt. J. C. Travers, who retires on half-pay, that officer having been appointed paymaster of the Woolwich Division; Second Lieut. H. A. Peake, of the Portsmouth Division, to be First-Lieut., and appointed to a division to be hereafter named.

An order received at Chatham garrison directing *Lieut. H. P. Lee*, Royal Engineers, to be held in readiness to embark for *China*, and Assist.-Surgeon J. V. Sedhall, M.D., to proceed to the Bermudas with the detachment of Royal Engineers under orders to embark for that station, Ensign A. W. Mansey, 2nd West India Regiment, has received orders to embark for the Bahamas.

A circular memorandum has just been issued from the Horse Guards, by order of his Royal Highness the Field Marshal Commanding-in-Chief, by which the provisions of circular No. 106, dated the 15th of February, 1861, and circular No. 186, of the 28th of February, 1862, for the recalling from the half-pay all officers able to serve on full pay, and for those on the half-pay who were not fit for service to retire from the service, if they so wished, by the sale of their commissions, are, with the concurrence of the Secretary of State for War, suspended until further notice.

"We understand," says the *Army and Navy Gazette*, "that the Lords of the Admiralty have informed Mr. E. J. Reed, the chief constructor of the navy, that it is their lordships' intention to increase his salary, and to provide for his being placed on the highest grade established in the public service with reference to his superannuation whenever his health or length of service may induce him to retire. It will be gratifying to Mr. Reed and his friends to know that their lordships accompanied the announcement of these marks of their favour with a very handsome acknowledgment of the manner in which the chief constructor has hitherto discharged the important and onerous duties attached to his office."

The Rapid, 11, screw sloop, 672 tons, 150-horse power, Commander W. B. Stubbs, arrived at Spithead from the Cape of Good Hope station, and afterwards went into Portsmouth Harbour to coal and land a seaman who had broken his leg, having received orders to proceed round to the eastward to dismantle and pay out of commission. The Rapid sailed from Simon's Bay on the 21st of October, arrived at St. Helena on the 4th of November, and sailed thence on the 6th; arrived at Ascension on the 12th, sailed again on the 15th; arrived at Sierra Leone on the 25th, and sailed thence again on the 28th. As unarmoured sloops weakly built of wood and of small engine power, both the Rapid and Coquette will most probably be broken up after being placed in the reserves.

The Coquette, 4, screw gun vessel, Commander Arthur G. R. Roe, 677 tons, 200-horse power, arrived at Spithead on the 8th inst., from China, and is ordered into Portsmouth Harbour to dismantle and pay out of commission. She sailed from Singapore on the 4th of September, passed Anjer on the 13th, and arrived at the Cape of Good Hope on the 21st of October. The Cape was left again on the 31st of October, St. Helena reached on the 15th of November, and left again on the following day, arriving at Fayal on the 22nd December, and sailing thence on the 24th.

The old line-of-battle ship, *Belleisle*, lent for some time past, and moored in the Thames, off Greenwich, as a cholera hospital ship, is ordered to be removed to Sheerness, being no longer required for that purpose. A short time ago she was run into and severely damaged on her starboard quarter by a passing steam-vessel.

Orders have been issued by the Admiralty for the immediate commencement at Portsmouth of two new vessels of the same dimensions and design as the *Danae*, of two more gun vessels from the drawings of the *Ringdove*, and of three gunboats to be driven, like the *Ringdove*, with twin screws. The last are to be on the plan which has been so successfully followed for some time on the Thames by the Messrs. J. and D. Dudgeon, the constructors of the machinery of the hydraulic gun vessel *Waterwitch*. The two vessels to be built on the lines of the *Danae* will be named the *Sirius* and the *Dido*. Their tonnage will be each 1,268, and the nominal power of their engines 350-horse. The two vessels to be built on the *Ringdove's* design will be named the *Magpie* and *Swallow*, and will be or 663 tons each, propelled by twin screw engines of 160 nominal and collective horse-power. The three gunboats, the *Cracker*, *Elk*, and *Avon*, will have each a tonnage of 463 tons and engine power of 160-horse power nominal, driving twin screws. They will be fitted with the engines of the old 60-horse power gunboats of Crimean date, which have been laid up at Haslar since the breaking up of the rotten hulls of the vessels. The smallest of these vessels will carry, at the least, one of the new 6½-ton rifled muzzle-loading guns.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, JAN. 7

The gloomy, eventful, and ominous year has passed away, and indeed there is but little to which we, glancing back over that year, can recut with unmixed satisfaction. We began it under a Liberal Government, we ended it under the rule of a Conservative Ministry; and a great many measures that were proposed by the Liberals for the welfare of the colonies were frustrated in consequence of the selfish and sinister influences of the Conservatives. As well at home as abroad, the curtain of the year falls upon great events—the period is one of conflict and transition in both hemispheres. But it is not for me to trouble your readers with a review of 1866, that perhaps would be long enough to be tedious and that scarcely could be sufficiently detailed to be instructive. My duty is to relate the facts that have occurred since my last letter, that I wrote whilst Parliament was discussing some bills of mere local interest. The last discussions in the Second Chamber were only remarkable for the attempt of Mr. Fransen van de Putte to furnish the Government with a political *echec*, when the Bill upon the construction of the railway net was brought into discussion. Notwithstanding the endeavour of that member to induce the Chamber to decide that only a previous credit should be granted to the Government, failed, it was of high importance to see that Mr. Thorbecke and his friends supported the proposal. This was the first act, by which was shown that agreement prevailed once more between these two statesmen. You will remember that the dispute between them caused the miserable position in which we now are. I need not say that the Conservatives, seeing the approaching union of the two factions of the Liberal party, were in the highest degree incensed, and they vented their indignation

Digitized by Google

when the Cattle Plague Bill was brought forward. They attacked Mr. Thorbecke, who in their rage was accused of being the only sole cause of the epidemic that still prevails in our country, but not so severely as some weeks ago. When this stupid debate was at last closed, the Second Chamber took the Christmas recess, and will not meet again before the 15th of February. The sittings of the Upper House were still less important; the members seemed only to have met to approve of all the Bills that had passed in the Second Chamber. There was but one question of importance, viz., when the Ministry was interpellated upon the question of the Scheldt. You will remember that the dispute about the damming up of that river arose from the wish of Holland to close up a useless mouth of that stream to unite the Province of Zealand to the continent by a railway, the construction of which is already considerably advanced. The Belgians pretend that this measure is injurious to the navigation of the river, notwithstanding that the report of the mixed commission of Dutch and Belgian engineers proved the contrary. Their objections are due to the fear that Flushing, once in direct communication with Germany, will injure Antwerp, to which town the Belgian Government will make some concessions to restore the peace between the inhabitants of that town and the Government. The Dutch Government replied that it was free to carry out on their own territory such works of embankment or weirage as their interests might counsel, and that it only was obliged to preserve the existing waterway, or to replace it by another as good or better. This stipulation is fulfilled by the opening of the new South Beveland Channel, which can be passed by ships of the largest tonnage. The Belgian Minister maintained his opinion even after the above-mentioned report was published, and he proposed that foreign Powers should send their engineers to the spot, thus providing on impartial and disinterested arbitration. Against this demand our Government protested, whereupon the Belgian Minister Rogier, when questioned in both the Belgian Chambers upon the matter, condemned the attitude of our Government, which, however, was supported by the greater part of our M. P.'s. In one of the last sittings of our Upper Chamber, the Minister stated that our Government had fully maintained the rights of the Netherlands, which could not accede to the unjust requirements of Belgium. He protested against the opinion of the latter State, that it alone could demand arbitration in this question, the less now that the subsequent investigations of Dutch and Belgian engineers proved the full rights of the Netherlands, and that the proposed embankment would even prove advantageous for the Western Scheldt. It is undoubtedly very remarkable that nothing is published by the Belgian papers, so that in that country the greatest ignorance prevails about these facts. In the meanwhile England and France have acceded to the requirements of Belgium. The British Cabinet appointed Mr. John Hartley to be member of this international commission of engineers, and France appointed Mr. Gosselin. The Prussian Government, however, declined still to send an engineer and the *Kolnische Zeitung* told us that it will not appoint, before our Government will have given its consent, that this commission should make investigations. This, however, seems not to be the real cause of the hesitating attitude of Count von Bismarck; I rather believe that he will oblige our King in that way to make some concessions with regard to the Luxemburg question, that still is unsettled. It is not yet decided if this Grand-Duchy will form a substantial state or that it will be involved in the North-German Confederation. I fear, that at last, the plans of Prussia's premier will triumph, now that the political parties in that unhappy Luxemburg, the Grand-Duchy of our King, are so divided that the greatest disharmony prevails. To re-establish order the Prince-stadholder was even obliged to threaten that he should leave the country, the independency of which he could not any longer warrant, when the Liberal opposition did its utmost to trouble the public order. A well credited rumour says that it will not suffer an investigation. I need not add that the good harmony between our country and Belgium is very much threatened by the question.

The Queen has met with an accident. While walking from her own palace to that of her son, the Prince of Orange, she slipped upon the snow, and fell with such violence that she became insensible. A soldier who was on the spot raised the Queen, and one of the King's aides-de-camps having hastened from the palace, they carried her into the royal apartments. It is hoped that this fall will not lead to serious consequences

Our Parliament being closed till February the papers only occupy themselves with the section reports that are published now and then. They are, however, not of much importance, as the Liberals do not care to waste many words about old questions. But that the coming session will be one of great political excitement can scarcely be disputed. The air is too much surcharged with electricity, and the storm must be on the wing. The main question of course will be again the future of India, which will become the stumbling-block for the Cabinet. The section report upon this chapter of the Budget expresses only discontent about the instability and inconstancy of this Government, whilst the majority have the firm conviction that it is more than time that the just claims of the Indian population will be consented to. and that more should be done for the welfare of those colonies that made us a rich power.

Some time ago a parliamentary commission was named to investigate the international regulations about the drawbacks of sugar. According to the report now published the general opinion is that these regulations will prove to be disadvantageous both for the industry in Java and the exchequer. This judgment will be received undoubtedly with great satisfaction in India.

In one of the last sittings of the Belgian Parliament the treaty with Japan and that State was approved of, after the Minister of Foreign Affairs had stated that for the negotiations between Belgium and Japan, the use of the Dutch language should be preferred over the French.

In a former letter I made mention of the deplorable disturbances that prevailed at the Military Academy at Breda. Order is now restored; the ringleaders will be punished very severely; the organisation of the Academy will be altered totally; a military rule will be introduced, whilst the Commander will be replaced—as rumour says—by Lieutenant-Colonel A. C. A. Sckonstedt.

Negotiations are opened between our Government and that of Portugal to fix a commercial treaty between both these countries.

It is with much regret that I must make mention of the well credited, rumour that Sir Milbanke Huskisson, Ambassador of the Court of St. James at the Hague, will ask for his dismissal in consequence of his ill health, for the restoration of which he started some days ago for Nizza. His departure will be much lamented in the diplomatic circles of the Hague.

Last week a beautiful iron war steamer *Banka* was launched at the yard of Messrs. Paul van Vlissingen and Dudok van Heel at Amsterdam. This steamer, furnished with engines of 200-horse power, is destined for the naval service in India.

In a former letter I mentioned that the finances of the Crystal Palace at Amsterdam were *en decomfiture*. The most extraordinary rumours are in circulation about the future of that building, but the general opinion is that the managers will propose a plan by which the building will be saved for Amsterdam. It is a good sign that our capitalists are willing to make some monetary sacrifices for the erection of a monster hotel, next to the Crystal Palace.

A company has been established here under the name of the Zuid Afrikaansche Maatschappy, with a very large capital. The aim of this company is to extend the trade on the South African coasts. There is also a rumour that a company will be established for extending our commercial relations with China and Japan.

COMMERCIAL.

TEA.—Java is actually very low in price, but as the consumption is increasing and the production not very large an improvement of the quotation, may be foreseen China: The cargo, per Monarchy, from Foo-chow-Foo, is waited for; and before this ship will have arrived no transactions of any importance will occur. The rather nominal quotation for China tea now is as follows:—Boei, 70 to 75 c.; Congo, 85 to 160 c.; Souchon, 85 to 200 c.; Pecco, 130 to 250 c.; Hysantchin, 70 to 80 c.; Thunkay, 85 to 150 c.; Hysans, 95 to 160 c.; Uxim, 100 to 170 c.; Imperial, 110 to 200 c.

Stock Jan. 1, 1866 ..	4,075/4ch...	3.661/4ch...	3.937 4ch...	3.686 4ch.

COFFEE.—Very firm, with a good demand. The lots, Bangel and Tenger that were sold in the November auction of the Trading Company, at the rate of 37 to 38 c., are now willingly paid with an advance from ½ to ¾ c., the other parcels of that auction that were sold under 41 c. met also with a good demand, but holders decline now to operate without an advance of 1 to 1¼ c. Total stock on the 1st of January 302,249 b., against 230,212 b. in 1865.

RAW SUGAR as well as refined, closes firmly, but there are no transactions of any importance to report. The unsold stock of the Trading Company was on the 29th ult. 32,139 kranj. and 1,527 bales, whilst the stock in the first hand amounted to 5,917 kranjangs, the total stock in the docks was 32,058,059 kils. against 28,913,551 kils. in 1865.

RICE.—4,600 bales 2nd quality Java Table, floating per Luneburg, were sold at prices that did not transpire.

SPICES.—The market is dull, and there is neither any inquiry for speculation nor for consumption, except for Mace, which article met with a good demand. Offers of 100 c. for D, and 97 c. for E were not accepted, and nothing can be bought now under 102 and 98 c.

Stock of Spices on the 1st of January :—

	Unsold.	On warrants.
Nutmegs	271 casks.	... ... 4 958 casks.
Mace	50 „	... ... 826 „
Cloves	— „	... ... 3,127 „
Java Cinnamon ...	164 fard.	... ... 1,022 fard.
Pepper	983 bales	... ... 183 bales

JAVA TOBACCO.—The market opened this year with a fair demand for first quality, and prices will rise more and more now that it has transpired that the last crop will not be sufficient to meet the consumption of this quality. Of course this sort will be paid with higher prices when the 13,702 bales Java will be offered in auction on the 23rd and 24th of January. Ordinary qualities, however, are much offered, and in consequence thereof prices are declining. Stock 25,416 b.

MANILA TOBACCO.—The total stock only amounts to 200 b. in the first hand, the holders of which decline to sell without a considerable advance on the still very high prices.

BANCA TIN.—There is a fair inquiry at advancing rates. 1,000 slabs at f. 50¼, 900 do. at f. 50½., but at the latter price there are no sellers. 1,400 slabs Billiton and 600 slabs do. ex Aeolus were sold at secret prices; 100 slabs do. were paid with f. 50. Unsold stock, 64,534 slabs; on warrants, 131,109 slabs.

HIDES.—The transactions include 624 p. Sourabaya Rinder ex Van Arteveldе, and 903 p. do. ex Van der Palm, at prices that did not transpire.

JAVA INDIGO.—The transactions were since our last report very moderate, but the tone of the market remains very firm.

ARRACK.—The market is inactive, the transactions only include 65 casks ex favourite, and 79 do. ex Matheran. The 1st hand stock was only 843 casks, whilst 257 casks are floating. The nominal quotation is for yellow Batavia 190f.; white 200f., old quality, 260f. and higher.

MOTHER-O'-PEARL SHELLS.—There are floating from Macassar 2,000 piculs, but these parcels are *tel quel* sold already at extraordinary high prices. 300 piculs disposable are offered now at 140 cents.

RATTANS.—The 1st hands stock amounts to 13,000 piculs. The nominal quotations are 10f. to 13f. for Banjermassing; 8f. to 10f. for Padang, 9f. to 11f. for Koetie. Only 65 piculs ex van Arteveldt, and 90 piculs ex Vyf Vriendeu, were sold.

SAPANWOOD.—100 piculs, imported by the Trading Company were sold at very firm prices.

DRUGS.—Camphor meets with a lively demand and many transactions were done at still advancing prices; China cannot be bought be bought now under 86 c.; Japan not under 88 c. The stock of China in the first hand amounts to 1,580 chests, and of Japan to 1,428 tubs, whilst the Trading Company's stock is 2,522 tubs Japan. Of Lon

Digitized by Google

Pepper the stock is exhausted, the nominal quotation is 16c.; Cassia Lignea, 73 c.; Cassia Vera, 38c.; Japan Wax, there is want of stock and prices are consequently advancing, the same remarks can be made about Preserved Ginger.

COTTON MANUFACTURES.—The exports from the Netherlands to India duringthe eleven months ending November, 1866, were:—Undyed Cotton goods, 2,104,304 yards; Dyed goods, 256,950 yards: Printed goods, 634,966 yards, representing together a value of f.25,296,090. The exports of cotton manufactures from England to our colonies during the said eleven months, represented a value of f.14,896,272 against f.6,984,036 during the same period in 1865. The amount of the yarns and woollen and other manufactures, exported also from England to Java, during that period amounted to f.4,807,698.

MONEY.—The hope that the new year should bring any positive relief is not realised; there is no more activity now than before the old year had passed away. The transactions are, indeed, of very little importance. The tendency in foreign stocks, however, was rather more favourable, the low priced classes again being in greater demand. As well in the open market as at the Bank there was an abundant supply of capital, so that the Bank rate of discount was reduced ½ per cent. In the open market, however, the bankers are content with ½ to 1 per cent. under Bank discount. Dutch Two-and-a-Half per Cents., 56; Three per Cents., 67; Four per Cents., 87⅛; Trading Company, 137 to 137¼; Dutch Rhenish Railway, f.293½; Central Railway, 48; Spanish Two-and-a-Half per Cents., 32; Portuguese Three per Cents., 42½; Russian Five per Cents., 91½; ditto 1866, 85; Austrian Five per Cents., 43¾; Italian Five per Cents., 50¼; Netherlands Bank, 260: Netherlands Credit and Deposit Bank, 91; Netherlands India Trading Bank, 80.

'CHANGE.—London: 3 mo., f.11.67½; 2 mo., f.11.71; short, f.11.79. Paris: 3 mo., f.46.37½; 2 mo., f.46.50; short, f.46.80. Antwerp: 3 mo., 46.35; 2 mo., f—; short, f.46.70. Hambro': 3 mo., f.34.75; 2 mo., f.34.87½; short, f.35.10. Bremen: 3 mo., f.188.

Discount (Bank) bills, 4 per cent.; acceptances, 4½; open market, 3½ per cent.

The premiums for insurance of manufactures bound for India are altered as follows:—Manufactures in bales, 3½ per cent.; English: in tarpaulin or oil cloth, 3 per cent.; in chests, 3 per cent.; in tin plated chests, 2 per cent.

SHIPPING.—ARRIVALS.—Dec. 20, at Brouwershaven, from Batavia: Aeolus; at Zierikzee, from Batavia, Stad Delft; at Texel, from Batavia: Sourabaya Packet; Dec. 29, at Texel, from Batavia: Alcyone; from Batavia and Wynkoopersbay: Quatre Bras; from Batavia: Nagasaki; Dec. 31, at Texel, from Panaroekan: Willem and Carel.

DEPARTURES.—Dec. 25, from Hellevoet, for Singapore: Constance; Jan. 3, from Texel, for Sourabaya: Hendrika; for Java, via Cardiff: Vertrouwen and Tweelingen; Jan. 5, from Texel, for Batavia: Willemina and Clara, Ægidia and Pauline, Cornelia Adalfina, Gelderland, Jupiter, Kaap Hoorn; for Batavia, via Cardiff: Alblasserdam, Oceanus; for Singapore, via Liverpool: Almonde.

PASSENGERS OUTWARD.—For Java, per Jupiter: Messrs. Grolman and family, J. and P. Ahbema, M. Bock, A. T. Herman, P. H. Hagenaar, L. Blommestein, H. J. Flint. C. Dekker, P. H. Kok, Mrs. C. Dongen van der Meer. Per Willemina and Clara: the officer, J. C. Albrecht, W. Ouwel van der Sluis Veer and A. P. Varkerisser, and 124 soldiers. Per Ægidia and Pauline: the officer, Lieut. Eras, J. A. F. Cramer and J. F. D. Bruinsink, with 125 soldiers. Per Gelderland: Messrs. C. Caulbach and family, W. Trappen and family, Pistorius, H. Hoen, Huisman, and Bruinstede.

PASSENGERS INWARD.—From Java, per Alcyone: Mrs. van Struve and family, Messrs. Musquetier, van Loenen, Geinve, van Genderen and family.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JAN. 7.

In one of my last letters I mentioned the invention of a new gun by an armourer at Bremen, which was considered to be peculiarly adapted for arming vessels likely to be attacked by pirates. I am now enabled to give your readers some account of the trials that have been made, and which appear to be a great success. The new gun weighs about 4 cwt., the barrel being 3 feet 6 inches long, with a calibre of 2¾ inches; the charge is contained in a tin canister, with a wooden bottom, through which passes the fuse. The canister is filled with from 40 to 56 balls of a secret composition, which, on the explosion of the canister, scatter in all directions, and burn with an intense fire, emitting at the same time a suffocating gas. In the canister is also a small quantity—1-8th lb.—of explosive composition, which on ignition causes the cylinder to burst and scatter the balls. In the experiments that took place last week at Bremerhaven, the gun was loaded with a small charge (1-12th lb.) of powder at an elevation of 30 degrees, calculated for a distance of 300 yards, the culminating point of the parabola being 150 yards distant, the length of the fuse being calculated to cause the explosion when 50 feet from the target. In the trials made the average duration of the burning of the balls was 77 seconds, and they scattered over an area equal to a circle with a diameter of 21 feet. As experience shows that the Chinese pirates generally make their attack in calm weather, seldom approaching the vessel on the broadside, but usually from the bow, or rowing up in the ship's wake, such a gun, if mounted as a stern-chaser or in the bows, would do good service, and the advancing piratical junk must offer a fair mark to point at. The experiments were deemed highly satisfactory, and several Bremen shipowners resolved to arm their vessels with the new gun. Amongst others the ship *Lesmona*, fitting out at Bremerhaven for Hong Kong, has been supplied with the new gun and a good supply of the cartridges, in addition to her previous armament of six-pounder carronades throwing both full balls and grapeshot.

The Hamburg barque *Kali Maas*, Captain Kohn, hence to Hong Kong, obliged to put back with damage from stormy weather in the North Sea, has now completed her repairs and left this port on the 4th inst. for her destination.

The sharp frost of the last two nights, when the thermometer fell to 12 deg. Reaumur, or 5 deg. Fahrenheit, has created such quantities of floating ice in the Elbe that the navigation for sailing vessels is quite interrupted, and even steamers have great difficulty in working their way through. If the temperature continues as it is for two or three days more all navigation will cease.

Dispatches have been received at Berlin announcing the safe arrival of the Prussian steam corvette *Vineta* at Honolulu, where she was preparing to proceed without delay to China. The official *Staats-Anzeiger* states that the Prussian Envoy at Peking had received instructions to endeavour to persuade the Chinese Government to take energetic steps, and to obtain the immediate service of steamers for that purpose, even by chartering those disposable. There are, therefore, reasonable hopes of seeing the baneful institution of piracy in the Chinese waters within a short period effectually put down or at least reduced to a minimum.

The *Weser-Zeitung* publishes a letter from Yokohama of the 31st of October last, stating that the Prussian Consul at that port had succeeded in procuring permission for the Bremen ship *Johanne Marie* to load goods there, and it was hoped that in future it would not be so difficult to obtain this exceptional privilege.

Mr. Louis van der Spar, merchant at Point de Galle, to be Prussian Consul at that port, *vice* Sonnenkalb deceased.

COMMERCIAL.

COFFEE.—The market has been tolerably active, the demand extending more than usual to inferior qualities, the value of all descriptions being firm. Sales of the week 26,000 bags, about 6,000 of which were bought on speculation.

SUGAR.—On account of the holidays but very little business has been transacted, and there is no alteration to report in the quotations of either raw or refined.

RICE.—A good consumptive demand prevails for cleaned grain at former prices.

SPICES are quite neglected, twelfth cake and plum-pudding forming no part of the German Christmas holiday fare.

SPELTER.—The only sale this week was 3,000 centners for spring delivery at 14 marks 9 sch. Banco, but the market closes in a very firm condition, though inanimate.

DISCOUNT 3¼ to 3½ per cent., and money plentiful. The weekly statement of the Giro Bank shows the value of the silver bars in the cellars to be 18,009,326 marks Banco, against only 14,771,239 marks Banco in the beginning of December.

Monetary and Commercial.

All bills of Messrs. Dent and Co., which have come forward under special credits or against consignments by other parties have, we understand, been accepted. Opinion is about even as to their suspending or paying the dishonoured bills.

The anxiety relative to the position of East India and China firms has to a great extent subsided, and we have had no fresh difficulties since the opening of the year. With the extreme ease ruling in the money market (first class bills having been done at a fraction under 3 per cent.), we do not look for any further failures, whilst houses known to have made private arrangements in 1866 for carrying over their engagements will have the best chance afforded of recovering their position. Messrs. La Roche, Nainby, and Co., who were forced into the Bankruptcy Court, expect to arrange a compromise and go on again.

The sum of £720,000 will be paid out to the creditors of Agra and Masterman's Bank on the 15th, being the second dividend of 5s. The London and Westminster Bank will declare a dividend of 16 per cent. for the half-year, making, with the 14 per cent. paid six months ago, a total distribution of 30 per cent. for the year 1866. The reserve is to be increased from £450,000 to £480,000, and £45,939 will remain to be carried forward.

The first dividend of 6s. 8d. will be paid by the liquidators of the Commercial Bank Corporation, on all admitted claims, during next month. It is stated that the amount would have been 10s. but for the opposition of some creditors and shareholders at Bombay.

The dividend to be proposed at the half-yearly meeting of the Discount Corporation is 15s. per share, being at the rate of 7½ per cent. per annum on the paid up capital, leaving a balance to be carried over of £4,096 5s. 11d., from which it is proposed to appropriate 1,000 guineas to the directors as their remuneration for the past twelve months.

The Union Bank of London declared, at the half-yearly meeting on the 9th inst., a dividend at the rate of 15 per cent. per annum, and a bonus of 2½ per cent. for the half-year, being the usual rate of appropriation at this period.

At the forthcoming annual meeting of the Ocean Marin Insurance Company the following dividends will be recom-

Digitized by Google

mended by the board: 5s. per share by way of interest and a bonus of 20s. per share, payable on the 5th of February, besides the usual payment of 5s. per share on account of interest to July. A further sum of £10,000 is also placed to the reserve fund, thereby increasing it to £50,000.

Messrs. Scott, Bell, and Co., who failed in 1865, have now declared the first dividend of 2s. 6d. It is expected that the whole liquidation will be shortly concluded, as the disputed accounts have been nearly all arranged, excepting that with Messrs. Dow and Co., of Shanghai, which is in progress. The liabilities have been reduced from nearly £1,500,000 to about £230,000.

The agency of the Labuan Coal Company at Singapore has been transferred to Messrs. A. L. Johnston and Co., one of the oldest firms in the place. The re-organisation of the company may now be considered as accomplished.

In reference to the notice which appeared in our last as to the opening of the Agra Bank, we have now to announce that the establishment opened at the old premises in Nicholas-lane on the 7th inst. Mr. J. W. H. Ilbery will officiate as manager during the absence of Mr. Balfour.

Creditors of the Bank of Hindustan, China and Japan (Limited) are required to send the particulars of their claims to the liquidators by the 4th of February.

The biddings for bills on India took place at the Bank of England. The proportions allotted were, to Calcutta £198,630, to Madras £1,370, and to Bombay £153,850. The minimum price was fixed at 1s. 10⅜d. on all the presidencies. Tenders on Calcutta and Madras at 1s. 10⅜d. will receive about 65 per cent., those above in full; and on Bombay at 1s. 10⅜d. and upwards in full.

The Stock and Share Company for the sale of shares, &c., by auction is gradually affording the public a medium to buy or sell without recourse to the Stock Exchange and its arbitrary rules and prices. The following is a list of the sales on the 8th inst.:—

Grand Central Railway of Venezuela, £35 paid, sold at 5s. per share; London, Chatham, and Dover Railway, Metropolitan Extension C Stock, £500 paid, sold at £20 per cent.; Marseilles Extension Railway and Land Company (Limited), £20 paid, sold at £2 15s. to £3 per share; Ottoman Railway Company, £100 paid, sold at £24 to £26 10s. per bond; Royal Swedish Railway, £4 paid, sold at 12s. to 22s. per share; Varna Railway Company, £20 paid, sold at £4 2s. 6d. to £4 10s. per share; Alexandra Hotel Company (Limited), Hyde Park, £10 paid, sold at £4 10s. to £5 5s. per share; China Steamship and Labuan Coal Company (Limited), £20 paid, sold at £5 5s. per share; ditto, Debenture, redeemable 1st Jan., 1872, £50 paid, sold at £26 10s.; Confederate States Loan, 1864, $1,000 paid, sold at 23s. to 26s. per bond; Credit Foncier of Poland, Warsaw, 3,000 silver roubles paid, sold at £11 5s. to £11 10s. per bond; ditto, ditto, 150 silver roubles paid, sold at 24s. per bond; Dun Mountain Copper Mining Company (Limited), New Zealand, £1 paid, 1s. 4d. to 1s. 7d. per share; East India Coal Company, £10 paid, sold at 6s. per share; Gas Products Utilising Company (Limited), £8 paid, sold at £8 15s. per share; Liverpool and London Hotel Company (Limited), £8 paid, sold at 26s. per share; Martin's Patent Anchor Company (Limited), £4 paid, sold at 1d. per share; Palace and Burlington Hotel Company (Limited), £5 paid, sold at £2 per share; Star and Garter Hotel Company (Limited), £10 paid, sold at 24s. to 35s. per share; Tahiti Cotton and Coffee Plantation Company (Limited), £10 paid, sold at £5 to £5 5s. per share; Westminster Palace Hotel Company (Limited), £10 paid, sold at £5 10s. per share.

We have to report the following changes in commercial firms:

Mr. Sieveking has retired from the firm of Sieveking, Droop and Co., of Fenchurch-street.

Mr. J. Stevenson has retired from the firms of Stevenson, Peel and Co., of Manchester and Calcutta, and Peel, Stevenson, Jacob, and Co., of Liverpool.

The firms of Hyde and Jones, of Billiter-square; Cooper and Aves, of Leadenhall-street; and Dadabhai, Navroji and Co., of Great St. Helens, have dissolved partnership.

Messrs. Robinson, Fleming and Co. have announced that Mr. W. F. Malcoln, and Mr. H. Luke Robinson, son of their late partner, Mr. W. R. Robinson, have been admitted into their firm, which will continue under its old title.

Messrs. Jacomb, Hogg and Co. have announced that Mr. Frederick Waithman, who has for several years been associated with them, has been admitted partner in their firm.

A circular issued on the 1st inst., by Messrs. Baring Brothers and Co., announces that Mr. Thomas Charles Baring (nephew of Mr. Thomas Baring, M.P., and recently partner in the house of Ward, Campbell and Co., of New York), has been admitted a partner into their firm.

Messrs. Brown, Buckley and Co. have announced the termination of their partnership. Mr. Brown, the elder, died a few weeks ago. Mr. Buckley continues the business at 27, Fenchurch-street; Messrs. Seaton and Brown, jun., at 11, Great Tower-street.

Messrs Arles Dufour and Co., of Lyons, have announced the discontinuance of their London branch. Mr. Truninger, who has hitherto managed the business, will henceforth conduct it under his own name.

A circular from Messrs. Richard Gibbs and Co. notifies that Mr. Robert William Gibbs Weston, the son of their senior, has been admitted a member of their firm.

Mr. Rhys B. Griffiths, of the firm of Layton and Co., of Mincing-lane, announces his retirement from business. The house, with the introduction of Mr. Stansbury, the nephew of Mr. Griffiths, will continue operations.

Mr. Bremner who succeeded to the business of W. J. Alexander, for many years in the China trade, has formed a partnership with Mr. Henry Laycock, lately in the employ of Messrs. Dent and Co., China.

A new tea-brokering firm has been established at 14, Mincing-lane—Messrs. Percival and Co.—to carry on the business of Messrs. Mitchell and Aspinwall.

The amount of bullion by the P. and O. Co.'s steamer *China* from Southampton on the 4th inst., in gold, to Madras, £2,085 in silver, to Singapore, £1,970.

MANCHESTER MARKETS.

There is still a very slight demand for Yarns and Shirtings and prices are lower. Grey Shirtings 7 lb., 11s. to 11s. 6d.; 8¼ lbs., 13s. 6d. to 13s. 9d. Cotton Yarn: Nos. 16-24 at 1s. 6d. to 1s. 7d. Maddapollams, 4s. 10½d.; Long Cloths, 13s. 8d.; T-Cloths, 8s. 6d.; White Spot Shirtings, 14s. 6d.; Brocade do., 14s. 6d.

ARTICLES OF IMPORT.

TEA.—The year has opened with a fair demand; common to fair kinds of Congou show no change, but the prices for good teas rule in favour of importers to the extent of about 1d. to 1½d. This rise is chiefly owing to importers not offering their stocks; they have held back very much, and if the market is not supplied by weak holders who must realise a further improvement of 1d. or 2d. (on the best Congous) may be expected, but at these rates the imports will still show a heavy loss. Oolongs and Souchongs are in fair request, but Flowery Pekoes neglected. Scented teas are in moderate demand at about former prices. There is nothing new in Indian or Japan teas. Greens have met with a steady sale at about former prices. The statistics present a great increase in the imports, the total for the year being 139,308,000lbs. against 116,354,000 lbs. in 1865. The deliveries show a small increase; the total being 133,300,000 lbs. against 130,820,000 lbs.; the increase in home consumption being 4,200,000, but the decrease in export 1,600,000 lbs. Our stock being 89,605,000 lbs. against 80,599,000 lbs.

SILK.—Importers of the earlier arrivals of China Silk realised handsome returns, but a change soon came over the market in China when the news from home of a steady market and advancing prices reached them; and a rise, unparalleled even in Shanghai, ensued, until rates considerably in advance of London quotations were readily paid, and the Chinese, as in tea, came in for the lion's share of the profit. During the year the fluctuation in prices has not been great, say 15 per cent. at the utmost, and closing prices of the year are, in Chinas about 1s. to 1s. 6d. under the highest point, 31s. 6d. being now the value of best No. 3 Tsatlee, whilst the cost laid down here is 34s. The statistics for the past year are as follows: Imports: China, 26,141 bales in 1866, against 39,021 bales in 1865; Japan, 7,467 in do., against 11,730; Bengal, 8,450 in do., against 9,081. Total, 42,058 bales in 1866, against 59,832 bales in 1865. Deliveries: China, 30,573 bales in 1866, against 31,730 bales in 1865; Japan, 6,480 in do., against 12,222; Bengal, 5,519 in do., against 9,656. Total, 44,572 bales in 1866, against 53,608 bales in 1865. Stock, 31st Dec.: China, 14,594 bales in 1866, against 18,742 31st Dec. 1865; Japan 3,712 in do., against 2,777; Bengal, 5,491 in do., against 4,520. Total, 23,797 in 1866, against 26,048 in 1865. Japan Silk, owing to its short import, its generally mixed and inferior character, and the positive absence of suitable qualities from stock at certain periods, has commanded a less important position than usual; demand has steadily existed for the best and finest qualities only. Bengal Silk has been in even less general inquiry than usual; as customary with this Silk there have been moments when there were no buyers, and holders had nothing to do but wait; filatures have been—it is hard to understand why—neglected, or at the

Digitized by Google

best in small inquiry, notwithstanding the general absence of fine Silks, and the want of such; and prices show a lower average comparatively han any other Silk. Cantons call for special remark on account of the unusually large imports and good deliveries; this Silk has come exceedingly *apropos* for certain manufacturers, who have been free buyers at satisfactory prices; the Tsatlee reel of this Silk, when good, is in considerable favour for the continental markets. The stock of China Silk at the end of year was 15,192 and ,8,605 unsold, against a total of 26,948 bales in 1865, being a deficit of 2,251 bales. These figures include about 5,000 bales of Bengal.

CHINA SILK PIECE GOODS.—There was an increased import of Pongee Handkerchiefs in 1866, the figures beings, as compared with the former year, 3,005 pieces Plain against 2,504, and 4,858 Figured against 1,839. There were willing buyers at all times for the best qualities, and high prices were occasionally paid for choice handkerchiefs. The deliveries have been satisfactory, and the year opens with but small stocks, chiefly in importers' hands, and which will be offered in public sale on 9th inst. There is a fair prospect for good medium and extra qualities, and it may be remarked that Crimson is returning to favour, so that assortments may again contain a due proportion of that colour both in plain and figured. Black Silk Handkerchiefs have commanded very extreme rates on the few occasions of their arrival during the year; but the article is not one admitting of large regular import. Pongee Silk, "nil," none have arrived; the article is constantly being asked for. Damasks: The want of this valuable Silk is much felt. Probably no article of Chinese Silk manufacture has been more missed than this; an arrival of the good old-fashioned Crimson Damasks would be most welcome. Crape Shawls find steady inquiry, and the arrivals go off fatisfactorily.

COTTON.—Since our last report prices have been fully maintained at the previous advance. The business done has been comparatively small, owing to the close of the market during the Christmas holidays. In the week ended 29th December the quantity sold was 2,900 bales, out of which 50 bales fair China realised 10¾d. per lb. No Dhollerah was offered. From that date to the 8th inst. the sales have been 6,560 bales on the spot, and about 3,500 bales for arrival. The quantity sold on the spot included 100 bales fair China at 10½d. to 10¾d., and 320 bales Rangoon, of fair to fully fair quality, which realised 9½d. to 9¾d. per lb. Dhollerah was again absent from the market. Out of the quantity sold "to arrive." 610 bales China, August sailing, guaranteed of fair quality, sold at 10½d. per lb. The sales at Liverpool up to the 4th inst. amounted to 64,350 bales. Fair Dhollerah is quoted 12½d., being ½d. advance upon our last quotation. Telegraphic advices from New York to the 7th inst. place middling upland 35½ cents. During the twelve months ended Dec. 29, 1866, the total quantity of China and Japan cotton imported into Great Britain was 18,844 bales weighing 6,143,144 lbs., of which the consumption was 10,463 bales or 3,410,938 lbs., and the export 9,387 bales or 3,060,132 lbs. The stock in Liverpool on the 31st Dec. was 2,840 bales, and in London on the 4th Jan. 1,332 bales.

COFFEE.—Colonial descriptions have been in good demand at the advanced prices given in our last, extending in some instances to a slight further advance. At auction the offers of Plantation Ceylon were 133 casks, 21 barrels, 45 bags, which realised as follows:—Triage, 34s. to 49s.; fine ordinary, 75s. 6d. to 76s.; low middling to middling coloury, 79s. 6d. to 82s. 6d.; good middling bold, 85s. to 87s. per cwt. No business has been done in native, the only other offer at auction being 1,363 bags Manila, out of which 950 bags fine ordinary pale and good bold sold at 68s. per cwt. Privately a fair amount of business has been done in plantation, at prices similar to those realised at auction. The stock of Ceylon in London on the 31st December was 8,190 tons, and of Java, Manila, &c., 2,070 tons.

DRUGS.—Anniseeds: Small business has been done in China Star at 90s. Camphor: Of China, 200 cases have been sold at £7 2s. 6d., and 80 cases in lead at same price. Of Japan, the sales have been 100 packages for arrival at £7 10s. Galls: An advance has been established of 2s. 6d., and 200 cases China realised 62s. 6d. per cwt.

EBONY WOOD.—Of Ceylon 81 logs (9 tons) were bought in at £7 per ton.

HIDES AND SKINS.—Messrs. Dyster, Nalder, and Co.'s report for the past year states:—The import of East India Hides during the past year has been 2,656,524 Hides against 2,441,704 Hides in 1865, and 2,350,348 Hides in 1864. The sales during the same period have been 2,324,010 Hides, against 2,351,668 Hides in 1865, and 2,137,440 Hides in 1864. 150,417 Hides have been forwarded on owners' account, against 315,393 Hides in 1865, and 133,780 Hides in 1864. Leaving the present stock 420,823 Hides, against 283,148 Hides in 1865, and 580,781 Hides in 1864. Showing, as compared with 1865, an increase of import of 214,820 Hides, a decrease of of sales of 27,658 Hides, and an access of stock at this date of 137,675 Hides. Of Batavia and Singapore the import has been 45,726 Buffalo Hides, against 65,059 Hides in 1865, and 40,794 Hides in 1864. From Manila 8,998 Hides, against 725 Hides in 1865, and 675 Hides in 1864. Buffalo Hides met a dull trade during the first two months at a decline of ¼d. to ½d. per lb. on the closing rates of 1865, but this was recovered in March, and during April and May a brisk demand caused a further advance of ¼d. per lb. During June and July the trade was dull and the quotations again receded; but from that time there has been more inquiry, and the present prices are about on a par with those of December last. The sales of the month comprise 2,974 Penang and Singapore Buffalo Hides—Best 5½d. to 6d. per lb.; Seconds and Light 5d. to 5⅝d. per lb. 200 Manila Buffalo Hides at 4¼d. per lb. The stock consists of 5,267 Singapore and 4,331 Manila Buffalo Hides, against 10,874 Singapore, 3,974 Java and 625 Manila Buffalo Hides in 1865.

MANILA HEMP.—An improvement has taken place in this market, and the decline reported in our last has been recovered. The sales have amounted to 330 bales fair roping at £46 per ton with short prompt. Good roping is quoted £48 on same terms.

OILS.—Anniseed: 20 cases sold at 9s. 1d. Cocoa Nut: The market continues inactive, and the only sale reported, is of 30 tons Ceylon at £51 per ton cash.

PEPPER.—Black: The market remains steady; no reduction in prices has taken place, but the sales both at auction and privately have been in small quantities. In public sale 170 bags Singapore sold at 3⅛d., one lot 3¼d., and 387 bags Penang at 3d. to 3⅛d. per lb. By private contract, 900 bags Singapore and Penang were placed, the prices realised being, for Singapore, 3⅛d., and Penang (Trang sort), 3d. per lb. White: Market still quiet, and of 635 bags Singapore offered at auction, about 170 bags middling to good sold at 5⅛d., the remainder being bought in at same prices.

RICE.—Market extremely dull, and prices declined 3d. to 6d. per cwt. The only sale reported is of 6,000 bags Rangoon, at 12s. to 12s. 3d. per cwt., and 1,000 tons soft grain to be shipped from February to April, at 11s. for Rangoon and Bassein, and 10s. 9d. for Naemanzie.

RUM.—Of Penang, 21 puncheons sold at 1s. 5d., proof.

SUGAR.—The circular of Messrs. Carey and Browne states:—"The trade holding sufficient stock for their requirements mostly abstained from buying during the Christmas week, and consequent on the absence of speculative inquiry of any importance, the transactions reported were unusually limited. Since the holidays, a moderate disposition to buy has been observable, but business has been much interfered with by severe weather. No change in value has occurred, but the market appears to harden towards the close." At auction the following sales have taken place:—5,000 bags unclayed Manila at 25s. 6d.; 39,000 bags common to fair clayed Manila (duty 8s. 2d. to 9s. 4d.) at 29s. to 30s. 3d.; and 1,800 bags Penang at 30s. 9d. per cwt. Privately, 10,000 bags clayed Manila have been placed at 29s. 6d. per cwt. The stock of Sugar in London on the 31st. December, was, of Manila 32,230 tons, of Penang 1,360 tons, and of Java 20 tons.

SPICES.—No business has been done in any descriptions.

SAPAN WOOD.—Of Manila 25 tons were tons were offered and withdrawn. No sales or offers of Ceylon.

TERRA JAPONICA.—Of 1,412 bales common Gambier at auction, 812 bales were bought in at 20s. 6d., remainder in soft condition selling at 19s. 6d. to 19s. 9d. per cwt.; also 3½ tons loose at 18s. 6d. per cwt. Small transactions have taken place in cubes at 29s. per cwt. We are still without offers of Cutch.

TIN.—This market continues to exhibit great activity, and prices have further risen 20s. to 30s. per ton. About 300 tons fine Straits have been sold, the prices realised being £85 to £85 10s. for cash, £86 with one month's prompt, and £86 10s. for arrival. Banca is quoted at £87, being 40s. per ton advance on our last report.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £5 15s. to £6; nail rod, £7 15s. to £8 5s.; hoops, £9 2s. 6d. to £9 10s.; sheets, single. £10 to £10 15s.; Staffordshire bars, £8 to £8 10s.; rails, £6 to £6 10s.

STEEL.—Swedish keg, £15 15s. to £16.

COPPER.—Sheet and Sheathing, £88 to £91 per ton; yellow metal, 7d. to 7¼d. per lb.

TIN.—£87 for block; £88 for common bars. Tin plates, best charcoal I.C., 32s. to 33s.

LEAD, &c.—English pig, W.B., £22 10s. to £22 15s.; shot, patent, £23 10 to £24; sheet, £21 5s.; spelter, £22 5s. to £22 18s.; zinc, English sheet, £28; quicksilver, £6 17s. 6d. to £7.

The following is from the circular of Messrs. French and Smith:—Although at the commencement of the past year it was apparent we were to have a dear money market, yet no one could have anticipated the time of difficulty then before us, and the consequent heavy fall in price of metals generally during the year. Iron: The total collapse of the speculation in Scotch Pig warrants, and the ruin which it caused to all who were engaged in the combination, will be remembered for years. This speculation commencing at the end of 1865, when warrants were about 58s., reached its height at the end of April, 1866, when the price attained 82s., after which the fall to 52s. was very rapid, and at about this price it remained stationary for many months, the last few weeks it has advanced to 54s. 6d. which is the price to-day. Welsh has gone back during the year £1 per ton, Bars can now be bought at £5 15s. to £6. Staffordshire has receded about 10s. per ton during the same time. Copper: All the anticipations of a good trade in this metal for the year 1866 were disappointed, and the price went back to a point as low as can be remembered for 30 years. The smelters' quotations for Tough Cake have been as follows:—From 1st January to 15th January £106; from the 15th January to 22nd January £101; from 22nd January to 21st March £96; from 21st March to 30th April £91; from 30th April to 16th July £86; from 16th July to 27th August £81; from 27th August to 3rd December £86; from 3rd December to 24th December £81; 24th December £86. The market now looks well, prices are steady at quotations. A few second-hand parcels may be obtained at £83 to £84 for Tough Cake. Burra is quoted £87. Wallaroo, £86. Chili Bars £78. Tin: We began the past year with the following quotations: English, common, £103; Banca, £97; Straits, £94; but the price declined until in June Banca sold £78 to £79; Straits £74 to £75; the price remained with trifling improvement until the end of Aug., when Straits advanced to £85 with a little extension of prompt. This advance was, however, soon lost, and the price went back £4 or £5. As the time approached for the Banca sale, 28th September, some considerable quantity of Banca was sold at £82 10s., but at the actual sale the price realised was 46 guilders, about equal to £81 10s., laid down here, after which there was some flatness; but at the end of November the price took a start, and has steadily increased since. We quote the price to-day, Banca £87, Straits £85 10s. to £86. The English Smelters ask £2 above their last official quotations, making the price for common £86 to £87. The quantity of Straits Tin afloat for Europe is 733 tons, against 1,528 in 1865, and 1,056 tons in 1864. Price of Straits on 31st December, 1866, £85, against £95 in 1865, and £90 in 1864.

TIN PLATES.—Have been in great demand during the entire year, and prices have been well maintained. The exports during the year were the largest ever known.

LEAD.—Has suffered less in value from the general depression in affairs than any other metal. No doubt the German war stopped the production of German lead to some extent. The last two months the market has been dull, but with firm prices.

SPELTER.—At the commencement of the past year was at the same price as now quoted, £22 5s., but anticipations of a scarcity, in consequence

Digitized by Google

of the continental difficulties, caused the price to advance in February to £24 10s., and this price continued throughout March, but gave way again, until the commencement of hostilities, when the price recovered, £25 was the quotation at the end of June, but the price receded again almost immediately, and in August the price was £19 only, the lowest point reached during the year. The stock on the 1st inst. was 4,266 tons against 6,419 tons in January, 1866.

QUICKSILVER has been reduced from £8 per bottle, at which it stood in January last year to £6 17s. 6d. the present price.

CATHA. MARIA (Dutch bq.), Batavia to Middleburg, Nov. 10.
ARIEL, London to Shanghai, Nov. 2, by the Taitsing, 4 N., 23 W.
MAGELLAN, Liverpool to Shanghai, Nov. 2, 38 S., 19 E.

FREIGHTS AND CHARTERS.

Excepting for the China berths vessels outward are very scarce, occasioning a good demand for tonnage to the other Eastern ports. Homeward business is merely nominal. Coal freights from the northern outports continue firm.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £46. For Singapore: £34. For Shanghai: £53. For Saigon: £50. For Yokohama: £50. For Batavia, £35. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2 2s. 6d. For Singapore, £1 12s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

The Admiralty have invited tenders for the conveyance of 53 tons shells, 2 tons wheels, &c., and a small quantity of combustibles from the Thames to Hong Kong.

CASUALTIES.

The Swea, Brodin, which sailed from Cardiff for Galle, Dec. 24, put back on Dec. 28, for repairs, having been in collision.

The Priam, Irvine, which sailed from Glasgow Dec. 31, for Batavia, and Sourabaya, put in at Belfast, with starboard, rigging, &c., carried away and other damage, having been in collision.

The Sea Wave, which sailed from Glasgow, Dec. 6, for Java, put in at Swansea, Jan. 2, leaky; the crew have refused to proceed in her.

The Huntly Castle has been dismasted, on her way from Liverpool to Glasgow.

The Taymouth Castle, for Singapore, has been lost off the coast.

MISCELLANEOUS.

At MONTE VIDEO.—Nov. 19, Beneleuch, Thomson, from Canton.

At ST. VINCENT, C.V.—Nov. 28, Excelsior, Maxwell, sailed for Colombo, &c., after repairing.

At CALLAO.—Nov. 24, Persia, Clark, from Shanghai, Eagle, Cuthbert, from Hong Kong.

At MAURITIUS.—Nov. 23, Jannetje, v. Striemen, from Batavia for Holland, leaky; 26, City of London, Watson, from Colombo for London, leaky; 28, St. Vincent de Paul, Lagoustine, from Batavia; 29, Ajax (s.), Kidd, from Shanghai, &c.; Dec. 6, Ellen Lewis, Hellon, from Singapore; Nov. 25, Bryn Ivor, Dowdall, sailed for Colombo.

RAPID PASSAGE.—The Northampton, 1,174 tons register, Captain Rowe, belonging to the Merchant Shipping Company, has arrived in the East India Dock. This ship has made the voyage from Greenock to Calcutta, and thence to London, in 7 months and 8 days, 65 days of which were expended in landing and taking in cargoes. The Northampton landed the Greenock pilot on the 18th May last, and took the Calcutta pilot on board on the 29th July, making the passage out in, we believe, the unprecedentedly short time of 72 days. On the 2nd of October the outward Calcutta pilot left the ship, and on the 84th day she was in the East India Dock, with a general cargo of 1,900 tons. The Northampton is a specimen of the new composite principle of shipbuilding, having an iron frame and teak planking.

RULES.

1. The Association shall be called "The East India Association," to be supported by Annual Subscriptions and Voluntary Donations.

2. The Association shall be for the independent and disinterested advocacy and promotion by all legitimate means of the interests and welfare of India generally. As an Institution, the Association will, so soon as the funds permit, provide a Library and Reading Room, and will always afford Members of Parliament, and the Public generally, information and assistance on all Indian subjects within its power. As a Body, it will receive communications, direct or through its Local Committees, on all those questions of local or public interest which there are at present no adequate means of bringing to the notice of the Public or Legislature.

3. The Association shall not take any notice of complaints of individuals against the Governments in India or their Civil and Military Servants; unless a question of public importance be involved therein; nor will it undertake to act in any matters that can be decided by Law Courts, or by Appeal to the Judicial Committee of the Privy Council.

4. The Association shall consist of Resident and Non-Resident Members. Those residing in the United Kingdom shall be called Resident, and all others Non-Resident Members.

5. There shall be an Annual Meeting of the Association, to be held during the Session of Parliament, Ten Members to form a Quorum at all Meetings of the Association.

6. The President and Six Vice-Presidents of the Association shall be elected at the Annual General Meeting.

7. Special Sub-Committees of Members, selected on account of their knowledge of the subjects under reference, of whom Three shall form a quorum, shall be appointed at the Annual Meeting, to take into consideration all matters referred to the Association by the Local Committees and individuals.

8. At the Annual Meeting a General Managing Committee shall be appointed, of whom Four shall form a quorum, composed of a Chairman, Six Members, and the Chairman of each of the Special Committees, by whom a Secretary and Treasurer shall be appointed, and the entire affairs of the Association managed.

9. Local Committees shall be appointed in India by the General Managing Committee; and the co-operation of independent Local Associations in India is invited by the "East India Association."

10. After the 1st January, 1867, any person desirous of becoming a Member of the Association shall be proposed and seconded, and after Election by the Managing Committee shall be required to pay an Annual Subscription, in advance, on the 1st of January in each year, of One Sovereign or Ten Rupees. The payment of Ten Sovereigns or One hundred Rupees in lieu of Annual Subscription, shall constitute Life-Membership.

11. The Election of every Member shall be notified to him in writing by the Secretary, who shall transmit to him, at the same time, a copy of the Rules of the Association.

12. Subscriptions unpaid on the 1st May in each year involve cessation of Membership, subject to appeal to the General Managing Committee.

13. At the desire of Five Members of the General Managing Committee, or on the written requisition of Ten Members of the Association, the Secretary shall convene a Special Meeting of the Association.

14. The General Managing Committee shall have power to make and alter any bye-laws for the management of the Association.

15. No addition to or alteration in these Rules shall be made, except at the Annual Meeting of the Association.

Subscriptions and Donations can be paid at the LONDON AND WESTMINSTER BANK, St. James's-square, London; Messrs. GRINDLAY and Co., 55, Parliament-street, S.W.; Messrs. SMITH, ELDER, and Co., 65, Pall-mall, S.W.; and their Agents in India.

Gentlemen wishing to become Members of the Association are requested to communicate with the SECRETARY, at 3A, King-street, St. James's-square, S.W.

DINNEFORD'S FLUID MAGNESIA.

THE Medical Profession for Thirty Years have approved of this Pure SOLUTION OF MAGNESIA as the best remedy for ACIDITY OF THE STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION; and as the best mild aperient for delicate constitutions, for LADIES, CHILDREN, and INFANTS; and for regular use in WARM CLIMATES.

DINNEFORD & CO.,
CHEMISTS, &c.,
172, NEW BOND-STREET, LONDON,

And of all other Chemists throughout the world.

N.B.—Ask for DINNEFORD'S Magnesia.

HOLLOWAY'S PILLS.—The greatest Wonder of Modern Times.—They correct bile, prevent flatulency, cleanse the liver, purify the system, renovate the debilitated, strengthen the stomach, increase the appetite, invigorate the nerves, and reinstate the weak. The demand for these Pills throughout the globe astonishes everybody, convincing them that there is no medicine equal to Holloway's Pills for removing the complaints which are incidental to the human race. They are indeed a blessing to the afflicted, and a boon to those who suffer from any disorder, internal or external. The purification of the blood and the consequent removal of all noxious matters from the secretions, and their gentle action upon the bowels, are the source of the curative powers of Holloway's Pills.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., who requiring to discharge them.

THE CHINA TRADERS' INSURANCE COMPANY (LIMITED).

REPORT of the COMMITTEE to the FIRST ORDINARY MEETING of SHAREHOLDERS held at the Office of the General Agents at HONG KONG, on November 19, 1866:—

The Committee have much satisfaction in being able to meet the Shareholders with a Report on the position the Company has attained in its first year of working, which will show its satisfactory establishment, its extensive business connection, and its undoubted prosperity. The Company was registered under the Company's Ordinance of 1865, on the 12th October, 1865, its shares being all taken up, and the first call of $1,000 per share having been fully paid up. The amount of Premia collected in Hong Kong and China, from the 1st of November, 1865, to the 31st of October, 1866, and the amount collected at the foreign Agencies within that period of which the General Agents have received advices, after deducting all sums paid as bonus and commissions, and adding interest, amounts to $271,282.13. This result must be gratifying to the Shareholders as it proves that the expectations upon which the Company was founded were well grounded.

Agencies have been established at Swatow, Amoy, Foochow, Ningpo, Shanghai, Chefoo, Tientsin, Yokohama, Sual, Manila, Bangkok, Saigon, Singapore, Penang, Rangoon, Akyab, Bassein, Madras, Calcutta, Bombay, London, and New York. The Committee hope that the increasing business of the Company will enable them further to extend its field of operations within the judicious restrictions imposed by the Articles of Association. The losses which have been paid by the Company amount to $81,488.02, and there are further claims not yet settled to the amount of $41,712.98; (the latter may, however, be considerably reduced). The Committee have been fortunate in securing the able assistance of Mr. W. Kaye and Mr. A. Sassoon as Auditors for the year, who have examined the accounts which the Committee have now the pleasure to submit for the consideration of the Shareholders.

It will be seen from the Accounts annexed that, after carrying forward to the next year's Accounts $24,000 for Premia received in respect of risks taken before October 31st, but not terminated, after carrying $41,712.98 to Suspense Account to meet claims and losses put forward, and after writing off a portion of the Preliminary Expenses, there remains a balance to the credit of Profit and Loss Account in respect of transactions actually closed of $118,000.

The Committee, after careful consideration of the question, do not feel called upon to advise the Shareholders to make any reserve or provision for unexpired risks which were taken before October 31st, as they are of opinion that it will, at the close of each year, be convenient (and consistent with the welfare and interests of the Shareholders) to treat these unexpired risks as taken on the first day of each new account; and beyond carrying the respective premia for those risks forward to the new Account, to treat any loss occurring in respect of those risks as being chargeable to the year in which the loss is made known.

The Committee, upon the assumption that the Shareholders will adopt this as the rule of appropriation of risks in the Company, recommend that the sum of $118,000 be declared available for distribution as profits of the Company for the year. The apportionment of this sum, if appropriated as being so distributable, will, under the 132nd Clause of the Articles of Association, be as follows:—The sum of $29,500 to be carried to the Reserve Fund and invested by the Committee; the sum of $29,500 to be divided *pro rata* among contributing Shareholders; and the sum of $59,000 or $295 per share to be paid to Shareholders as General Dividend.

The absence of Mr. McClellan from Hong Kong, and the departure of Mr. Deacon to Europe will necessitate the selection of Shareholders in their stead as members of the Committee, which, under the Articles of Association, has to be done for first two years by the remaining Members of the Committee. In accordance with the Articles of Association, the Meeting will have to elect Auditors for the ensuing year, and will also have to determine the amount of their remuneration.

In conclusion the Committee, in congratulating the Shareholders, on the prosperity and prospects of the Company, cannot refrain from calling their attention to the success which has attended the allotment of Shares to Chinese Residents and Traders, as all doubt as to the expediency of the introduction of this new element must vanish before the highly beneficial result to the Company attendant upon it.

WILLIAM NEILSON, Chairman.

Hong Kong, November, 16th, 1866.

IMPORTANT
TO PERSONS RESIDING IN HOT CLIMATES.

ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corode or get out of order, and can be worked (with or without Ice) by the most ignorant servant. The Freezing Salts employed are indigenous to most hot climates, easily and cheaply obtained. A *bona fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine is rapidly becoming indispensable to all European residents in India and China.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice... ... ... £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0

If without fittings (merely as Wine Coolers.)

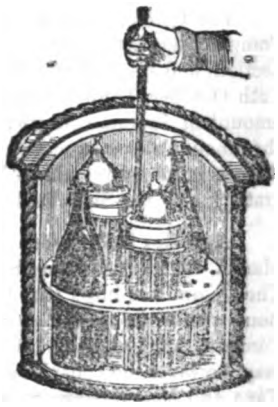
For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

When Dessert Ices are never required, these Wines Coolers can be fitted with BLOCK ICE MOULD at 30s. for each Mould so fitted.

SOLE MANUFACTURER:

GEORGE SIMPSON, 315, OXFORD-STREET, LONDON.

Orders enclosing remittance can be sent direct, or through Messrs. H. Fogg & Co., Shanghai



Prize Medal 1862. Prize Medal 1862.

HARMONIUMS.

W. E. EVANS,
THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).
No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).
No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).

No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 45 Guineas.
(Tinned Packing-case, and delivery at any home port, 45s. extra).
No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas.
(Tinned Packing-case, and delivery at any home port, 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

Are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances. Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 28, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

THE CAPE, INDIA, AND CHINA AGENCY.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 12, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERIE, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,

Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York; and 37, Gracechurch-street, London.

PRIZE MEDAL SODA-WATER MACHINERY.

THE Book for 1865, containing twenty-eight leaves of Illustrations descriptive of all the Machines now in use, with advice before purchasing, to be obtained of any of the Agents of this Paper, price 6d., and through whom Orders can be sent.

The usual P. and O. mail, with the correspondence, &c., of the above dates, arrived a Malta on the 25th, and is expected to be delivered in London on the 29th. Our despatches via Brindisi came to hand last night. The latest telegrams received will be found in another column to extend to 1st January from Hong Kong, and 26th December Shanghai. The French mail due on the 5th prox. arrived at Suez on 23rd inst.

List of Passengers.

PASSENGERS INWARD.

By this mail, from Hong Kong.—For Marseilles: Mr. Josepha, Mr. and Mrs. T. P. Sevilla, Messrs. F. Coit, C. Lucas, J. Nutt, R. C. Lambert, S. Saco E. Zuboaga, A. R. de Valdin, J Giujarro. C. Spechley, Whetherill Prior, Grant, C. Linart. For Southampton: Mrs. Evans, Mrs. Gordon, Messrs. Dalryn ple, the Rev. Lloyd, J. Gardiner.

PASSENGERS OUTWARD.

Per P. and O. steamer Pera, from Southampton, Jan. 20.—To Ceylon: Lieutenant and Mrs. A. Hansard, Miss Adams, Mrs. Wormald, Ensign Perkins, Mr. W. W. Murray, Ensign Price, Mr. A. Adair, Rev. Mr. and Mrs. Kilner. To Singapore: Mr. W. H. Newman. To Hong Kong: Dr. Young. To Calcutta: Mrs. Battersby and child, Mr. H. J. Weston, Miss Higgins, Mr. G. Cheetham, Lieut. D. G. Beamish, Capt. Ellis, Ensign Hopwood, Miss Sparke, Mr. T. Whitehead, Mr. G. Chrissantho, Mrs. Callan, Ensign Hon. A. Grosvenor, Major and Mrs. Armstrong, child, and ayah, Mr. C. J. Brooke, Ensign Holy, Mr. and Mrs. Force and four children, Cornet Ord, Mr. D. M. Stewart, Mrs. D. M. Stewart, Mrs. E. D. Brown and child. To Madras: Major C. E. and Mrs. Taylor, Capt. J. and Mrs. McDonnell Paymaster Smith, Major and Mrs. McPherson, Mr. Arnold, Lieut. J Godson Mr. E. B. Vickers, Mr. and Mrs. French, Miss French, Mr. French, jun., Mr. T. P. Bliss. To Bombay: Mr. R. Gale, Mr. R. F. Briscoe.

From Marseilles, Jan 28.—To Shanghai: Dr. and Mrs. C. Powles, Mr. J. P. Bisset. To Singapore: Mr. P. F. Banermann, Sergeant-Major J. Rose. To Hong Kong: Mr. E. W. Batt, V.B., Mr. H. Hitchcock. To Penang: Mr. de Munnick. To Ceylon: Mr. W. J. Inglis. To Calcutta: Mr. Armstrong, Mr. and Mrs. Collett, child, and servant, Mr. J. R. Carnac Mr. and Mrs. W. Blunt, Capt. A. Blunt, Lieut. H. Rowland, Mr. Landale, Ensign Gouldsbury, Mr. W. A. Bullen, Mr. H. Bainbridge, Captain Drummond, Mr. and Mrs. Macfarlane, Mr. Douglas de Wet. To Madras: Mrs. Fisher, child, and ayah, Mr. A. C. Campbell, Major E. H. Blomfield, Mr. S. Perkes, Mr. J. Carruthers, Mr. Ridley, Mr. Higginson Mr. Oakshotts, Mr. Taylor. To Bombay: Ensign Wyllie, Mr. Watson, Mrs. Prior, Mr Melvin, Dr. and Mrs. P. de Souza Cardoza, Colonel Kennedy, Mr. Arbuthnot, Mr. Leslie.

Per P. and O. steamer, from Southampton, Feb. 4.—To Singapore: Colonel and Mrs. Ord and niece, Mr. H. F. Plow. To Ceylon: Mr. J. Le Cocq, Mr. H. Wiggin. Miss McCabe, Mr. and Mrs. Gillman, Lieut. Tegart, Mr. T. M. O'Brien. To Yokohama: Miss A. Mitchell To Shanghai: Mr. R. G. Head. To Hong Kong: Lieut. Lee. R.E.

From Marseilles, Feb. 12.—To Hong Kong: Mr. J. Owen, Mr. G. Anderson, Mr. W. Odell. To Penang: Mr. A. F. Brown, two daughters, and son, Mr. and Mrs. H. J. D Paddav, Mr. and Mrs. J. Butters, Miss Smith To Singapore: Miss Zobel, Mr. J. Watson, Mr. Niel Macleod. To Ceylon: Mrs. Anderson. To Shanghai: Mr. Blair.

Per P. and O. steamer from Southampton, Feb. 20.—To Ceylon: Mr. C. Giles. To Hong Hong: Mr. and Mrs. Oxley and four children.

From Marseilles, Feb. 28.—To Ceylon: Mr. P. W. and Mrs. Braybrooke. To Hong Kong: Mr. J Ferguson, Mr. W. Newman, Mr. A. Andrews, Mr. T. K. Ashton. To Shanghai: Mr. J. B. Hallam.

EXTENSIVE FIRE AT YOKOHAMA.

We have received our despatches from China and Japan in anticipation of the P. and O. mail expected to be delivered on the 29th. The following are the details of the fire at Yokohama, which took place on the 26th Nov.:—

"The fire commenced in a cookshop, leading from Beutchdori to Yoshiwara. The latter place is on the peninsula, and contained a great number of habitations of Japanese women. The fire spread rapidly, and there being only one bridge leading to it, a great destruction of life took place, as all but two isolated buildings were destroyed.

"The Japanese report the finding of thirty-five bodies, but a further examination of the burnt district adds largely to the number. The greatest confusion prevailed during the fire. Every effort was made to arrest the progress of the flames by the use of water and the blowing-up of buildings, but in vain, until nearly one-third of the stores and dwellings of the business firms were destroyed.

"Early in the day large detachments of sailors and marines were landed from the British fleet lying in the harbour, who at first worked well under the control of their officers, but afterwards getting access to liquor they became unmanageable. From striving to save property they turned their attention to plundering, and robberies of the boldest nature were perpetrated while owners of property were standing helpless to prevent them.

"Among the losses by fire and destruction were the archives of the United States Consulate. A large portion of the archives of other consulates were also destroyed.

"The French Consul lost his office and all his private property. The English Consul also suffered. The bonded warehouse, filled with goods, under the superintendence of Mr. Benjamin Seare, was destroyed; loss $160,000. The new house built for the American Consulate was also consumed. The whole range of old Consulate buildings—French, American, Prussian, and English,—the Post-office, with nearly all the private residences, were destroyed by the conflagration.

"Among the sufferers are Augustine Heard and Co., E. M. Van Reed, Jardine, Matheson and Co., Colonel Fisher, Walshe and Co., Schultze, Reis and Co., Ross, Barber and Co., Macpherson and Marshall, and others.

"The fireproof buildings of Textor and Co., and the French hospital, are among the buildings saved.

"The fire put an end to all business for a time. Some articles had advanced in consequence of the large quantities destroyed, such as shirtings, yarns, camlets, &c. The latter are held at $20 to $22. Of tea about 2,200 piculs were burnt.

"The agents of the fire insurance companies held a meeting, when it was ascertained that the aggregate losses amounted to $2,150,000. The *Japan Herald* estimates the total loss of natives and foreigners at between three and four millions of dollars.

"Owing to the unsuccessful harvest of rice the lower class of the people are suffering for food. The Government has removed the monopoly of sale by allowing foreign merchants to sell direct to consumers. It is believed that this permission to sell food and import rice to save the lives of the common people will do much to beget a better feeling between the Japanese and foreigners."

Another letter says :—

"A high wind from the north was prevailing at the time, and in a few minutes flames were seen issuing in various quarters simultaneously. Otta-matchi broke out at several points, the new American Consular building, at the distance of fully a quarter of a mile, showing flames through the roof at the same moment. The flames worked up against the wind from the locality in which the fire originated, and in half an hour the whole of Yoshiwarra was destroyed. With the exception of one or two fire-proof godowns and the temple at the end, not a single stick was standing to mark the boundaries of dwellings. Unhappily, we have to record that here was a terrible loss of life, if we may believe the reports of the Japanese themselves, who state that thirty-five bodies have been found. Yoshiwarra, being quite surrounded by water, and there being only one narrow bridge which led in to the street that was already in flames, became a *cul de sac*, from which the only retreat was by improvised bridges of boards, or by punts which were brought into use with all the celerity possible; but the flames were so rapid in their work of desolation that many fled from them only to meet death in another element. We hear that in several parts of the native town persons were burnt or crushed to death. In Otta-matchi the effects of thoughtlessness and disorganisation were painfully apparent. All along the street the people were getting their little moveables out to fly with them to Matchi (the newly filled in ground) or some other place of safety, but towards the end near the foreign settlement several shopkeepers had filled up the street with their goods and chattels, thus making a perfect barricade, and here was an obstruction that even the unencumbered found great difficulty in overcoming, whilst those who were carrying loads were driven to desperation in their efforts to pass, and many women and children were very much hurt. Meanwhile the fire spread northwards, and into the foreign settlement. The new American Consulate was now generally level with the ground, and report flew around that No. 1, the private residence and godowns of Messrs. Jardine, Matheson, and Co. had caught. In another few seconds it reached the whole settlement and the private residence, No. 2—Messrs. Walsh, Hall, and Co.—was on fire. Simultaneously with this, the whole range of the old consular buildings, the French, Prussian, American and English, in which latter several gentlemen of the English Legation and Consulate were residing, were swept off like so much tinder. The wind increased almost to a typhoon; the sparks communicated with the old Japanese Custom-house, and in almost as short a time as it takes to pen this story it was a thing of the past.

"The fire raged from nine to eleven a.m., when the wind lulled and prevented it from spreading any further. The lighted *debris*, however, continued to flame up, and was still smouldering when the mail left, November 28th.

"The fire engines were brought out the instant the alarm of fire was given, but, alas! for the efficiency of the Yokohama fire brigade, there was not the slightest organisation; and some of the engines were entirely useless, having got out of order, probably from disuse. It was difficult also to procure a sufficient and continuous supply of water for some of those that were well manned and in order, so that at length there seemed to be an almost entire absence of effort to make them available.

"The principal foreign houses that were destroyed altogether or partially are those of the following firms :—

Jardine, Matheson and Co.
Walsh, Hall and Co.
Wilkin and Robison.
Reiss and Co.
W. M. Van der Tak (blown down).
Augustine Heard and Co.
Ross, Barber and Co.
Hecht, Lilienthal and Co.
Charles Rickerby.
Godowns.
X. Salabelle.
Schultze, Reis and Co.
Felix Beato's photographic gallery.
C. Wirgman.
Carst, Lels and Co. (blown down).
Ditto.
Augustine Heard and Co.'s godowns.
W. R. Adamson and Co.'s offices and godowns.
Textor and Co.'s offices (blown down).
Dr. Lysnar (blown down).
Eisler and Co.
J. Byrne, sailmaker.
Meyer and de Jong, surgeons.
Dwelling-house and godowns, unoccupied.
Dwelling-house and godowns, unoccupied.
Delfis and Co. and H. C. Morf.
Carst, Lels and Co.'s godowns.
Textor and Co.'s godowns.
Schultze, Reis and Co.'s offices and godowns.
R. Lindau and Co.'s do. do.
Cornelius George, livery stables.
Ch. Thorel, Ziegler and Co.
Quan Chong, tailor.
A. Morris, Clarendon Hotel.
P. Ferguson, hairdresser.
J. Hartley and Co., druggist.
W. Boyd, storekeeper.
Ladage, Oelke and Co., tailors and clothiers.
Grosser and Co.
Siber and Brennwald.
G. H. Carriere and Co. (Yokohama Hotel).
Bourne and Co., auctioneers.
H. E. Meara.
Jelovitz and Co., auctioneers.
Domoney (Brewers' Arms).
A. Malvalle (Prince of Wales' Tavern).

Bonded Warehouse, A.
Japanese Custom House.
Old U. S. Consulate.
Prussian Consulate.
Portuguese Consulate.
British Legation and Consular residences.
French Consulate.
Engine-house.
Native Town, F. Perregaux.
E. Schnell.
G. Glackmeyer.
Thos. Hogg.

At the time of the departure of the mail it was impossible to obtain any certain data on which to base a calculation of the loss, but rough estimates put the total Japanese and foreign loss at between four and five millions, independent of the losses of non-insurers, which must be considerable. Luckily no banks have sustained any loss, although at one time the Hindustan Bank was in danger. The loss of the Japanese merchants would appear to be severe, as they had large quantities of silk stored in the godowns of foreigners. It has been ascertained that the fire had its origin in a small cookshop; some grease dripping on to the fire caused a blaze that caught the dry woodwork, and in a few minutes attained mastery over the whole place.

KOREA.

It will be remembered that a previous narrative carried the chronicle of events as far as the occupation of Kanghoa, on the 16th of October. The French vessels had advanced up the river on which the capital is situated as far as this point, and had scarcely encountered any resistance whatever. When a party was detached to take possession of the town it found the place all but deserted and absolutely undefended. It was occupied and plundered a good deal, it would seem, and a vessel was detached to take down to Shanghai the news of what had occurred. After the departure of this vessel various reconnaissances were made, with the view of ascertaining the feasibility of advancing to the assault of the capital, Seoul. Kanghoa stands upon an island formed by two branches of the river, and it soon became rumoured that bodies of native troops were crossing the arm which the French had left open, and were organising an attack on the invaders. In view of this the Admiral saw the desirability of seizing a fortified pagoda situated on a high hill commanding the town, and a party was sent to its attack. As the troops advanced it was supposed that the works were untenanted. No sign of a garrison was seen, but when the men were close to the walls, a murderous

Digitized by Google

musketry fire was poured from behind them. There were six or seven Koreans loading pieces for every man in a position to fire effectually, and the small party of French were forced to retreat, giving up their enterprise, and losing thirty-five men killed and wounded. Further delay in the river would have subjected the squadron to the danger of being frozen up for the winter, and mortifying as it must have been to have retired under the circumstances, Admiral Roze had of course no choice.

That the attempt to punish the Korean Government for the massacre of the missionaries will be renewed by the French fleet in these waters next year is now a matter of course. Under more favourable circumstances as to season, and with the knowledge of the country acquired in the course of the operations which have just taken place, there need not be any question as to the success which will attend a renewed effort upon the determined exclusiveness of the rulers. It is to be hoped, however, in view of the facts which have been brought to light by this expedition, that the various Powers holding treaties with China and Japan will co-operate with the French in opening up the new field for commercial enterprise which Korea now offers. It is clear that the country, far from being barren and worthless, must be rich and productive, the people in many respects in advance being of Chinese and Japanese. The firearms they use are of their own manufacture, are highly finished even to the extent of having in some cases octagonal barrels, and silver name-plates let into the metal work; there are actually breech-loading cannon in use by the soldiers, constructed on a principle said to be not unlike that of Snider's rifle. In other arts the nation is equally advanced. A library of 300 volumes has been seized in Kanghoa by the Admiral, and in one of the temples have been found certain folding marble tablets, highly ornamented in an artistic style, also pieces of silk damask of native manufacture. The helmets worn by the Korean soldiers were of leather, described as very like those of the Prussian army. Vast quantities of gunpowder were stored at Kanghoa, and considering the almost complete isolation in which the country has remained, it is difficult to account for this except on the supposition that it is of native manufacture. The tls. 30,000 of silver which were seized by the expedition were in ingots of a peculiar shape, round disks, unlike the Chinese or Japanese ingots, and it is presumed that the metal had been mined in the country. The missionaries have from the first reported the place extraordinarily rich in mineral resources, and it was nothing but the wildly romantic nature of their statements which had caused them to be disbelieved. Whatever may be the fact about the silver, it is tolerably clear that Korea, far from being savage and poverty-stricken, is well worth the attention of the British Government. The French must at any rate take some vigorous measures next summer in order to repair the humiliation they have now suffered, and the previous policy of the British Government in the East would certainly suggest the propriety of joint action in the present case.

The Koreans doubtless understand the making of arms, and their sword blades are thus curious, that they cannot be broken; they are of soft iron and not sharp, about two feet long in the blade, and the hilt made for one hand. No two-handed hilted swords were found in Korea. On a musket to be seen here there is a silver enamel let into the breach of the barrel, which betokens a certain knowledge of art; while the octagon shape of the barrel, like an American rifle, and the neat finish of the stock, is a most creditable job for these barbarian artificers.

Strange to say, some of the cannon found at Kanghoa are breech-loaders. This is effected by the Korean in a most simple manner. A small cannon of the length of the charge and shot is placed in a cavity of the breach somewhat of the shape of the opened Snider Enfield breech-loading rifle.

A mat taken from the king's palace at Kanghoa and brought here with other things is really a handsome piece of work. Made of fine rice straw, and worked over with ornaments in coloured silk and gold, it is superior to any Chinese or Japanese matting the writer has ever seen.

From all this it must be concluded that the Koreans are a warlike people, courageous and possessing the usual cunning of Orientals. They are clever workers in metals, and have a knowledge of arms. They have a literature and a grand ceremonial, for in the books of the library at Kanghoa there were manuscript volumes containing pictures of the court processions and rites of worship, with descriptions of them. They have a taste for the beautiful in art, as evinced in the marble tablets already mentioned, and no doubt when further research is made into their habits they will be found to possess a civilisation equal at least to the Japanese. During the sack of Kanghoa about thirty thousand taels weight of silver was found under a heap of muskets. The ingots were not like Chinese sycee, but flat round plates of about six inches in diameter. This is a probable evidence of the existence of silver mines in the country, as it was part of the Government treasury.

CHINA.

TIEN-TSIN.

The season at this port may now be considered at an end. The river at Tsze-chulin was frozen over on the 26th, and quite a fleet of sailing vessels are at present fairly frozen in. It is possible the river may again open, but our correspondent expresses great doubt of it. A good deal of tea is still expected to Russian consignment. About two thirds of the inland dealers in manufactures have departed; but a fair business is doing by those still here. A very active market in opium is reported, with daily advancing rates. The cargoes of the *Korea* and *Ying-tsze-fei*, however, are not yet landed, the former being on the bar, the latter outside waiting high tides. Besides the sailing craft frozen in off the settlement, a number are detained at Taku, by want of water on the bar.

SHANGHAI.

Business has been extremely dull during the past fortnight—more intensely so perhaps from the prevalent rumours of unfavourable telegrams said to have been received *via* Kiachta. The arrangements for improving the lighting of the entrance to the river are still under discussion. It has been found necessary to abandon the Amherst Rocks, on the ground of expense, and the North Saddle appears likely to be at length determined on. Some funds will then, it is estimated, be still available, for the disposal of which two plans have been suggested, on which the opinions of nautical men in the habit of frequenting this port are again invited. One is, the improvement of the present Kintoah Beacon to be a light of the first class, and the removal of the Light-ship to the point of intersection of lines drawn from the Beacon to the North Saddle, and from the Amherst Rock to Gutzlaff. The other, the mooring a second Light-ship between the Ariadne and Amherst Rocks, leaving the present one where it is and the Beacon as it is. It has been objected, however, that the removal of the existing Light-ship so far eastward as the point named would leave the North bank unprotected; so the extreme point of the bank, some five or six miles eastward of its present moorings, would probably be a safer position. A reference to the chart will show that the object of this removal is to place the light in the direct line of vessels entering the Yangtsze from the Saddles, and at a point between the Amherst and Ariadne Rocks and Gutzlaff, nearly equi-distant from either, and affording an equally good mark to vessels approaching either from the North or South. To vessels coming from the North the placing a second Light-ship near the Ariadne Rock would no doubt be most advantageous; but the interests of the Ningpo steamers would be entirely overlooked; whereas the proposed removal of the present Light-ship to the eastward would be a gain to both.

A party of gentlemen who had left Shanghai on a shooting excursion arrived off Sz-kong-k'eu, a place where the Soochow Creek branches off in four different directions, at 2 P.M. on 2nd inst., and there discovered a foreigner lying on the bank of the creek, clothed only in his shirt, and severely wounded in the left arm, apparently by a chopper or knife. He gave his name as Henry Albrecht, and stated that he was a Prussian, adding that he had gone up the country with a companion, whose name our informant has forgotten, but who, Albrecht said, was an Englishman; and that about 2 P.M. on Saturday, when between Lok-k'o-pan and Quinsan, he and his companion had been attacked while asleep by the Chinese in the boat. Their assailants, he stated, were armed with hatchets and knives; and he jumped overboard to save his life. His companion, he feared, had been murdered, as after leaving the boat he heard yells and cries of "My God, I am killed!" He subsequently saw the Chinamen run ashore, and he made his way during the night to the spot where he was found. He was taken across the creek to the Chinese Custom-house, when a mandarin was sent for. The Prussian has been since brought to his Consul, and inquiries have been instituted with regard to the Englishman.

From Chinkiang we are informed that at about three o'clock

Digitized by Google

on the 3rd a fire broke out on the north bank, close down to the river, and burnt with great fury for about two hours, destroying a large number of houses. As there was a fresh northerly wind blowing at the time, there was a great commotion among the junks and other small craft anchored in proximity to the fire, many of which were burnt and unfortunately many lives lost. The river opposite the city at one time presented a very animated appearance, owing to the number of native craft trying to escape from the scene of the conflagration, which, together with the foreign hulks anchored on the north side of the river, stood in no slight danger from the burning junks and sampans which now and then drifted down among them.

The Viceroy is reported to have gained a series of successes over the Shantung Nienfei, who are now believed to be completely crushed and dispersed.

Winter was still keeping off at Newchang at the date of our last advices, the 21st Nov., but a change was daily expected, and the season was considered practically at an end. Malwa opium was quoted at tls. 650, the arrival of 100 chests in the *Korea* having caused a fall of tls. 10 per picul. About 300 chests were on stock.

HONG KONG.

To send away a mail summary of Hong Kong news during the past fortnight and not to allude to the commercial anxiety by which the community has been agitated would be to disguise the state of affairs here. During the early part of the fortnight rumours of a terrible character relating to the stability of many of the greatest firms in the colony were flying about. Name after name was mentioned, until at last the overwhelming character of the crisis which was threatened became so great that it was evident there had been gross exaggeration of the news, whatever it was, which was supposed to have come in private Kiachta telegrams. Ultimately the reports took a definite shape, one in which they did it is true deal a heavy blow to the credit of a great firm, but in which they showed that the worst apprehensions were unnecessary. Since then there has been reason to suppose that in this case at any rate a way out of the difficulty has been discovered, and nothing has transpired with regard to the other rumours to show that any failures need be feared.

There has still been no publication in the *Hong Kong Government Gazette* (says the *Daily Press*) of the report of the Mint Commission, which has now been for a considerable time in the hands of the Government. The contents, however, have become very well known. The Commission recommends that the establishment should not be closed at any rate for another twelve months, as the colony would derive no pecuniary benefit from so doing. The Mint officials were all engaged for a term of three years, on the understanding that if they were sent home at an earlier period they should receive each a year's salary from the date of their arrival in England. They have now been here about eighteen months, and if sent home they would have a claim for nearly the whole of the three years' salary. It is evident therefore that they may as well remain here in view of possible occurrences which may benefit the mint. It remains to be seen what effect upon the exchange and bullion markets will be produced by the inauguration of the new line of steamers between Hong Kong and San Francisco, which will commence running in January, and it also remains to be seen how political events in Mexico will affect the supply of Mexican dollars. To close the mint at once, therefore, would be simple folly, even though it now stands absolutely idle.

The Governor in the course of a second memorandum on the Chinese memorial relative to the new Hong Kong Junk ordinance, has retreated from his first position and wisely abandons the idea of insisting on the payment of regular fees for anchorage, permits, and clearances, by the passenger and provision junks which ply between Hong Kong and the mainland. It was abundantly evident from the first to those who knew anything of this trade, that to treat these licensed boats in the same way as if they were strange seagoing junks would not only be an injustice and a misapplication of the principles involved in the Ordinance, but a fatal blow to the branch of trade—humble, but by no means unimportant, in which they are concerned. The Governor's first reply was understood to mean that he intended to carry out the provisions of the ordinance against all junks alike. He now says that it was never intended from the first to apply them to these passenger and provision junks, which of course every one is very glad to hear, though under these circumstances it seems a pity that the Governor should have gone into long arguments in order to show how well able such boats are to pay the fees. The Junk and Registration ordinances have, according to a telegraphic despatch by the French mail, been sanctioned by the Home Government, and will probably come into operation in the beginning of the new year. For the more effectual execution of the ordinances Mr. Tonnochy, the sheriff and originally one of the student interpreters, is to cruise about the island continually, visiting the branches of the harbour master's office which are to be established at the various villages. The Government has bought an old junk in which he is to perform this duty, and has been joked a good deal about this last addition to Her Majesty's navy. Certainly an English built cutter would in many ways have been better adapted to the work, and would scarcely have been more expensive.

Amongst minor items of Hong Kong news is to be noticed the seizure by the creditors of the Commercial Bank of certain treasure which arrived to the Hong Kong branch. It will be remembered that a previous judgment of the Supreme Court had been in favour of the local creditors, and that in consequence of this the bank smuggled off by the mail steamer the whole of its available funds. It now appears, however, that legal evidence of the action of the High Court of Chancery in vesting all the property of the bank in the official liquidator being in the colony, which was not the case when the judgment of the Supreme Court above referred to was given, the proceedings on behalf of the creditors have been considered hopeless, and have been suffered to drop, the treasure reverting to the possession of the bank agents.

On the 12th Dec. the boats' crews of H.M.S. *Salamis* (Commander Suttie) and H.M.G.B. *Janus* (Lieutenant Commander Johnson) had a brush with pirates at a place named Tai Nia, on the west coast of the Island of Tonqua. Acting on information received from the mandarin of Quang-Hai, Commander Suttie landed with the above force, numbering about forty-five men and officers, for the purpose of reconnoitring this locality, which appears to consist of a large mangrove swamp, lying behind a barrier of sand, and skirted by high and thickly wooded hills.

In one of the creeks by which this swamp is intersected were three junks and five snake boats, on approaching which the party was fired on from several directions, whilst a straggling force of about 200 men (as nearly as could be ascertained) were seen to be making off towards the hills, carrying with them as usual all they could conveniently bundle together at a short notice. Some however remained in the brushwood on the near hill side, and continued a straggling fire with by no means a bad aim, one bullet (amongst other "close shaves") passing within a few inches of Commr. Suttie's head. Of course these ruffians were speedily dislodged, and several of them shot whilst scrambling up the hill. In the meantime, Lieut. Johnson, with six men, pursued the main body of retreating pirates, and had arrived within 200 yards of them, when a party of about forty made a stand in a small gap, where they planted a red and white flag, and commenced firing with a rapidity and precision which might have given us a sadder tale to tell had not a bank been fortunately at hand, behind which Lieut. Johnson halted his men, and having extended them in skirmishing order, kept up a steady fire on the gap, which, in about ten minutes effectually dislodged the enemy. He then proceeded to take possession of the position vacated by the pirates, and as they were mustering in force at the head of a valley some 800 yards on, halted for reinforcements; these soon came up, but with orders to retire from Commander Suttie, who very sensibly deemed it inexpedient to follow far, in an unknown country, a force whose strength he had not been able to ascertain.

The junks and snake boats were all effectually destroyed, and after having thus crippled the resources of the pirates, the boats returned to their ships, fortunately in that very desirable state, on these occasions, without a man hurt. Tai-ma is likely yet to be the seat of further operations, as out of the force, which is certainly not under the numbers we mention, and is comparatively well-organised, no more than ten or twelve can be counted as killed and wounded in this affair.

Considerable surprise has been expressed that the Commission on the Hong Kong Mint has not yet published its report. The *Daily Press* surmises that it is held back, as it does not suit the local Government.

Dr. Macgowan, whose schemes in connection with the introduction of electric telegraphy into China have already been

Digitized by Google

noticed, was not long in Hong Kong before bringing his proposal before the Chamber of Commerce, requesting that the influence of that body might be exerted with the Foreign Consuls of Canton to secure their support of his application to the Viceroy for permission to construct a telegraphic line between Hong Kong and Canton. The Chamber complied with his request, and addressed a communication to each of the Consuls. The English Consul was absent at the time, but the French Consul secured for Dr. Macgowan an interview with the Viceroy.

HONG KONG GENERAL CHAMBER OF COMMERCE.

Sir,—I take the liberty of addressing you, by order of this Chamber, on a subject which I feel fully convinced will have your valuable support. I refer to telegraphic communication, which is about to be inaugurated under the auspices of the East India Company's Commissioner, Dr. Macgowan. This gentleman will, no doubt, pay his respects to you personally, and explain more in detail the object that has brought him to China, so that I need not go further into the matter. My especial desire in now addressing you is to solicit your interest and support in laying the point of telegraphic communication before his Excellency the Viceroy at Canton, and to urge upon him the great benefit that would result from a line between this port and that city. Dr. Macgowan is perfectly ready to commence upon it as soon as a concession is granted.

I feel that there are great difficulties in the way, but those are not unlikely to be surmounted if you bring your influence to bear on his Excellency. Leaving the matter therefore in your hands, I have the honour to be, Sir, your most obedient servant,

(Signed) JOHN DENT, Chairman.

THE FRENCH CONSULATE AT CANTON.

CANTON, Nov. 28th, 1866.

SIR,—I had the honour to receive at Hong Kong the letter addressed to me by you on the 23rd November, by order of the General Chamber of Commerce, to request my support near his Excellency the Viceroy of Canton for the proposed establishment of a telegraphic communication between this port and Hong Kong, under the direction of Dr. Macgowan, Commissioner of the East India Telegraph Company, and I lost no time on my return here (on the 26th) to procure an interview with his Excellency which took place the next day—the 27th.

I fully explained to H.E. the advantages of such a mode of communication, not only for its benefit to the foreign community, and advantages in commercial transactions between nations, but perhaps more on account of its undoubted utility to the Chinese authorities, as it would enable them to secure immediate information in reported cases of piracy, smuggling, and local disturbances.

I laid before the Viceroy many inducements having reference to the material interests involved in the projected enterprise, and I had the unexpected satisfaction to succeed in drawing the most serious attention of H.E. to the scheme, and to hear from him that as far as he was concerned he was ready to give it all the support in his power.

Nevertheless, H.E. declined to assume the responsibility of making the desired concession from apprehension touching illwill on the part of portions of the population, owing to their ignorance of the value of improvements, and to the strength of their secular prejudices; in consequence of which he considered it necessary to communicate with the chief of the Tsung-li Yamun at Peking to obtain his consent.

But H.E. pledged himself to give his full adhesion to the scheme, when presenting it to the appreciation of the Tsung-li Yamun, and he distinctly stated that in case of a favourable answer, which he greatly hoped to obtain, the enterprise might rely entirely upon his best protection.

These promises, I am happy to say, were made in the presence of Mr. Macgowan, who, having been admitted to the audience, was able owing to his good knowledge of the Chinese language to understand the questions of my interpreter and the answer of the Viceroy.

His Excellency will address a communication immediately to Pekin, but he does not expect to have any answer in less than two months' time.

Allow me, in conclusion, to acknowledge the honour which in the name of the Hong Kong General Chamber of Commerce you have conferred on me by confiding to my support an undertaking of such magnitude to the interests of China, and of China and foreign commerce. I shall endeavour to keep the subject before the Viceroy, and to explain it to the Governor, who, like the Viceroy, is a man of energy and favourable to progress. In like manner I shall bring the matter before the Superintendent of Customs in order to excite a general interest in Dr. Macgowan's great undertaking. —I have the honour, &c., (Signed) G. DE TRENQUALYE, H.I.M. Consul.

Hon. John Dent, Chairman of the General Chamber of Commerce of Hong Kong.

The colonists, finding resistance to the Stamp Act useless, seem determined to take their revenge by making fun of the obnoxious measure and its promoters. With this view a photographic caricature has been circulated, entitled "The Pantomime of the *The Stamp Act*, as Performed at Government House," accompanied by the following doggrel rhyme :—

A LAY OF THE STAMP ACT.

Who lays on us with tender care,
A tax too great for us to bear,
And when we grumble "Combs our hair?"
Good Gracious!

Who, when he's heard our reasons out,
Replies to us, with scornful flout,
"You don't know what you talk about?"
Good Gracious!

Who makes a speech that scarcely tends
To satisfy? Who makes amends
By sneering at "protesting friends?"
Good Gracious!

Who, when he finds he logic lacks,
To make the Chinese like the tax,
Stabs at Jardines behind their backs?
Good Gracious!

Who says John Chinaman 's a worm,
The merchants trample on by turn,
Especially the East Point firm?
Good Gracious!

Who of our business knows much more
Than we do? Who says, o'er and o'er,
Hong Kong's the same as Singapore?
Good Gracious!

Who, if he gets the money soon,
Will go across to cool Kowloon,
And build a country house—for whom?
James Johnson!

Who, all to show his common sense,
Intends to make, at great expense,
A road that is to start from—whence?
Good Gracious!

Who says he'll do these wondrous acts,
Who'll make his words accomplished facts,
Provided that *we* pay the tax?
Good Gracious!

But when our business flies away,
When we no longer choose to stay,
Who'll pay the tax on that fine day?
Good Gracious!

It should be explained that the phrase which forms the *refrain* of this humorous production is the favourite ejaculation of Sir Richard Macdonnell.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

DUNN—On the 17th Jan., at Stanford Cottage, Worthing, the wife of Captain George Dunn, of the P. and O. Company, of a son.

DUNAWAY—On the 5th Dec., at Hong Kong, the wife of James J. Dunaway, Deputy-Purveyor to the Forces, of a daughter.

FENNELL—On the 8th Jan., at Newlands, Regent's-park, Southampton, the wife of Arthur Fennell, Esq., prematurely, of a son, stillborn.

JOHNSTON—On the 11th Jan., at The Grove, Yoxford, Suffolk, the wife of Alexander R. Johnston, Esq. of a son.

LYALL—On the 23rd Jan., at 2, Buckingham-gate, the wife of George Lyall, Esq., of a son.

MARTIN—On the 21st Jan., the wife of William Martin, Esq. (Borneo Company), of a daughter.

SCOTT—On the 21st Jan., at Raeburn House, Pownall-gardens, Hounslow, the wife of W. R. Scott, Esq., of Singapore, of a son.

TURING—On the 5th Jan., at South Ormsby Rectory, Lincolnshire, the wife of the Rev. J. R. Turing, Chaplain of Trinity College, Cambridge, prematurely, of a daughter, who survived her birth only a few hours.

MARRIAGES.

BRAYBROOKE—BROWN.—On the 17th Jan., at the parish church of Leamington Priors, by the Rev. J. H. Smith, incumbent of Milverton, Philip Watson Braybrooke, of H.M.'s Civil Service in Ceylon, eldest son of Major-General Braybrooke, to Mary, only daughter of William Brown, Esq., of Leamington.

PADDAY—FRASER—On Jan. 24, at the Presbyterian Church, Clapham-rise, by the Rev. John McFarlane, D.D., LL.D., Henry James Duncan Paddav, Esq., of Penang, second son of Jonathan Paddav, Esq., of Inverness-terrace, Kensington-gardens, to Sophia Cumming, second daughter of Lewis Fraser, Esq., Clapham-park, late of Singapore. No cards.

STEELE—MOIR.—On the 16th Jan., at. Stephen's, Guernsey, by the Rev. C. S. Guille, M.A., the Rev. Otho W. Steele, B.A., son of Major Steele, of Sutton Court, Sutton, Surrey, to Flora, fourth daughter of the late William Moir, Esq., Ceylon Civil Service. No cards.

DEATHS.

DALZIEL—On the 8th Dec., at Hong Kong, suddenly, the wife of W. R. Dalziel, Esq., Acting Superintendent P. and O. Company, Hong Kong.

GINGELL—On the 14th Jan., at 48, Connaught-terrace, Edgware-road, Mrs. Mary Esther Gingell, widow of the late Mr. John Edwd. Gingell, late of 31, Edwards-street, Portman-square, in the 51st year of her age, of bronchitis.

HOWARD—On the 30th Nov., at Hong Kong, Sarahhe beloved wife of Wm. Howard, H.M.'s Naval-yard, Hong Kong.

The following is from Messrs. Sharp and Co.'s Circular.

GOLD.—A considerable business has been done in Leaf for India. The total received is $560,000, and that sent away, including the Behar on the 1st instant, and excluding the Ellora, is $590,000.

SILVER.—The transactions herein have also been large, the summation of amounts inwards being $850,000, and outwards $430,000; this latter sum is inclusive and exclusive as above in the case of Gold. Considerable shipments of Bar Silver and Sycee are in course of preparation for the Calcutta steamers, the greater portion of the drug being again paid for in Bullion, as for a long time past.

DOLLAR CURRENCY.—The imports, almost exclusively from the coast ports, are $600,000, and the exports, which show a return of shipments to Shanghai, are $450,000. We may again shortly have to record a premium upon clean coin.

EXCHANGE.—The market has been rather wide; documentary bills being regarded with a degree of caution, as some people think more consistent with a period of active speculation, than the present careful course of trade. In Rupees but very little has been done.

DISCOUNT AND MORTGAGES.—In consequence of the whisperings of the Kiatcha line, which has a most unenviable notoriety for speaking evil of everyone, buildings have been in more request than bills during the last few days, but the arrival of the mail has in some degree reassured the colony, and given hopes of more reasonable rates.

SHARES.—These, especially bank, have been injuriously affected; and investors have improved the opportunity afforded by the haste of some. Insurances have fallen in consequence of the fire at Yokohama. Our local office, the Hong Kong, has discouraged risks beyond the colony, and has happily escaped.

COMMERCIAL REPORT.

—o—

CHINA AND JAPAN EXPORTS.

TEA.—The business of the fortnight has been generally rather restricted, and the obstinacy of the teamen in some cases, in holding out for higher rates than any buyers would agree to, and in others the depressing effect of rumours threatening the credit of various houses, tended in the same direction to deaden the market. In some cases indeed the Kiachta telegrams had the effect of lowering prices, but the business done at most of the ports has been of an irregular character.

CANTON.—Until within the last few days the market continued quite inactive, when considerable settlements were made in common to good Canton Scented Teas as reported below. Country Congous: The 33 chops remain unsold and apparently unasked for, as the holders are still absurdly firm, there being yet fully 3 to 4 taels to be conceded on the part of teamen ere intending buyers entertain ideas of operating. Several of the chops, however, are now getting into the hands of the Cantonese, owing to the heavy cash advances made by them to the country part-holders on account of their teas; as soon, therefore, as the Canton merchants obtain a fuller interest in the stock, settlements will be more likely to take place at reasonable rates. Country Greens.—Two chops comprising 630 packages have been taken at the proportion prices of taels 39 and taels 41. No further arrivals have occurred, and present stock is therefore 3,170 packages, for which holders continued very firm. Canton-made Teas.—Settlements during the last few days have taken place to a considerable extent, but prices do not show any decline on former quotations, anything common but clean in Canton scented kinds exceedingly difficult to meet with. Some 8,000 boxes Scented Orange Pekoe, and 7,500 boxes Scented Caper are reported settled for the fortnight, and 2,500 boxes Gunpowder. In Canton packed Congou nothing has been done. Sales, &c., are reported as follows:—Country Congous, none; Scented Orange Fekoe, 8,000 boxes at tls. 21 to 29; Scented Caper, 7,500 boxes at tls. 14 to 27; Canton Packed Congou, none; Gunpowder, 2,500 boxes at tls. 15 to 24: Country Greens, 63£ pkgs. tls. 39 and 41 proportion.

FOOCHOW.—Settlements of Congou continued on a fair scale, at former rates until the 4th, when the arrival of the Fusi-Yama steamer from Shanghai with telegrams (it is said to the 10th November), *via* Kiachta, of a disastrous nature, almost suspended business. Other kinds of Tea remain without change. The settlements of Congou, which are reported amount to 9,345 chests 13,502 half-chests and 1,682 boxes, at taels 7 to 28, say 2,062 chests and 3,110 half-chests at taels 7 to 11, for Dust to Broken Leaf; 1,064 chests and 3,717 half-chests and 146 boxes, at taels 12 to 14.5, for Common to Good Common; 6,219 chests 6,549 half-chests and 1,536 boxes, at taels 15.7.5 to 20.5 for Flavoury to Good Flavoury; and 126 half-chests, at taels 28, for second-class Kaisows. Souchong: Common to fair, 1,446 chests, at taels 17.5 to 23; good to second-class, 1,447 chests, at taels 27 to 33. Pekoe: Common mixed leaf, 88 chests, at taels 19. Oolong: Common to fair cargo, 11,614 half-chests, at taels 16 to 22.5; good cargo, 1,000 half-chests, at taels 23 to 26. Scented: Dust and common, 700 boxes, at taels 16 to 18; fair to medium, 2,907 boxes, at taels 21 to 24.

AMOY.—Oolong: Arrivals for the fortnight amount to 6,910 packages, few of which have met with buyers owing to their inferior quality. The settlements comprising 3,447 packages being mainly from teas previously on the market and showing no quotable change in value. All fair to good teas being held for high rates, and Common Ankoi kinds are quoted at $13 to 14.50. Common to good common at $18 to 23, and fair to good at $24 to 27. The Brothers will sail to-day from this port with a full cargo, and another small shipment will probably complete the export of Tea for the season.

SHANGHAI.—Black Teas: There is a large business in Congous to report, 18,000 chests having found buyers during the fortnight. Most of the settlements were made at previous rates, but purchases since the arrival of the telegrams *via* Kiachta show a fall of fully one tael. The best Teas on offer have been cleared, and arrivals being small, stocks are now reduced to 23,000 chests.

Settlements for the fortnight have been as follows:—

		Tls. per pcl.
18,000 chts.	common to fair Howhow and Oonam	at 15 to 28
	common to good Ningchow (2nd crop) and Oopack	at 20 to 26
	one chop fine (1st crop) Ningchow...	at 30 to —
Re-shipments		800 chests.
Stock		23,000 „

Total settlements, with re-shipments from the river ports, from 1st June to date, 285,700 chests against 248,100 chests last year. Green Teas: A good demand existed for Fychows and Moyunes for America until within the last few days, when buyers held off for lower prices, which declined one tael on all descriptions. The only settlements for England are 4,000 half-chests Pingsuey. Supplies have come in freely, and increased stocks to 51,000 packages. Settlements have been as follows:—18,700 half-chests common Fychow to finest Teenkai and Moyune, at tls. 28 to 45½, proportion; 4,000 half-chests fair to good Pingsuey, at taels 33⅓ to 35½. 22,700 half-chests.

HANKOW.—There had been some little inquiry for common Oonams at taels 13, and about 3,500 chests had found buyers. The 3rd crops Oopacks were held for taels 18 to 20, and teamen were firm, but the advices that have been since despatched from here will make holders more anxious to sell. The stock comprised 10,400 chests of undesirable teas.

Arrivals.	Settlements.	Stock.
1866, 368,600 chts. ...	358,200 chts. ...	10,400 chts.
1865, 139,200 chts. ...	316,900 chts. ...	2,300 chts.

KIUKIANG.—Black Teas: The only settlement reported is that of a chop of medium Ningchow, at taels 17¼ (1s. 3½d.), but 3,000 chests have been shipped to Shanghai on native account. The stock is reduced to 1,400 chests of very inferior Teas. Green Teas: 7,700 packages have been settled on the market at slightly higher rates, taels 30 to 37 for medium to fine Moyunes, but a much larger quantity, 17,800 half-chests, had been shipped to Shanghai by the teamen. There was no change in prices at the close of the market. Over 13,000 packages remained in stock. Quotations were:—Moyunes, fine to finest, taels 36 to 39; common to medium, taels 30 to 36. Arrivals, 1866: Black, 118,800; Green, 107,600. 1865: Black, 89,000; Green, 82,100. Settlements, 1866: Black, 119,400; Green, 94,300. Do. 1865: Black, 89,000; Green, 72,400. Stock, 1866: Black, 1,400; Green, 13,300. Do. 1855: Black, nil.; Green, 9,700.

YOKOHAMA.—The active demand for Tea noticed on the 15th instant, met with a check in consequence of the news from America, received by the English mail of the 26th September, which arrived here on the 19th. About 2,800 piculs were settled previously at perhaps slightly easier rates, until the 26th when the fire brought business entirely to a standstill. Of the above mentioned settlements, about 2,200 piculs have been burnt of the unsold stock, of tea in native hands about 3,200; making a total of 5,403 piculs—of the quantity of packed tea burnt there is no reliable information. It may be presumed that business to any considerable extent must be stopped until both portions of the trading community have become more settled; at the same time it is reasonable to suppose that native merchants having lost heavily will be anxious to realise, while foreigners will be glad to replace their consumed purchases by again entering the market. The quotations and stocks are as follows:—Good common, $18 to 26, stock, 700 piculs; medium, $28 to 32, stock, 4,000 piculs; good medium, $33 to 36, stock, 5,000 piculs; fine to finest, $37 to 46, stock, 2,600 piculs.

RAW SILK.—CANTON.—The market has been quiet during the fortnight and prices up country seem inclined to harden; the sixth crop is coming forward very slowly, and the season may be said to be closing, at all events as regards the finer classes. A considerable stock of the commoner sorts still remain on hand, which being in demand for America, are firmly held at fully former rates. Included in

Digitized by Google

the settlements for the fortnight are nearly 400 bales China Silk, which were shipped by the last French steamer after the statistics for the last mail had been made up. The quotations are:—Tsatlees, Chops No. 1, tls. 615 to 620 per pcl.; do. 2, tls. 595 to 605; do. 3, tls. 575 to 585; market, 3, tls. 525 to 545; do. 4, tls. 500 to 525; do. 5 and com. tls. 460 to 490. Taysaams, No. 1, tls. 510 to 535; do. 2, tls. 490 to 500 do. 3, tls. 450 to 470; but present stocks quoted for the finer kinds are about all that can be expected at market this season. Settlements and stocks are quoted as follows:—Tsatlee No. 1, no sales, $610 to 620; Loong-kong No. 1,100 bales, 600 to 610; Kowkong, 100 piculs (for India), 550 to 560; Lacklow and Cumchuck, no sales, 590; Seulam, 50 piculs, 470 to 480; Re-reeled Cumchuck, 300 boxes, 630 to 640; Pierced Cocoons, no sales, 90 to 95; Waste Silk, 30 bales, 80 to 90.

SHANGHAI.—There has been but little activity in this market, and prices paid have been very irregular; but a decline of about tls. 10 to 29 may be said to have been established for all descriptions, with the exception of best Kah-hing Taysaams. No. 4, 5, and com., 380 to 440; Yuenfas, No. 1, 530 to 540; No. 2, 510 to 520; No. 3, 470 to 490; No. 4 and com., 430 to 450; Hainins, 430 to 540; Hangchow Tsatlee, 470 to 490; Sewhings, 350 to 400; Laeyongs, 370 to 380.

2,500 bales	2,000 bales	2,000 bales

YOKOHAMA.—On the 26th instant, at the breaking out of the fire, the position of the market was as follows:—The general quality of the stock, left after the departure of the last mail, was so far from accounting for the high prices demanded by holders that a strong endeavour had been made by buyers to bring the market down. The attempt was partially successful, and about 400 piculs were settled at a reduction of from $10 to 25 on last quotations, and the unsold stock about 600 piculs. Since then, arrivals have ceased and no business has been done. The quotations below are nominal. The silk destroyed in the foreign settlement hardly amounts to 50 piculs; the loss in the Japanese town is trifling; and beyond a short interruption in transactions, this terrible conflagration is not likely to affect the silk market. Mybash and Sincuh, Best, $900 to 940 per picul; do. Medium, 830 to 890; do. Inferior, 740 to 820; Hatchojee Mybash, 750 to 820; do. Shimada, 650 to 680; Ida Best, none; do. Medium, none; do. Inferior, 720 to 770; Ooshio, Best, 830 to 860; do. Medium, 760 to 800; do. Inferior, 660 to 700; Koshio, Best, none; do. Medium, 710 to 760; do. Inferior, 650 to 700; Sodai, Best, none; do. Medium, 745 to 760; do. Inferior, 700 to 730; Echizen, Best, 720 to 750; do. Medium, 680 to 710; do. Inferior, 650 to 670. Telegrams from Shanghai to 26th December report No. 3 Tsatlees $590; and the total exports 29,500 bales.

DRUGS AND OTHER EXPORTS.—CANTON.—Cassia Lignea has been dealt in to the extent of 2,300 piculs, at $19.25 to 19.50, and the market is now perfectly bare of supplies. Cassia Buds are quoted at $43 to 44, but no purchases have been effected, and stock consists of about 100 piculs. China Galls: No sales, and the limited stock of 100 piculs is held at $14 to 14.50. Galangal: Very dull at $1.80 per picul, with 300 piculs on the market. China Root: $3.50 to 3.75. Vermilion, $39 to 40 per box, of 50 caddies, for best brands. Rhubarb: Offering in very poor quality only, and consequently does not command any attention. Essential Oils and Star Anniseed: No supplies.

CAMPHOR.—HONG KONG.—No further supplies have arrived since the issue of last report. For the parcel of 800 piculs lately arrived from Formosa, holders are asking $30 per picul, unpacked, which purchasers still refuse to pay, and consequently no transactions are reported.

CHINA GRASS.—SHANGHAI.—Stock much reduced, and best quality entirely wanting. No transactions for shipment to Europe during the past fortnight. At Hankow the article is in a similar position. Nominal quotation for best white, 14½ to 15 taels; No. 2, 13 taels; common short and green, 10 to 12 taels.

CHINA AND JAPAN IMPORTS.

HONG KONG.—Business has been almost suspended during the past fortnight in consequence of the alarming rumours which were current which had all the more effect acting on a falling market. Within the last few days, however, the fire at Yokohama has quickened the demand for some descriptions of goods. Cotton yarn, No. 16 to 24, might be placed if there was any on the market, but the only transactions have been sales of yarn to arrive by the *Achillies*, at $185. The principal transaction in grey shirtings has been the sale of 19,000 pieces of Japan, and scarcely any other business has been done. This sale was of 8¼ lbs. goods at $3.60 per piece. Spanish stripes remain in fair request, and one sale of 500 pieces lastings is reported at $18.30. Other kinds of piece goods are neglected. Nail rod iron remains in fair request, and hoop iron has been placed to some extent at $3.40 per picul. Steel has been settled at $3.70 per keg, and tin plates in small quantities at $6.30 per box.

CANTON.—There are but few transactions to report. Cotton yarn has declined $15, metals remain about as last quoted. 1,000 piculs of common lead have been placed at $6.65 to 6.70, and 400 piculs of W.B. mark at $7.00 to 7.05. About 9,000 piculs remain on offer. 100 flasks of quicksilver have been settled at $72 to 73, and 200 flasks remain on stock.

SWATOW.—The importations have been on a large scale, and the demand light. The receipts of yarn have amounted to 295 bales, and the quotations are nominal at $200 to 205, for 16 to 24's. Grey shirtings, 5714 pieces received, and quotations $3.50 for 7 lbs., $3.70 for 8 lbs., 4.4.10 for 8½ lbs. T-cloths have arrived in considerable quantities, and are quoted at $2.80 for 6 lbs., and $3.40 for 7 lbs.

AMOY.—Cotton yarn has declined—no sales; quotation, 1st quality, at $70.50; 2nd quality, at $68.50; 3rd quality, at $66.50; stock, 75 bales. Grey Shirtings were inactive during the earlier part of the fortnight, but improved afterwards, and sales of 2,500 pieces have been made at $3.08 which, however, shows no change from previous quotations, viz.:—7¼ lbs., at $3.60; 8½ lbs., at $3.80; 9 lbs., at $4.10; stock, 4,650 pieces. T-cloths, no sales; 6 lbs. may be quoted at $2.90; stock, 2,800 pieces. White Shirtings: sales of 1,000 pieces, 60 reed, have been made at $3.60, but in other kinds prices are unaltered, and may be called at $4.10 for 64's, and $4.40 for 66's; stock, 2,849 pieces. White Brockades, $5; stock 250 pieces. Dyed Brocades are a little better at $5 85, sales 250 pieces; no stock. T. R. Cambrics have also slightly improved in value, and may be quoted at $3.50 to 4; no stock. Camlets are unchanged; Scarlet may be quoted at $23.50; Assorted at $22.50; no stock. Long Ells, Scarlet at $9 to 12; Assorted at $8 to 11; no stock. Spanish Stripes, $1 to 1.10 per yard; no stock. Lastings, sales of 40 pieces at $20.25. Metals, a few small sales have taken place, namely:—From first hands 100 slabs Tin at $23.80, and 200 pigs Lead at $7, these are the latest quotations. Stocks of the former are 2,942 slabs, and of the latter there is now no stock remaining. Quicksilver is quoted at $72.50.

SHANGHAI.—In Cotton Goods the business of the past two weeks has been on a restricted sale, attributable in a great measure to the closing of the northern ports by ice. Grey Shirtings, 8¼ lbs. weight, have declined 5 to 10 cents in value, and 7 lbs. 5 cents per piece. White Shirtings and T-Cloths have both been dull of sale, and quotations must be regarded to a certain extent nominally. Black Velvets and Turkey Reds have been in some inquiry at quotations. Spanish Stripes have been most difficult of sale at even lower prices. Camlets have also given way in value, and are in no inquiry. Long Ells and Lastings are not quotable lower, but continue difficult to move at prices below. In Metals, Nail Rod has been inquired for at last quotations. Lead is only saleable in small quantities at former rates. Quicksilver, owing to the absence of demand, has given way in price about 50 cents per picul. G. E. Grey Shirtings, sales 35,000 pieces; market quiet. G. E. White Shirtings, sales 3,000 pieces; very dull. American Drills, Jeans, Sheetings, and English Drills, no sales. T-Cloths, sales 2,500 pieces; prices weak. Handkerchiefs, sales 1,000 dozens at quotations. Spotted Shirtings, White, no sales. Spotted Shirtings, Dyed, sales 250 pieces. Brocades, sales 1,000 pieces. Damasks, sales 200 pieces. Chintz, sales 1,500 pieces; fair demand. Turkey Reds, sales 2,000 pieces for Japan. Velvets, no stock. Velveteens, sales 480 pieces. Muslins, no market. Dimities, sales 400 pieces. Union Spanish Stripes, no stock. Spanish Stripes, 360 pieces at auction. Medium, Broad, and Habit Cloths, sales 600 pieces. Camlets, sales 700 pieces; small demand. Long Ells, 2,000 pieces bartered against Silk. Lastings, sales 180 pieces. Crape Lastings, no sales. Crape Lustres, sales 500 pieces. Orleans, Figured and Plain, sales 2,000 pieces. Iron.—Flat and Round, no demand. Nail Rod, wanted. Hoop and Pig, no demand. Lead, small sales. Tin Plates and Steel, no business doing. Quicksilver, stock very small. Flints, wanted. Window Glass, no inquiry.

NINGPO.—6,260 pieces of Grey Shirtings have arrived exclusively in native hands. In Metals the arrivals have been:—Tin, 1,249 slabs; Tin Plates, 627 boxes; Nail Rods Iron, 750 bundles. Nail Rods are saleable, ⅛ to ½ inch being the sizes preferred. Quotations are:—Grey Shirtings, 8¼ lbs. $3.80 to $3.75 per piece. Swedish Steel, $5.50 to $5.60 per picul. Tin, Malacca, $26.50 per picul. Tin, Canton, $26.50 per picul. Nail Rod Iron, $3.20 to $3.70 per picul. Flat Iron, $3.60 to $5.80 per picul. Lead, $6.70 to $6.80 per picul.

YOKOHAMA.—Since the last report there has been but little change. Up to the 24th a few transactions took place, but the fearful conflagration which occurred on the 26th has naturally put an end to business for the moment. Owing to large quantities of goods, especially Shirtings, Camlets, and Cotton Yarn, having been consumed in the fire, prices will probably be higher, and the dealers are offering $20 for S. S. Camlets. It is, however, impossible to give reliable figures under the circumstances.

HANKOW.—There has been a little more animation in the market during the past fortnight, principally owing to a few Szechuen traders commencing to lay in their winter supplies. Prices of Plain and Dyed Cottons have been fairly maintained, with the exception of T-Cloths which have given way. Fancy Woollens and Cotton Mixtures have also been well supported, but Woollens and Worsteds are still depressed. Grey Shirtings best makes of 8 lbs. 4.6 oz., continue in good demand at previous rates, while heavier goods are 1 mace per piece lower. White Shirtings, with light stocks and a better inquiry for local consumption, and the Szechuen market medium reeds can be quoted 1 to 2 mace per piece higher. T-Cloths have still a downward tendency, and the inquiry has been chiefly for 7 lbs. Cloth, which is quoted 2 to 3 mace per piece lower. Drills—Clearances have been on a large scale, but no improvement in price can now be looked for. American cargo is worth Tls. 5.10 to 5.30 per piece, while English and Dutch are as last quoted. Dyed Spots and Brocades are only in moderate favour at former prices.

COTTON.

HONG KONG.—The market has not changed materially, and small settlements have been made day by day, amounting in all to about 6,100 bales, at former prices. It closes rather weak at the following quotations:—

Ningpo	$26 to 27
Shanghai	23 to 24
Tientsin	21 to 23
Bengal	22 to 24

CANTON.—Moderate transactions have taken place during the fortnight, about 400 bags of Shanghai have been placed at 20 to 21 tls; 1,500 bags of Ningpo at 15¼ to 17¼ tls., and 3,000 bales of Bengal at 15 to 18 tls. The remaining stocks include about 900 bags of native sorts and 1,600 bales Bengal.

SWATOW.—Receipts are 8,260 bales Northern and 969 bales of Indian. Stocks are being gradually worked off, and prices show a slight tendency to rise, though the demand is not very active. Quotations are, new Shanghai $25.50, old $24. Chefoo and Tientsin $24.50, Bombay $23, and Bengal $22.

AMOY.—Arrivals of New Ningpo and Shanghai Staple amount to 2,878 bales. Chinese have made small sales of New Ningpo at $26½, and Shanghai at $26½ to 27. These are present quotations. Old Shanghai staple is quoted $23½ to 24. Tientsin $22½ to 23. Stock 3,751 bales, principally in Chinese hands.

Digitized by Google

SHANGHAI.—Shipments have continued to Japan and Hankow, and after the departure of last mail, rates advanced to tls 16.5 per picul for best Shanghai staple, but receded again to tls 16.4, which is the present quotation; medium qualities may be quoted Tls 16 to 16.2 per picul.

NINGPO.—The Export has been 4,260 bales principally to Hong Kong; owing to good advices from the South, the market opened at an advance, and $28 per bale of 120 catties is the latest quotation.

HANKOW.—Imports have again been on a large scale, and sales (chiefly by Chinese) in proportion. The full supplies have thrown Tientsin staple out of the market, but good clean Shanghai is still wanted at tls 18.50 to 19. Best Tung-chow is saleable at tls 20.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Liverpool, Nov. 26, Carioca.

At SHANGHAI.—From Newcastle, Dec. 3, Ettrick; from Newport, Nov. 24, Crawshey Bailey; from Hamburg, 25, Johann Christoph; Dec. 2, Elize; (reported by telegram) previous to Dec. 26, from London, James Shepherd; from Falmouth, Dilkoosh.

At HONG KONG AND CANTON.—From Newcastle, Nov. 11, Queen of the Age, Dec. 14, Lord Raglan; from Liverpool, 14, Achilles (st.).

At MANILA.—From Liverpool, Nov. 24, Feliz.

DEPARTURES.

From YOKOHAMA.—For New York, Nov. 20, Lorton.

From SHANGHAI.—For New York, Dec. 5, Antelope.

From FOOCHOW.—For London, Nov. 20, Banian, John Temperley; 27, Patna; Dec. 7, Osprey; 8, Cingala; for Cowes, 5, Yeavering Belle; for Boston, Nov. 30, Renown.

From AMOY.—For New York, Dec. 8, The Brothers.

From HONG KONG AND CANTON.—For New York, Dec. 7, Charger; for Havana, 1, Manilla Bilbao; 4, Glenlee; 5, Avon.

From MANILA.—For New York, Dec. 2, America.

VESSELS EXPECTED.

From YOKOHAMA.—Thomas Dryden, Conference.

From NAGASAKI.—Wm. Mitchell, John Bunyan.

From SHANGHAI.—Nelly, Illimani, Lansdowne, John Paul, Knight of Snowdon, Marquis of Argyle, Trebolgan, Queen of the East, Antipodes, Ann Adamson, Polmaise, John Bull, Agamemnon, General Caulfield, Sir W. F. Williams, Juanpore, Red Deer, Onsuri, Janet Mitchell, Scindia, City of Quebec, Camilla.

From FOOCHOW.—Naomi, Louisa, Northfleet, Invincible, Gauntlet, J. C. Munro, Beautiful Star, Scawfell, Dunmail, Ellenborough, Fontenaye.

From CANTON.—Victoria, Kelso, Solent, Samuel, Passing Cloud, Cora, Linn, Chetah.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £2. 10s. to £3; Silk, £4 to £4. 10s. per ton.

At NAGASAKI.—To London, £2. 10s.; to New York, £2. 10s. per ton of 40 cubic feet.

At SHANGHAI there is no alteration to report, rates remain at £2 per ton to Great Britain; tonnage abundant. One vessel, however, the Asphodel, has obtained £2. 15. per ton of 50 cubic feet, but this is an extional rate.

At FOOCHOW.—To London, £2. 5s. to £2. 10s. per ton.

AT HONG KONG AND CANTON.—The freight market remains quiet, and without any improvement on rates for coast charters and the rice ports. Disengaged tonnage is considerably decreasing, which if it continues may have a beneficial effect. Rates to London unaltered; to New York the vessels on the berth are loading at £11 5s. and £2. According to the circular of George Holmes the estimated number of disengaged vessels in harbour is 14, representing a tonnage of 10,988.

MANILA.—The only vessel fixed during the fortnight has been the British barque Eleanor, for London, with about 350 tons unclayed sugar at £2, and 150 tons hemp at £2 5s. per ton.

CASUALTIES.

HONG KONG.

The British ship Queen of the Age reports having left Newcastle July 7th, passed the Downs July 9th, had strong westerly winds in the Channel and then a continuation of calms and light airs until off the Canaries on the 28th, when had moderate N.E. trades to the line which passed Aug. 20th, in long. 26 W. the rest of the passage to Sandalwood Island, had moderate weather with the exception of a gale on Sept. 3rd, passed Sandalwood Island Oct. 26th, was becalmed six days in the Ombay passage which passed Nov. 6th, passed through the Pitt's Passage on 17th and Gillollo on 21st, passed Pelew Islands 30th, and from there had a succession of heavy easterly gales in which shifted cargo and sustained other damage, passed through the Balintang Straits Dec. 8th, in a heavy gale and arrived here Dec. 11th. Spoke in the Ombay passage, Nov. 2, the American ship Endeavour, from New York to Shanghai 116 days out, American ship Horatia, and British ship James Russell, London to Hong Kong, all well.

The American ship Tennyson, Capt. Graves, reports having experienced light winds W. Palawan but strong N.E. winds in crossing the sea; fell in with to the Northward of Palawan the following vessels from Singapore for this port:—English ship W. G. Russell, Prussian ship Ferdinand Brumm, Prussian barque Agatha Johanna, and Hamburg barque Notos; same time spoke English barque Mountain Ash from London for Japan.

The Achilles (Holt's line) came in on the 14th December. The steamer met with a cyclone shortly after leaving Mauritius for Penang, and had very heavy weather from Singapore. At 8 A.M. on the 29th left the wharf at Singapore; at noon off Pedra Branca. 30th. Light airs and calm, all sail in; sent topgallant yards down. Dec. 1. Light winds, fore and aft sail set, sent mizen-topmast down. 2nd. Light winds and head sea, all sail in. 3rd. Light winds and clear; at 5 A.M. stopped, ship drifting 1¾ knots S. by W. 4th. At nine last night started. Noon, strong breezes and head sea. 5th. Strong breezes and heavy sea; current, S. 27 W. 53, sent topgallant mast down. 6th. Strong breezes and heavy head sea; current, S. 46 W. 27. 7th. Strong breezes and wet weather, all sails in. 8th. Strong breezes, part of this twenty-four hours fore and aft sail set. 9th. Strong breezes, with a heavy cross sea. 10th. Strong breezes; part of this twenty-four hours fore and aft sails set. 11th. Strong breezes, fore and aft sails set. 12th. All sail in.

GALLE, Dec. 29.—The Sea Witch, from Shanghai for New York, has put into Batavia leaky, having struck in Gaspar Straits, and would discharge.

LATEST TELEGRAMS.

CHINA.

(BY OVERLAND TELEGRAPH FROM GALLE.)

CANTON, Dec. 25.

Gray shirtings, 6½ catty, $3 60c.
Water twist, 16-24, $1 85c.
Tea dull.
Exchange.—Bankers' bills, 4s. 6¼d.

SHANGHAI, Dec. 20.

Tea, Congou firm.
Silk, good inquiry. No. 3 Tsatlee, 595. Export to date, 29,500 bales.
Bankers' bills, 6s. 4¼d.
Tea, 100 mil.

HONG KONG, Jan. 7.

No alteration in markets. Tea export to date 100,000,000 lbs., against 102,000,000 in 1866.

POINT DE GALLE, Jan. 10.

The Messageries Imperiales steamer *Donnai* left here to-day for Suez, with the homeward India, China, and Japan mails. She has a hundred passengers on board, and a full cargo of silk.

GALLE, Jan. 17.

The *Benares*, from China, arrived on the 14th inst., and the *Geelong* from Australia, to-day. The *Candia* leaves for Suez to-day.

THE OUTWARD MAIL OF DEC. 4-10

The *Nubia* arrived at Galle on January 6.

INDIA, CHINA, AND JAPAN MAILS.

SUEZ, Jan. 23.

The Messageries Imperiales steamer *Donnai* arrived here at noon to-day with the homeward India, China, and Japan mails. She brings 2,700 bales of silk and 350 packages of other merchandise.

THE INCOMING MAIL.

MALTA, Jan. 25.

CALCUTTA AND CHINA MAILS.

The *China* leaves at 8 A.M. to-day for Marseilles, where she may be expected about the evening of the 27th inst.

The *Tanjore* left at 3 P.M. yesterday for Southampton, where she may be expected about the 2nd proximo.

COMMERCIAL POSTSCRIPT.

The Taiwan (s.s.), from Aberdeen for China, at Yarmouth, with, it is supposed, her pumps out of order.

COTTON.—The market has been quiet, but prices have been well maintained. No China has been offered, but 120 bales fair Rangoon have realised 9d. to 9¼d. The stock of China and Japan in London amounts to 642 bales. The quotation for fair China is 10½d. to 11d.; for good and fine 11¼d. per lb.

SILK.—We have to report a very quiet market since last mail, prices on the whole have been fairly maintained, though the tendency is certainly in favour of buyers. The demand for export is very restricted, and the home trade only buy to supply immediate requirements. The large unloadings now working up will, no doubt, lead to more business, though so far as we have seen the quality of the Silk is very unsatisfatory. Japan Silk is still almost unsaleable; importers generally are anxious to be doing something, but do not appear willing to accept the low speculative offers that are occasionally made. Deliveries from 1st to 24th inclusive: China, 2,195 bales; Japan, 436 bales; total, 2,631 bales. China: Tsatlee, No. 1, 33s. to 33s. 6d.; 2, 32s. to 32s. 6d.; 3, 31s. to 31s. 6d. Japan: Mibasch and Sinchew, No. 1, 24s. 6d. to 35s. 6d.; 2, 33s. 6d. to 34s.; 3, 32s. to 33s.; 4 and inf., 29s. to 31s. 6d.

ARRIVALS (not in the Tables).—Jan. 10, at New York from S John Tarquin; 25, at London from Singapore, Indemnity, from China, Paul.

DEPARTURES.—Jan. 23, from Cardiff for Hong Kong, Southern Belle.

CASUALTIES.—The Sea Wave, McVicar, from Glasgow for Batavia, which went ashore Jan. 14, on Chapel Bar, has been got off into safety with loss of rudder, sails, and other damages. The Tarquin, arrived at New York, lost bulwarks, &c.

SPOKEN.—Doesborgh, Java to Amsterdam, Nov. 24, 30 S., 12 E.; Scheveningen, Bavavia to Rotterdam, Dec. 20, 12 N. 27 W.; Alfred Ray, Canton to London, Dec. 11, 5 S., 29 W.; Corsock (barque), Glasgow to Samarang, 26 days out, Dec. 14, 6 N., 26 W.; Ribbleton, Padang to New York, Dec. 16, 9 N., 28 W.; Veronica, from Foo-chow-Foo, Dec. 31, 43 N., 35 W.; Zaanstroom, Batavia to Amsterdam, Dec. 27, 36 N. 36 W.; Georges, Japan to London, Dec. 6, 13 S., 9 W.

TRIAL TRIP OF THE S.S. "COURIER."

This vessel, which has been built by Messrs. Henderson, Coulborn, and Co. at Renfrew for a Japanese firm, went down the Clyde on the 21st inst. for trial of her machinery, which has been specially designed to unite the greatest simplicity and the largest possible amount of power from small consumption of fuel.

She is 626 tons gross register, with compound engines of 90-horse power nominal, with surface condensers, and guaranteed by her builders to steam an average speed of eight nautical miles on a consumption of four cwt. per hour, and over ten nautical miles on a consumption of six and a-half cwt. per hour.

The trial was specially held for the owners' satisfaction, and she was

Digitized by Google

thoroughly tested to show what speed she would average on the guaranteed consumption; the result of the day's trial showing that a speed of eight and a-half knots had been steadily maintained on the four cwt. consumption, the coal being the ordinary Scotch quality. The machinery worked very smoothly and entirely free of vibration, the whole of the journals keeping perfectly cool. The pressure used on the trial was from 38 to 40 lbs., and the vacuum obtained was 28½ inches. Her boilers are of the ordinary tubular description. The model and finish of the ship are all that could be desired, and her deck and cabin arrangemeets are specially suited to Eastern trade. The time of her departure for Japan has not yet been finally decided on.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, JAN. 22.

The Second Chamber of the States-General will meet again on the 5th of February, and proceed at once to business, in the first place to settle the definitive budgets. Amongst the new Bills to be laid before the members is that upon the re-organisation of the national guards (*schutteryant*). The Government proposes to present the commonalties with 5f. for every *schutter*, and to provide them with arms, the articles made of leather and belonging to their equipment, and with ammunition; the other expenses are to be paid by the commonalties. In time of peace three per cent., or 50,000 men, will be levied, and in time of war, or when the public order is threatened, this number will be doubled.

The section report upon the Bill regulating the adjudication of waste grounds in India has been issued; the majority applaud this liberal measure, but there exists a difference of opinion about the best manner by which the aim could be obtained. The following measures were proposed, 1st, by selling waste grounds; 2nd, to give them as ground rents; or 3rd, to let them. The general conviction, however, was that this matter should be organised, because it was highly necessary that the interest of the natives with regard to the grounds should be ascertained. In the beginning of this report the strange behaviour of the actual Governor-General, Mr. Myer, was severely criticised, he having opposed this measure when it was proposed by the Minister Fransen van de Putte, while he proposed it himself when he was appointed Minister.

A good deal of sensation has been created here by the article translated by the *Nieuwe Rotterdamsche Courant* from the *Overland China Mail* of the 1st of Dec. relating to the trial and conviction of kidnappers holding authority to "collect coolies," issued by an agent (B. Lobscheid) of the Netherlands West India Immigration Company. According to a letter of of the board of that company, directed to the first-named paper, a severe examination about the facts mentioned by the China paper is ordered, as it seems that illegal deeds have been committed, but against the wishes of the agents of that company, and which they ignore completely. One of the motives for the illegal acts seems to be the great difficulty in obtaining twenty-five women for every hundred coolies, who immigrate, and in consequence of the claims of that company our Government now considers whether this stipulation ought not to be removed, Henceforth, only coolies will be engaged freely and justly for the immigration to Surinam, where there is any difficulty for obtaining the number of women prescribed by the law.

Our Government has adopted the new Commercial Code of Signals of France; it will shortly come to this that ships only will be able to communicate with other ships by means of this code.

Mr. A. J. Swart, of Amsterdam, ex-president of the Court of Justice at Batavia, has been presented by a number of his friends with a magnificent silver *piece de milieu*, provided with a proper inscription.

Miss Susanna Sablairolles, our principal *tragedienne*, died some days ago at the age of thirty-eight years.

Mr. J. P. C. van Overstraten, governor of the Military Academy at Breda, has asked for his dismissal, which was granted to him with a pension of 2,400f. Up to this time nothing is known officially about his successor, who perhaps will not be appointed before the plan for the reorganisation is fixed.

To Mr. C. J. Picke, ex-Minister of Justice a pension was granted of 391f.

A very severe snowstorm has visited our country. The snow lies nearly three feet deep, and in many places the roads, from drifting of the snow, are quite impassable. Locomotion was and is still very difficult. A biting east wind has since prevailed and a severe frost set in. The river navigation is totally suspended, the river being full of ice; I need not add that business has stopped.

Notwithstanding the coldness of the weather we still suffer from the cattle plague to a most alarming extent. In the last week ending on the 12th December 4,387 heads of cattle were attacked, against 4,988 and 5,832 in both the previous weeks.

As I wrote in my last letter, Mr. Hinsberg, ex-director of the Rotterdam Bank, has published a pamphlet, in which he puts forth that the business did not go on so well as might be, owing to the bank having no director thoroughly acquainted with banking. At the meeting held yesterday the directors proposed that a special commission should be elected to investigate the affairs of the bank and the truth of Mr. Hinsberg's assertions. This proposal was carried by a great majority, while the commissioners (*commissarissen*) asserted that the bank was prospering. I am of opinion that the pamphlet named would very much interest your readers in India, as much of the *vie intime* of the bank and its branches in India is revealed in it.

The prospectus for the new Lottery Loan, in behalf of the Crystal Palace at Amsterdam, was issued some days ago. It states that 100,000 shares of f.6.50 each will be issued, making a capital of 650,000f., which will be redeemed in 65 years with premiums, making together a capital of 1,000,000f. The lists of subscriptions will be closed on the 24th inst., and there is no doubt that a good result will be obtained.

COMMERCIAL.

COFFEE.—There is still a good demand for the consumption and better prices are paid. An advance of 1 cent is paid for Bangil and Tenger, and ¾ cent for Malang; the offers are, however, very limited. Good ordinary 41 to 41½.

SUGAR (RAW).—The market remains in a very favourable condition but the transactions are of no importance, because the holders decline to operate at the actual quotation, being 1f. above November value.

SPICES.—There is still a good demand for fine qualities. Nutmegs No. 1 were paid with 81c., but nothing can be bought now at these prices. Mace D 106c., E 103c., of both there is want of stock.

TOBACCO (JAVA LEAVES).—All the attention is directed upon the important auctions that will begin to-morrow; 439 b., trade mark *Wedi*, were sold.

DRUGS.—Cassia Vera: With important imports. Gummi Damar: Again higher in price. 498 chests floating were paid with 40c., but holders decline now to operate under 42c.

ARRACK.—40 casks Sourabaya ex Marianne were sold at prices that did not transpire.

JAVA INDIGO.—With a regular demand. The stock in the first hand includes 386 chests.

BANCA TIN.—Since our last report 1,800 slabs were sold at 52½f., 100 slabs at 52¾f., 1,200 slabs at 52½f. At this quotation large parcels can be obtained.

HIDES.—411 p. Sourabaya Rinder, weighing 7 to 7¼ k., ex India were sold at secret prices.

RICE.—Java Table 16 to 18, 2nds, 13 to 14. Without transactions.

MONEY.—The stock markets have been very quiet, with little business of any kind in progress. The demand for money in the open market was at rather stiffer rates. Dutch Two-and-a-Half per Cents., 56½; Three per Cents., 67½; Four per Cents., 87½. Trading Company, 136½. Belgium, Two-and-a-Half per Cents., 55 3-16ths. Spain, Two-and-a-Half per Cents., 31⅜. Portugal, Three per Cents., 42⅜. Russia, Five per Cents., 66. Austria, Five per Cents., 43¼. Crystal Palace, 31. Rotterdam Bank, first serie, 100; 2nd serie, 98¾.

'CHANGE.—London: 3 mo., f.11.67; 2 mo., f.11.70; short, f.11.76½. Paris: 3 mo., f.46.42½; 2 mo., f.46.52½; short, f.46.80. Antwerp: 3 mo., f.46.40; short, f.46.70. Hambro': 3 mo., f.34.77½; 2 mo., f.34.87½; short, f.35.10.

SHIPPING.—ARRIVALS.—Jan. 14, at Texel, from Padang, Ramsey.

DEPARTURES.—Jan. 15, from Brouwershaven, for Batavia, Cortgene, Ary Scheffer, Argo, Copernicus; for Samarang, Bremen; for Padang, Julie; for Macassar, Nederlands Vlag; for Melbourne, Johannes Lodewyk; Jan. 15, from Texel, for Batavia, Willemina and Clara, Cornelia; Jan. 15, from Zierikzee, for Batavia, S. van Heel; Jan. 15, from Veere, for Java via Liverpool, Susanna and Elizabeth; Jan. 17, from Hellevoet, for Batavia, for Java via Cardiff, Kinderdyk; Jan. 17, from Texel, for Batavia, Cornelia, Adolphina; for Padang, Gerredina, Wilhelmina.

PASSENGERS OUTWARD.—For Java, per St. Jan, Messrs. M. G. W. A. Schumann, P. van Assen, Wyers, D. T. C. Simons and 125 soldiers.

PASSENGERS INWARD.—From Java, per Ramsey, Mr. Stauur and family.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JAN. 13.

The projected Austrian expedition to the Far East appears to be abandoned, or at all events postponed for this year till a time when the finances of the country are in a more satisfactory condition; for though the Emperor and the Government—more especially the Minister for Commerce, Admiral Baron von Wullerstorf, who commanded the Novara expedition—are fully convinced of the important results that must accrue to the commercial interests of the empire from the realisation of the undertaking, it seems they all agree that it will cost too much money in the present low state of the exchequer. This has caused great disappointment, and the Chamber of Commerce at Trieste immediately passed a resolution unanimously to draw up a memorial on the subject showing the urgent necessity of sending out the expedition without loss of time and in anticipation of the opening of the new maritime thoroughfare to the east by the Suez canal. The memorial has been sent to the Minister of Commerce at Vienna, accompanied by a petition from the merchants to reconsider the subject and press its importance on the Council of Ministers.

From the report received by the Academy of Sciences at St. Petersburg, it would appear that the expedition sent to Siberia under the command of Herr Schmidt to search for the frozen mammoth discovered in the ice of the Arctic Sea turns out to be little better than a failure, at least in a scientific point of view. It is true they have found the remains of the animal, but in a very dilapidated condition, and with scarcely any flesh remaining on the bones. The skull was in an injured state, most of the vertebræ and ribs are imperfect, and some missing, as well as one of the hind legs. It affords no solution of the problem as to the habitat of the mammoth, as this specimen might just have well have travelled to the spot where it died from a distance and in any direction, or have been carried there when dead by a current of water or a floe of ice. The former report of Maximow, as communicated by Guljajew, appears therefore to be very incorrect. No new geological facts or specimens have been discovered, and the leader of the expedition feels great disappointment and dejection at his want of success.

At St. Petersburg the new institution of local telegraphs has been opened. There are sixteen stations in the different parts of the city and suburbs, where telegrams are received and forwarded not only to other local districts but through the Central Telegraph Office to all parts of the empire and foreign countries. The price charged for a local telegram not exceeding 20 words is 40 copecks, 60 copecks for 30 words, and so on rising 20 copecks for every additional ten words.

Accounts from Siberia announce a fresh discovery of a bed of rich auriferous sand, this time quite by chance, on the banks of the Debak, the Darassuk, and the Djalmatchin, in the vicinity of Nertchinsk.

According to an announcement published by the Russian Geographical Society, despatches have been received from Captain-Lieutenant Lund, commanding the Russian steam corvette *Warjag*, stating that coals of good quality have been discovered in 63 deg. north latitude—exactly the parallel of St. Petersburg—on the Kamschatka side of Penschinsky Bay, near the mouth of the River Padkatchernaya.

COMMERCIAL.

COFFEE.—A good deal of business has been done this week, which tended to strengthen the market. Sales 15,000 bags.

SUGAR.—Raw is more in request, and prices are firm. Refined enjoys more attention, but the transactions are very limited in extent, as the market is nearly denuded of ready goods.

RICE.—Consumers have bought pretty freely from the dealers at full prices, and the market is in a very satisfactory condition.

SPICES.—Cassia Lignea continues in favour, and the late advances are fully established. Nothing is now to be had under 12⅞ sch. bco. Pepper is again more inquired for, and 800 bags Batavia were sold at 3¼ sch. bco. Singapore commands 3⅛.

REFINED CAMPHOR is considerably higher, as with the increased demand the stock is very low. It now sells freely at 21 sch. bco.

TERRA JAPONICA.—The stock on hand has been cleared off for some time, and the 400 chests just arrived per *Henriette*, from Singapore, will come to a good market.

SPELTER.—The business was confined to 2,000 centners for spring delivery, at mks. 8½ Sch. Bco. The market closes quiet but very firm.

DISCOUNT.—2½ per cent. The silver bars in the Bank have increased by more than a million mks. bco. since last week.

SHIPPING—ARRIVED.—Jan. 8, at Cuxhaven, Henriette from Singapore (can't come up yet on account of the ice). The Hamburg three-masted schooner Tai-Lee, hence to China, is still detained at Cuxhaven.

HAMBURG, JAN. 23.

Public attention is now almost exclusively absorbed by the preparations for the general election of the members for the first North German Parliament, which is convened to meet at Berlin on the 15th of February, and the elections are appointed to take place on the 12th of that month. The lists of electors—which in this case means every man of the age of twenty-five, for the elective franchise is extended to universal suffrage—have been made up and are exhibited in the several electoral sub-districts, and the people are officially invited to inspect them to see if their names are included and properly spelt. Though we had something of the sort acted here nearly twenty years ago, when Hamburg had to elect members for the revolutionary Parliament that met at Frankfort in 1848, yet it is a novel proceeding for the younger part of the community. To complete the liberality of the arrangements the voting will be secret. In the present infancy of Parliamentary life in Germany candidates are as yet shy of offering themselves prominently to the notice of the electors, and thus it is ordered that each voter on his arrival at the polling office shall be furnished with a blank slip of paper on which he is to write—presupposing that he *can* write—as many names as there are to be members elected, which slip he is to fold up and deposit it in the urn provided for the purpose. As the electoral law ordains there shall be one member for every 100,000 heads in the entire population and one extra if the surplus be more than 50,000 souls, and as the late census gives the total population of Hamburg with its suburbs and rural territory at 282,000, it follows that three members are to be returned for this city. But though, as I said above, candidates do not come forward themselves, committees and associations are formed to promote the election of persons whom they consider eligible for the honour of representing Hamburg at the Central Parliament. It is generally considered that the members should be persons of weight and capacity, able to explain the claims and wishes of this place in connection with the re-construction of the Zollverein, and that the interests of Hamburg's commerce, manufactures and shipping require for their further development and prosperity a position as a free port in the most extended signification—like Trieste and Singapore. Four gentlemen are mentioned as "good and proper persons" to represent this city in Parliament; these are 1. Senator Kirchenpauer, at present deputed by the Senate to take part in the preliminary conferences at Berlin to draw up the draft of the new Federal constitution with Prussia and the other allies; 2. Dr. Soetbeer, the Secretary of the Board of Trade, a gentleman of great practical knowledge and experience, and well known by his numerous publications on Finance, commerce, and statistics; 3. Mr. Adolf Godeffroy, the chairman of the board of directors of the Hamburg-American Steamship Company; and 4, Mr. Edgar Ross, the head of the eminent firm of Messrs. Ross, Vidal and Co., East India merchants. These may be called the candidates of the Exchange, but the artisans and working classes are taking measures to nominate men of their own body; and I must confess that as the suffrage is universal, and they greatly out-number the educated electors, they may become very dangerous competitors if they combine well together and do not lose their strength by splitting their votes on too many candidates. This causes some alarm in the camp of the upper classes of society.

In the adjoining town of Altona, which with its rural population forms an electoral district, a large and influential part of the commercial community has resolved to put in nomination Mr. William Pustau, the China merchant of that place, as he is considered not only a proper person to represent that constituency in Parliament from his extensive knowledge and experience of commercial affairs, but has shown on various occasions considerable tact and judgment in politics. Moreover, there is but little doubt that he would be a *persona grata* at Berlin, as at an early period he showed that he comprehended the mission of Prussia in Schleswig-Holstein by signing the so-called address of the seventeen notabilities of the duchy. What tends to strengthen Mr. Pustau's chance of success at the coming election is that Mr. Th. Reincke, the only other candidate with hopes of being elected, declines the honour of being put in nomination. It is even stated that the latter gentleman recommends his personal and political friends to support Mr. Pustau with their vote and interest, but I cannot vouch for the truth of the statement.

The new Japanese Embassy has arrived at Berlin, last from Paris, *en route* to St. Petersburg, where it appears they have instructions to negotiate a new treaty of commerce and to make some rectification of the frontier between the two countries. By the treaty of January 26, 1855, the Island of Saghalien or Krafto was to remain neutral territory; but as since then by the treaty of Peking in 1860 China has ceded the long strip of land south of the Amoor, with six hundred miles of coast line opposite Saghalien and Yesso, the Russians find it very inconvenient to have a trac of country so near—and in some parts even within sight—not under their absolute control. The principal members of the embassy have called on the Russian Ambassador at Berlin, by whom they were received with marked courtesy and cordiality. They are all dressed in European winter costume, and proceed in a few days to the northern capital by railway.

The weather is very severe. Deep snow covers the ground, and the Elbe is choked up with floating ice which drives up and down with the tide, preventing all navigation. The steamers now only come up as far as Gluckstadt, and goods and passengers are forwarded by railway. Above this city and beyond the tidal influence the Elbe is crossed on sledges. The arrival of the mails is very irregular, and we are often two or three days without letters from England.

COMMERCIAL.

COFFEE. — The market continues very active, considerable purchases having been made both on speculation and for consumption.

SUGAR.—Raw firm, but the business done was only trifling.

RICE.—In prices no alteration. Market firm but quiet.

TERRA JAPONICA.—The parcel mentioned in last report as just arrived has been sold at 15 marks banco. No more in the market.

SPICES.—The last remaining parcel of cassia lignea (about 2,000 chests) has been taken at 12¼ sch. banco, by which the market is denuded of the article till further supplies come to hand. Pepper firm, but with limited sales.

CAMPHOR.—Refined continues in favour, and a further advance is established.

OIL OF STAR ANNISEED.—The last advices from China have caused some speculation here; the prices are higher and holders unwilling to sell.

SPELTER.—No transactions to report, and in consequence of this lull purchases might be made rather lower, say 14½ marks banco, both in loco and for delivery.

DISCOUNT.—Money still very plentiful. The stock of silver bars in the bank has again increased this week by nearly a million, and good bills can be discounted easily at 2½ per cent.

SHIPPING.—A vessel was reported as arrived at Cuxhaven from Batavia; for "Batavia" read "Bahia."

FRANCE.

The *Gazette du Midi* contains the following letter from Toulon:—

"Vice-Admiral Roze, seing that the Korean diplomatists were trying to spin out the negotiations until the river of Kanghoa should be closed by the ice, weighed anchor and brought his squadron into the Chinese ports safely. Several little things had been observed which showed there was no time to lose if a disaster were to be escaped. The flower of the Korean army had come against the French forces, and in an attack upon a fortified pagoda it was perceived that the enemy fought well, and repulsed the assault with so much vigour that the French began to think better of it, or they were obliged to retire with several officers and a considerable number of sailors wounded. Among the former were MM. Chabannes and de Lassale, sub-lieutenants. Cochin China is now plunged into a war which is one of conquest, and the end of which no one can foresee. Colonel Alegron, who left Saigon on the 1st December with 700 European troops and 1,200 Annamite auxiliaries, received orders to act against the insurgent chief Poulo-Cambo to the utmost, in order to dislodge him from the left bank of the Cambogia and drive him into Laos. Two hundred and fifty waggons accompany the expedition, with stores and provisions of all kinds. During the absence of Colonel Alegron the Governor-General has been organising all the military forces of the country with the object of invading the eastern provinces, which are considered as the permanent focus of the insurrection and of the intrigues which are ruining the country. Preparations are in progress, it is said, to send reinforcements to Cochin China as a precautionary measure; the steam frigates *Gomer* and *Eldorado* are mentioned as having to take 100 naval artillerymen and a regiment of infantry from Toulon; and by way of Suez these are to be sent to their destination."

Naval and Military.

On the transfer, in March next, of Singapore and the Straits Settlements from the Indian to the Imperial Government, the troops to be stationed there will consist of head-quarters and one wing of a European regiment, eight companies Ceylon Rifles, (two to be detached to Labuan) and two batteries Royal Artillery. The Ceylon garrison will at the same time be altered to one European regiment, the wing of a second European regiment, head-quarters and six companies Ceylon Rifles, two batteries Royal Artillery, and a company of Gun Lascars. The military command of the Straits is to be attached to that of Ceylon, and the whole will be under Major-General Studholme Hodgson, now Commander of the Forces in Ceylon.

The Barrosa, 20, screw corvette, Capt. Henry Boys, arrived at Spithead on the 9th inst. from service in the China seas, and on anchoring exchanged salutes with the flagship of the Naval Commander-in-Chief and Port-Admiral, the Victory. The Barrosa brought home a number of naval invalids, who were landed by the Port Admiral's steam tender Sprightly, Commander Allen. Orders were received by Capt. Boys soon after arrival to proceed with his ship round to Sheerness, where she will be dismantled and paid out of commission. The Barrosa sailed from Yokohama on the 6th of September, 1866, arrived at Nagasaki on the 10th, sailed on the 11th, and arrived at Hong Kong on the 17th, sailed on the 23rd, and arrived at Singapore on the 3rd of October; sailed on the 6th, and arrived at the Mauritius on the 27th; sailed on the same day, and arrived at the Cape of Good Hope on the 16th of November; sailed on the 17th, and arrived at St. Helena on the 26th; sailed on the 27th, and called in at Ascension on the 3rd of December. She experienced fine weather generally until she arrived off the Western Islands. She then fell in with heavy north-easterly gales, which continued until in the Channel she met with strong south-westerly winds.

The following is from the *Army and Navy Gazette* :—

It appears that the 59th Regiment, now at the head of the list for foreign service, is to be sent to Ceylon and not to India, for which—from the fact of its being one of the only two battalions similarly placed that did not last return from that country—it was apparently destined. The following are now likely to be the five India reliefs:—2nd battalion 25th, from Ceylon, to be replaced by the 59th; 2nd battalion 60th Rifles, 1st battalion 6th, 92nd, and 85th, from Ireland. The 75th will also, in all probability, leave Ireland for the Mediterranean in the course of the summer. This arrangement is rather hard on the 85th and 92nd, which will have been home only about four years, the former having landed from the Cape in June, 1863, and the latter in the previous month. It has also the effect of pushing regiments that came home in 1864 and 1865, which, according to ordinary rule should not embark till 1869 and 1870, very much on towards a resumption of foreign service. Thus, in 1868, the 31st, which returned from China in November, 1863, and the 1st battalion 13th, 1st battalions 14th, 69th, 74th, 62nd, and 1st battalion 21st Fusiliers will probably have to embark after having been but a few months over four years at home. In act four years and not five will become the rule. If we take into confideration the time that some of the regiments in India will now have pent on foreign service, the theory that each battaionl gets about five syears at home for ten abroad becomes true only in rare and exceptional cases. Thus the 27th, 35th, 46th, 91st, and others, will have been out for fourteen; the 7th, 19th, 79th, and 88th, for fifteen; and the 38th and the 3rd battalions of the 60th and Rifle Brigade probably for sixteen years before they again see England. This is a greater instance of expatriation than even that which the Recruiting Commissioners condemned. It may be said that this cannot be helped, that we have not battalions enough for our wants, and that the authorities can do no more in the matter. We venture to differ from this opinion, and on another occasion we shall probably give our reasons.

The Royal Alfred, 18, armour plated steam-ship, was commissioned at Portsmouth by Captain F. A. Herbert, as flag-ship for Vice-Admiral Sir R. Mundy to relieve the Duncan, flagship of Vice-Admiral Sir James Hope, G.C.B., Commander-in-Chief of Her Majesty's ships in North American and the West Indian waters. The Admiral hoisted his flag (*pro tem.*) on board the Duke of Wellington, Captain Fellowes, under the customary salute from the Victory, Captain the Hon. F. Egerton, flagship of the Commander-in-Chief, Admiral Sir T. C. Pasley, which was duly acknowledged from the Duke of Wellington. The Royal Alfred will have some alterations made in her internal fittings, and a stern gallery affixed, before she will be ready to leave for her station.

The Urgent, troopship, Capt. S. Anderson, went out of Portsmouth harbour for a trial of speed at the measured mile in Stokes Bay, under the charge of the officials of the Steam Reserve and dockyard, but the weather proving unfavourable she returned to the harbour and was swung to ascertain the deviation of her compasses. The machinery was in good order and worked well, and it is supposed the trial will be dispensed with, as she is appointed to leave about the 25th for China, with a number of naval officers and supernumerary seamen.

Vice-Admiral Sir George Rodney Mundy, K.C.B., was gazetted Commander-in-Chief of the North American and West Indian station, vice Admiral Sir James Hope, G.C.B., whose period of service has expired.

An order was received at Chatham garrison directing Lieutenant H. P. Lee, Royal Engineers, to be held in readiness to embark for China. Lieutenant H. R. G. Georges, Lieutenant A. Audry, and Lieutenant W. B. Hurst, Royal Engineers, have been struck off the strength at headquarters, previously to embarking for foreign service. A detachment of the Royal Engineers has been placed under orders to embark for Malta, for service at that station.

The Hong Kong Corps which we have already noticed as about to be formed and composed of natives of China, Ceylon, and Malays, will be officered from Ceylon, and subalterns will rank as lieutenants. The cost of this service will be included in the next estimates.

A large number of hands have been put on the flagship of Vice-Admiral Sir Henry Keppel, K.C.B., the Rodney, now fitting for China. Additional cabin and office accommodation for a flag officer's retinue is being fitted on board, and various improvements in her internal fitments are being carried out. The Rodney is complete in her fitments aloft, and there is comparatively little remaining to be done inboard before she is out of hand. As soon as she has been put out of the basin, and is ready to receive her guns on board, her armament will be forwarded to her from the War Department stores, Chatham. Captain Hensage has been appointed flag captain.

The supernumeraries per troopship Urgent, noticed in our last, consist of the following:—15 lieutenants, 1 master, 4 second masters, 6 assistant surgeons, 28 engineers, 10 warrant officers, 500 men, and 1 captain's cook. The vessel is to leave this day for Hong Kong.

Capt. the Duke of Edinburgh, K.G., arrived on the 23rd, at Moorshead's Royal Hotel, Devonport, and visited Port Admiral Sir William F. Martin, K.C.B., at Mount Wise, and then went to the office of Admiral Superintendent the Hon. James R. Drummond, C.B., in Devonport dockyard, after which his Royal Highness hoisted his flag on board the screw steam frigate Galatea, 26, which is to have a complement of 515 officers and men. The First Lieutenant of the Duke's previous ship, the Racoon, Hugh Campbell, is appointed Commander of the Galatea, and several other officers belonging to the corvette will also join the frigate. A detachment of the Royal Marines Light Infantry, consisting of one sergeant, one corporal, one drummer, and 51 privates, of the Chatham division of Royal Marines Light Infantry, under the command of Capt. R. F. Tayler, will leave head-quarters, and proceed to Devonport, for service on board the Galatea.

The Colonelcy of the 64th Regiment is vacant by the death on the 19th inst. of General Sir James Freeth, K.C.B., K.H., at the age of 81.

The navy estimates, as was generally expected, will largely exceed those of last year. The project for the augmentation of the navy involves the building of no fewer than 49 men-of-war, of rates varying from the first-class ironclad to the comparatively tiny gunboat. It appears that Great Britain has a relative superiority in third-class men-of-war, but more of the smaller kind of vessels are still wanted. The Admiralty plan is for constructing seven second-class ships, and ample provision is made for smaller ships. It is stated that the English navy at this moment is only slightly superior to the French navy, and absolutely inferior to the combined navy of almost any two naval Powers.

The Coquette, 4, screw gun vessel, Commander the Hon. G. R. Roe, was paid out of commission at Portsmouth, under the superintendence of Capt. F. Egerton, C.B., A.D.C. to the Queen, of Her Majesty's ship Victory, after dismantling, on return to England from foreign service. Joseph Eades, chief boatswain's mate, was awarded the silver medal given by the Admiralty for long service and good conduct. Only one officer and nineteen men have returned to England in the Coquette out of her original crew. She was commissioned at Portsmouth in April, 1862, by Commander Alexander, who retained the command of her until promoted to the Euryalus in August, 1863, when he was relieved by Commander Roe, who has paid her out of commission. The Coquette took an active part in the actions of Kagosima and Simonosaki. Since the conclusion of the war she has been chiefly stationed in the Straits of Malacca.

THE P. AND O. COMPANY.

(To the Editor of *The London and China Telegraph.*)

SIR,—After the recent boasting on the part of the Peninsular and Oriental Company of the marvellous services which they render to the Government and public, would you kindly lend a little of your valuable space to acquaint your readers with the other side of the question?

By one of the company's telegrams which appeared in the morning journals of 17th inst., those interested in the arrival of the mails were informed that the next mail due from Calcutta and China had arrived at Suez on the 13th inst. (four days early); but by to-day's papers we learn that the journey was not resumed from Alexandria till the 21st, so that the chance of answering letters by the outward mail of 26th is frustrated. Merchants are kept two days beyond the extreme contract time allowed for the voyage for their advices and remittances, while the unfortunate passengers suffer eight days' delay in Egypt, which to all is a great inconvenience, and to some a very serious consideration in the exorbitant hotel expenses thus inflicted upon them.

Of course as the time approaches when the present contract with the Government will expire the company will take good care to perform its duties more satisfactorily, but in the meantime, with such successful competition as they are now meeting with in the French mail service, I should have thought the P. and O. directors would have found it to their interest o be more accommodating to their mercantile customers.

Two steamers in reserve at Alexandria (or even only one for the Marseilles quick route) would prevent a recurrence of the present evil, and enable the company to give the public the benefit of an early arrival at Suez, when their steamers do manage to exceed the speed stipulated for in their mail contract, and then the directors could proceed more leisurely to replace their unsuitable and worn-out ships on the more distant stations.—I am, Sir, your obedient servant, MERCATOR.

London, Jan. 24, 1867.

[The company have been repeatedly urged to have a steamer at Alexandria, ready to bring on the mails, but they have frankly stated that they cannot afford it.—ED.]

WRECK OF THE "TAYMOUTH CASTLE", FOR SINGAPORE.—Telegrams were received in this town (says the *Liverpool Journal of Commerce*), announcing the loss of the *Taymouth Castle*, belonging to Messrs. Skinner and Co., of Glasgow, together with her commander and crew. The *Taymouth Castle* was a composite vessel built by Messrs. McConnell, of Greenock, in 1865. Her register was 627 tons, and she was a very fine ship. At the time of her loss she was under the command of Captain Miller, and was manned by a crew of nineteen men. She sailed from the Clyde on the 5th of January, and appears to have experienced the full force of the recent hurricane in the Channel, and to have ultimately become a total wreck at Torr Point, on the coast of Antrim. Heavy insurances were effected in London, Liverpool, and Glasgow, and the underwriters have sustained a very heavy loss. The cargo of the *Taymouth Castle* consisted of—beer, value £451 cotton thread, £674; earthenware, £511; galvanised sheet iron, £220; 647,202 yards plain cotton, £11,499; whiting, £5; yellow metal sheathing, £1,006; cotton and wool (manufactured), £45; saddlery, £110; 72,040 yards coloured cloths, £14,151; 165,185 lbs. cotton yarn, £17,225; 5,240 yards plain linen, £164: cambric, £180; rice bowls, £234; damask, £30; bar iron, £480; nailrod iron, £740; hoop iron, £105; umbrellas, £25; stationery, £81; linen collars, £20; woollen cloth, £156; twine, £80; nails, £61; and copper, £856. The ship was valued at about £12,000, and her fittings and stores were also worth a considerable amount. The loss at present stands between £60,000 and £70,000, which may be reduced by salvage.

NEW GUNBOATS FOR CHINA.—Mr. Ladd, master shipwright at Woolwich, has received instructions from the Board of Admiralty to make preparations for laying down the keel of one of the new class twin-screw gunboats, six or eight of which are to be built in the various dockyards, to be placed at the disposal of the Admiral on the China station These vessels, which are to be of what is termed composite construction' will have iron frames with an outward coating of two thicknesses of teak planking, and are to be of 463 tons burden, and to have 150-horse power engines each, with twin screws. The one ordered to be built at Woolwich will be named the Dwarf, and is to be completed with the utmost possible despatch, on the slip from which the 6-gun screw corvette, armour-plated, Pallas was launched in 1865.

THE Archbishop of Canterbury has fixed Saturday, the 2nd of February for the consecration of the Rev. C. R. Alford, M.A., of Trinity College, Cambridge, to the bishopric of Victoria, Hong Kong.

THE approaching annexation to France (says the *Havre Journal*) is announced of three new provinces in Cochin China, with the tacit consent of the Emperor, Tu-Duc, who would be delighted to get rid of them, as they are in a state of chronic rebellion.

LONDON, SATURDAY, JANUARY 26, 1867.

THE HONG KONG MINT.

AN echo from afar reaches us to the cry now so frequently resounding in our own streets—"We've got no work to do-o-o!" The officials of the Hong Kong Mint seem to be in the same predicament as the distressed agriculturists here, though from a different cause. They are not exactly "frozen out," but nevertheless their occupation is gone; they have used up all the bullion sent in for coinage or recoinage, and, like Oliver, are "asking for more," but don't seem to get it. "The sentry "walks his lonely round" guarding vaults tenanted only by rats, and innocent of filthy lucre either in the raw material stage of sycee or in finished coin; and the Master and his deputies daily go through the form of supervising work that consists in diligently doing nothing—or at best in keeping the Mint machinery clean and ready for use against a contingent influx of the coveted metal. In sober truth, this is a lamentable state of things, and is likely if of long continuance to be fraught with very serious consequences. In the first place it must have a disheartening and even demoralising effect on the *personnel* of the establishment. Of all places in the world there are few worse than Hong Kong for any one whose energies are not braced up by the wholesome stimulant of a regular and necessary occupation; an idle, purposeless life in such a climate is as detrimental to the physical as it is to the moral welfare, and is too often the finger-post that points the road to the so-called "Happy Valley." But apart from its ill effects on the internal economy of the Mint, this lethargic condition of the establishment threatens to derange the entire financial condition of the colony. As a separate department, expected not only to defray its own expenses but to contribute a handsome annual surplus to the revenue, it has proved, so far, an entire failure; and as a consequence has rendered necessary the imposition of a tax which, although undoubtedly justifiable, is nevertheless obnoxious to a large section of the population. To the discontent arising from this cause may, we presume, be attributed the ominous rumours already in circulation as to the probable abandonment of the whole scheme.

Is there no remedy for this? As we have already pointed out, the case looks much worse than it really is, owing to the cost of the building, plant, and machinery, amounting to nearly $400,000, having been paid in so short a time out of the annual revenue of the colony, instead of being spread over a term of years by means of a loan; and the establishment—undoubtedly a good one of its kind—having been so paid for, surely a hasty abandonment of it without a patient trial would be a false step, and one which we trust the good sense of the colonists will not allow, even should its maintenance continue, for the present, to entail a small loss to the revenue. A large loss we do not believe possible, for we have the best grounds for stating that, so long as even a single press is kept steadily at work on 10-cent and 20-cent pieces it will be sufficient to defray all expenses; and whatever difficulty and delay there may be in getting the dollar into circulation, the utility and popularity of this smaller coinage are beyond doubt or dispute. Singapore, too, is eagerly demanding a local small coinage, which could easily be supplied by the Hong Kong Mint, to the advantage of both sides; and before long we may reasonably expect exchange to take a different course, resulting in a renewal of the export of bullion to the East, and this must also throw work into the Mint. With these prospects we must decline even now to consider the failure of the Mint as irretrievable, and counsel the Governor to take no hasty step, but wait patiently for better times. In this we are supported by the opinion of persons largely interested in the trade.

KOREA.

EVIDENCE in support of the accounts published by us relative to the proceedings of Admiral Roze in Korea arrives bit by bit from French sources. One of the officers of the expedition wrote to the *Vigie de Cherbourg* on the 18th November in the following terms:—"We are leaving Korea for Japan. We depart this very day. The expedition now finished has cost us dearly enough. On the 26th of October we had three men killed and five wounded. On the 9th of November, in another affair, we had thirty-eight wounded, most of them seriously, including five officers. The Admiral showed great hardihood in throwing himself with a handful of men into a country with twelve millions of inhabitants; but he wisely retired when he knew more of his position. Besides, he had completely fulfilled the object in view. We have destroyed a large fortified place, razed one of the King palaces, and burnt an immense quantity of arms, ammunition, and stores of all kinds. This is a blow from which the Korean Government will not recover in a moment. Do not suppose from the number of our wounded that we were beaten; on the contrary, during a month we had nothing but success. In no case did the natives assume the offensive; they remained behind their walls, and it was only when we went forward to dislodge them that we suffered our losses. You understand that no valour can make up for numbers when the disproportion is too great. It would have been foolhardy to have remained there longer with the small force we possessed, but this affair will remain one of the most interesting acts of war, and will reflect great honour on the Admiral and all concerned in it. We are going to Yokohama, where we shall probably remain until the end of the campaign. We all desire this, for it is the most agreeable manner of finishing what we have to do." We confess we do not understand the last sentence, unless it means that the officers of the expedition have had quite as much as they desire of the Koreans. The correspondent of the *Vigie* naturally enough does not call the retreat a defeat; but we cannot overlook the fact, admitted by the French authorities themselves, that the Koreans managed so well that Admiral Roze found it necessary to leave before receiving the satisfaction he had demanded. We feel assured that the Koreans will construe this into a brilliant victory, and we feel also that it would have been better, as matters have turned out, for European prestige if Admiral Roze had done either less or more. The only thing he has acccomplished, as it seems to us, is having learned a little more about the Koreans than we Europeans knew before; but in doing this he has helped them to a false estimate of their comparative power, and it will require a considerable effort to show them their error. The *Moniteur* speaks of the affair as glorious, but there is no echo; the most devoted journals are silent, while others cry out in doleful terms—"Another distant expedition!"

THE SHANGHAI MIXED COURT.

WE have watched with considerable interest the formation and progress of the Court whose title heads this article, but we have hitherto abstained from commenting on its functions, preferring rather to ascertain its working before bringing it prominently under the notice of our readers. To many of the latter the very name of the "Mixed Court" is probably still unfamiliar, and we may therefore be excused for briefly stating that in the conjoined English and American settlements at Shanghai a tribunal has recently been established, before which all police cases occurring in the foreign quarter wherein natives appear as prisoners and all civil cases brought by foreigners against Chinese or against unrepresented Europeans are tried and adjudicated upon. In order the better to estimate the benefit of this measure we must advert to the course of judicial procedure in civil and criminal cases wherein Chinese were the defendants or accused parties previous to the opening of the Mixed Court. The treaty provides that a British subject having reason to complain of a Chinese must proceed to the consulate and state his grievance. Failing an amicable settlement, the Chinese authorities are to be requested to investigate the case in conjunction with the Consul, and thus an equitable decision is to be arrived at. But

Digitized by Google

in practice this was found to work badly, for as no penalty could be inflicted upon natives save by their own officials, bribery was invariably set to work, while whenever manifestly partial verdicts were not given, the course of justice was so sedulously encumbered with forms, appeals, counter-appeals, and all the machinery of law courts that the foreign plaintiff generally lost patience and never obtained satisfaction. Thus it was in civil suits. In criminal cases the same thing occurred. A prisoner was brought before the Vice-Consul and by him was transmitted to the chief magistrate with a request that, as his guilt was fully proved, he should receive so many weeks' imprisonment or so many blows of the bamboo. Friends were, however, frequently forthcoming whose united representations backed by something more tangible sufficed to obtain an acquittal, and the butler who had robbed his master or the compradore who had cheated him was in the majority of cases to be seen clothed sumptuously and promenading the bund some hours after he had been carried forcibly into the city as a convicted felon. Of course pressure was occasionally brought to bear upon the local Mandarins, and in isolated instances even wealthy criminals obtained their deserts; but the rule remained as we have stated it, justice being in China, as our readers are perhaps aware, an article which bears a readily ascertainable market value.

It was, we believe, with Mr. SEWARD, the active and energetic United States Consul-General, that the idea of a mixed commission for the trial of cases wherein foreign interests were involved first originated. The suggestion was at once adopted by the Hon. Sir FREDERICK BRUCE and the Hon. ANSON BURLINGAME, then Ministers at Peking for England and the United States respectively. Mr. SEWARD visited Peking for the purpose of bringing the subject more fully under the cognisance of the foreign representatives, and returned with draft rules and regulations for the guidance of the new Court. Sir HARRY PARKES was at the time English Consul at Shanghai, and the scheme met with his hearty co-operation. Thus backed by foreign influence the assent of the Chinese officials was readily obtained, and the Court was fairly called into existence. A *wei yuan* named CHEN was appointed by the Taotai to act as Chinese judge, and Mr. ALABASTER, interpreter to the English Consulate, and Mr. JAMIESON, interpreter to the American Consulate-General, were called to sit as assessors or co-judges, their duties being nominally confined to watching the progress of such cases as involved foreign interests. Messrs. ALABASTER and JAMIESON had obtained a certain local reputation for their acquaintance with the Chinese language and customs, and hence the foreign element in the Court was almost exclusively represented by them. Provision had been made for the presence of a member of the Municipal Council or of an officer deputed by that body at all sittings of the Court, but this privilege was we believe rarely if ever claimed. The Council probably considered that the Mixed Court should have been placed more directly under its surveillance, and as the consular element largely preponderated, it held aloof from the proceedings. The plan, however, worked remarkably well, criminals being no longer sent into the city with the chance of escaping the consequences of their faults, but being, where the nature of the offence admitted, compelled to work on the roads, break stones and assist in the carrying out of the necessary public works within the settlement.

As may easily be conceived the functions of the assessors were not confined to the merely passive duties first assigned to them. They were compelled by force of circumstances to join in consultation with the native magistrate, and thus, to the advantage of all parties, and certainly to the advancement of justice, they shared in every decision promulgated by the Court. After a short time the jurisdiction which had for a few months extended to criminal charges only was enlarged to embrace civil cases, and an elaborate code of regulations was drawn up and published in English and Chinese. We have been favoured with a copy of this code, which comprises fifteen rules, but may be summarised as follows. The constitution of the Court is detailed and provision made for a record in English and Chinese of its proceedings. Its criminal jurisdiction extends to natives and unrepresented foreigners charged with the commission within the foreign quarter of such an offence as would be adequately punished by (in the case of Chinese) imprisonment with or without hard labour for one hundred days or less, one hundred blows with the light bamboo, or a fine not exceeding one hundred dollars, and by (in the case of foreigners) imprisonment with or without hard labour for sixty days or less, or a fine not exceeding two hundred dollars. Charges of greater magnitude are to be submitted to the Taotai, who will, as the case may demand, request the assistance of foreign consular officers. Civil suits brought by foreigners against Chinese or against non-treaty Europeans are in like manner to be decided subject to appeal to the Taotai whenever the sum in dispute exceeds one hundred dollars. From the Taotai's Court an appeal lies to the Board of Foreign Affairs at Peking whenever the consular assessors disagree with the chief magistrate's finding, all proceedings being in the meanwhile stayed. The decisions of the Court in civil cases may be enforced by warrant of distress, or imprisonment issued by the Taotai with the consent of the foreign Consul interested, and executed by the Municipal Council. So far it will be seen that the organisation of the Court is all that could be desired. Complaints are still, however, made regarding the immunity of prisoners sentenced to terms of imprisonment or to castigation, for as yet such offenders are handed over to the native officials, who are ever ready to sacrifice the ends of justice for a slight pecuniary consideration. An attempt should therefore be made to obtain a gaol within which all the sentences of the Court should be carried out, thus destroying the only remaining element of uncertainty in the administration of the law such as it exists.

We have thus given a succinct account of the rise and progress of the Mixed Court. Its usefulness may best be estimated from the subjoined figures. During the year 1865 the number of prisoners brought before it amounted to 2,931, whereof 1,970 were convicted. Of these latter 416 were warned and dismissed, 635 were flogged, 143 cangued, 311 fined, 458 imprisoned, and seven deported. The offences ranged through every degree of crime, from murder and piracy to trivial breaches of municipal rules. But the most satisfactory proof of the usefulness of the court lies in the statement made by the Watch Committee of the Shanghai Municipal Council for 1865 and 1866, to the effect that crime has materially decreased, and burglary with violence is now almost unknown. The certainty of punishment has thus had a most beneficial effect in the suppression of crime, whether of a serious character or such as proceeds rather from the strangeness of the foreign municipal regulations to which native residents find themselves compelled to conform. We would suggest that, in conjunction with the present duties of the Court, the settlement of those questions which frequently arise between the customs and individuals should be submitted to the same mixed commission. At present claims made by foreigners against the customs are either settled summarily in a manner invariably unsatisfactory to the claimant, or are forwarded to Peking there to await decision at the end of a variable period depending on the amount of work or recreation which the authorities there have to get through. Similarly claims against individuals could with greater advantage be settled upon the spot without the alternative of appeal except where very large sums are involved. It has frequently happened that serious loss has accrued to foreign merchants in consequence of an embargo laid upon steamers pending the decision of the Peking Board, and it would thus prove of benefit to all were the settlement of such questions left (except in rare instances) to a local tribunal.

THE NEW GOVERNOR OF THE STRAITS.

The departure of Colonel Harry St. George Ord, C.B., the newly-appointed Governor of the Straits Settlements, for the seat of his future jurisdiction is fixed, as we have already announced, for the 10th proximo. In pursuance of our usual custom of giving the antecedents of any official nominated to a post of such importance as this, we have obtained some information from Bermuda, the colony lately under Colonel Ord's government, regarding the relations which subsisted between himself and the colonists. The evidence before us seems to show that his rule there, though firm, was distinguished by wisdom and ability, and that his removal has been a source of sincere and unaffected regret to all classes. Colonel Ord's career has hitherto been confined almost exclusively to the West Indies and the coast of Africa, a field in which there is much hard work to be done, and comparatively little credit to be gained. His employment by Her Majesty's Government on special missions to the Courts of Paris and the Hague to assist our Ministers at those Courts in carrying out negotiations respecting the French and Dutch possessions in Africa may, however, be taken as some guarantee of his administrative abilities, and the following passages from a numerously signed farewell address, presented to Colonel Ord, on the eve of his

Digitized by Google

departure, testify to the hearty good feeling which existed towards him in Bermuda :—

"Bermuda has found in you a governor of singular energy and ability, and of most unusual freedom from the fetters of form and prejudice; and under your administration these islands have undoubtedly worn an unusual aspect of activity and progress. How much the colony owes to your Excellency's indomitable enterprise, readiness of resource, and clear-sighted judgment is perhaps not yet generally known; but we feel convinced that however fortunate we may be in our future governors, your Excellency's administration will form a marked era in our history, which, the better it is understood, will be the more appreciated as one productive of lasting advantages to Bermuda, and reflecting the highest credit on your Excellency."

Another address, presented by the Mayor and Corporation of St. George, contains this flattering paragraph: "Accessible, frank, courteous, and patient of hearing to every one who sought an interview, your Excellency has succeeded in establishing among us the character of a true friend to all, and while we think that the same noble qualities which have won the respect and esteem of this colony will be eminently appreciated in your new government, we cannot but regret that they are thus early lost to ourselves. In short, as long as talent, decision and forethought, a manly frankness which invites confidence, and a cheerfulness which no opposition can impair, continue to be qualities which secure admiration, so long will your Excellency's administration be remembered among us as a bright era in the history of the colony." Each address concludes with a warm tribute of respect to Mrs. Ord.

The same sentiments are freely expressed in the public journals, as the following extract from a leading article in the *Bermuda Chronicle* of Nov. 21, 1866, will show :—"Considering that Governor Ord's administration has lasted considerably under six years, and that upwards of twelve months of that time were spent by him away from the colony, principally in the execution of an important mission entrusted to his talents and energy on the coast of Africa, it is matter of interesting inquiry how uring so comparatively brief and interrupted an administration he has succeeded in securing so large an amount of the respect and esteem—not to use even a warmer word—of the inhabitants of these islands? We believe the secret will be found in the following circumstances. Governor Ord was, and is, essentially a man of progress. Possessed of no ordinary amount of talent and forethought; energetic, active, fearless, and self-reliant, he was not long in mastering, not only the broad features but the miniature details of our *regime* here, and to such a mind, grasping the facts of the case was the same as at once devising in conception and carrying out in action plans for amelioration. For the rest, but one feeling prevails everywhere—a feeling of honest deeply felt regret at our loss, coupled with the heartiest wishes for the success of his future. No Governor the colony has ever had will be more missed than Colonel Ord. We may be permitted to add a few words for his estimable lady. Administering the hospitalities of Government House with a kindly grace which left nothing to be desired Mrs. Ord distinguished herself rather by the silent unobserved exercise of those highest of all qualities, active charity and benevolence among the sick and needy."

Admiral Keppel will most probably leave for China by the mail of 20 26th February. He will in this case possibly meet Admiral King at Singapore, and there assume command of the station. No gunboat has yet been despatched for Hong Kong to be attached especially to the colony, several causes—the chief among them being the present unsettled state of the Hong Kong finances—having prevented the immediate carrying out of the plan arranged by Sir Richard MacDonnell before his departure We are glad to observe however that a number of twin-screw gunboats of 150-horse power are ordered to be built immediately to strengthen the China squadron, and these from their improved construction will doubtless prove more efficient than the old class of gunboats in suppressing piracy. Indeed, it is high time that these old vessels were disposed of; they have all done good service, and are now entirely worn out and inefficient. They should be sold on the spot for whatever they will fetch, and not sent home to rot in the dockyards here. Let the new Admiral have a good fleet at his command, and he will do his work well.

We understand that the appointments for the Straits Government under the Colonial-office are being filled up rapidly. In our next issue we expect to give the whole of the heads of the departments. In the meantime we may mention that Major Anson, formerly at Mauritius, has been appointed Lieut.-Governor at Penang. Colonel Ord, who proceeds by the next mail to Singapore, has been working hard at the various points requiring immediate attention, and we understand that he at once advised what we have long advocated, viz., a dollar and 1 cent. currency. This will of course involve a new set of dies for local stamps and postage stamps, which will be prepared. There is one small anomaly connected with postage, which we trust will not be perpetuated by the new Government, and that is, that a letter of over 1oz. to Singapore is charged 5s. 4d., while to Hong Kong it is only 4s. This has probably escaped attention, but is an anomaly which should not longer exist.

DEPARTURE OF THE FIRST STEAMER FROM SAN FRANCISCO TO CHINA.—The steamer *Colorado* left San Francisco on the 1st January for Yokohama and Hong Kong direct. She took 45 cabin passengers, 200 Chinese steerage, about 300 tons general cargo, including 1,300 barrels flour, and Treasure value $580,000. The piers were crowded with spectators to witness her departure and wish her *bon voyage*. Thus the long-heralded line has actually commenced, and we wish it all success.

BREACH OF CONTRACT CASE.—JON.— v. JUSTESThis was an action for breach of a contract for the sale of hemp. The contract was for Manila hemp, to be shipped at Singapore at £38 10s. per ton. The cargo was wrecked, and the hemp got wetted with sea water, and had to be dried, and in the result was mixed with sand and much damaged. The case was tried at Liverpool before Mr. Justice Blackburn, who laid the law down thus :—He said there was an implied warranty that the hemp was merchantable, and he explained this to mean hemp such as fair and honest merchants would expect on a contract for Manila hemp—that is, hemp such as they would expect to receive as Manila hemp. The jury found for the plaintiff—damages, £766. Mr. Brett now moved, on the part or the defendant, to set aside this verdict on the ground of misdirection, insisting that the only warranty was that the hemp was Manila hemp. Instead of which the learned judge had given as the test what fair and honest merchants would expect to receive as Manila hemp. The only warranty was that the article delivered was that described. Mere damage done to it could not be recovered against the seller as a breach of warranty. The Lord Chief Justice observed that the argument of the learned counsel went to this extent, that on a contract for wheat it would be enough to deliver any kind of grain which could be called wheat. He thought there was an implied contract in such cases that the articles should be in a reasonably merchantable condition. Mr. Justice Mellor said he presumed the seller would contend that having contracted to pay the price for fair and merchantable hemp, he had a right to have merchantable hemp. It had certainly been held, in a case where the contract was for "spent madder," that there was no implied warranty that it should be fit for any particular purpose, as, for instance, for dyeing. But he was not aware that the authorities went further than that in favour of the seller. Mr. Justice Lush inquired if the learned counsel could cite any authority in favour of his view. No such authority being cited, the Lord Chief Justice said as the point was important, it was fit that it should be argued and determined, and therefore the learned counsel might take a rule *nisi*.

DEATH OF THE REV. DR. MACDONNELL —We regret to announce the death of the Rev. Richard MacDonnell, D.D., Provost of Trinity College, Dublin, and father of Sir Richard Graves MacDonnell, Governor of Hong Kong. He had for some time suffered from a slight paralytic attack, but bronchitis was the immediate cause of his death, which took place on the 24th inst. at the age of 80. Dr. MacDonnell was originally a member of the Irish bar, and was elected fellow of the college in 1808, being then only in his twenty-first year. After a collegiate career of forty-three years, during which, as a teacher, he displayed great ability, he was appointed provost by the Government of Earl Russell in 1857. He was a Whig in politics and a supporter of the national system of education in Ireland.

THE JAPANESE IN PARIS.—The Japanese Embassy now staying at the Grand Hotel, Paris, occupy a suite of elegant rooms, for which they pay 350fr. a day. The arms they wear consist of long daggers and short sabres, richly ornamented, and are beautifully finished and formidable weapons. The chief of the Embassy dresses in European costume, with trousers and black frock coat. His name is Ko-tole, and he bears the title of Yamato-no-Kami. He is Minister of Foreign Affairs at Japan, grand officer of the Shiogoon, and governor of a province as large as the whole of France. Before returning to Paris he will pay a visit to St. Petersburg, and afterwards to America. The Japanese Ambassadors appear to be much pleased with the cookery of the Grand Hotel. They take five meals a day, and appear to have an excellent appetite. Of wines they seem to prefer Madeira and champagne, but they have a strong predilection for beer, and are sufficiently good judges of malt and hops to give the preference to the English beverage.

Monetary and Commercial.

The Comptoir d'Escompte announces that the subscription to the 80,000 new shares for doubling the capital will commence on the 16th January and be continued to the 4th February. Shareholders only are allowed to subscribe.

At a meeting of the general board of directors of the Thames and Mersey Marine Insurance Company (Limited), held in London, it was resolved to recommend a payment of 4s. per share (the same as paid to 30th June last); being 2s. per share dividend, or at the rate of 10 per cent. per annum, and 2s. per share bonus, making in all 20 per cent. per annum on the paid up capital of the company for the year 1866.

The telegrams from Hong Kong of Dec. 15 were only received on the 13th inst. (Sunday), and on the 14th the news soon spread over the city. Considerable satisfaction—rejoicing we may say—was experienced in the "Jerusalem," at Lloyds' and other places, that the house of Dent and Co. would be able to sustain the shock caused by their bills being refused by Messrs. Dent, Palmer and Co. on the 6th Nov. It is stated that the firm received assistance from Messrs. Jardine, Matheson and Co. The telegram of Messrs. Dent and Co. simply states that the bills would be provided for, and business was proceeding as usual. We have already noticed that Messrs. Dent, Palmer and Co. have accepted a considerable amount of bills which have been drawn subsequently, and it is to be presumed that Messrs. Dent and Co. will put them in funds to pay those dishonoured—amounting to about £60,000 —at the due date, which will be next May and June, the bills

Digitized by Google

being at six months' sight. Of course the bills which have been returned to China will be paid at once. We are extremely happy to find that the view we took of the matter in November has been realised, and that the long-standing and popular firm of Dent and Co. has not succumbed. We trust that with prudent management it will soon resume its *prestige* and profitable trading. It will be no easy task for Mr. John Dent and his partners to accomplish, but what would be impossible to other firms is not so to them, inasmuch as creditors will be willing to grant them such extension of time as may be necessary. We subjoin the comments of the press on the matter.

The Times :—

"Telegrams from China to-day, *via* Galle, dated Hong Kong, the 15th of December, announce that Messrs. Dent and Co. have been enabled to provide for their draughts which were refused acceptance by their London correspondents at the beginning of November last, through the assistance of Messrs. Jardine, Matheson, and Co., and others—a result which will greatly tend to restore confidence in this branch of commerce. It is added that the business of the house is going on as usual. The market items by the present opportunity are to the effect that silk was rather lower, with a small business, and that in tea also the transactions were limited and the shipments on a reduced scale."

Daily News :—

"Telegrams received to-day from China, dated the 15th ultimo, make no reference to the prevalence of a mercantile panic, as was rumoured in London a few days ago, but contain the satisfactory information that Messrs. Dent and Co. were prepared to take up the bills, amounting to about £30,000, which were refused acceptance in November last by their London agents, Messrs. Dent, Palmer, and Co."

Morning Post :—

"A telegram from China, dated Dec. 15, states that Messrs. Dent and Co., having received assistance from Messrs. Jardine, Matheson, and Co., have been enabled to resume business."

Standard and *Herald* :—

"A telegram has been received stating that provision had been made for those bills of Messrs. Dent and Co. which were refused acceptance in November last by Messrs. Dent, Palmer, and Co., of London. The parties who are understood to have interfered in their behalf were Messrs. Jardine, Matheson, and Co. The firm of Messrs. Dent, and Co., in China, will, therefore, not suspend payment. The rumour recently current in London that a panic prevailed at Shanghai does not receive any confirmation in the telegrams of to-day, as they in no way refer to such a disaster, and consequently it is not believed to be correct."

Daily Telegraph :—

"It is very satisfactory to be able to announce that a telegram was received this morning from Hong Kong, dated December 15, to the effect that the bills of Messrs. Dent and Co., of China, refused some time since by Messrs. Dent, Palmer, and Co., of London, their agents, will be fully provided for. It is therefore presumed that the anticipated suspension of the firm will be avoided."

The Shanghai Exchange quotation noticed in our last as telegraphed at 5s. 10¼d. it appears was an error on the part of the Telegraph Company in transmission. The words despatched were, Exchange, Seventy-five and a-quarter; but the telegram was delivered Seventy and a-quarter. This is trifling compared to the gibberish which is sometimes delivered. Most of the messages on the fire at Yokohama have been unintelligible.

Amongst the shares connected with the Far East we notice a considerable rise in P. and O. Company's, which stood at about £6 premium a month since, and are now at £18 to £20. The dealers on the Stock Exchange have decidedly been caught in their "bearing operations" in this company, for there is nothing new in its affairs to cause this rise. Considering the deficiency in their freight receipts on bullion and silk, there is room for depreciation. The receipt of the news in reference to Messrs. Dent and Co. has not caused any marked improvement in the India and China Bank shares. There has been a demand for Hong Kong gas shares at £1 discount, in consequence of the affairs of the company having improved so far as to enable the directors to declare a dividend shortly.

The arrangement by which Mr. Ilbery was to have filled the post of manager of the Agra Bank in the absence of Mr. Balfour has not been carried out.

On account of the receipt of a telegram from Bombay, announcing the shipment of further remittances, the official liquidator of the Commercial Bank Corporation of India and the East will at once apply to the Court of Chancery for permission to increase the proposed first dividend from 6s. 8d. to 10s., as originally intended. The scheme for resuscitation is in hand.

Creditors of the Asiatic Banking Corporation are required to send the particulars of their claims to Mr. William Turquand and Mr. F. W. Lawrence, the official liquidators, by the 17th July next, the 1st August having been appointed by Vice-Chancellor Stuart for adjudicating upon them.

The large decline in the Comptoir d'Escompte is owing to the fact that the holders of the shares, which are now made the subject of time bargains, have exercised the right of subscribing for the new shares. The quotation of shares for cash, those that is who still possess this right, was f.832.50.

The efforts made by Messrs. Small and Co. to make a private compromise with their creditors have not resulted favourably, and a deed to wind up under inspection has been signed and registered in the Court. We understand that the assets will scarcely yield 5s. The operations of this firm have of late been chiefly with Messrs. Balfour and Co., Calcutta, who have succumbed to the late financial pressure and the absence of facilities granted by the Agra Bank before its failure. The partners in Messrs. Small and Co. are Patrick F. Robertson, M.P. for Hastings, and J. R. Robertson; the former is a director of the Oriental Bank, the Ceylon Company, Bank of Egypt, &c., which it will be necessary now to resign. In the old times he was the chief partner in Turner and Co., China, and old residents will remember that a considerable business was once transacted between Turner and Co. and Small and Co. Of late years however the transactions of the firm, which has stood for years, have been confined to Singapore and Calcutta. The manner in which the difficulties have been brought about, and the very meagre assets, are spoken of very disparagingly in the City, and the Chartered Mercantile Bank have felt it their duty to resist the private winding up. As we have before pointed out, it is injurious to trade generally that banks should support tottering firms when the difficulties have become chronic, and the Mercantile Bank have acted we believe with the best intentions for the general welfare. It appears that the firm should have long since suspended, and the means they have used to keep afloat are said to be by no means creditable. The liabilities are fortunately not large, being under £100,000.

The firm of How Brothers, chiefly in the China trade in connection with Messrs. Johnson and Co., have also failed in making a private compromise, and a winding-up deed has been executed. We understand that the assets are estimated at 15s., and that the losses of the firm have been produced chiefly by losses through other parties and not by any indiscretion or over-trading. A good deal of sympathy has been expressed for the stoppage of the firm, and it is probable that they will resume business. It is presumed that the stoppage of Messrs. Johnson and Co. will have already been decided on in China.

Messrs. Goddard, Finch, and Co., shippers to China, &c., have also effected a deed to wind up under inspection, but we understand permission is accorded to continue business.

In reference to the failure of Messrs. La Roche, Nainby, and Co., engaged in the Straits trade, noticed in a previous issue, an application has been made to the court to confirm a resolution of creditors representing £54,000 out of £62,500—to accept a composition of 1s. in the pound. The court refused the same in consequence of the opposition of some creditors represented by Mr. Bagley.

According to last advices from India and China the proposed change from six months' sight to four months' sight was gradually gaining favour, and we believe that already some firms have anticipated the time originally proposed for giving effect to the alteration, as bills have been received by last mail at four months' sight, instead of the usual usance of six months' sight.

The directors of the Merchant Shipping Company, Limited, (late Somes) have issued a circular to the shareholders informing them of the progress of the company since the meeting in July last. They state that the dockyard property and fleet of ships are now wholly unencumbered, and that all are actively employed. It is proposed to declare an interim dividend of 10s. per share.

The arguments in the matter of Overend, Gurney, and Co. were finished on the 22nd. Vice-Chancellor Malins said the case was a most important one, and it had been very ably and elaborately argued by the counsel on both sides. He added that he would give it his best consideration, and hoped to be able to deliver judgment by the end of this term, or at all events on the first day of the sittings after term. Judgment may accordingly be expected at the latest in the early part of February.

A meeting of the shareholders of the London Joint-Stock Bank has been held. The net profit of the half-year has reached £183,055, including £26,571 brought forward. A dividend at the rate of 12½ per cent. per annum, and a bonus of 18s. 9d. per share, were declared, being together £1 17s. 6d. per share, or at the rate of 25 per cent. per annum for the half-year. The sum of £8,055 has been carried to the guarantee

Digitized by Google

fund, which now amounts to £332,846, and the balance—£40,000—placed to a special reserve, in connection with accounts not yet closed, resulting from the recent crisis.

The report of the London and Provincial Marine Insurance Company has been published in anticipation of the general meeting to be held on the 31st. It states that, notwithstanding the unusual number of heavy losses to underwriters last year, the company, after having paid all claims, losses, and expenses, carries over a balance of £51,999 14s. 5d.; making, in addition to the capital and reserve, a total of £179,004 0s. 6d. Under these circumstance the directors recommend payment of interest for the half-year at the rate of 10 per cent. per annum. The balance-sheet for the 1866 shows that the net premiums of insurance have amounted to £234,662 18s. 5d. the claims paid to £149,875 1s. 11d., and that the reserve fund is now £25,000.

The half-yearly meeting of the proprietors of the Consolidated Bank was held at the London Tavern, Mr. J. A. Turner in the chair. The report and proceedings showed that the directors had succeeded in fairly resuscitating the bank, and from the accounts it appeared that to the 31st December there was a net profit of £32,116 0s. 9d., of which £6,550 was carried to the reserve fund, £16,458 for payment of the dividend of 5 per cent. per annum for the half-year, leaving £9,107 to be carried forward.

At the meeting of the National Discount Company (Limited) the directors' report showing an available balance of £77,772 and recommending a dividend at the rate of 20 per cent. per annum for the half-year, was adopted. The chairman, Mr. F. W. Russell, M.P., in referring to the satisfactory progress of the company, mentioned that the recent average amount of loss has not exceeded 4¾d. per £100. The company have no securities which are not convertible, and there is no lock up of capital except that on bills of joint-stock companies, which will shortly be met, and the interest of which will come into the profits of another year.

The report of the Ocean Marine Insurance Company, to be presented on the 31st inst., shows an available total of £67,630, and recommends a distribution of £1 5s. per share, and the appropriation of £10,000 to reserve, which will thus be increased to £50,000, leaving £7,630 to be carried forward.

The report of the Bank of Egypt, to be presented on the 5th of February, shows an available total of £47,142, including a previous balance of £9,372, and recommends a distribution for the half-year in the shape of dividend and bonus at the rate of 18 per cent. per annum, which will absorb £22,500. The sum of £18,477 is to be carried to reserve, which will thus be raised to £45,000, and £6,165 will remain to be carried forward. The paid-up capital of the bank is £250,000.

The report of the International Financial Society (Limited) states that the accounts show that the profit of £30,693 brought forward from the last account has been absorbed, and a loss of £23,934 incurred, which has been written off against the reserve fund, reducing the amount of that fund to £4,846 11s. The directors express regret that, under these circumstances, it is impossible for them to recommend the payment of any dividend and they add their belief that the shareholders will concur in the policy of thus dealing at once with the losses which have arisen from the events of the past year. As they mention that all the society's securities have been valued at the lowest market prices on the 31st December last, it is to be inferred that the paid-up capital of £750,000 may be regarded as intact. On this head the auditors, Messrs. Harding and Galsworthy, append the following note:—

"We have examined the above accounts, with the books, vouchers, and securities, and have found the same correct; but it must not be assumed that all the amounts represented by securities and investments could at once be realised. The assets immediately available are, however, far more than sufficient to satisfy the debts of the society, and we have o doubt that the estimated values of the whole will be ultimately produced."

At the meeting of the East and West India Dock Company a dividend of 3 per cent. and a bonus of 1 were declared for the half-year, and resolutions authorising the raising of £384,000 by the creation of new stock were adopted.

The directors of the London and St. Katherine Docks Company will recommend to their proprietors at the approaching general meeting the payment of a dividend on the company's ordinary stock of £1 10s. per cent. for the half-year, free of income-tax—making, with the dividend declared in July last, 3½ per cent. for the year—and carrying a surplus of £12,649 to the rest account.

At a meeting of several large shareholders of the Bank of London, holding upwards of 10,000 shares, at the London Tavern resolutions were unanimously passed to commence an independent investigation of the affairs of the bank by Mr. David Chadwick, of the firm of Messrs. Chadwick, Adamson, M'Kenna, and Co., with the view of resuscitating the bank. A committee of shareholders was appointed to confer with the official liquidator of the bank, and it is understood that Mr. Chadwick will proceed with his investigation as early as practicable, and report to the shareholders at a general meeting to be called for the purpose.

The first instalment of about 230 tons pipes for the supply of water to the town of Penang has been shipped off in the *Zambeze* by Messrs. John Buttery and Co., of Glasgow.

The amount of bullion by the P. and O. Co.'s steamer *Pera*, from Southampton on the 20th inst., was, in gold, to Malta, £105; in silver, to Bombay, £750; to Calcutta, £5,000; total, in gold, £105; in silver, £5,750.

MANCHESTER MARKETS.

The market is exceedingly quiet and prices are in most cases again weaker with more desire to press for orders. Grey Shirtings 7 lb., 10s. 9d. to 11s.; 8¼ lbs., 13s. 3d. to 13s. Cotton Yarn: Nos. 16-24 at 1s. 6d. to 1s. 7d. Maddapollams, 4s. 9d.: Long Cloths, 13s.; T-Cloths, 8s. 8d.; White Spot Shirtings, 14s. 6d.; Brocade do., 14s. 6d.

SAM MENDEL'S EXPORT TABLES.

Mr. Sam Mendel has issued his monthly tables, giving the quantities of Cotton goods exported from London, Liverpool, Southampton, and the Clyde to the ports and countries of the Far East in the month ended 16th January, 1867, compared with the exports during the corresponding months of the two preceding years:—

To HONG KONG AND WHAMPOA.—For month ended 16th January, 1867 the export of Plain Cottons was 3,415,395 yards; for 1866, 2,779,696; and for 1865, 704,564. Of Coloured Cottons the export for 1867 was 135,020 yards; for 1866, 146,401; for 1865, 88,936. Of Printed Cottons the export was, for 1867, 121,510 yards; for 1866, 44,700. No return for 1865. Of Cotton Yarn the export for 1867 was 146,030 lbs.; for 1866, 93,200; and for 1865, 136,400.

To SHANGHAI.—The export of Plain Cottons was, for January, 1867, 7,155,735; for 1866, 4,637,723; for 1865, 6,702,253 yards. Of Coloured Cottons, for 1867, 2,135,369; for 1866, 278,308; for 1865, 166,140 yards. Of Printed Cottons, for 1867, 479,205; for 1866, 164,400; for 1865, 249,528 yards. Of Cotton Yarn, for 1867, 73,152; for 1866, 5,000; for 1865, 23,000 lbs.

To JAPAN.—The export of Plain Cottons for January, 1867, was 677,830; for 1866, 1,778,875; for 1865, 48,125 yards. Of Coloured Cottons for 1867, 178,400; for 1866, 385,730; for 1865, 11,000 yards. Of Printed Cottons, for 1867, 93,600; for 1866, 293,282; for 1865, 83,460 yards. Of Cotton Yarn for 1867, 158,020; for 1866, 316,732 lbs. No return for 1865.

To SINGAPORE AND PENANG.—The export of Plain Cottons for month ended Jan. 16 was, for 1867, 3,453,650; for 1866, 2,848,971; for 1865, 254,600 yards. Of Coloured Cottons for 1867, 713,508; for 1866, 1,227,079; for 1865, 40,500 yards. Of Printed Cottons, for 1867, 327,677; for 1866, 181,790 yards. No return for 1865. Of Cotton Yarn, for 1867, 88,500; for 1866, 174,400; for 1865, 44,000 lbs. The returns for 1865 and 1866 do not include Penang.

To BATAVIA.—The export of Plain Cottons for the month ended 16th January was, for 1867, 2,972,886; for 1866, 1,912,534; for 1865, 388,160 yards. Of Coloured Cottons for 1867, 1,735,489; for 1866, 1,555,428; for 1865, 417,330 yards. Of Printed Cottons, for 1867, 1,591,587; for 1866, 467,230; for 1865, 647,644 yards. Of Cotton Yarn, for 1867, 58,540; for 1866, 23,850; for 1865, 54,400 lbs.

To MANILA.—The export of Plain Cottons for the month ended 16th January was, for 1867, 45,671; for 1866, 475,660; for 1865, 1,280,330 yards. Of Coloured and Printed Cottons the returns for 1867 are not given. Of Cotton Yarn, for 1867, 16,089; for 1866, 4,800; for 1865, 6,000 lbs.

To CEYLON.—The export of Plain Cottons for the month ended 16th January was, for 1867, 3,676,448; for 1866, 1,461,152; for 1865, 335,237 yards. Of Coloured Cottons, for 1867, 348,080; for 1866, 182,081; for 1865, 136,640 yards. Of Printed Cottons, for 1867, 630,320; for 1866, 404,535; for 1865, 174,607 yards. Of Cotton Yarn, for 1867, 11,500; for 1866, 28,179; for 1865, 24,292 lbs.

We have also been favoured with comprehensive tables, likewise by Mr. Sam Mendel, detailing the quantity of Plain Cottons and Cotton Yarn exported from London, Liverpool, Southampton, and the Clyde to Japan for four years viz., from 1863 to 1866 inclusive, and to the other ports in the Far East for ten years, viz., from 1857 to 1866 inclusive:—

To HONG KONG.—The export of Plain Cottons was, for 1866, 41,394,471; for 1865, 36,907,736; for 1864, 21,067,009; for 1863, 12,677,234; for 1862, 20,934,593; for 1861, 66,060,981; for 1860, 70,723,201; for 1859, 54,113,697; for 1858, 31,162,395; for 1857, 15,675,301 yards. The monthly averages were, for 1866, 3,449,539; for 1865, 3,075,645; for 1864, 1,755,584; for 1863, 1,056,436; for 1862, 1,744,549; for 1861, 5,505,082; for 1860, 5,893,600; for 1859, 4,509,467; for 1858, 2,596,866; for 1857, 1,306,275. Of Cotton Yarns the quantity exported was, for 1866, 4,630,230; for 1865, 1,140,830; for 1864, 1,601,810; for 1863, 2,640,531; for 1862, 3,230,622; for 1861, 6,649,110; for 1860, 7,536,612; for 1859, 9,565,261; for 1858, 5,156,900, for 1857, 3,270,696 lbs. The monthly averages were in 1866, 385,852; in 1865, 95,069; in 1864, 133,484; in 1863, 220,044; in 1862, 269,219; in 1861, 554,093; in 1860, 628,051; in 1859, 797,105; in 1858, 429,742; in 1857, 272,558 lbs.

To SHANGHAI.—Of Plain Cottons, the export was, for 1866, 124,551,768; for 1865, 79,422,708; for 1864, 37,133,127; for 1863,

Digitized by Google

23 719.097; for 1862. 44,742.801; for 1861, 158.006,183; for 1860, 107.970.231; for 1859, 108,536,115; for 1858. 80,580.161; for 1857, 89.658.245 yards. The monthly averages were, in 1866, 10,379,314; in 1865, 6 618 559; in 1864. 3.094,844; in 1863, 1.976,591; in 1862, 3,728.567; in 1861, 13.167,182; in 1860, 8.997,519; in 1859, 9.044,676; in 1858, 6.715,013; in 1857. 7,471,520 yards. Of Cotton Yarns, the export was, for 1866, 126.200; for 1865, 81,000; for 1864, 158,249; for 1863. 758; for 1862, 11,500; for 1861, 4,240; for 1860, 18,000; for 1859, 55,100; for 1858, 274,000 lbs. The monthly averages were, in 1866, 10,517; in 1865, 6 750; in 1864, 13.187; in 1863, 63; in 1862, 958; in 1861, 353; in 1860, 1,500; in 1859, 4,592; in 1858, 22,867 lbs.

TO JAPAN.—The export of Plain Cottons was, for 1866, 21,866 868; for 1865, 17,891,196; for 1864, 2,728,102; for 1863, 15,600 yards. The monthly averages were, in 1866, 1,822,239; in 1865, 1,490,933; in 1864, 227,342; in 1863, 1,300 yards. Of Cotton Yarns the export was, for 1866, 1,141,928; for 1865, 816.432; for 1864, 50.650 lbs. The monthly averages were, in 1866, 95,161; in 1865, 68,036; in 1864, 4,221 lbs. As stated above, the returns are given only for four years.

TO SINGAPORE. — The export of Plain Cottons was for 1866, 48,422.146; for 1865, 32,310,731; for 1864, 19,610.141; for 1863, 21,403,410; for 1862, 21,621,000; for 1861, 32,452.178; for 1860, 66.313.624; for 1859, 42,473,207; for 1858, 31,129.982; for 1857, 24.191.225 yards. The monthly averages were, in 1866, 4.035,179; in 1865, 2.695,061; in 1864, 1.634,178; in 1863, 1.783,617; in 1862, 1.801.001; in 1861, 2.704,348; in 1860, 5,526,135; in 1859, 3.539,434; in 1858, 2,594,165; in 1857, 2.015,935 yards. Of Cotton Yarns, the export was for 1866, 1,808,877; for 1865, 1,132,785; for 1864, 1,281,492; for 1863, 1,877,210; for 1862, 1,265,828; for 1861, 1,568,717; for 1860, 3,392,327; for 1859, 4,029,645; for 1858. 2,097,970; for 1857, 1,964,295 lbs. The monthly averages were, in 1866, 150,740; in 1865, 94,399; in 1864. 106,791; in 1863, 156.434; in 1862, 105,486; in 1861, 130,726; in 1860, 282,694; in 1859, 335,804; in 1858, 174,831; in 1857, 163,691 lbs.

TO MANILA.—The export of Plain Cottons was, for 1866, 12,113,822; for 1865, 13.326,775; for 1864, 8,245,292; for 1863, 6 454,608; for 1862, 5.898,273; for 1861, 16.682,192; for 1860, 17.898,903; for 1859, 18,480,501; for 1858, 11,461.107; for 1857, 9,391.646 yards. The monthly averages were, in 1866. 1 009,485; in 1865, 1,110,565; in 1864, 687,108; in 1863, 537,884; in 1862, 491.523; in 1861, 1,390,183; in 1860, 1,484,075; in 1859, 1,530,042; in 1858, 955,092; in 1857, 782,637 yards. Of Cotton Yarns, the export was, for 1866, 89,248; for 1865, 104,502; for 1864, 122,980; for 1863, 32,250; for 1862, 64,600; for 1861, 133,940; for 1860, 152,897; for 1859, 331,740; for 1858, 500; for 1857, 60,330 lbs. The monthly averages were, in 1866, 7,437; in 1865, 8,708; in 1864, 10,248; in 1863, 2,688; in 1862, 5,383; in 1861, 11,162; in 1860, 12,741; in 1859, 27 645; in 1858, 42; in 1857, 5,027 lbs.

TO CEYLON.—The export of Plain Cottons was, for 1866, 20,278,509; for 1865, 13,690,888; for 1864, 7,587,435; for 1863, 15.776,243; for 1862, 14,443,815; for 1861, 15,080,099; for 1860, 17.885,326; for 1859, 20.066,411; for 1858, 16,939,460; for 1857, 13,508,588 yards. The monthly averages were, in 1866, 1,689.876; in 1865, 1,135,907; for 1864, 632.286; for 1863, 1,314,687; for 1862, 1.203,651; for 1861, 1,256,675; for 1860, 1,490,444; for 1859. 1,672,201; for 1858, 1,411.622; for 1857, 1,125,716 yards. Of Cotton Yarns the export was, for 1866, 796,243; for 1865, 314,977; for 1864, 207,931; for 1863, 678,649; for 1862, 452,684; for 1861, 250,702; for 1860, 512,919; for 1859, 492,450; for 1858, 576 296; for 1857, 365,560 lbs. The monthly averages were, in 1866, 66,354; in 1865, 26,248; in in 1864, 17,328; in 1863, 56.554; in 1862, 37,724; in 1861, 20 892; in 1860, 42,743; in 1859, 41,038; in 1858, 48,025; in 1857, 30,463 lbs.

ARTICLES OF IMPORT.

TEA.—During the past fortnight there has been more activity in our market than for some time past, the demand for home consumption continuing good, whilst importers have firmly supported prices. The result shows a further improvement in common to medium kinds of Congou of ½d. to 1d. per lb, also of 1d. per lb. on fine to finest. Congous: Siftings remain much as before, at from 7d. to 9d. per lb., according to quality. The broken-leaf kinds have been in demand at full prices. Those free from dust are saleable at 11d. to 11½d. per lb. Good common is quoted 11½d. to 1s. per lb. Fair flavory kinds of old import show a rise of fully ½d. per lb. Fair to good Kaisows have been saleable at an advance of ½d. to 1d. per lb. Fine to finest also show a similar advance, with a fair demand. Pak Lings remain as before. Common to fair black-leaf Congous are better, very few of the former being now to be bought under 1s. per lb. Fair to good qualities of recent import have sold from 1s. 3d. to 1s. 8d. per lb., establishing an advance of ½d. to 1d. per lb. Fine are steady at the late advance, whilst a few finest have been sold up to 2s. 2d. per lb. In new-make Cantons a fair business has been done at from 1s. 3d. to 1s. 4d. per lb. in half-chests, and 1s. 5d. to 1s. 7d. per lb. in boxes, being fully former prices. In Oolongs sales have been made to a fair extent at from 1s. 5d. to 2s. 3d. for fair to fine kinds. Fine Souchongs remain firm, the quantity offering being small. Fair to good show no material change. In Flowery Pekoes there is nothing new. Fair Scented Capers continue saleable at from 1s. 3d. to 1s. 4d. per lb.; good to fine are firm at previous prices. Canton-make Orange Pekoes remain dull of sale for common to fair kinds, but fine have been readily saleable at from 1s. 10d. to 1s. 11d. per lb. Foochow kinds have been sold to a fair extent, but prices have given way 1d. per lb. for good quality. Uncoloured Japans remain as last advised.

GREEN TEAS.—There has been a fair business done in these kinds. The arrivals have been freely placed on the market, and sales made to some extent, both in Ping Suey and Moyune kinds; prices have, however, rather given way, but not much considering the large quantity offering. Commoner kinds remain difficult of sale, and some at public auction, without reserve, sold at very low prices. Canton Gunpowders remain as before.

The *Produce Markets Review* has the following on our notice of the Tea Trade:—

Notwithstanding the excess of importation into this country the *London and China Telegraph* comments on the rising demands of the Chinese, and proposes an abstinence from competition on the part of the foreign merchants that would amount to a combination such as would be impracticable; but were it possible, it is but fair from what we know of the ingenuity and the resources of the Chinese to believe them to be quite capable of adopting a similar expedient, and fixing a minimum price, below which no tea should be sold to the foreigners. But, even as matters now stand, we cannot see that fair competition need be confused with antagonism further than the usual opposition of interests between buyer and seller must of necessity create, although it is necessary in reference to the future to distinguish between the operations of speculators and the legitimate rise in prices consequent upon improved quality, scarcity of labour, or any other real cause. The *London and China Telegraph* justly considers the operations in China last season as speculative, but we are at issue with the writer, if he lay the onus of speculation upon the Chinaman. The rashness of the English merchants has surely led to the losses that have occurred; and no one can blame the Chinese for obtaining the highest possible prices for their tea. It is almost impossible that such fluctuation and uncertainties will exist in future years in any trade increasing so largely as the tea trade, or could be found amongst nations amenable to the ordinary influences of modern civilisation; but between any European nation and the Chinese, complications in a trade still in its infancy must necessarily arise. Our imperfect acquaintance with their peculiar train of ideas, and their entire ignorance of trade in foreign countries make progress slower than it would be in a less exclusive nation. It is not only that we are separated by language, by laws, and by morals, we are separated really by centuries, and one of the greatest difficulties that the mind has to encounter is to estimate fairly the aims and tendencies of an age far behind in point of time, and one with which we may be supposed to have nothing in common. In fact, the more enlarged ideas of English merchants meet with little response in China, and the exchange of goods, although conducted with great shrewdness on the part of the Chinese, is as between civilised man and the barbarian. It may be to the present interest of the more cultivated intelligence, and to the pecuniary gain of the individual, but for the creation of commerce a greater equality in knowledge of the world and of mankind, it cannot be doubted, would produce more rapid results. Many years hence, with increased knowledge and experience on either side, our commercial relations with China may be as fairly adjusted as between any other nations—unless, indeed, in the meantime, our sources of supply should be transferred from China to the tributary provinces of India and Ceylon."

SILK AND COTTON.—See "Latest."

COFFEE.—The market for colonial descriptions has exhibited great activity, and the business done both at auction and by private contract has been of large extent. Prices remain for the most part the same as those current at our last report. The sales of Plantation Ceylon during the week have amounted to 288 casks, 27 barrels, 283 bags at auction and about 50 casks, 150 bags, by private contract. Garblings and triage realised 21s. to 66s.; fine ordinary grey and brownish 69s. to 72s.; fine fine ordinary and low middling coloury 77s. to 79s.; middling and good middling, 80s. to 84s. 6d.; fine bold, 89s.; and peaberry 83s. to 89s. 6d. per cwt. The offers of native Ceylon were 22 casks, 1086 bags, which sold as follows:—Bold, 70s. 6d. to 72s.; good ordinary, 64s to 66s.; fine ordinary, 67s. to 68s. per cwt. Fair business has been done privately at about the same rates. The stock of Ceylon coffee in the United Kingdom on the 12th January was 7.120 tons; of other East India, 2,390 tons.

COIR YARN.—A considerable supply has been brought forward at auction, which met with a steady demand, but at prices £3 to £5 per ton below those obtainable at the close of last year. Of Ceylon 50 tons sold—fine at £43, good middling at £36 5s., medium at £32 to £33 15s., and very common to common £26 10s. to £28 10s. per ton.

COIR FIBRE.—Slightly advanced and 1 ton Ceylon realised £31.

DRUGS.—Anniseeds: 1 case China Star was bought in at £6. Cantharides: 1 case China was bought in at 7s. per lb. About 50 cases China sold at £7 2s. 6d. to £7 3s. 9d. We are still without offers of Japan. Dragon's-blood: 3 cases good middling lump realised £8 10s. to £8 15s. Galls: At the earlier sales of the week 140 cases China sold at 62s. 6d. to 63s., and about the same quantity Japan at 58s. 6d. to 59s. 6d. Later there were offers of 216 boxes China of which 40 boxes good quality sold at 63s. to 63s. 6d., and one box fair at 63s., the remainder being bought in at 64s. to 65s. per cwt. Rhubarb: Of 125 boxes China offered 80 sold:—low middling as 3s. 6d.; middling 4s. 9d. to 5s.; fair small 5s. 5d. to 6s.

GUMS.—Benjamin: At auction 45 cases Sumatra were offered, of which 5 cases middling seconds sold at £10 10s. to £10 12s. 6d., and the remainder was bought in at £12 to £15 per cwt. No Siam offered. Copal; Of Manila 102 cases good bold hard were bought in at 45s. and 50 cases common soft yellow were withdrawn. Damar: 10 cases fair Batavia were bought in at 77s. 6d.

INDIA RUBBER.—In public sale 20 baskets good Penang realised 1s. 6d., and 20 bags low Singapore 1s. 1d. to 1s. 3d. per lb.

JAPAN WAX.—There was an absence of inquiry at the sales and 168 boxes saucers were bought in at 74s., and 24 boxes lump at 80s. per cwt.

MANILA HEMP.—The demand has become larger, and prices have advanced. The sales by private contract on the spot have been about 2,500 bales at £46 10s. to £49, and about the same quantity for arrival (Nov. shipment) at £43 to £46. In public sale 1,678 bales in the catalogue were all held for higher prices, the sound portion being eventually bought in at £50 per ton. At the close of the market £47 was offered for a parcel of November shipment.

OILS.—Cocoa-nut oil is dull and difficult of sale. Ceylon is quoted £51.

PEPPER.—Black: The demand has increased, and the small quantity offered at auction sold readily as follows:—1,960 bags Singapore, good, 3½d. to 3¾d.; fair, 3¼d.; a few lots, 3¼d.; 1,065 bags Penang, 3d. By private contract about 500 bags have been taken on previous terms. White: The market continues extremely dull, and we are still without offers of Penang. Small business has been done in Singapore at 5¼d. per lb.

RICE.—Holders persistently refuse lower rates, and buyers decline operating at the ruling quotations, consequently the business done has been

Digitized by Google

limited. Of 7,113 bags good Rangoon the sound portion (1,606 bags) was all bought in at 12s. 3d., the remainder, slightly damaged, selling at 11s. 9d. The bulk of 19,507 bags Necrassie was also bought in, only 1,100 bags first-class damaged being placed at 11s. 3d. Later, 1,500 bags sound, but broken or peeled, found buyers at 10s. 6d., and 839 bags low heated at the same price. The private transactions during the week have been unimportant.

SAGO FLOUR.—Of 2785 bags good Borneo offered 200 bags sold at 16s. 3d., and the remainder was bought in at 16s. 6d. to 17s.

SUGAR.—The advanced prices are firmly maintained, with a tendency towards further rise at the close of the market, owing to increased activity in the demand. Messrs. Carey and Browne's Circular contains the following:—"The rapid assimilation of the stock which has occurred induced an increase of speculative purchases; the trade at first appeared reluctant to follow the course of the market, but subsequently the value in the outports, and the firmness here, had an influence, and refiners became strong buyers. Low qualities have been of ready sale at the improvement. At auction the sales have been 4,000 bags Penang at 29s. 6d. to 34s. 6d., and 7851 bags unclayed Manila at 26s., repacked 25s. 9d., washed 25s. 6d. The transactions by private contract amount to 32,000 bags clayed Manila at 29s. 9d. to 31s., and 9,000 bags unclayed at 25s. 9d. to 26s. 3d. per cwt. The stock in the United Kingdom on the 12th January was of Penang 1180 tons, of Manila 32,000 tons, and of Java 18 tons.

SPICES.—Cinnamon: At auction 51 bales Ceylon, crop 1866, realised, first quality, 1s. 11d.; seconds, 1s. 8d. to 1s. 9d. thirds, 1s. 4d.; fourths, 1s. 2d. Of Java 8 bales sold at 10d. Cloves: Four cases Penang sold at 1s. 0½d. to 1s. 0½d. Mace: Ten cases ordinary dark wormy Singapore sold at 1s. 2d. to 1s. 5d. per lb. Nutmegs: Of Penang 50 cases at auction sold firmly as follows:—Good middling, 77 to the lb., at 2s. 3d.; 66 to lb. at 4s. 1d.; 81 to lb. at 1s. 10d. to 1s. 11d.; 87, 86 to lb. at 1s. 7d. to 1s. 8d.; common small, 103 to lb. at 1s. 3d. to 1s. 4d.; 116 to lb. at 1s. 2d. to 9s. 3d. per lb.

TIN.—Increased activity in this market has occasioned further advance, and small lots of fine Straits now realise £86 10s. cash, but larger parcels may be obtained for £86 per ton. Banca has advanced £2 per ton, and is now quoted at £89. Good business is being done in each description, both on the spot and for arrival.

TERRA JAPONICA.—The demand for Cutch continues active, and 2,000 boxes Pegue of fine quality realised 45s., 200 bags good Singapore 44s., and 890 bags Rangoon 40s. per cwt. Privately about 30 boxes first-class sea-damaged Pegue sold at 46s. cash, and 350 bags mixed Penang at 35s. to 40s. per cwt. The market for Gambier continues extremely dull. At auction, of 400 bales fair a small portion only found buyers at 19s. 6d. to 19s. 9d., and 10 tons broken at 18s. to 18s. 6d. per cwt.

MISCELLANEOUS.—Preserves: Of China, 147 cases; import, 1861 and 1862 were offered at auction and withdrawn. Rattans: Of 7,635 bundles Singapore a few sold at 3s. 7d. per hundred. Soy: Forty cases China were bought in at 3s. Sticklac: Improving; and 100 cases Siam sold at 50s. Turmeric: Of China, 72 bales were withdrawn. Tonquin Beans: Six cases ordinary foxy to fair sold at 11½d. to 1s. 6d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £5 15s. to £6; nail rod, £7 15s. to £8 5s.; hoops, £9 to £9 10s.; sheets, single, £10 to £10 15s.; Staffordshire bars, £8 to £8 10s.; rails, £5 15s. to £6.

STEEL.—Swedish keg, £15 15s. to £16.

COPPER.—Sheet and Sheathing, £88 to £91 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£90 for block; £91 for common bars. Tin plates, best charcoal I.C., 32s. to 33s.

LEAD, &c.—English pig, W.B., £22 10s.; shot, patent, £23 10s. to £24; sheet, £21 5s.; spelter, £22 5s. to £22 15s.; zinc, English sheet, £28; quicksilver, £6 17s. 6d.

The following is from the Circular of Messrs. French and Smith:—Since the opening of the year we have had a fair business in metals, with some alteration in price. Iron: Continues dull. In Staffordshire the masters have reduced their quotations £1 per ton, but three-fourths of this reduction had been already discounted. Copper: Is still without animation for all descriptions, although some sales of ore at 15s. 3d. per unit would indicate that the buyers of these parcels have a better opinion of the market than the public generally. In Tin there has been very considerable business. English was again advanced to £91 for bars, and in foreign transactions for large quantities are reported up to £86 10s. for fine Straits, and £88 for Banca. Sellers now ask £87 and £89 respectively for these qualities. Spelter is without alteration in price.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

There being still a good demand for tonnage, current rates of freight to the Eastern Ports are well maintained. Coal freights remain unaltered.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £45. For Singapore: £34. For Shanghai: £53. For Saigon: £50. For Yokohama: £50. For Batavia, £35, From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2 2s. 0d. For Singapore, £1 12s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

MISCELLANEOUS.

At ST. HELENA.—Dec. 1, Veronica, Brown, 96 days from Foo-chow Foo, for Liverpool; 2, Monarchy, Day, 112 days from Foo-chow-Foo; 3, Indemnity, Jenkins, 76 days from Singapore, for London; Dartmouth, Elsden, 81 days from Shanghai; 4, William Melhuish, Duncan, 110 days from Shanghai, for London; Knight of Snowden, 96 days from Shanghai, for London; Lansdowne, 117 days from Shanghai, and sailed for London; 5, Victoria, 138 days from Hong Kong, for London; 12, Lochleven Castle, 79 days from Singapore, for Liverpool; 15, Northfleet, 79 days from Foo-chow-Foo, for London; 18. Luconia, 89 days from Java, for Schiedam; 20, Nelly, 108 days from Shanghai, for London; Solent. 80 days from Hong Kong, and sailed for London; Marquis of Argyle, 110 days from Shanghai, for London; 21, Concurrent, 62 days from Batavia, for Rotterdam; 27, Jeddo, 56 days from Batavia for Rotterdam; Eliza Hands, 121 days from Yokohama, for New York; India Packet, 54 days from Batavia, for Amsterdam; Louisa, 86 days from Foo-chow-Foo, for London; 5, Ortelius, Groote, from Batavia, and sailed 6 for Amsterdam; 6, Maria Anna, Monnom, from Batavia, and sailed 8 for Rotterdam; 12, Prime, Goujon, from Batavia, and sailed for Belle Isle; 19, Medoc, Roux, from Macao, and sailed 20 for Havana; Dagmar, Westerstrahl, from Samarang, and sailed 20 for Amsterdam; 20, Addison, Sloan, from Sourabaya, and sailed for Amsterdam; 23, Bulgersteyn, Geerling, from Batavia for Rotterdam.

Off ST. HELENA.—Dec. 14, Margaret Camphell, from Japan; 20, William Gillies, from Colombo.

At ASCENSION.—Dec. 26, Tycoon, from Shanghai, and sailed 27th, for New York; 27, Staatsraad v. Ewyck, from Batavia, and sailed for Amsterdam; 24, John Bull, from China, for London.

Off ASCENSION.—Dec. 8, Wm. Rathbone, from Shanghai; 9, Larkins, from Shanghai; 17, Insulinde, from Batavia, for Amsterdam; 20, Vanda, from Japan, for New York; 21, Imperator, Alexander, from Batavia, for Amsterdam; 23, Beautiful Star, from Foo-chow-Foo; 24, General Caulfield, from Shanghai, for London; 25, Oithona, from Shanghai for London.

At SIMON'S BAY.—Dec. 8, Jacobus Martinus, from Batavia, for Schiedam.

At TABLE BAY.—Dec. — Illimani, Diamond, from Shanghai, and sailed 13, for London; 8, Suomi, Nordberg, from Macao, and sailed 13, for Havana; 14, Falcon, Sullivan, from Macao; 17, Brouwershaven, Huizer, from Padang; 4, Phase (s.), Henslin, from Marseilles, and sailed 16, for Japan.

At ALGOA BAY.—Dec. 8, Jane Leech, Bingham, from Manila, for medical aid for master and crew, and sailed, 14, for New York; 3, Taeping, McKinnon, from London for Shanghai, with master sick, and sailed, 4, under the charge of Dowdy, chief officer.

At MAURITIUS.—Dec. 9, Panama, Bally, from Saigon.

At ST. HELENA.—Dec. 1, Veronica, Brown, from Foo-chow-Foo, and sailed for Liverpool; 2, Monarchy, Day, from Foo-chow-Foo; 3, Indemnity, Jenkins, from Singapore.

At TABLE BAY.—Nov. 22, Belle of the South, from Samarang for Amsterdam, short of water.

CASUALTIES.

The Sea Wave, Mc. Vicar, from Glasgow to Batavia, which went ashore Jan. 14, on Chapel Bar, will have to discharge for repairs.

The Jacmel Packet, from Singapore, which put in at Colon, Dec. 14, in distress, will be sent to New York, with her cargo, in charge of another master and crew.

The Wilhelmina Johanna, Albert, from Batavia to Rotterdam, which put into Algoa Bay, Oct. 19, leaky, &c., has been sold, and also her damaged cargo.

The Holland (Dutch barque), Growbeck, from Batavia to Amsterdam, with sugar and coffee, put in at Lisbon Jan. 19th, leaky, with mainmast and rudder broken and loss of sails and boats.

The Jacobus Martinus, from Batavia to Schiedam, which arrived at Simon's Bay, Dec. 8, had mainmast badly sprung, deck strained, and lost sails, having experienced very bad weather off Cape Recife.

The Sir W. F. Williams, Wilson, from China to London, put into Table Bay Dec. 14, with foremast sprung, which was being replaced.

The Rangoon, from Sourabaya to New York, which went ashore at Chincoteaugue Dec. 24, has been got off,

The Raby Castle, Harris, from Penang to London, which put in at Capetown Nov. 27, was forced to anchor within half a mile of the shore; the master afterwards resigned his command, and the vessel was taken on in charge of Philips, late chief officer of the Hydaspes.

The Concurrent, Ouwehand, which arrived at St. Helena Dec. 21 from Batavia, had encountered very heavy weather, during which she strained very much, and made a quantity of water, and lost foreyard, foretopsail, &c.; she was surveyed, and as she was found to be making one inch water per hour when at anchor was being caulked.

The Taymouth Castle, which sailed from Glasgow for Singapore Jan. 5, with a general cargo, was driven ashore Jan. 6 at Torhead, near Baylleastle, and became a total wreck, crew drowned. About 400 bales cotton goods have since been saved.

The Rangoon (ship), from Java to New York, went ashore at Chincoteague Dec. 26; assistance was sent, and hopes were entertained of her being saved.

The Jannetje v. Striemen, from Batavia to Holland, arrived at Mauritius, Nov. 23, very leaky; she had experienced heavy gales from 14th to 18th Nov., during which she lost boats, bulwarks, and sails, and made so much water that the pumps had to be kept constantly going.

The City of London, Watson, from Colombo for London, which vessel put in at Mauritius Nov. 26, leaky, had been obliged to keep her pumps constantly going, having had as much as ten feet water in her hold. The pumps had been choked with coffee, and on her arrival at Mauritius she had still four feet water in the hold.

The Willemina and Clara, Herwerden, which sailed from Texel Jan. 5 for Batavia, was obliged to put back through stress of weather.

A great portion of the cargo discharged from the Sir Lancelot, Robinson, from London to Shanghai, which put into Falmouth Dec. 15, with loss of fore and main masts, &c., is considerably damaged through water having got into the hold.

Advices from Amsterdam dated Jan. 11 state that the Cornelia Adolphina, Roever, from Amsterdam to Batavia, now in the Nieuwe Diep, had struck the ground near Egmond, but that she was presumed to be tight, and would be examined by a diver.

The Jacmel packet, Dawes, from Singapore, arrived at Aspinwall, Dec. 14, in distress having lost mainsail, immediately after her arrival the master sold the cargo but was prevented discharging the same by the United States Consul seizing the vessel. Surveyors report a portion of the cargo somewhat damaged and recommend its being shipping to New York, which will probably be done.

The Sea Wave (barque), M'Vicar, which sailed from Glasgow, Dec. 5, for Batavia, with a general cargo, has gone ashore on Chapel Bar, within Padstow harbour.

The Bolina, from Manila, is reported by telegram as lost in the China Sea, crew arrived at Singapore.

THE CLIPPER "TAEPING."—The Algoa Bay paper has the following:—"A still more extraordinary run than that made home from China has been accomplished by the Taeping, which anchored in Algoa Bay on the 3rd Dec. She left London on 14th October for Shanghai with a general cargo and ten passengers, and in the unprecedentedly brief period of 39 days from that date was off the L'Agullias. This without doubt is the shortest passage accomplished by a sailing vessel on record. When in lon. 45, lat. 37, it was found necessary to turn the vessel from her course and make the nearest port, as the captain, who had for some time been complaining of illness, was then suffering severely from general debility, accompanied by a dyspeptic attack, which necessitated immediate medical advice. This deviation of 1,600 miles from her original course to Algoa Bay occupied ten days, thus making the run from London, with the deviation above mentioned, in the unparalleled period of 49 days." The vessel left for China in command of the chief officer on the 4th Dec. Capt. Mackinnon was sent to the hospital, and was rapidly recovering at the latest date, Dec. 14.

THE STEAMSHIP "FAR EAST."—Letters dated the 27th of December have been received from St. Vincent, Cape Verd. The *Far East* steamship was taking in coals. She had encountered very heavy weather since the pilot left, on the 11th of December. When in the Bay of Biscay it increased to a terrific gale, at W.S.W., obliging the vessel to lay to from the 13th to the 16th of December, the ship behaving remarkably well. She was to leave for Calcutta the following day (Dec 28th). Passengers all well.

NEW CHINA CLIPPER.—We understand that Messrs. Robert Steele and Co. have contracted with Captain Rodger, Glasgow, owner of the Ellen Rodger, Taeping, and other celebrated China clippers, to build another composite clipper ship of about 800 tons for the China trade.

THE AMERICAN CHINA MAIL.—The Pacific Mail Steamship Company have appointed Captain Samuels, formerly of the Fulton, and now of the victorious yacht Henrietta, to a command in their line, and have assigned him one of their new steamships now in process of construction for the China trade. Captain Samuels is well known as a skilful commander, and is believed to have shown special ability in his recent trip.

THE "CHALLENGER."—This vessel has again left for Shanghai, being her sixteenth voyage to China, while she is only fifteen years old. No vessel has ever attained this feat in the China trade. She has been one of the most successful craft afloat for the underwriters from the large and valuable cargoes of silk and tea which she has carried.

THE Ajax steamer put into Algoa Bay from Shanghai Oct. 22, Hong Kong 31st, Singapore Nov. 11. She took on board about 3,000 bales wool. This freight was some compensation for leaving China with only a partial cargo, in order to keep her time of arrival here. She arrived in London on the 21st inst., being ninety-one days from Shanghai, and eighty-two from Hong Kong, including all stoppages.

HEAL and SON, Bedstead, Bedding, and Bedroom Furniture Manufacturers 196, 197, 198, Tottenham-court-road, London, W.

PEACOCK AND BUCHAN'S COMPOSITIONS FOR KEEPING OFF BARNACLES, WEEDS, &c.

THIS is now established as the BEST and CHEAPEST known for protecting ships bottoms from galvanic action or fouling. It is used on the ships of the "Peninsular and Oriental," "Royal West India," "Panama and New Zealand," "Pacific Steam," and other Royal Mail Companies; also on foreign ships of war, and in H.M.'s Royal Dockyards. Apply to the Manufacturers direct, SOUTHAMPTON, or to their accredited Agents at all the seaports of the world.

Extract from the "Standard" of October 18th, 1866.

"**COMPOSITION FOR IRON SHIPS' BOTTOMS.**—It appears that the iron turret ship 'Huascar,' on Captain Cowper Coles' plan, and fitted with his patent tripod masts, &c., belonging to the Chilian Government, before leaving England was coated on her bottom with Messrs. PEACOCK and BUCHAN'S last Improved Composition for protecting the plates and rivets, and keeping off shell fish, &c., and which has given such entire satisfaction that they, the said Government, have just ordered *five* tons of the material to be sent out to the Arsenal at Valparaiso for the use of their Iron Fleet in the Pacific. The Spanish Government have also ordered a considerable quantity of this composition for the use of their Iron Fleet."

Extract from the "Greenock Advertiser" of October 11th, 1866.

"**ANTI-FOULING COMPOSITION.**—The ship 'Ceres,' of Greenock, lately reached this port after a two years' voyage, and has been put into Dock to receive a fresh coating of Messrs. PEACOCK and BUCHAN'S (of Southampton) Patent Composition. The vessel was coated with it at London, in 1863, and sailed thence to Melbourne, Calcutta, Bombay, and Greenock, and on her arrival here the copper was quite clean and clear of barnacles, and has thus saved a very heavy per centage of wear and tear. We understand that the local agents, Messrs. Macallister and Fyfe, have received a letter from Captain M'Kenzie, of the "Hooyland," of Glasgow, stating that on his ship's return from a voyage to Surinam the copper, which had also been coated with this Composition, was perfectly clean."

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Hasless colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

GELLE FRERES' PERFUMERY.

FIRST ESTABLISHMENT, 35, RUE DES VIEUX AUGUSTINS, A PARIS.

THE house of GELLE FRERES, celebrated for the superiority of its Perfumery, addresses itself to the fashionable world as much for its essentially hygeianic, refreshing, and tonic preparations as for its delicate and distingué perfumes.

To be obtained of all the principal Perfumers and Hairdressers in Europe and other parts of the world.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

Prize Medal 1862. Prize Medal 1862

HARMONIUMS.

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).

No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).

No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).

No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guineas
(Tinned Packing-case, and delivery at any home port, 45s. extra).

No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany ... ... 80 Guineas.
(Tinned Packing-case, and delivery at any home port, 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

Are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances. Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 2B, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any ervice in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

THE "LONDON AND CHINA EXPRESS" ON SALE

COUGHS, ASTHMA, and INCIPIENT CONSUMPTION are EFFECTUALLY CURED by

KEATING'S COUGH LOZENGES.

JUDGED BY THE IMMENSE DEMAND, this UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and Sold in Boxes, Tins, and Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

Testimonial from Colonel HEWETT, J.P. and D.L., 3rd Brigade, Cardiff Artillery Volunteers.

Ter. Mab. Ellis, Ponty-Pridd, Glamorgan, May, 1866.

DEAR SIR,—I was attacked with a severe cough, which your Lozenges removed in a few days. My servants, also, by taking your Lozenges, were soon cured.

I feel it a duty (to the public) to offer my testimony to their efficacy, which you are at liberty to publish.—Yours truly, W. HEWETT.

To Mr. THOMAS KEATING.

CHILDREN'S WORM TABLETS (KEATING'S).

The great remedy for these disorders in children can now be administered IN THE FORM OF A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective

Prepared and sold in tins and bottles by THOMAS KEATING, Chemist, &c., 79, St. Paul's Church-yard, London, E.C., and retail by all druggists and patent medicine vendors in the world.

Observe the words 'KEATING'S WORM TABLETS" are engraven on the Government Stamp of each tin, without which none are genuine.

TESTIMONIAL

Loughton, November 28, 1865.

DEAR SIR,—I write to inform you I purchased a box of your Worm Tablets, and they have brought no less than 80 Worms, some 3 or 4 inches in length, from my child, two years and-a-half old. I feel it my duty to make this public, as others who may be similarly afflicted may derive benefit.—I am, your obliged,

EDWARD BUSH.

RADLEY'S HOTEL,
SOUTHAMPTON,
IMMEDIATELY OPPOSITE THE RAILWAY TERMINUS AND DOCKS

THIS FIRST-CLASS HOTEL, so well-known to most Travellers from the East and West Indies, China, the United States, Brazils, &c., is admirably situated for their convenience, Mr. RADLEY having, by careful organisation, made those arrangements that have tended so much to establish its reputation.

Mr. R. employs no touters or paid agents, but his Porters are always in attendance to meet passengers on arrival, with carriages, &c., as usual. Rooms may be engaged by letter from Malta.

ELASTIC  BOOTS.

W. SPARKES HALL & CO. beg to call attention to their PANNUS CORIUM BOOTS which are peculiarly adapted for India or any warm climate. They have the appearance of leather, and are cleaned with ordinary Blacking, but the material is much softer than any leather ever introduced. Pannus Corium Boots are now coming into general use in India, and will be found a great luxury to Ladies and Gentlemen, in any climate with tender feet.

Printed Circular, with full particulars of Prices, forwarded free to any part of the world.

N.B.—SELF-MEASUREMENT—Stand on a sheet of paper and mark round the outline of the foot. Take the size of the foot in the places marked in the above drawing.

SMITH'S PATENT DISINFECTING CLEANSING POWDER
FOR
SCRUBBING, WHITENING, & PURIFYING SHIPS' DECKS (SURPASSING HOLYSTONE), CLEANSING PAINT, FLOORS, CABINS, &c.

NO Soap or Soda required; is a preventive of fever and contagious diseases, and effectually destroys insects. In use by the Army and Navy (by special appointment), and all the Hospitals and Asylums in England, and forwarded to the Naval Stores abroad for the use of H.M.'s Ships. It is far superior to Soft Soap or any other article yet introduced. To be had in any sized packages.

Also SMITH'S PATENT DEODORISING POWDER, under distinguished Medical patronage is the cheapest and most efficacious remedy in removing offensive smells and preventing disease Is much cheaper and more effective than Chloride of Lime. Parish and other authorities are ordering its use for foul drains, streams, alleys, and houses.

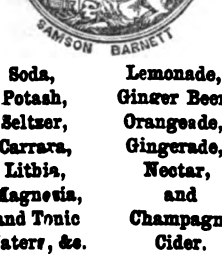
FRANCIS-STREET, NEWINGTON BUTTS, LONDON.

WALKER'S CRYSTAL CASE WATCHES.
PRIZE MEDAL, 1862.
JOHN WALKER,
CHRONOMETER, WATCH AND CLOCK MAKER
(BY APPOINTMENT), TO THE
English, Indian, Foreign, and Colonial Railways,
68, CORNHILL, AND 230, REGENT STREET, LONDON

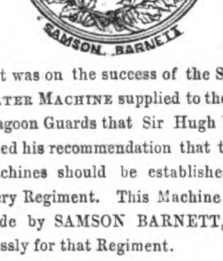
J. W. SOLICITS the attention of Military and Naval Officers and the Public o China to his CRYSTAL CASE WATCHES, as they are especially adapted for foreign use.

The CRYSTAL CASE WATCH is so constructed that it entirely obviates the necessity of a Hunting Case Watch, as it is much stronger and cannot so easily get out of repair. Description Pamphlets with List of Prices on application.



Soda, Potash, Seltzer, Carrara, Lithia, Magnesia, and Tonic Waters, &c.

Lemonade, Ginger Beer, Orangeade, Gingerade, Nectar, and Champagne Cider.



It was on the success of the SODA WATER MACHINE supplied to the 7th Dragoon Guards that Sir Hugh Rose based his recommendation that these Machines should be established in every Regiment. This Machine was made by SAMSON BARNETT, expressly for that Regiment.

Full Directions for preparing ALL the above Drinks are sent with each Machine.

SAMSON BARNETT, 23, Forston-street, Hoxton, London,
Above Twenty Years Foreman to Messrs. TYLOR,

FROM 30 years' manual practice in the above branch, and having constructed most of the Machines now at work in various parts of the world, is enabled to offer the most complete and durable machinery and by confining his manufactory to only two branches, namely, SODA WATER MACHINES and DIVING APPARATUS, and his whole attention being given to these branches, it must be obvious that every part has been the subject of his most careful study, so that any derangement of parts can hardly occur. All the Machines made by S. BARNETT are constructed under his own superintendence, and proved to four times the pressure they are ever required to be worked at. S. B., being so well aware of all the requirements of persons using Machinery where MECHANICAL ASSISTANCE CANNOT BE OBTAINED, has paid full attention to this point, as the great number of testimonials in his possession will prove. He has also lately introduced larger condensers, and more powerful frames than those previously in use, while his prices have not been increased.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C Sole Manufacturer.

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,
Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation. and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York; and 37, Gracechurch-street, London.

HOLLOWAY'S PILLS.—RESTORATION TO HEALTH.—When disordered action is first noticed an early resort to these purifying Pills will set all right again. They improve the appetite, strengthen the stomach, and overcome all its difficulties. No medicine is so well adapted for the sedentary and studious; they fortify the nerves, and give universal tone to the system. Be the malady what it may, Holloway's purifying pills will abate its severity and abridge its durations. They extract all poisonous matters from the blood, and expel all gross humours from the frame. Biliousness, flatulency, nausea, distention, and constipation give way at once to these pills, which, acting through the medium of the constitution, exercise a most beneficial influence over the entire body.

Powles.

Per P. and O. steamer Delta, from Southampton, Feb. 20—To Ceylon: Mr. C. Giles. To Hong Hong: Mr. and Mrs. Oxley and four children, Mr. H. E. Woodhouse. To Shanghai: Mr. E. Hewett, Mr. W. Borling.

From Marseilles, Feb. 28.—To Ceylon: Mr. P. W. and Mrs. Braybrooke. To Hong Kong: Mr. H. B. Walker, Mr. J. Ferguson, Mr. W. Newman, Mr. A. Andrews, Mr. T. K Ashton, Mr. R. B. Parr (V B.), Mr. Pemberton. To Shanghai: Mr. J. B. Hallam, Mr. P. Maclean. To Singapore: Sergeant-Major J. Rose.

Summary of News from the Far East.

JAPAN.

TWO MORE FIRES AT YOKOHAMA.

Our advices from this port are now brought down to the 15th December. The English mails of 18th October arrived out on the 4th. By way of San Francisco we received news on the 29th ult. of two more fires having taken place, but as no details were given we did not deem it worth while to issue an extra.

The first of these occurred on the 4th Dec., and was confined to the native town. It originated in a quarter remote from the foreign settlement, and there being little wind did not spread very rapidly; still a good many small Japanese houses were consumed before it was put out. A small engine belonging to Mr. Hegt, worked by himself and other Europeans, was of great service.

The next alarm of fire—the third within a fortnight—was on the 9th December at 7 o'clock in the avening, when the British Hotel, kept by Mr. Moss, burst suddenly into flames, and being a wooden building in less than ten minutes the whole range, occupying three sides of a square, was as cleanly consumed as if it had never been. The flames, however, before the roof fell in communicated with the new two-storied wooden house next door, just opened as an hotel by Mr. Metzner. The fire speedily gained the mastery of the whole building, and although Mr. Hegt's new engine was, as usual, quickly on the spot, no water could be procured for a long time, and never a sufficient quantity to keep up a constant and effective stream. But there were hundreds of willing hands that set to work to save the adjoining carpenters' yard of Messrs. Wilkie and Laufenburg, by removing the sheds and timber. Very early there came to the scene many French sailors and soldiers of the 9th. On this occasion they worked well and without confusion, under the directions of their officers, and when the burning frame of the house fell down, the chance of the further spreading of the conflagration was at an end. The origin of the fire was in the overheating of the stove pipe in the dining room of the British Hotel.

On the 30th November an attempt was made by four Japanese to set fire to the French hospital annex on the hill—beyond the English barracks. They had heaped together a quantity of combustible material against it, and were about lighting it when discovered by the French marine on duty, who gave the alarm, but was not in time to secure them. There was a report also of a similar attempt to fire the English barracks, which was happily unsuccessful.

We have now more detailed accounts of the fire of the 26th November, and fuller particulars of the loss resulting from it, which will be found embodied under a separate heading. The momentary paralysis caused by the calamity was quickly succeeded by a reaction; all the merchants who were burnt out had procured temporary premises, and business had already been resumed with some degree of vigour. The destruction of so large a quantity of piece goods, &c., had naturally given an impetus to the import trade, and a general determination seemed to prevail to make the best of it, and "go a head" again with as little loss of time as possible. One of the results of the great fire has been that advantage has been taken of the immense space entirely cleared of houses to lay out that part of Yokohama in an improved manner, and there will be a very great addition to the security and beauty of the place from the plan on which it is proposed to divide the two settlements. Another result is that in consequence of the great losses caused by the fire, the agents of the insurance offices have met and determined on raising the rates of insurance to the extent of 50 per cent.

The political situation also seemed more promising. The *Japan Herald* announces that Stotsbashi has had from the Mikado the usual solemn audience of investiture, and the interregnum of the Shiogoonate may therefore be considered as formally ended. The best feeling continues to exist between the Mikado and the Shiogoon upon all political matters, and the latter devotes all his care and attention to the public good, attending daily to business and exerting the greatest possible activity in every department. In short, the new executive shows all the signs of a strong and energetic government.

According to the *Japan Times*, the Civil War in the Inland Sea was actually over. Troops continued to pour along the Tokaido daily into Yedo from the South, and everything seemed to indicate that a change of policy was initiated by the death of the late Shiogoon. There are not wanting those, of course, who insinuate that most likely that event was hastened by the necessity of making such a change. Be that as it may, it is certain that all his arrangements have been reversed. The great assembly of Daimios which was ordered before his death will not now take place, the most influential refusing to attend. This move is regarded as a censure on the late Government for its conduct in the affair with Chiosiu, and that chief remains therefore on the field with all the honours of war. He retains at the present moment his conquests in the Straits, opposite to his own territory.

At about 5.26 A.M. on the 24th Nov. a very long and rather severe shock of earthquake was felt in Yokohama. The morning gun, an unusually loud one, had just been fired, and it seemed the signal for the disturbance of the earth; so curiously, indeed, that when the rumbling noise of the earthquake was first heard, one might well have imagined the sound to be the echoes of the shot from the surrounding hills. This noise increased in intensity, becoming at last very marked, more so, indeed, than was ever before noticed as accompanying a similar convulsion. The usual results of a severe shock, such as water being thrown out of basins, upper stories rocking, and severe creaking of beams, &c., were very clear, and many people were much alarmed. No mischief was done, however, we are glad to hear.

By the last mail steamer fourteen young Japanese gentlemen left Yokohama for Europe to see the Paris Exhibition; they were in charge of the Rev. Mr. Lloyd, Chaplain to H.M.S. *Scylla*, who comes to England on leave of absence. They will afterwards remain some years in this country, not simply to learn English and be put through the ordinary scholastic curriculum, but to go through a university course, and are expected to compete for honours. The same steamer conveyed as far as Shanghai, on the way to this country, a company of Japanese acrobats and jugglers. A second expedition of tumblers and jugglers left Yokohama for San Francisco by the *Archibald*, but they have given the rival troupe too long a start and the novelty of the thing will have worn off. It is stated, we know not with what truth, that the notorious Col. Fisher is connected in some way with this speculation. These facts would seem to indicate that the recent edict of the Gorogio permitting Japanese subjects to travel is now in full force

An unanimous move has at last been made by the community regarding the dollar currency question, and it is hoped that no further difficulties will arise. The Custom House has issued the following notification:—"The Japanese Custom House hereby notifies that it is willing to receive in payment of duties all *bona fide* Mexican dollars of full weight and without cracks or chops, so long as the foreign banks continue to receive the same. Should the foreign banks at any time cease to receive such dollars, the Custom House will also no longer receive them.—Signed, YASUDA JIROKICHI, Superintendent of Customs."

An incident had occurred between Kanagawa and Yoshida, which reminds foreigners that they must continue to be on their guard beyond the limits of the settlement. As Mr. Van der Tak was driving home from Yedo, having a lady in the phaeton with him, a drunken Yakonin drew his sword, and gave chase for a considerable distance. From the top of the hill near the Governor's house to the bottom, Mr. Van der Tak was obliged to keep his horses at full speed to avoid the fellow, but he succeeded in distancing him, although at the risk of an accident to horses or to carriage through the rapid descent. In commenting on this event, and the fire, the *Japan Herald* says:—"We do not know that we attach much importance to the fact, but it certainly is extraordinary that 1866 acts up to the charter, and refuses to allow November to pass without trouble to foreigners. It will be remembered that poor Baldwin and Bird were murdered in November, and most of the untoward events that have succeeded each other in the history of Japanese and foreign intercourse have happened at about the same period of the year."

The Freemasons of Yokohama, says the *Herald*, have at length a local habitation of their own. They have taken the upper portion of a fine building erected on lot 38 for Mr. Carroll, under the professional superintendence of Mr. Dowson. The lower floor is used by Mr. Carroll as a store, in which he carries on his ship chandlery business, and the upper floor consists of a noble Masonic hall, a good sized refreshment room, and several smaller rooms necessary for the operations of the craft. The first meeting was held in it on the 21st December, when there were nearly eighty brethren present, including visitors. The "Yokohama Lodge" bids fair to rival in the number of its members most of the Eastern lodges; a prospect highly satisfactory to all "brethren of the mystic craft."

H.M.S. *Princess Royal* left Yokohama for Nagasaki, on her way homeward, on the 12th December. The Admiral arrived from Shanghai in the *Adventure* on the 19th December, and on the 28th she sailed again for Hong Kong with Captain Perry and some invalids of the 9th Regiment. The new U.S. Consul, General Stahl, had arrived.

NAGASAKI.

From Nagasaki we learn that the younger brothers of the Prince of Satsuma had started for an expedition to Europe, in which they will be under the care of one of the members of the firm of Glover and Co., one of their principal objects being of course to see the French Exhibition. The Prince of Satsuma himself will be an exhibitor, large quantities of "curios" and specimens of produce, manufactures, &c., having been already shipped for Europe on his behalf; one vessel lately despatched from Nagasaki took no less than 169 packages.

It will be remembered that when the late Shiogoon was lying sick at Kioto, Dr. Bauduin, the Dutch physician of Nagasaki (who succeeded Dr. Pompe van Meerdevoort as President of the Japanese School of Medicine there), was sent for to attend him, but arrived too late to be of any service. This mark of confidence in European science has just been repeated. The Prince of Hizen being dangerously ill, one of his steamers was lately despatched to Nagasaki, and again Dr. Baudiun was called away to attend an illustrious native patient. It is to be hoped that in this case he will reach Hizen in time to be of service, and that his treatment may be successful.

The steamer *Coromandel* had been sold to Kishiu for $100,000; the *Owari*, a sailing vessel, had also passed into Japanese hands, having been bought by the Government for $30,000, and other sailing vessels have also been bought, or are being bought, for the purpose, it is said, of taking rice from the South to Osaka, *via* the Bungo Channel, the ordinary route by the Inland Sea being closed at present by Chiosiu. The P. and O. steamer *Azof* was also at Nagasaki, where it was expected she would be offered for sale.

Messrs. Alt and Co.'s Market Report, dated Nov. 30, says:—

Since the date of our last report we have received the mails of the 10th, 17th and 26th September. In Imports a fair business continues to be done, and where stocks are not excessive advanced rates are obtainable. Grey Shirtings, American Drills, and T Cloths, are in demand at quotations, but of the latter there are still no stocks. For White Shirtings a small inquiry exists, and White Spots and Brocades are in improved demand with no stocks. Dyed Brocades are less wanted. Fancy Prints, Turkey Red Goods, and Taffechellas are without change. For Yarns there has been a small inquiry, but a quotation has not yet been established. Camlets are in rather better demand at a slight advance on last month's rates; stocks, however, continue heavy. Scarlet Long Ells are still wanted. Black and Scarlet Spanish Stripes, Lustre Orleans, Camlet Cords, and Crape Lastings are saleable at quotations, and Figured Orleans and Velvets are much wanted, with very light stocks. For Shanghai Cotton there has been a fair demand, and sales have been made at $33 per picul. At present quotations holders are firm. Lead and Spelter continue in small demand. Tin Plates and Tin are unsaleable. Small sized nail rods can be placed at quotations, but other sorts of Iron are dull. Coal is in good supply.

EXPORTS.—Supplies of produce continue equal to requirements, and lower rates made quoted for most articles. Vegetable Wax and Tobacco are in moderate demand at quotations. Galls and Camphor are in small request; of the latter about 400 piculs have been settled. Silk: The parcel referred to in our last has been purchased and shipped to Shanghai. Tea: This staple continues in good stock, but our dealers do not, as yet, show any great anxiety to press sales. Settlements have been about 1,300 piculs, chiefly for the American market. The cargo of the John Bunyan, which sailed for London on the 6th ultimo, consisted of 396,699 lbs. Green, and 45,965 lbs. uncoloured Tea. Total 442,664 lbs.

EXCHANGE.—6 months bills on London, 4s. 7d. On Shanghai, 10 days nominally 1 per cent. prem. On Hong Kong, par. Ichibous nominal, 306 to 308; but Dollars are unobtainable at these rates.

Digitized by Google

FREIGHTS.—To London, £2 10s. New York, £2 10s. per ton of 40 feet. Shanghai, $3.50 to $4. Hong Kong, the same. Vessels loading: Carnarvonshire, for London; Christian Rankin, for New York; steamers, Fee Loong and Kaffir Chief, for Shanghai; Alma, for Hong Kong.

CHINA.

SHANGHAI.

On the 7th Dec., at the Supreme Court, before C. Goodwin, Esq., the case of Jenkins *v.* Lane, Crawford, and Co. was heard. From the evidence adduced it appears that Mr. Wilson, of Lane, Crawford, and Co., instructed their broker, Mr. Russell, to negotiate the purchase of a quantity of gunpowder. Mr. Russell thereupon purchased 250 kegs of powder of Mr. Jenkins, the plaintiff in the action, who charged Messrs. Lane, Crawford, and Co., the defendants, at the rate of 20 taels per picul. It afterwards came to the knowledge of Mr. Wilson that the plaintiff had not sold the powder on his own account, but for Messrs. Allen and Co., from whom he had bought the powder at the rate of only 13 taels per picul. Under these circumstances Mr. Wilson refused to settle with the plaintiff, alleging that the plaintiff had no right to so heavy a percentage for merely acting as agent or broker between Mr. Wilson and Messrs. Allen. The offer of 812 taels having been refused by the plaintiff, the present action was brought to recover 1,250 taels, the price of the powder at 20 taels per picul. After evidence had been given of the facts stated above, a verdict was entered for the plaintiff for the full amount, with costs and interest at 6 per cent. from the 18th of October, the date of the commencement of the suit. In our opinion the facts of the case should have entitled the defendants to a verdict, and we regret the decision of the judge, inasmuch as it serves to cover dishonest acts on the part of brokers generally.

The *North China Daily News* has the following remarks upon this case:—The case adjudicated upon in the Supreme Court, affords an interesting example of the difficulty frequently found in defining with exactness the true meaning of the term "broker." Usually he is supposed to be a third party in a transaction negotiating between two principals, and as such his rights and liabilities are tolerably well understood; but when a fourth person is introduced who partakes of both characters the frequently recurring question arises—in which is he to be regarded? In this amphibious character Mr. Jenkins appears in the case at issue. However extraordinary it may seem, he comes before the Court in two characters completely at variance with each other; and what is still more extraordinary, he is allowed to assume and retain the one most advantageous to his own interests. It must be galling enough to Messrs. Lane, Crawford, and Co. to have to pay fifty per cent. more than they needed to have done; but our sympathies are chiefly with the unfortunate Japanese, to whom the powder was consigned, who found themselves obliged to buy an article out of which four men in Shanghai alone had severally made a profit, and one of these profits so exorbitant as to become the subject of a suit.

An action was brought by Chapman, King and Co.'s compradore against J. A. Knox, a partner in the firm of Hawes and Co. The plaintiff said:—"On the of 2nd November Knox told me he had got a charter for one of Messrs. Chapman, King and Co.'s steamers. He asked me to go out and get a charter, and said he would pay me one-half of what he himself got on commission. I said I only wanted one-third. The charter was concluded. Messrs. Chapman, King and Co. gave Knox a commission in the form of a compradore's order. It was presented to me and I refused to pay it, unless I might deduct the one-third that was due to me. I insisted upon getting my one-third. Knox took out a summons against Messrs. Chapman, King and Co. in consequence of the order not being paid. The amount of the order was then paid to Messrs. Hawes and Co. I claim one-third of that amount."—The defendant denied that the plaintiff had obtained the charter, and said that all the plaintiff had to do was to see that the securities offered by the charterer were good. Messrs. Chapman, King and Co. refused to pay more than one and a-half per cent. The Chief Judge addressed the plaintiff at the conclusion of the evidence as follows:—"How comes it that you, being Messrs. Chapman, King and Co.'s compradore, and, as such compradore, it being your duty to ascertain whether the securities offered by the charterer be good or not, that you, I say, now ask payment from the brokers? What right have you to expect payment from them for doing business as your master's servant?" A verdict was then entered for the defendant.

In the case of Jarvie, Thorburn and Co., bankrupts, Mr. Myburgh, on behalf of the creditors' assignees, addressed the Court as follows:—

"I consider it my duty to get an opinion from the Court as to the nature of the relations subsisting between Messrs. Jarvie, Thorburn and Co., and Messrs. Buchanan, Hamilton and Co. I would ask the Court to consider whether Messrs. Jarvie, Thorburn and Co. are responsible to Messrs. Ashton and Co. for more than any sum that may be due by them to Messrs. Buchanan, Hamilton and Co. I would also submit to the consideration of the Court that Messrs. Jarvie, Thorburn and Co. were merely agents of Messrs. Buchanan, Hamilton and Co., and that, in fact, if they had failed to carry out any engagements entered into by Messrs. Buchanan, Hamilton and Co. with Messrs. Ashton and Co., Messrs. Ashton and Co. would have had a remedy only against Messrs. Buchanan and Co., who, in their turn, might have proceeded against Messrs. Jarvie, Thorburn and Co."

The Court ruled that Messrs. Buchanan, Hamilton, and Co. were partners in Messrs. Jarvie, Thorburn, and Co., and so allowed the claim—about £13,000—against Messrs. Jarvie, Thorburn, and Co.'s estate.

Messrs. Maitland and Co. now put in a claim through Mr. Reid, who, in answer to Mr. Myburgh, said he was not certain that Messrs. Maitland and Co. had not proved for this amount against Messrs. Fletcher and Co., who have a joint account with the bankrupts.

Mr. Myburgh: "It must be ascertained whether this amount has been proved for against Messrs. Fletcher and Co. If it has, Messrs. Maitland and Co. cannot now prove against Messrs. Jarvie, Thorburn, and Co. If they were allowed to do so, Messrs. Jarvie, Thorburn, and Co. would be liable twice for the same debt. Messrs. Maitland and Co., assuming that they have not proved already against Messrs. Fletcher and Co., are at liberty to elect against whom they will prove for their debt, or they may prove for half of it against Messrs. Jarvie, Thorburn, and Co., and for the other half against Messrs. Fletcher and Co. Certainly they cannot prove for the whole against both the firms."

The Court then adjourned the case until the 13th January.

At the Supreme Court, before Sir Edmund Hornby, the case of Glover *v.* Lewis was heard on Nov. 11. This was an action brought by Glover and Co. against Captain Lewis, of the *Trebolgan*, to compel the re-delivery, free of freightage, to them of sven hundred and one packages containing vegetable wax and tobacco shipped on board his vessel in June, for Liverpool, on their giving guarantees of indemnification to him for so doing. The plaintiffs stated that they shipped in June last seven hundred packages on board the *Trebolgan*, with the understanding that the vessel was to have immediate despatch. After waiting some time, the plaintiffs, finding the date of the vessel's sailing very uncertain, wrote to Captain Lewis requesting the re-delivery of the goods. This the captain refused, and hence the present action. After hearing evidence of the above facts, Sir E. Hornby gave judgment that the plaintiffs were entitled to a return of the goods on condition of their giving a guarantee of indemnification to Captain Lewis.

In the case of Jardine, Matheson, and Co. *v.* Yun-Chang Bank, the plaintiffs claimed a balance of taels 3,536.87. The bank in question was closed, and had no assets except sundry outstanding debts, which it was endeavouring to collect, but which it was prepared to make over to plaintiffs. The latter, however, preferred obtaining a judgment against the bank. Judgment was accordingly given for the amount claimed, and the bank ordered to settle its affairs as quickly as possible.

The next case on the list was a cross action. Overweg and Co. *v.* Francis, and Francis *v.* Overweg and Co. Mr. Rennie appeared for Francis, Mr. Myburgh for Overweg and Co. Francis claims in fact tls. 900 in respect of arrears of interest due on an expenditure of tls. 6,000 made by Francis in pursuance of an agreement of the 9th March, 1866. There are tls. 300 with which Overweg and Co. credited Francis, so that irrespective of an item of tls. 300 due for arrears of rent on an account of rent stated between them, Francis only claims tls. 600. Overweg and Co. dispute this sum being due, because they say Francis has recovered it from the Chinese contractor on a breach of his contract, which breach as against Overweg and Co. is a breach committed by Francis, and therefore they claim to retain tls. 600 as a measure of damage. And besides this they claim damages for general imperfect performance of the contract by the Chinese contractor. Francis was the person with whom they agreed, that the faults and breaches of

Digitized by Google

the contractor were the faults and breaches of Francis, that they wanted an European superintendent, and that Francis would not have one, hence the bad workmanship and the damages. The Chief Judge remarked that the case should never have been brought in Court. Such a case should have been settled between the parties themselves. He reserved his judgment.

The following items are from the *North China Herald*:—An important case arising out of the opium swindles to which we alluded some weeks ago has been tried before the Supreme Court. Messrs. Preston Breuell's compradore, it will be remembered, handed over forged delivery orders to sundry native dealers in return for hard sycee, and disappeared. The dealers, regarding him as the responsible agent of the firm in the transaction, sued the latter for the amounts out of which they had been swindled, and a verdict has been given in their favour.

Two other instances of the extreme point of depreciation which property has reached in Shanghai have occurred during the week. At the auction announced for the sale of the premises of the Shanghai Wharf Company, the property was bought in at tls. 28,000, the agent declaring that the bidding did not come up to the figure at which the directors would feel justified in selling. And some property belonging to Mr. Wiggins' estate, comprising the premises occupied by the *Recorder*, Messrs. Dadabhoy and Co., &c., was bought in for tls. 12,000.

The Pao-shan-hsien has had an interview with H. B. M.'s Consul, regarding the Indians who were reported to have been murdered at a village on the Woosung road a few weeks ago, and regarding whom nothing has since been heard.

The Chinese are busily employed in repairing the ruined bund of the Hangchow sea wall, at various places along the coast line; but have not yet attempted to restore the outer and stronger wall, on the very dilapidated state of which Major Edwards reported about two years ago. The inner one will alone be sufficient to protect the country, if kept entire; but, it is to be feared, will require constant repair if left unshielded.

The *Vineta*, of 28 guns and 350 men, has arrived in port from Honolulu.

A fire broke out in the foreign settlement at Ningpo on the 15th, which destroyed a number of Chinese houses. Several foreign hongs were in imminent danger, but were saved principally through the aid of the men of the Anglo-Chinese Contingent.

We learn from Nanking that Tsen-kwo-fan, after resisting as long as possible the order to proceed to Peking, has at length yielded to pressure, and is about to leave for the capital, where, we presume, he will take up his substantive appointment of President of the Board of War. In that case, Li-hung-chang's acting appointment as Commissioner of Foreign Affairs will be made permanent, and he will succeed Tsen-kwo-fan as Generalissimo.

A rifle association, which has succeeded the defunct volunteer corps, has held a first meeting at Hong Kong. Sir Richard MacDonnell was present and inaugurated the proceedings by making a bull's-eye. Some correspondence has passed between the Chamber of Commerce and the foreign Consuls at Canton, relative to the proposed establishment of a line of telegraph between that port and Hong Kong. The French Consul appears to have shown great interest in the scheme, and to have impressed its advantages very strongly on the Governor, who promised to advocate it at Peking. His Excellency has also been induced by Mr. Mayers to declare the Hong Kong dollar a valid tender in payment of Chinese Government dues; and is said to contemplate lighting the river between Hong Kong and Canton.

Mr. Morel, of the Comptoir d'Escompte, proved against Rowley Miller's estate for a debt of Tls. 91,826.55. The proof of a debt claimed against the bankrupt's estate by the Commercial Bank was rejected. Mr. Myburgh, who appeared for the bank, moved for leave to appeal against the rejection, which was granted. The case was adjourned until the 31st Dec., to give the bankrupt time to file his accounts in accordance with the terms of the Act.

The transfer of the Bubbling Well Road to the Municipal Council has been completed; the latter having undertaken to pay all debts due up to the present time.

A meeting of the promoters of a Seaman's Church has been held, at which it was announced that upwards of tls. 3,000 had been collected. The hope at first entertained, of raising the required funds among the shipping seems to have been abandoned, as some tls. 1,500 of this have been collected among the community. At a meeting of the society for the relief of destitute foreigners held on Friday, it was unanimously resolved by the three or four members who attended, to wind it up. The finances were found to be in not the most satisfactory condition, a large sum being due to the hospital for sick men who had been sent there.

Frederick Harvey, Esq., Her Majesty's Consul at Chinkiang, has issued a notification addressed to the several lessees of lots in the British Concession at Chinkiang, stating that there is now two years' ground rent due to Her Majesty's Government by the terms of their leases, and requesting that the amounts be immediately paid.

The Consul has also issued a notification to residents outside the British Concession reminding them that the arrears of ground rent due are to be paid to the Chinese Government through the medium of the Consulate, there being no regular Chinese Government Bank at Chinkiang. Each renter will receive a printed receipt under the seal of the Chinkiang magistrate.

The *Hankow Times*, writing on railways in China, says:—"Like others who have thought upon the subject, we, too, have our pet scheme, which we would now propose as being, in our opinion, by far the most likely to prove remunerative, while it would at the same time have the advantage of the surveillance of foreign merchants at both its termini—that is, a line from Shanghai to Ningpo, via Hangchow. This line would be about 180 miles in length, and it would command the entire local trade between those two ports, namely, that from Ningpo, including the cargoes of nearly all the junks up the coast, and a large proportion of the green teas and silk from the interior; and that to Ningpo from Shanghai, comprising all the native produce, such as oil, hemp, wax, &c., sent to the latter port from Hankow. The trade of Hangchow, too, would thus find its way direct to Shanghai—an item by no means to be overlooked, as a large quantity of tea and silk now comes through that city to Ningpo.

The *Recorder* has the following on the proposed college at Peking:—

It is now some three years since the Hon. Anson Burlingame suggested to his Government the desirability of devoting a sum of $200,000 out of a surplus which had been paid by the Chinese in the settlement of the indemnity money, to the establishment of a college at Peking, having for its object the instruction of Americans in the language and literature of China, so as to fit them for acting as consuls and interpreters, and also to educate clever Chinese in English studies and in their own literature, with a view to their employment either by their own Government or by the United States. Upon the desirability of such a scheme being carried out it is needless to dwell at any length. The difficulty in obtaining interpreters is one which has always been very severely felt in the Consular Services in China, and at the present moment seems to be attracting no little attention in Hong Kong. Our Southern contemporaries point to a scheme which would practically be the counterpart to that suggested by the Hon. Anson Burlingame. They propose that a college for the instruction of interpreters should be established at Hong Kong. This would doubtless be of great use; but it appears to us that it would be far more desirable that the institution should be at Peking; as in that place the dialect in use among educated Chinese is actually spoken; and the studies of the students must therefore be very greatly facilitated by their residence at the Capital. There is, we hear, every wish to carry out the scheme which the Hon. Anson Burlingame long ago proposed. We need not say that we should like to see so desirable an object accomplished; and we think it might possibly be so arranged that the advantages of the institution would be common to all nationalities. There is the Customs' Service, who have constantly a large number of students at Peking; the British Government also send out young men in the same capacity; and it is now suggested that a college should be established by the Colonial Government at Hong Kong.

In accordance with instructions received from Peking, the Taoutai has had a notice posted about the French Settlement and also in the Native City inviting the Chinese to send any articles of manufacture or produce for the International Exhibition in Paris.

"Never say die" is a motto universally adopted by the foreign communities in China. Notwithstanding the gloomy accounts lately conveyed to them by each successive mail of the outturn of their shipments; and in spite of the woful depreciation of property in Shanghai evinced by the ruinous sacrifice of

Digitized by Google

Messrs. Jarvie Thorburn and Co.'s property, the residents of the "model settlement" are devoting all their energies to the erection of a theatre for the use of the amateur dramatic corps.

Messrs. Jarvie Thorburn's property at Kiukiang has been sold by auction for tls. 4,900, and that at Hankow for tls. 6,300.

A very extensive fire occurred at Tientsin about the 1st Dec. It broke out in the *A'u I Chea*, a place outside the city, where there are a large number of clothes shops, and over five hundred Chinese houses were burnt to the ground. A native Tientsin merchant informs us that the loss of property in the houses, and in the form of shirtings, T-cloths and other materials, is estimated at over taels 300,000.

The following letter has been published in Shanghai, in consequence of a misapprehension in regard to the Russian Service and Grants.

(To the Editor of the *Friend of China.*)

Kiachta, Nov. 4, 1866.

Dear Sir,—I observe in one of your leading articles of the 2nd of October that you take a very discouraging view of my courier line in consequence of an advertisement by the Russian Vice-Consul, to the effect that telegrams will be received for despatch to Europe by the Russian authorities at Peking and Tien-tsin.

As your leading article might possibly prejudice my line in the opinion of persons who are not *au fait* as to the difference between the Russian post and "Grant's Trans-Mongolian telegrams" line, I may mention that the Russian Trans-Mongolian line has been in operation for upwards of four years, and that the minimum time occupied in transmission of telegrams from Shanghai to Kiachta is twenty-six days; whilst by Grant's Trans-Mongolian line the minimum time is fourteen days. This saving in time is considered so advantageous by nearly all of the mercantile community in Shanghai, that the extra three hundred per cent. that I charge is considered a bagatelle in comparison with the advantages that accrue.

By this courier I send a telegram to Hong Kong, which I feel confident will take the latest English news.

If the receiver of a telegram forwarded by my line to Hong Kong has obtained later news from Europe by any other line, I will deliver his telegram "gratis."

I trust, dear Sir, you will enlighten the public as to the merits of "Grant's Trans-Mongolian Telegram's Line."—I remain, &c.,

C. MITCHELL GRANT.

FOOCHOW.

The following record of the arrival of the tea clippers will be of service:—

In the year 1857 the Crest of the Wave arrived on September 26th, laden with half old tea and half new tea. She was followed by the Maury on October 15th, and by the Fairy on October 16th, thus giving her cargo a good nineteen days' start on the market.

In 1858 the Fiery Cross arrived on October 21st, followed by the Crysolite on November 25th and the Kate Kearney on December 2nd, and had a month and five days in advance.

In 1859 the Ellen Rodger arrived on October 23rd, beating the Fiery Cross by one day and the Sea Serpent by three days.

In 1860 the Falcon on September 26th was followed by the Ellen Rodger on October 4th, and the Ziba on October 10th, giving eight days.

In 1861 the Fiery Cross, on September 23rd, had sixteen days' advantage over the Falcon, on October 9th, and the Ellen Rodger on October 10th.

In 1862 the Fiery Cross arrived on September 27th. The Flying Spur on September 29th, and twelve days in advance of the Min, on October 9th.

In 1863 the Bahama steamer arrived on August 19th, the Fiery Cross on September 8th, and the Ziba (to Liverpool) on September 22nd. Five other vessels reached London 5th October, and the Fiery Cross got the £1 extra, owing to the wording of her bills of lading, although it was not intended that the ships should get the premium at all if they were beaten by the steamer.

In 1864 the Serica, on September 18th, was only one day before the Fiery Cross, on September 19th, which was followed by the Robin Hood on October 5.

In 1865 the Fiery Cross, on September 10th, was again only one day in advance of the Serica, on September 11th, and seven other vessels arrived on the 7th and 8th of October, while in the present year, 1866, the Erl King steamer arrived on August 22nd, and three ships, the Taiping, Ariel, and Serica, on the same day, September 6.

We think that results of the race for the last three years prove the folly of retaining the extra premium unless some saving clause as to number of days in advance be inserted.

HONG KONG.

The *Malacca*, P. and O. steamer, newly placed on this line, has arrived. She is a splendid ship in all respects, and has evidently been fitted up under the direction of some officer practically acquainted with the requirements of the China coast service.

With reference to the fearful conflagration at Yokohama, it is said that General Gay is about to despatch a commission of officers to Japan to inquire into the conduct of the troops belonging to H.M.'s 9th Regiment, whose excesses, under the influence of liquor, have been described as abominable.

THE PHILIPPINES.

MANILA.

On the 19th ult. the Spanish steamer *Malespina* arrived from Hong Kong with the London mail of 26th October, and public telegrams up to about 10th Nov.

IMPORTS.—We have to report rather a quiet market for plain staples generally, and increased willingness on the part of holders of White Shirtings especially, to meet buyers. In coloured goods also there has been less activity, very unseasonable weather having somewhat interfered with business.

EXPORTS.—The limited nature of supplies of all kinds of produce has again prevented anything like animation in our market, and prices are almost unchanged.

TONNAGE.—There are no disengaged neutral vessels in port, and though stocks of produce are light, suitable ships would probably obtain fully last rates for England, say 40s. and 45s. for sugar and hemp.

EXCHANGE.—First class 6 months-sight. Bills on London 4s. per dollar.

(FROM A CORRESPONDENT.)

WE have some hope of liberal changes in the commercia field. Slow as the march of Free-trade has always been in Spain and her colonies (indeed the march has been frequently rather backwards and then forwards), she is now making one short and hesitating step in a right direction. At present the duties paid on goods imported by foreign ships are exactly double those on goods imported under the Spanish flag, the rates being respectively 14 per cent. and 7 per cent. But now the Madrid Government has come to the magnanimous conclusion —and we must be thankful for small mercies that goods imported by steamers direct from Europe shall only pay 50 per cent. more than if imported by Spanish ships, *i.e.*, 10½ per cent. It was hoped that goods brought by steamers to Singapore, and thence transshipped to Manila, would enjoy the benefits of the great concession. But no! The ancient *cent. per cent.* has been in such cases exacted, and the decree is said only to contemplate importations by steamers coming round the Cape direct from Europe; so that practically for any present good, or even any prospective good that our generation can contemplate, they might as well have declared that when the Philippines march into the Atlantic they are to enjoy this splendid display of Spanish foresight and wisdom. However, *Cosas de Espana* need surprise nobody. We believe, however, the new Governer to be well disposed, but as the Dunderheads at Madrid have not learnt the old Castilian proverb, that "the fool knows more of what passes in his own house than the wise man of that which passes in the house of another" ("Mas sabe el loco en lo qui pasa en su casa qui el sabis de lo qui pasa en casa agena,") of course they are better informed of our wants and interests than we ourselves are! The moderations introduced some years ago have produced such good fruits that we might have hoped experience would have taught something, though it is said "the Bourbon race never learn anything they ought to learn, and never forget anything which they ought not to remember." You recollect that a few years ago Manila was the only port into which foreigners were allowed, or in which to settle, but now there are four foreign houses in Zebu and three in Iloilo, and, *mirabile dictu*! we have steam communications with both.

MALACCA STRAITS.

SINGAPORE.

From this port our advices are to the 5th January. The French mail of the 17th November arrived out on the 22nd Dec., and the English mail of the 26th November was delivered on the 30th.

Very stormy weather has prevailed in the Straits. The north-east monsooon (says the *Straits Times*) has continued to blow with unabated fury. The casualties to shipping between Hong Kong and Singapore this year have been far in excess of that of many years past—no less than thirty vessels having already put into the latter port, having been more or less disabled in typhoons. Even between Singapore and Penang the monsoon has been blowing very strong, so much so that the *Torch*, light vessel, stationed on the north sands, parted her cables and drifted, or rather was compelled to put into Malacca. She was

Digitized by Google

towed back to her original position on the 14th December by the Straits Government steamer *Rainbow*, and the Straits steamer *Pluto* was despatched immediately on receipt of the intelligence with anchors and chain cables for the *Torch*. The British barque *Thomas Brown*, lately arrived from Australia, had shipped twenty-two horses for Singapore, and had fallen in with such bad weather off the Natunas that all except two or three were washed overboard, and those remaining were so much injured that they had to be killed. The vessel was thirty-six hours under bare poles, and narrowly escaped being wrecked.

The *Straits Times* says that the Oriental Bank at Singapore has received from the Hong Kong Mint for distribution a quantity of half-dollars, 20-cent, 10-cent, and 5-cent pieces. These were to be given as change to all applicants, and if in sufficient quantity would partly relieve the inconvenience felt from the want of a small coinage.

Madame Anna Bishop, the well known *cantatrice*, had arrived safely at Singapore, and was giving a series of concerts there before proceeding to India. It will be remembered that Madame Bishop was shipwrecked in the ill-fated barque *Libelle* on her way from Honolulu to China, and suffered greatly from the exposure and privations.

The *Straits Times* gives a description of the *Meteor*, an American screw steamer, which had reached Singapore on her way to China and Japan. The *Meteor* is said to be 1,220 tons new measurement, but according to the old measurement would be about 1,600 tons. Her length over all is 270 feet, breadth 34½ feet, and depth of hold 24 feet. Her engines, by Messrs. Horne, of Greenock, are of 250-horse power. Her average speed under canvas with shaft disconnected is about 15 knots, and under steam and canvas about 20 knots per hour [very short knots we should imagine]. She was built for a combination of wealthy merchants of New England to hunt down the *Alabama* and other Confederate cruizers, at the time they were making their depredations on Federal merchantmen, but on account of the war between the North and South having been concluded, was left on the hands of the owners, and was subsequently bought by Mr. Walsh, her present owner. She was built for a man-of-war, of the best American white oak, and pierced for 12 guns.

The following circular has been issued by the Borneo Company (Limited):—

NOTICE:—The connection of Messrs. Samuel Gilfillan, William Adamson, Henry William Wood, and Patrick William Auchincloss with our business terminated by common consent on the 31st October last. and they have ceased to act as managers for us.—Singapore, 3rd Dec., 1866. The BORNEO COMPANY (LIMITED).

Messrs Lorrain, Gillespie, and Co. advertise that they have established a branch of their firm at Batavia under the style of Lorrain and Co., where the business will be conducted by Mr. W. H. Hill and Mr. J. G. Wilson.

The proprietors of the *Singapore Free Press* (Mr. William Marshall and others) announce a dissolution of partnership. The paper will in future be conducted by Mr. C. H. Westlake.

The French Consul at Singapore publishes the following notification:—

Notice is hereby given to the public that the light and anchorage dues at present collected in Saigon will be modified as follows from 1st January, 1867, by virtue of an order under date of 22nd November last from the Vice-Admiral Governor and Commander-in-Chief in Cochin China:—

1st. The light duty of 3 cents of a dollar per ton and per year is suppressed for vessels of all nations.

2nd. The duty of ½ or ¼ dollar, as the case may be, collected on all vessels excepting French and Spanish is reduced to a fixed and single tax of 2 francs per ton for French and foreign vessels of all nations.

3rd.—The duty will be one franc for vessels arriving in ballast and sailing with a cargo. It will not be charged to vessels arriving in ballast and sailing with same.

4th.—French and Foreign Men-of war, and Mail boats of the Messageries Imperiales are exempted from the duty before-mentioned.

Vessels chartered by the State for the Local Government are exempted in the proportion of the tonnage with which they are loaded.

These last mentioned vessels will pay, in addition, the half duty when they sail again with a cargo.

The Consul for France. C. TROPLONG.

Singapore, 18th Dec. 1866.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ALLAN—On the 22nd Nov., at Penang, the wife of John Allan, Esq., of a son.
AITKEN—On the 14th Dec., at Hankow, the wife of James Aitken, of a daughter.
BURN—On the 18th Dec., at Malacca, the wife of Major James Burn, Bengal Staff Corps, and Resident Councillor of Malacca, of a son.
BURN—On the 18th Dec., 1866, at Malacca, the wife of Major James Burn, Bengal Staff Corps, and Resident Councillor of Malacca, of a son.
COUTTS—On the 24th Nov., at Shanghai, Mrs. Coutts, of a son.
DARKE—On the 1st Dec., at Shanghai, the wife of Captain F. M. Darke, of a daughter.
FRASER—On the 6th Dec., at Yokohama, the wife of James Campbell Fraser, Esq., of a daughter.
HARVEY—On the 24th Jan., at The Green, Pembroke, the wife of Commander Frederick Harvey, R.N., of a daughter.
JOHNS—On the 19th Dec., at Shanghai, on board the ship Canvass Back, the wife of Captain Johns, of a daughter.
LAMBERT—On the 25th Jan., at Liverpool, the wife of Robert Carr Lambert, Esq., of Hong Kong, of a son.
ROSS—On the 1st Dec., at Yokohama, the wife of George Ross, Esq., of a daughter.
STANFORD—On the 26th Jan., at Canonbury Park north, Mr. George Stanford, late of Shanghai, of a daughter.
WOLFE—On the 4th Dec., at Foochow, the wife of the Rev. R. J. Wolfe, of a son.

MARRIAGES.

CAULFIELD—REDDIE.—On the 10th Dec., at Yokohama, by the Abbe Girard, and at H.B.M.'s Consulate by F. G. Myburgh, Esq., H. B.M.'s Consul, Thomas Caulfield, to Caroline, niece of Sergeant-Major Reddie.
LEONARD—BLACKWELL.—On the 3rd Dec., at Shanghai, by the Rev. C. H. Butcher, James Keith Leonard, Esq., Commissioner of Customs, Ningpo, to J. F. Blackwell, second daughter of the late T. Blackwell, Esq., Edinburgh.
PARKES—WILSON.—On the 22nd Dec., at the Union Church, Hong Kong, by the Rev. Dr. Legge, the Rev. Henry Parkes, of the Wesleyan Mission, Canton, to Miss Anne Wilson, of Staffordshire.
SHORTRIDGE—HARPER.—On the 13th Dec., at the Presbyterian Church, Singapore, by the Rev. William Jeffrey, Samuel Shortridge, Esq., of Sourabaya, Java, to Mary Anne, fourth daughter of the Rev. James Harper, of Leith, Scotland.
VYSE—NORCLIFFE.—On the 29th Jan., at St. James's Church, Piccadilly, by the Rev. Granville S. Howard Vyse, rector of Bougton, Northamptonshire, Lieut.-Colonel Edward Howard Vyse, 3rd (King's Own) Mussars, to Mary, second surviving daughter of Mrs. Norcliffe, of Langton Hall, Yorkshire, and of the late Henry Robinson, of York.

DEATHS.

AITKEN—On the 21st Dec., at Hankow, Annie Jane, the infant daughter of James Aitken, Esq.
BUTCHER—On the 2nd Dec., at Shanghai, accidentally drowned, W. Butcher, chief officer of the receiving ship Waterwitch.
HODGSON—On the 24th Dec., at Shanghai, Robert Page Hodgson, aged 20 years.
ROSS—On the 3rd Dec., at Yokohama, the wife of T. J. Ross, Esq., aged 35.

EXCHANGES ON LONDON.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London, Dec. 10, Dilkhoosh; 19, James Shepherd.

At HONG KONG AND CANTON.—From Havre, Dec. 25, Taffarette; from London, 23, Sea Belle.

At MANILA.—From Rotterdam, Dec. 21, St. Helena; from New York, 17, Jeanie.

At SINGAPORE.—From London, Dec. 19, Petchelee; from United States, Dec. , U.S. Shenandoah; from Liverpool, 10, Sophie; from Sunderland, 15, Eva; from Hamburg, 17, Penguin; from New York, 16, Meteor (str.).

At PENANG.—None.

At BATAVIA—From London, Rota, Dec. 7, Erl King (st); from Glasgow, County of Lanark, Betty; from Liverpool, Oscar, Coquetdale.

DEPARTURES.

From YOKOHAMA.—For New York, Dec. 9, Banda; 12, for England, calling at the China ports, H. M.'s ship Princess Royal.

From SHANGHAI.—For London, Dec. 11, Southern Cross, 17, Harlow, 19, Dundonald; for New York, 17, Lady Louisa, 13, Assyrian, 11, Andreas.

From MACAO.—Dec. 20, for Havana, S. Vicente, 23, Henry IV.

From MANILA.—For Liverpool, Dec. 1, Rinaldo (from Zebu), for London, 22, Eleanor.

From FOOCHOW.—For London, Dec. —, Weymouth; for New York, Dec. —, George Shotter, F. Reck, Queen of the Ocean, Kate Carnie.

From SINGAPORE.—For Liverpool and Glasgow, Dec. 17, Bothwell Castle; for Falmouth, 9, Carleshaven; for Bristol, 15, Dorothea; for Hamburg, 12, Patriot; for New York, 19, Albatross; do. (*via* Penang) 8, Queen of May; 20. Ceylon.

From PENANG.—None.

CASUALTIES.

BATAVIA.

Telegraphic news from Batavia to 29th Dec. reports that the Koning Willem III. foundered in the China Sea, and the Cornelis Anthony and Isis on the Coast of Java. All partly insured in London offices.

MANILA.

The British barque Jeannie, bound from New York to Hong Kong, put into Manila with cargo shifted and otherwise damaged.

The Dutch brig St. Helena, from Rotterdam to Hong Kong, also put into Manila with loss of bulwarks, sails, &c.

COMMERCIAL POSTSCRIPT.

The French mail steamer which arrived at Marseilles on the 1st instant has brought the following cargo:—Silk, 2,671 bales; cocoons, 24 packages; silkworms' eggs, 48; silk piece goods, 27; tea, 12; curiosities, &c., 56; indigo, 108; sundries, 81; rhubarb, 12.

ARRIVALS NOT IN THE TABLES.—Feb. 1, at Liverpool, from Singapore, Lochleven Castle; Jan. 29, at Texel, from Batavia, Aquarius; 30, Ortelius; from Samarang, Dagmar; 26, at Helvoet, from Padang, Jane (not John as previously reported); Feb. 4, at Liverpool, from Singapore, Unrivalled; 2, at Falmouth, Cecrops; in the Downs, from China, Janet Mitchell, Victoria, Louisa; at London, Herald.

DEPARTURE.—From Falmouth, Feb. 2, for Hong Kong Str. Taiwan.

CASUALTIES.—About 200 bales of the cargo of the City of Delhi, Taylor, from Singapore, stranded near Dungeness Jan. 28, have been picked up; divers will be employed to raise the tin; the remains of the hull and materials will be sold.

The Maria Anna, from Java, reported arrived at Zierikzee, has gone ashore near that place Feb. 2.

Literature.

The literary productions of the fortnight have not been numerous. The only one which commends itself specially to notice as directly concerning our readers is a little work, published by Mr. Churchill, entitled *The Tropical Resident at Home*. This is the work of a physician who has himself passed a large portion of his life in India, and much of the advice tendered is the fruit of his own experience since his return to this country. The many valuable suggestions which the book contains are conveyed in that uniformly pleasant and *un*-dogmatic tone which compels the most prejudiced reader to read on, unconsciously losing his prejudice, from the utter absence of *antagonism*, as he proceeds. That he will be the wiser for his pains we have little doubt. A new Plan of Shanghai, very carefully constructed and complete in all its details, has just been published for the Municipal Council of Shanghai. Every block of buildings is distinctly shown, the foreign houses being colored red, the foreign warehouses (godowns), neutral tint and buildings occupied by Chinese yellow. We understand that a supply of these plans will be forwarded to Shanghai by next mail.

PROGRESS OF THE RUSSO-AMERICAN TELEGRAPH.—The steamer *George S. Wright*, of the Russia American Telegraph Company, Capt. Patterson, arrived November 29th in Esquimalt harbour from Russian America, having on board Colonel Bulkley, Lieut.-Col. Wicker, and Messrs. John F. Lewis, E. K. Laborne, and George A. Nunez. She left Plover Bay on the 13th October. The companies were all well when the *Wright* left, and the work was proceeding satisfactorily. The entire route is now explored. In Eastern Siberia the houses and stations were built, and many thousand poles were up. The party who left there last year under Major Abassa were progressing finely. Left a party at Plover Bay, under Capt. Kelsey, who built twelve miles of wire during the few days the steamer stopped there. Winter was setting in when the steamer left. The Russians behaved very kindly, and the Esquimaux and Tchukichi (Siberia) tribes were very well disposed, the party evincing the greatest desire to assist. Everything is ready for prosecuting the work vigorously next spring, and Colonel Bulkley purposes commencing operations earlier next year than he did this. The party are all in good health.

CONSECRATION OF COLONIAL BISHOPS.—On the 2nd inst. three colonial Bishops were consecrated in Canterbury Cathedral—the Rev. R. Milman to the bishopric of Calcutta, the Rev. W. C. Sawyer to that of Grafton and Armadale, and the Rev. C. R. Alford to the see of Victoria (Hong Kong). The Archbishop of Canterbury officiated, and was assisted by the Bishop of Oxford, the Bishop of Rochester, Bishop Smith, the Bishop of Dunedin, &c. Most of the official dignitaries of the cathedral were also present, and took part in the ceremonial, which was witnessed by a very large congregation.

THE President of the United States has issued a proclamation forbidding ship captains to put into any port on the coasts of Japan, except the open ports of Yokohama, Nagasaki, and Hakodadi, except when forced therein by stress of weather.

THE Company des Forges et Chantiers of France has built at La Seyne a plated frigate for the Japanese Government. It costs £140,000. Six large cannon are included in this sum.

THE CIVIL SERVICE.—FOREIGN-OFFICE.—Messrs. W. N. Abdy, H. A. Giles, A. R. Magnay, and B. C. G. Scott have been appointed student interpreters in China, Consular Service.

LONDON, MONDAY, FEBRUARY 4, 1867.

THE GREAT FIRE AT YOKOHAMA.

Owing to the receipt of our despatches *via* Brindisi some days in advance of the P. and O. mails *via* Marseilles, we were enabled to give the earliest account of this great calamity in our issue of the 26th ult. The local papers and correspondents' letters since received bring many additional details, and enable us to give a more circumstantial account of the progress of the conflagration, as well as to relate many noteworthy incidents attending it. As already related, the fire originated in a small cookshop some distance from the foreign settlement, which would in all probability have escaped injury had it not been for the proximity of the *Yoshiwarra*, or *Gankiro*, a quarter especially set apart, as is customary in Japanese towns, for prostitutes—with tea houses, bath houses, and shops of every discription for their special use. This is the "establishment for the education of young ladies" mentioned by the Duke of Newcastle in the House of Lords in the Kagosima debate of 1863, as having been half burnt and rebuilt so rapidly. It has always been an intolerable moral and physical nuisance, and besides a great source of danger to the settlement. Japanese of the lowest class, drunken soldiers and sailors from the garrison and fleet, and the dwellers in the den itself, have always made night hideous with their orgies. It should here be observed, however, that the existence of this place must not in itself be considered as evidence of unusual social depravity or unbridled licentiousness among the natives, but simply as the result of a system by which the Government endeavours, by confining the "social evil" within certain bounds, to keep it more effectually under the control of the law. But the position of this suburb with regard to the settlement was most ill-judged, and we are glad to observe that the Gorogio have promised that when rebuilt it shall be removed to a safe distance.

To resume—no sooner had the fire broken out at the spot indicated than it spread rapidly along the narrow street leading to the Yoshiwarra, which instantly caught and was soon in ashes. Surrounded by a deep moat, with water also on both sides of a narrow street, the only means of exit, the frightful position of the wretched inhabitants of that quarter, at least a thousand in number altogether, may be imagined. A large number fled to a little temple at the end of the Yoshiwarra, which, standing rather apart from the rest of the buildings, was saved, a little oasis in a waste of flame; many plunged into the moat and escaped by swimming, others got across in the few boats that happened to be moored to the banks. And here we have the pleasure of recording the valuable aid rendered by the Rev. M. Buckworth Bailey, Consular Chaplain, and Dr. Dunwoodie, R.N., of the Naval Hospital. These two gentlemen arrived early at the dreadful scene of destruction, and found of course all in confusion, with no guiding head to direct many willing hands; boats punted across and grounding halfway, some selfishly seized by one or two that could have held a score, and great loss of life imminent. By passing ropes across and thus enabling boats to be hauled quickly to and fro, many were ferried over while Messrs. Bailey and Dunwoodie were rapidly constructing a bridge of boats, by means of which ultimately all escaped who had not previously fallen victims to fire or water.

Meanwhile the fire had run up the narrow street and spread right and left in the native town. So dry were the roofs, so strong the wind, that flakes of burning shingles were lifted and carried to great distances, and the flame bursting out wherever they alighted, the fire seemed to leap to spots a hundred yards distant from the spot of the main conflagration, and the native town presented at one time the appearance of a place set on fire by incendiaries in twenty spots at once on a well-concerted plan. The Yokohama Volunteer Fire Brigade had out two of their engines immediately, and were halted in the open space between the foreign houses and the new Consulate ground. At that moment the flames had spread to a block of low bungalows immediately behind the Custom-house. In this mass of Japanese shanties—of wood, plaster, and paper—lived the subordinates in most of the Foreign Legations and Consulates, and there, too, were situated the actual offices of the American, Prussian, Swiss, and Portuguese Consulates themselves. The rapidity with which this block caught and burnt like tinder was simply marvellous. A house would be seen intact, a flake of fire would fall on the roof, and in less than five minutes the building would sink down like a house of cards collapsing under the touch of a child's finger. Here lived Mr. Satow, of the English Legation, whose valuable services to students of the Japanese language are already well appreciated and will shortly be more widely known. Many found time in the course of the disastrous day to ask whether his manuscripts had been saved, and we have the great pleasure of announcing that such was the case,—that his servants succeeded in saving his dictionary, still in manuscript, and the copy of the colloquial dialogues, now just on the point of going to press. Mr. Mitford, also of the English Legation, was not so fortunate. This gentleman has been for some time in Peking, and arrived here but a few weeks ago. His manuscripts—translations of of Chinese documents and notes for an important work on Chinese literature—have all been consumed. Mr. Siebold, also of the English Legation, has lost a quantity of valuable notes on Japan, and Mr. Schnell, of the Prussian Legation, another student, has sustained similar loss.

Here, too, lived M. Degron, the French Postmaster. His position is a very unfortunate one. His office and house were situated in the very heart of the block, and all he had in the world is destroyed—furniture, clothing, and books. He was on the point of going to France on leave. $1,500, the savings of some years from not very liberal pay, which he had economised for his expenses while at home, were in his office safe and are lost. And in that safe, too, were the proceeds, in cheques and notes, of the sale of some very considerable quantity of postage stamps and fees. The greatest exertions were used to save the chest but in vain, and M. Planton, a marine, and M. Degron's clerk, were severely injured in attempting to rescue it. We hear that this brave young man behaved so well as to have been recommended by the Commandant for a decoration.

The whole of the Japanese Custom-house soon afterwards catching fire, a great body of flame was projected against the warehouses; the roof soon caught, and in a short time the building fell, and over $160,000 worth of goods were burning. The amount of loss is justly thought small. It is fortunate that during the whole of the month large deliveries had taken place, and hardly anything sent in; and the figure we give represents the total amount of loss. Mr. Seare, the superintendent, was on the spot at the first alarm of fire, and succeeded in rescuing his books and papers, which, however, were subsequently destroyed in what was thought to be an utterly impregnable mud-built silk safe of like construction to those which may be seen dotting the wide expanse of the *debris* of Japanese houses.

Meanwhile, a flake of burning wood had flown over to the new American Consulate, a building standing nearly opposite to Messrs. Jardine's. It alighted on a small mat shed built for the workmen, which was instantly blazing, and quickly the whole house was on fire, and a great body of flame from it streaming straight out into the bay. Here it was hoped that, should the wind keep steady, the mischief would end; but a few miserable little Japanese houses made a link of connection between the native and foreign towns, and here the fire crept up, seized the nearest European house, that of Mr. Crace, agent for Messrs. Chapman, King, and Co.—then Messrs. Hooper and Clarke's—some large taverns, and finally the Yokohama Hotel and the houses at the corner of the main street. There were destroyed, the house and godowns of Messrs. Thorel, Ziegler, and Co.,

Digitized by Google

Overweg and Co., and Eisler and Co.—the last named storekeepers, and supposed to have been uninsured, their policy having expired on the previous Saturday. A variety of stores and less important buildings in the neighbourhood were of course also consumed, and then the house and godowns of Messrs. Jardine's on the Bund caught fire, and the wind shifting slightly to the eastward, and showing symptoms of veering still farther to the same point, the foreign settlement became in imminent danger. For here we pause to note that the whole of the native town which had been attacked being down and its embers still blazing—a fierce fire raging in the bonded warehouses where the walls had long since fallen in, and a long pile of bales of goods, 16 feet high, showed like an enormous furnace of gigantics blocks of coal—the whole north-west side of the settlement proper in flames, and the large masses of the Custom-house and new American Consulate assisting to increase the fire—a shift of wind for a quarter of the compass from south-west to north-west, which about 10.30 seemed imminent, must infallibly have caused the destruction of the whole front of the place, or, in other words, the houses and godowns of nearly every important firm in Yokohama. Fortunately this change of wind did not take place until later, when much of the great wall of fire had sunk into smouldering embers. It must seem almost incredible to readers at a distance that this immense amount of destruction should have been consummated in little more than an hour! But such is the fact; and those who have had an experience of Eastern life will understand why a gentleman sitting in the Club at breakfast, and being told that his house, a Japanese built bungalow, was on fire, should have simply thanked his informant and called for more coffee; for he knew of course that, if the fact were so, the house and all in it would be a mere heap of blazing ruins long before he could have reached it. And this circumstance actually happened.

The houses contiguous to Messrs. Jardine, Matheson, and Co. along the bund were No. 2, Messrs. Walsh, Hall, and Co.; No. 3, Messrs. Wilkin and Robinson; No. 4, Messrs. Reiss and Co.; No. 5, the Dutch Trading Company, and then the Club. Nos. 2 and 3 successively fell before the advance of the flames. Messrs. Reiss and Co.'s godowns, however, with £50,000 worth of goods in them, happily resisted the attack. In the rear fell the godowns of Messrs. Lindau and Co.—the house being untouched by some almost miracle—the offices of Messrs. Schultze, Reiss, and Co., and a mass of small wooden bungalows, livery stables, Chinamen's houses and wooden godowns, which stood among their statelier neighbours. Meanwhile the sailors from the fleet, and a very large detachment from the garrison, with some engineers had appeared upon the scene, and a little after noon it was decided to blow up the house No. 5, the residence of Mr. Van der Tak, agent for the Dutch Trading Company, in the hope of saving the Club, standing on the same lot and thus preventing the flames from spreading. Lieut. Bond, R.E., conducted the operation in person, and his daring and coolness in doing his work were very remarkable. Meanwhile the houses and godowns of Messrs. Carst, Leis, and Co. had taken fire, and, being of great extent and situated close behind the Club, it was thought to be in imminent danger. A party of midshipmen and some of Mr. Van der Tak's Japanese coolies, with Mr. Smith, the well known Club Secretary, at their head, worked in the most gallant manner to save the threatened building. One end of the building was several times actually on fire, but one of Mr. Van der Tak's servants kept there at his post, and extinguished each flake of the fire as it fell on the roof. The middies were busy keeping the whole roof wet, and did indeed good service. One of these lads we are sorry to hear —Mr. Hammond—rolled off, and suffered severely from the fall. Care was at the same time given to the main building. Fortunately there happened to be upon the premises a couple of small pumps and a plentiful supply of water in large tubs and tanks. A bucket full of water here, another there, stopped each spark that lighted on the building and—almost ludicrous though it may seem when told in sober print—a few coffee cups full of water at one time saved the Yokohama Club, for fire had lighted on the roof and some timber had caught fire, when Mr. Smith, happening by good fortune to be in the upper story, saw the danger and stopped the fire by this simple means.

But while the Club was being saved, the fire had passed it and seized No. 6, an old wooden bungalow, the residence of Mr. A. O. Gay, agent for Messrs. A. Heard and Co., and then to No. 7, when the godowns of Messrs. Ross, Barber and Co. were *entirely* consumed, and their bungalow much damaged. Here it was that the sailors from the merchant ship *Chaa-ize*, under command of Captain Shewan, did good service with a little ship's engine, which they had ultimately to abandon. By this time, just when darkness was approaching to add to the difficulties of those who were working to suppress the flames, the wind suddenly shifted again, and commenced to blow right inland, threatening to ignite the houses in the rear, which had hitherto escaped. It was then deemed necessary to blow up the new house of Messrs. Textor and Co. in Water street, and this was unfortunately done. We say unfortunately, for the wind again changed immediately and blew seawards; and the house might have been spared, but at the moment the precaution seemed indispensable. And then the wind dropped, and the progress of the fire was happily arrested.

The services of the 9th Regiment were called into requisition to aid in suppressing the fire, and a large number of sailors were landed from Her Majesty's ships of war for the same purpose; and we regret to observe that, with a few exceptions, the conduct of all these men was most disgraceful. At first, the men worked well, and were under complete control of their officers; but as soon as a few store rooms had been opened, and particularly after a wine and spirit store in the main street had been gutted, many men were seen drunk, and soon, except the few good men who could be kept with their officers, the soldiers of the 9th and the sailors from the fleet threatened to become as dangerous enemies to the foreign settlement as the fire itself. There was more than one instance of that most heinous crime in a soldier—drunkenness on guard and desertion of his post. In one case where a corporal and two men were placed on an important guard, the men were both drunk and deserted one after the other, and a civilian who went to get a relief for the corporal, found him absent also on his return. In one case a resident had to drive out men from his dining-room with a revolver, and there is another of sailors of the *Princess Royal* entering the office of a merchant, opening his desk and stealing therefrom a cash-box containing property of very great value. The merchant followed the men to their boat and would have searched for his box, but was driven back, assailed with the grossest abuse and threatened absolutely with personal violence, the officer of the boat being meanwhile perfectly helpless in the hands of his men. The officers, one and all, worked with the utmost goodwill, and many showed singular presence of mind and talent for command, and they deserve the best thanks of the Yokohama community for their help.

The entire area destroyed by the fire appears to have been about fifty acres, and on the few following days this presented an extraordinary scene of devastation. A correspondent says, "By the third day the Japanese had already begun to rebuild their houses. A temple and one godown were the only buildings left standing in the Gankiro. Lying at the side of the road I observed five heaps covered with straw matting. Just then a Japanese officer, a kind of coroner, came up, and the straw covering was removed from the first heap. It was a poor girl, apparently about 22 or 23 years old. Her left arm was bent over her face, her right arm stretched out to its full extent, as though she had thrown herself on to her face to avoid the suffocating smoke. The next two heaps were girls of about the same age dreadfully burnt; the other two were a little girl and a middle-aged man. The officer took a full description of them. Thirty-seven bodies have been found, most of them drawn out of the water; one girl's remains were found in a well. It is impossible to say how many were burnt up in this place. The Japanese say that about one hundred lives were lost altogether, by fire and drowning." Great distress of course resulted to the poor people burnt out, but active measures were immediately taken by the native authorities for their relief. A large theatre in a part of the town unconsumed was made into a sort of casual ward, and in a village across the creek 500 more were billeted. All the burnt out Europeans found shelter, of course, among their friends. A charitable gentleman, Mr. Hoey, himself lying sick in the settlement, placed in the hands of the Consular Chaplain a thousand "bous" for distribution among the destitute Japanese. There has been doubtless great destruction and loss of property among Europeans, some of whom can ill bear the calamity, but in the case of the natives, there must certainly be hundreds who have lost their all, and Mr. Hoey's generous gift is worthy of the highest praise. The well-known liberality of the foreign community renders it probable that his example will find many imitators.

As far as we can gather from the roughly estimated accounts received, the loss of property in the form of merchandise is less

Digitized by Google

than might have been supposed. Only about forty bales of silk were burnt, which were under inspection in foreign godowns. The loss of tea is estimated at between 4,000 and 5,000 piculs —about 1,600 having been lost in the foreign settlement and the remainder in the native town. In the bonded warehouses the losses were as follows:—Grey Shirtings, 6,299 pieces; Chintzes, 5,794; Ginghams, 4,000; Orleans, 1,000; Figured ditto, 100; Taffachellas, 4,000; Camlets, 2,990; Muslins, 900: Printed Cottons, 1,500; Spots, 1,048; Velvets, 156; and Cotton and Woollen Mixtures, 1,287. The total value of these and a few sundries is $162,000. A large amount of curios have of course been destroyed, the chief shops for such articles being in the locality desolated by the fire. The following statement gives the actual liabilities of the various insurance offices:—

China Fire	—	...	$341,000
Imperial	£20,000	...	—
Phœnix	—	...	66,900
North British	52,000	...	—
Northern	—	...	306,500
Commercial...	9,000	...	—
Queen	9,000	...	—
Royal	79,000	...	—
London and Lancashire ...	—	...	132,000
Liverpool and Globe ...	—	...	80,000
London	43,700	...	—
Sun...	—	...	156,500
Samarang	—	...	20,000
Albert	—	...	43,000
	£212,700		$1,145,900

Thus, reducing the sterling at a rate of 4s. 5d., the total liabilities of all the offices in dollars amount in round numbers to $2,100,000. Twenty per cent. taken from this will leave their probable actual loss. And perhaps a little less than this would represent the amount uninsured, so the total pecuniary loss in the foreign town may be roughly called four million of dollars. The natives say that they have lost another two millions, which is perhaps about the correct figure.

It appears that Sir Harry Parkes was absent on the day of the fire, having left for a short trip into the country a few days previously. On his return on the 20th November we are told that he immediately visited the scene of the conflagration, and several of those who had been sufferers. No sooner had he realised the great losses some have endured, than he commenced making active inquiries as to means of affording relief to the most urgent cases. The day after the catastrophe some of the ladies busied themselves to set measures on foot for the same purpose, and besides a public subscription, a concert is spoken of, at which they have generously offered to assist. Under such circumstances, an entertainment of the kind would be certain of success.

THE STRAITS GOVERNMENT.

The form of Government which is about to be instituted may be said to assimilate closely to that in force in the colony of Ceylon. It will consist of a Governor and Legislative Council; the latter body comprising six official members and four unofficial members, two of whom will represent Singapore and the other two Penang and Malacca respectively. The Governor is to visit Penang for three months and Malacca for one month in every year. The troops stationed in the island will be a wing of a European regiment, six companies of the Ceylon Rifles, and two batteries of Artillery. Of these, 880 men are to be considered as stationed in the settlements exclusively for colonial purposes. The Colonial Military Contribution will be £59,300 per annum.

The Executive Council will consist of the Governor, the Colonial Secretary, the Attorney-General, the Commanding Officer, the Government Agent of Penang, and the Government Agent of Malacca. The titles of the two last mentioned officers will probably be changed to that of Lieutenant-Governor. The official members composing the Legislative Council will, in addition to the Governor, be the Chief Justice of Singapore, the Colonial Secretary, the Attorney-General, the Treasurer, the Auditor-General, and the Chief Engineer. The unofficial members will be two members for Singapore, one for Penang, one for Malacca, and the Clerk of Councils.

The following is a list of the various offices under the new Government with the names of the employés where the appointments have been made. The total of the salaries amounts to £59,693.

CIVIL ESTABLISHMENT will be as follows:—Governor, Colonel Harry St. George Ord, R.E., C.B., £5,000; Private Secretary, £300, H. F. Plow; Colonial Secretary, £1,800; Chief Clerk, £300, W. S., Leicester; Second Clerk, £180, G. Perreau; Third Clerk, £96, J. A. Hawkshaw; three other Clerks and a Malay Writer; also three Cadets at £200 each. Auditor-General, £1,000, Chas. John Irving; First Clerk, £360; Second Clerk, £300; Third Clerk, £180; Chief Engineer Straits Settlements and in charge of Public Works Singapore, £1,400; First Clerk, £240; Second Clerk, £180; Estimator, £120; Draftsman, £120; Surveyor-General, £864, D. Quinton; Colonial Surgeon, £960; Government Printer, £112, L. F. D'Souza.

SINGAPORE.

TREASURY AND STAMP OFFICE.—Treasurer and Commissioner of Stamps, £1,000, W. W. Williams; First Treasury Clerk and Cashier, £390, J. B. Leicester; Second Clerk and Accountant, £120, F. R. Frois; Deputy Commissioner of Stamps, £360, G. Norris.

LAND REVENUE SURVEY OFFICE.—Assistant-Surveyor, £180, J. Peel; Draftsman, £180, Wajid Khan.

REGISTRATION OF TRADE AND SHIPPING.—Deputy Registrar, £300, John Cooper; First Clerk, £96, E. Leicester, and two other Clerks.

PUBLIC WORKS.—Head Overseer, £300, J. M. Magalhaens; Second Overseer, £180, W. D. Baylis; and a Storekeeper.

ECCLESIASTICAL.—Acting Colonial Chaplain, £960, Rev. C. J. Waterhouse.

MEDICAL.—Acting Assistant Colonial Surgeon, £564, A. Fergusson.

LAW AND JUSTICE.—SUPREME COURT.—Chief Justice, £2,500, Sir P. Benson Maxwell; Clerk, £300, C. G. Baumgarten; Attorney-General, £1,000 and private practice, Thomas Braddell; Crown Soliciter, £250; Registrar, £1,200, C. Baumgarten; First Clerk, £600, G. W. Lecerf; Second, £300, W. F. Hendriks; Third, £120, A. A. Baumgarten; Chief Interpreter, £300, G. W. D. Geils; Chinese Interpreter, £120, Tan Kay Sing; and three other interpreters; Sheriff, £360, H. Hewetson; Jailor, £120, G. W. Ganno; Clerk and Bailiff, £96, Robert Jeremiah.

COURT OF SUMMARY JURISDICTION.—Judge, £1,500; First Clerk, £240, W. Norris; Second Clerk, £120, Henry Holloway, Head Jailor, £180, J. Burnett; Assistant Jailor, £60, C. Robeiro.

POLICE.—Senior Magistrate, £960, J. D. Vaughan; Junior Magistrate, £540, F. H. Gottlieb; Commissioner of Police, £1,200, T. Dunman; Deputy-Commissioner and Coroner, £528, K. B. S. Robertson; First Clerk, Magistrate's-office, £264, S. Leicester; Second, £118, R. J. Duncan; First Clerk, Commissioner's-office, £132, H. Hewetson; two other Clerks, a Writer, and three Interpreters.

CHARITABLE INSTITUTIONS.—Superintendent Lunatic Asylum and Apothecary, £216, R. Watson; Senior Apothecary, General Hospital, £132, F. G. Eade; Apothecary, Pauper Hospital, £114, J. J. L. Wheatley.

MARINE.—Master Attendant and Shipping Master, £840, Lieutenant Burn, I.N.; Deputy ditto, £360, G. T. Wright; First Clerk, £144, H. D. Chopard; Second, £120, G. S. Reutens; and three other Clerks, Gunners, Light-keepers, &c.; First Light-keeper, £108, T. Todd.

SUPPRESSION OF PIRACY.—Commander steamer *Pluto*, £420, J. Eales; Officer steamer *Pluto*, £210, D. H. Thom; First Engineer, £360, R. H. Wiseham; Second, £150, J. Akan.

POSTAL.—Postmaster; Assistant Postmaster, £600, William Cuppage; Charge Taker, £400; First Sorter, £240, James Nicholson; Second, £100, William Brown; and three other sorters.

PENANG.

TREASURY AND STAMP OFFICE.—Government Agent, £1,800; Collector of Stamps and Assistant Treasury Department, £480, Philip Jones; First Treasury Clerk, £120, J. E. Hogan, and two other Clerks.

COLLECTOR'S OFFICE.—First Clerk, Penang, £180, E. Laureiro, two other Clerks and three Collectors; First Clerk, Province Wellesley, £158, J. Hogan and three other Clerks.

REGISTRATION OF TRADE AND SHIPPING.—Deputy-Registrar, £121, J. Rodyk.

PUBLIC WORKS.—Executive Engineer, £720, J. Bennett; Head Overseer of Works, £280, E. Scully.

ECCLESIASTICAL.—Acting Colonial Chaplain, £960, Rev. J. Mackay, B.D.

MEDICAL.—Acting Assistant Colonial Surgeon, £564, J. B. King.

LAW AND JUSTICE.—SUPREME COURT.—Chief Justice, £2,000, Sir W. Hackett, Knt.; Clerk, £300; Crown Solicitor, £250; Registrar, £1,080, A. Rodyk; First Clerk, £600, W. N. F. Caunter; Second, £300, A. W. S. Stewart; Third, £120, R. Scott; Chief Interpreter, £360, G. W. Symons; Chinese Interpreter, £120, Koh Ten Choon; Sheriff, £300, J. B. D. Rodyk; Jailor, £96, R. R. Reutens.

COURT OF REQUESTS.—Commissioner Penang, Police Magistrate, *ex officio*; First Clerk, £180, T. G. Mitchell; Second, £90, B. Jeremiah; Commissioner, Province Wellesley, Police Magistrate *ex officio*.

POLICE.—Magistrate, Penang, £720, C. B. Plunket; Magistrate, Province Wellesley, £720, G. W. Earl; Commissioner of Police and Coroner, £528, C. B. Walker; Deputy Commissioner and Coroner, £300; First Clerk, £180, J. Hogan; First Clerk, Commissioner's Office, £150, Martin Thomas.

CHARITABLE INSTITUTIONS.—Apothecary General Hospital, £120, J. Ash; Assistant Apothecary, Province Wellesley, £120, G. E. Lilly-white.

MARINE.—Harbour Master and Shipping Master, £660, G. F. Gottlieb First Clerk, £96, Z. C. Aeria.

SUPPRESSION OF PIRACY.—Commander steamer *Mohr*, £240, P. Earl; Engineer, £175, J. Dick.

POSTAL.—Postmaster, Harbour Master *ex officio*; Assistant Postmaster.

MALACCA.

TREASURY AND STAMP OFFICE.—Government Agent, £1,200; Collector of Stamps and Assistant Treasury Department, £240, J. Overie; Treasury Clerk, £120, L. Fernandis; Record Office Clerk, £120, H. J. Leynard; Government Surveyor, £600, P. S. Lenthall.

COLLECTOR'S OFFICE.—First Clerk, £192, H. A. Baumgarten; Second Clerk, £132, A. D. Neubronner; and four other Clerks and Writers.

PUBLIC WORKS.—Sub-Engineer, £300, C. A. Evans; First Clerk, £120, C. J. Van Braght.

ECCLESIASTICAL.—Colonial Chaplain, £420, Reverend W. Hackett.
MEDICAL.—Acting Assistant Colonial Surgeon, A. C. Maingay.
LAW AND JUSTICE.—SUPREME COURT.—Clerk, £600, W. Rodyk; Chief Interpreter. £144, A. Neubronner; Sheriff, £180, F. D. Baumgarten; Jailor, £120, W. Boyd.
POLICE.—Magistrate, £720; Commissioner of Police and Coroner, £360, C. J. Hanson; Clerk, Magistrate's Office, £107, C. S. J. Minjoot; and three Interpreters.
MARINE.—Clerk, E. Neubronner; Deputy Registrar of Trade and Shipping, E. Neubronner; Commander Light-vessel *Torch*, £216, G. L. Baumgarten; Light-keeper, £96, J. Linehan.
SUPPRESSION OF PIRACY.—Commander steamer *Tonze*, £240, F. A. Fox; Engineer, £175, C. Goddard.
POSTAL.—Government Agent, *ex officio*.

ST. HELENA AS A PORT OF CALL.

WE are glad to find that the merchants of St. Helena have become fully alive to the importance of removing one serious impediment on trade—that arising from the tonnage dues exacted at Jamestown. Such dues constitute an unpleasant item in a captain's list of his vessel's expenses. Whilst little fault can be found with these dues in the abstract, it is certain that their operation is to restrict the number of calls; and, as in any given instance, the payment is likely to constitute but an insignificant sum compared with the total spent ashore, the aggregate loss to the community is a serious one. The Governor, it appears, has only an eye for the direct proceeds, and refuses compliance with a most influential memorial. We trust that no time will be lost in forwarding it through his hands to the Colonial-office. On the score of actual loss to a small community, possessing but a limited market, and living in the midst of ocean, this is a serious matter, and their well-considered representation must not be summarily dealt with after the style of the "old school." We find from an able article on this subject in the *St. Helena Guardian* that the merchants would willingly submit to pay a certain percentage for business done with the ships rather than continue the present impost, so that the revenue should not suffer loss. An increase of ships calling would increase the revenue from water rates, and in various ways add to the prosperity of this interesting colony.

THE steamer *Colorado*, which left San Francisco on the 1st January for Hong Kong, is announced to leave on the return voyage on the 13th February. The next steamer from San Francisco will leave on the 3rd April. Passengers from this must leave Liverpool by the West Indian and Pacific steamer of the 20th February.

TELEGRAPHIC advices from Batavia to 29th December announce the arrival of Governor Meyer from Holland.

TENDERS have been invited for the conveyance of troops to Singapore, and also from the Cape to Hong Kong. Particulars will be found in our "Shipping Intelligence."

Naval and Military.

The Urgent troop ship finally left Plymouth on the 27th Jan. for Hong Kong. The Urgent has on board a large number of naval officers, seamen, and marines for service in the gunboats and other of Her Majesty's ships now serving in the Chinese and Japanese seas. The list of naval officers going out in the Urgent for this service includes Captain Hickley, R.N.; Lieutenants Cameron, Rose, Anson, Kent, Grenfell, Griffith, Crosbie, and Broxham; Master John Tully; Paymaster J. M. Blyth; Second Masters Hedden, Packer, Fox, and Ridden; Assistant-surgeons H. R. Ryall, R. Nelson, E. W. Lesly, H. Hansford, Eugene Van Meru, and C. G. Wodeworth; Chief Engineer E. M. Avoy; Engineers Young, Foster, Coltam, Sanders, Murray, and Green; 25 assistant-engineers, 8 warrant officers, and upwards of 50 seamen and marines. The Urgent will call at Loando, the Cape of Good Hope, Mauritius, Singapore, and Ceylon during the outward voyage. The machinery of the ship since her arrival at Portsmouth from foreign service in August of last year has undergone considerable repairs, and important modifications have been made in the overhead arrangements of the boiler-room and stokehole. The engines have had new condensers and air pump, and a general overhaul and repair of all other parts. New boilers were also required, and a set which had been lying in the dockyard for some time, marked "Furious," were appropriated for the purpose, the said Furious being now a coal hulk converted from a once formidable paddle steamer.

Letters from Madeira announce the arrival on the 23rd ult. of H.M.'s armour-plated ship Zealous, 20, 800-horse power, Captain R. Dawkins, bearing the flag of Rear-Admiral the Hon. G. F. Hastings, Commander-in-Chief of the Pacific squadron. During her passage out the Zealous had encountered very severe weather, and ran short of coals, necessitating her putting into Lisbon for a supply. After receiving 200 tons at Madeira she sailed again at noon on the 27th ult., all well. The screw sloop Rinaldo, 7, 200-horse power, Commander W. K. Bush, arrived at Madeira on the afternoon of the 27th ult., and sailed late in the afternoon of the 30th for China. The sloop-corvette Reindeer, 7, 200-horse power, Commander E. Nares, arrived at Madeira on the 1st inst., after a lengthened passage, during which she encountered a succession of very high gales. On the 14th ult. the Reindeer exchanged signals with the brig Commerce, of London, standing east, in lat. 49 40 and long. 3 45. The Reindeer was at Madeira at the despatch of the mail, but would leave in a few days for China.

The Rodney, 78, screw steamship, 2,770 tons, 500-horse power, fitting in Sheerness dockyard, has been fully commissioned as Admiral Keppel's flagship for China, by Capt. Algernon C. F. Hepeage. The following officers have been appointed, and taken up their commissions:—Commander Edward White, Lieuts. W. R. C. Cookson, M'Hardy (for gunnery duties), Archibald H. Turner, Thornhaugh P. Gurdon, C. O. Woodroffe, and W. L. Bamber; Master Wm. H. Harris, Staff-Surg. Dr. Chas. Forbes, Surg., additional, Dr. Henry Fagan, Paymaster G. Grant, Chief Engineer, James Coade, Sub.-Lieut. Hugh M. Tyler, Second-Master Charles H. P. Douglas, Assist.-Surg. Bradley Gregory, Assist.-Paymasters John T. Hugo and T. A. Irwin; Midshipmen John V. Fawcett, Herbert Horner, G. H. Moore, C. Hantingford, Tyne F. Hammell, Cecil H. Whish, W. S. Taylor, Sydney A. Holt, W. M. Atkinson, Archibald E. C. Kennedy, and Henry C. A. Morshead; Naval Cadets, Henry Ponsonby, Gerald Ellis, Francis C. M. Noel, Sydney H. Abell, Herbert R. L. Phillips, Stuart R. Paltulo, and Clement C. Woodland; Clerk Francis T. Lobb; Assist.-clerks Richard H. Clark, John Hyde, and Joseph H. Potter; Engineers William Collier and Henry W. White; First-class Assist.-Engineers Frederick Hallett and W. M'Naught. Capt. W. G. Hale. First-Lieut. F. Baldwin, four non-commissioned officers, two drummers, and 102 privates of the Chatham division of Royal Marines Light Infantry have been placed under orders to embark on board the Rodney.

Racoon, 22, screw, Captain Purvis, at Devonport, was taken to Keyham to have her internal fittings completed. As soon as ready for sea she will proceed to the Cape of Good Hope station.

H.M.S. Leopard, which a few months since returned to England and was paid off after completing her term of service on the China station under the command of Captain Leckie, is advertised by the Admiralty for sale. She is described as being of 1,406 tons and 560-horse power, and now lies at Devonport, where particulars and cards to view her may be obtained from the Admiral-Superintendent. Tenders will be received at the Admiralty up to two P.M. on the 19th February.

BARRATRY CASE.—The American brig *Jackmel Packet*, of 120 tons, Capt. John A. Dawes, owner and master, reached Aspinwall on the 14th instant under very suspicious circumstances, and has been seized by the U. S. Consul at that port. It appears the vessel sailed from Singapore on the 19th August, with a cargo of pepper, mace, nutmegs, tapioca, cobre fibre, pearl sago, &c., worth, vessel and cargo, about $20,000, under a charter from Rautenberg, Schmidt and Co., of that port, and was consigned to Haege and Co., of Melbourne, Australia, for which voyage her papers were all made out in regular order. This fact alone created considerable suspicion, which was increased by the various rumours set afloat as to the cause of her coming to Aspinwall, one reason assigned by the captain being that he had put in through distress to procure new sails, &c. On obtaining her papers, Consul Rice found that the vessel was originally built in the States, afterwards transferred to the British flag, and then illegally transferred back again to the United States flag, by the U. S. Consul at Singapore. The charter party, and other papers proving a direct case of barratry, were also found in the vessel, and having procured the fullest evidence of an attempted swindle on the part of the captain, Consul Rice seized the vessel and placed a guard of marines from the U. S. ship *Mackinaw* on board of her. Immediately on her arrival at Aspinwall, and previous to seeing the Consul, the captain had disposed of the cargo for about half its value to Mr. Donalisio, but that gentleman declined having anything to do with it on hearing the circumstances. Mr. E. W. Cowan, Lloyd's agent at Aspinwall, rendered Consul Rice very efficient service in bringing evidence to light in regard to this curious affair, and to both these gentlemen great credit is due for the promptness with which they ferreted out all the particulars connected therewith, and the steps taken immediately to bring the culprit to justice. Of course, we presume, Consul Rice will place the vessel at the disposal of his government, so that the actual owners of the cargo will in the end lose nothing beyond the delay. Later advices state that "after a minute examination of the laws on the subject the authorities concluded to allow the consul to remain in possession of the vessel, and she will therefore be at once sent to New York, consigned to the collector of customs there for adjudication."

THE SUPPRESSION OF PIRACY IN CHINA.—Mr. H. N. Lay writes a long letter to the *Daily News* on the recently announced facts that a transport, carrying a large number of supernumerary officers, is under despatch to China, that the gunboats at present laid up at Hong Kong are to be recommissioned, and that orders have been issued by the Admiralty for the building of six or eight gunboats for the China squadron. The inference is that our naval force on that station is to be employed in the suppression of piracy, and against the unconditional adoption of this course Mr. Lay protests. Piracy in China, he says, is not what piracy is in other countries; it is simply a symptom of disease, and not the disease itself, and is not to be got rid of by repressive measures only, however rigorous. Its existence is but proof of bad government, and to put it down we must go to the root of the evil, Peking, where the remedial means needed must be applied. To interpose for the extermination of the pirates is to interfere between the government and the people. As to our own interests we pursue a most suicidal course when we render aid unconditionally. In delivering the Chinese Government from embarrassment and peril, without conditions of any sort, we remove the only motive, fear, calculated to incline it to mend its ways; by our own act we mar the chance of improved administration. Why should the Chinese Government be exempted from at all events bearing its share of the cost of any force organised to suppress piracy? It cannot plead impecuniosity, since it draws a large annual revenue from the foreign customs. Besides, we are not the only Power with large interests at stake. French, Americans, and Germans carry on an extensive trade, and Russian interests are growing. Why should we,

Digitized by Google

then, incur singly the expense of suppressing piracy? If each Power provided a couple of gunboats the force would suffice for the safety of foreign shipping, which is all that devolves upon us to provide for. Why should the English tax-payer alone bear the expense of maintaining an immense naval force in China, in order that the Government may be relieved of its obligations and duties?

DIVORCE CASE—COGHILL V. COGHILL AND LOURREIRO.—Dr. Spinks Q.C., and Mr. Macrae Moir for the petitioner; Dr. Tristram for the respondent. The co-respondent did not appear. The petitioner is a physician. He married the respondent at Edinburgh in 1862, and after a short but not very happy cohabitation in this country they sailed for China, where the petitioner has since continued in the practice of his profession. They first settled at Hankow, but left it for Shanghai, where they continued to live together until September, 1864. The respondent was much given to flirtation, and this led to so many misunderstandings with her husband that they ceased for some time to occupy the same bedroom. In Sept., 1864, it was arranged that she should return to England. She embarked at Shanghai, and shortly afterwards wrote to the petitioner's brother, also a physician practising in China, thanking him for his kindness, and expressing regret for her own folly, which she endeavoured to excuse on the ground of her husband's want of love. In this letter she confessed that she had been criminally intimate with the co-respondent, Pedro Loureiro, a person in the employ of a mercantile firm at Shanghai, and added that she and not he had been the tempter. The co-respondent (who is now undergoing a sentence of penal servitude for defrauding his employers), had also confessed their guilt to a friend. His Lordship said that, although the case rested on admissions, they were yet made under such circumstances that the Court could not fail to give credence to them. He then granted a decree nisi, with costs.

A NEW FOOD FROM CHINA.—Mr. J. Hullet, Clarence Lodge, Cosham, Hants, writes calling attention to the Chinese sugar grass (*Sorghum Tartaricum*) as a valuable addition to our cereal crops. It is not only perfectly hardy, and bears from six to eight times the quantity per acre than wheat does, but the bread made from it is more nourishing, and goes further than any other. Added to this, the leaves and shoots are invaluable as food for cattle. As the true seed is not easily obtained Mr. Hullet will be happy to send a few grains to any one sending a stamped directed envelope.

THE JAPANESE TROUPE.—Messrs. Prior and Grant have arrived in London with their troupe of Japanese jugglers and acrobats, who will soon commence their performances, we believe at the Egyptian Hall. They are nine in number, two of them being women—the first that have ever visited this country.

Monetary and Commercial.

The advices from China are still far from satisfactory. Fresh difficulties are reported with each mail and also by telegrams. It was hoped that the announcement that Messrs. Dent and Co. would be able to meet their dishonoured drafts would have restored confidence and cleared the atmosphere, but it is not so; and the ultimate result of this firm's arrangements is still looked on as doubtful by many who should be good judges. This naturally weighs upon other firms who are believed to be weak; and, as usual in these cases, rumour also extends to houses known to be equal to all their engagements. It will be a considerable triumph to Messrs. Dent and Co. if they succeed, and it is most sincerely hoped that they will; but the offers made in Hong Kong for their assistance are interpreted in different ways. It is stated that they have announced to depositors their willingness to pay them at once, and indeed the statements emanating from themselves are most hopeful as to their ability and intentions to maintain their business. It is only natural that distinct points of difference should exist between them and their London agents, Messrs. Dent, Palmer, and Co., as to the dishonour of their drafts.

The last steamer from Mexico has brought only a small amount of silver. The next one is expected to bring over half a million in dollars.

The official liquidator of the Commercial Bank Corporation of India and the East has issued dividend notices of the first payment of 10s. in the pound for the 19th, 20th, and 21st of February. Creditors of £50 and under are to be paid in full on the 13th of February.

The distribution to be recommended by the directors of the London and County Bank (who are the London Bankers of the Hong Kong and Shanghai Bank) at the meeting on the 7th inst. will be 14 per cent., or £2 16s. per share, making, with the distribution of 11 per cent. in August last, a total payment of 25 per cent. for the year.

At the meeting of the National Bank who acted for the Hindustan Bank it was stated that the engagements in connection with Hindustan, which in May last stood at £2,264,000, have been reduced to £850,000, against which the bank holds securities of the nominal value of upwards of £1,000,000, and which are unquestionable for £500,000. It was therefore quite improbable that their ultimate claims to be realised out of the estate of the Bank of Hindustan will exced £350,000, and he added that if the amount involved were double that figure it would be perfectly safe of realisation to the last penny.

In addition to our notices relative to the changes in firms, we have to add that Messrs. Henry Enderby Eaton and William Meriton Eaton have been admitted partners in the firm of H. W. Eaton, silk broker. The business will be carried on in future under the name of Henry W. Eaton and Sons. Mr. Henry Rodwell will continue to sign by procuration.

The partnership of Messrs. Maitland, Ewing, and Co. has been dissolved by mutual consent, and a circular has been issued announcing that Mr. J. D. Crum Ewing will continue the business in his own name.

Mr. Woollett, sen., has retired from the firm of Messrs. Rangell, Woollett, and Co., India, China, and Australian commission merchants.

Mr. Mitchison has retired from the firm of Sanford and Mitchison, wine merchants.

In reference to the paragraph which appeared in our last as to the changes of firms, we are requested to state that the new firm under the title of Percival and Co., of 14, Mincing-lane, has no connection with the late firm of Mitchell and Aspinall, now under liquidation.

TEA.

The arrivals have been large, including no less than 25 vessels in January (and to this date), with cargoes aggregating 23,000,000 lbs. The cargoes afloat up to the mail's advices are now reduced to the following:—

				lbs.
Aug. 16	Illimani	Shanghai		494,722
„ 19	Conference	Japan		92,130
Sept. 5	Antipodes	Shanghai		691,350
„ 19	Ann Adamson	Do.		690,511
Oct. 5	Agamemnon	Do.		1,003,045

„ —	Weymouth	Foochow		166,700
			lbs.	24,052,612

The market has continued firm during the past week, at the rates quoted in our last, but the heavy arrivals have checked the upward tendency. The total export from China and Japan is 100,000,000 lbs. to the 31st Dec., against 102,000,000 lbs. in 1865, and 15,000,000 lbs. more may be expected to the end of the season, making a total of 115,000,000 lbs., against 115,000,000lbs. in the previous year. The struggle between the buyers and importers has been equally maintained, and considering the late increase to our stocks, the importers have maintained their position better than could be expected. The quantity to be offered at public sale this week consists of 10,000 packages. Should the export fall below 115 millions it will, of course, improve their position, but taking all points in their favour as compared with the determination of buyers, we cannot hope for an advance beyond 1d. or 2d., and these rates still leave a heavy loss on many invoices. The sooner the end of this disastrous season is reached the better for all parties, for we can hardly expect the rashness which has characterised the purchases in China in 1866 to be repeated in 1867. The native teamen in China must prepare for very different offers, and unless their Tea is brought down to the shipping ports in better condition they may expect a severe lesson. With the present stocks we can very well wait, and the best means of restoring a healthy condition is to reduce our enormous stock. If the next season's Tea is held back until the end of June it will arrive here quite as soon as wanted, and good Kaisow should be laid down at not over 1s. 8d.

SILK.

Market continues very quiet still; prices of good China keep firm, at a little under last quotations, but inferior sorts are easier; there is very little demand for them. Japan have declined 2s. to 3s. within the last week, and 4s. to 5s. on the highest rates current; but the mixture of quality and size has rendered the bulk of the Japans difficult of sale for some time past, and some holders have pressed sales. The deliveries of Silk are as follows, and in the case of Bengals are very good, but of other Silks only moderate:—Delivered, January, 1867—China, 2,810; Japan, 550 bales. January, 1866—China, 4,304; Japan, 1,016 bales. The stock of Silks this day is, comparatively, as follow:—1867. China, 17,479; Japan, 4,805 bales. 1866. China, 19,087; Japan, 2,768 bales. Messrs. Arles, Dufour, and Co., of Lyons, thus refer to the prospects of the silk trade:—We are entering the new year under unfavourable auspices; manufacturers having been unable to make sufficient supplies before the rise, have now to struggle with a consumption which is reluctant to pay for the silk goods an advance equal to the rise of the raw material. If the exceptional scarcity of thrown silk, the extreme slowness of production, and the favourable effects expected to result from the Great Exhibition, lead us to believe that high rates will be maintained up to the new crop, we must, on the other hand, look for a very limited and difficult trade. The strong increase in the export of silk goods in 1866 has been obtained only by heavy sacrifices on the part of manufacturers.

FREIGHTS AND CHARTERS.

Inquiries for tonnage for the Eastern ports still continue brisk, and previous quotations are well maintained; coal freights from the northern outports also remain steady.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £45. For Singapore: £34. For Shanghai: £53. For Saigon: £50. For Yokohama: £50. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong: £2 2s. For Singapore: £1 12s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

The Admiralty have invited tenders for the conveyance of 37 tons measurement, naval common stores; 98 tons measurement, naval boilers; wg. 59 tons, and three tons measurement, Victualling Stores, from the Thames to Hong Kong, for which purpose the Naomi has been ordered to be surveyed. Also about 5 officers (including a medical officer) 2 ladies, 3 children, 101 men, 10 women and 14 children, from Liverpool or Gravesend to Singapore, and of about 16 officers, 4 ladies, 8 children, 9 staff sergeants, 3 wives, 370 men, 27 women, 50 children and 5 horses from Capetown to Singapore.

CASUALTIES.

The Zaanstroem, Driest, from Batavia to Amsterdam, arrived at Falmouth Jan. 25, with rudder broken, loss of sail, and other damage.

The Sea Wave, from the Clyde for Batavia, which went ashore, Jan. 14, on Chapel Bar, near Padstow, arrived at Milford Haven, 7an. 27, in tow.

The Catherine Wilhelmina, Roca, from Batavia, which put into Scattery Roads Jan. 26, leaky, had thrown part of her cargo overboard.

Advices from Rotterdam, dated Jan. 29, state that the Monarchy, from Foo-chow-Foo, arrived at Brouwershaven, had run down an English schooner there, the crew of which were drowned.

The Bestevaer, Rosier, which arrived at Texel Jan. 27, from Batavia, had been on her beam ends in a hurricane on Jan. 6, in 43 N., 24 W., and sustained damage to bulwarks, rigging, &c.

The Noord Brabant, Loos, arrived at Texel Jan. 27, from Sourabaya, with rudder broken and part of cargo thrown overboard.

The Pauline Constance Eleonore, Ingen, which arrived at Texel Jan. 29, from Batavia, had lost top-gallant-mast, spars, sails, &c., and sustained other damage, having experienced a hurricane.

The Ymuiden (Dutch barque), Icke, and the Mary Goddard, Newhuys, both from Batavia, which arrived at Brouwershaven Jan. 27, had been in collision near that port, the former sustained damage and the latter lost an anchor.

The City of Delhi, Taylor, from Singapore to London, with a general cargo, went ashore near Dungeness on Jan. 28th and subsequently became a total wreck, crew and passengers saved. Before the vessel broke up a few packages were got out and landed, nearly all in good condition, but since more than two-thirds of her cargo have been washed out.

MISCELLANEOUS.

The unsold portion of the cargo of the Wilhelmina Johanna, Alberts, from Batavia to Rotterdam, which vessel was sold at Algoa Bay, previous to the 15th Dec., will be sent on by the E. Shun.

FIFTY-NINTH REPORT OF
THE LONDON JOINT-STOCK BANK.

At a GENERAL MEETING of the SHAREHOLDERS, held at the Banking-house of the Company, in Princes-street, Mansion-house, on THURSDAY, the 17th January, 1867, FREDK. JNO. JOURDAIN, Esq., Chairman, GEORGE GARDEN NICOL, Esq., Deputy-Chairman, the following REPORT was presented :—

The Directors have much pleasure in placing before the Shareholders the annexed statement of accounts of the Bank for the half-year ending the 31st ultimo, by which it will be seen that after providing for rebate of interest on bills discounted not yet due, and crediting the Guarantee Fund with the usual interest, the Bank has made a net profit of £183,055. 3s. 7d., including £26,571. 2s. 11d. brought forward from the 30th June.

Of this amount the Directors have appropriated the sum of £135,000 for the payment of the usual dividend at the rate of 12½ per centum per annum, with a bonus of 18s. 9d. per share, together £1. 17s. 6d. per share, equivalent to 25 per centum per annum, and have carried £8,055. 3s. 7d. to the Guarantee Fund, now amounting to £332,846. 10s. 9d., leaving a balance of £40,000, which the Directors have placed to special reserve, in view of accounts not yet closed, resulting from the recent severe crisis, and they trust the course they have adopted will be cordially approved by the Shareholders.

The following Directors retire by rotation, under the provisions of the Deed of Settlement, viz.:—Philip William Flower, Esq.; John George Maclean, Esq.; George Garden Nicol, Esq.; and George Tayler, Esq., who, being eligible, offer themselves for re-election.

The Meeting will be made an Extraordinary General Meeting for the election of a Director to fill the vacancy at the Board, created by the lamented death of John T. Oxley, Esq.

The dividend and bonus, free from income-tax, will be payable on and after Friday, the 25th instant.

The preceding Report having been read to the Meeting by the Secretary, a dividend for the half-year ending the 31st December, after the rate of £12½ per centum per annum, and a further division of 18s. 9d. per share, out of the net profits of the half-year ending as above, were declared by the Chairman.

Resolved unanimously,—"That the Report now read be received, adopted, and printed for the use of the Shareholders."

The following Directors, having retired by rotation, were unanimously re-elected, viz.:—Philip William Flower, Esq.; John Geo. Maclean, Esq.; George Garden Nicol, Esq.; George Tayler, Esq.

The Chairman then declared the meeting to be an Extraordinary General Meeting for the purpose of electing a Director in the room of the late Jno. Timothy Oxley, Esq., and stated that the only candidate was John Stewart Oxley, Esq.

The question having been put to the Meeting, John Stewart Oxley, Esq., was declared duly elected a Director of this Bank.

Resolved unanimously,—"That the best thanks of this Meeting be presented to the Chairman and Directors for their zealous and unremitting attention to the business of the Bank."

Resolved unanimously,—"That the thanks of this Meeting be given to Mr. Jno. Whitaker Nutter, the General Manager, the Managers, and the Staff generally, for their able services during the past half-year."

(Signed) FREDK. JNO. JOURDAIN, Chairman.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

HOLLOWAY'S PILLS.—This medicine has resisted every test which time, prejudice, and vested interest could impose upon it, and it at length stands forth triumphant as the most reliable remedy for those derangements of the system so common at the change of seasons. When the air grows cooler and the functions of the skin are retarded, an occasional dose of Holloway's Pills will call on the liver and kidneys for greater activity, and compensate the system for diminished cutaneous action. As alteratives, aperients, and tonics these Pills have no equals. To every aged and delicate person whose appetite is defective, digestion infirm, and tone of health low, this medicine will be a precious boon, conferring both ease and strength.

NOTICE.—The undersigned have this day established a BRANCH of BUSINESS in BATAVIA, in connection with their Penang Firm, under the style of LORRAIN and CO., and its management will be under the care of Mr. Wm. Lorrain Hill and Mr. James G. Wilson, the latter signing per procuration.

Ferguson, Mr. W. Newman, Mr. A. Andrews, Mr. E. C. Smith, Mr. T. K. Ashton, Mr. R. Parr (V.B.), Mr. Pemberton. To Shanghai Mr. J. B. Hallam, Mr. P. Maclean, Mr. B. A. Mouilleseaux. To Singapore: Mr. R. B. Read, Surgeon-Major J. Rose.

Summary of News from the Far East.

We have received our despatches from China, Japan, &c., in anticipation of the usual mail, expected to be delivered to-morrow.

CHINA.

SHANGHAI.

Dates are down to December 26, or two days later than received per French mail on the 4th inst.

Accounts have been received from Tientsin, *via* Chefoo, of a considerable fire, in which English imported goods were destroyed to the value of about £100,000.

A new publication, called the *Supreme Court and Consular Gazette*, is announced for the 5th January, to be published weekly at the *Recorder* office.

The following items are from the *Recorder*:—

Beyond items of merely local interest, we have only one matter of importance to notice since the publication of our last issue, namely that a notification has been issued by Sir Rutherford Alcock respecting the residence of British subjects of Chinese descent in the interior of the country. This, the notification justly points out, is contrary to the provisions of the Treaty of Tientsin; as according to that instrument no British subject can reside permanently in the interior. Though this is unquestionably a correct view as to the law of the question, it is generally regretted that these men are precluded from settling down in China, as their being able to do so forms one of the best means of assimilating the Chinese to European ideas, and breaking down many of those barriers which prejudice on either side has raised up against a more extended intercourse between Europeans and Chinese.

The Royal Asiatic Society held their usual monthly meeting on the 20th December, when the third portion of the Rev. S. R. Browne's translation of a Japanese manuscript, entitled the "Annals of the Western Ocean," was read to the meeting by the secretary; and Mr. Alabaster read his notes upon the salt trade in China. After the latter a discussion ensued, and some interesting remarks were made by the president respecting the magnitude of the salt trade conducted at Chinkiang, and by Mr. J. G. Dunn upon the probability of salt paying as an import from foreign countries, should the Chinese ever see fit to take off the prohibition which now exists against the article. Mr. Dunn stated that the question was gone into some years ago, but in consequence of the damage which a cargo of salt did to a vessel by damping it, the rate of freight requisite was too high to admit of ships being laden in England with salt for China. Such a course, in fact, would unfit them for taking any other cargo than coal. It was observed by Mr. Alabaster that at a place called Foochow, in the Corea, salt could be obtained, that would lay down at the mouth of the Yangtsze at 4 cash per catty, which would sell, with payment of Government taxes, at 18 cash. An interesting extract from an old history of China was read to the meeting by Mr. Kingsmill. It was from a work written at the time the Manchus were overrunning China, and gave an interesting illustration of the manner in which the Chinese in those days called in the aid of the Portuguese, in precisely the same manner as within the last three years they have had recourse to the aid of other Europeans.

A meeting of the Society for the Relief of Destitute Foreigners was held on the 21st, when it was unanimously resolved by the three or four members who attended to wind it up. The finances were found to be in not the most satisfactory condition, a large sum being due to the hospital for sick men who had been sent there. The subject of providing some permanent and organised means of relieving destitution in the settlement is attracting attention, and it is under contemplation if possible to establish a species of alms house in connection with the Municipal Council.

Information has been received from a native source that the Mahomedan rebels are giving great trouble to the Imperial forces, and that they have succeeded in capturing four important cities in the Kiangsi province, and from Hankow news has been received by steamer *Fire Queen* to the effect that the Nienfei rebels are approaching the city. At the date of the departure of the steamer, namely, the 20th inst., the rebels were stated to be about three hundred li away; but the country people were flocking into the foreign settlement, and were in apprehension of their rapid approach.

The police have by energetic measures succeeded in capturing a man named Wilson, who is charged with having shot at and killed his companion Macgrath, while up the country in a boat. He was brought up before Sir Edmund Hornby at the Supreme Court on the 24th inst., and committed for trial.

The *Hankow Times* of December 15 reports—"On Saturday last, at about 7 P.M., a clerk of the Custom House Bank was returning with some money he had been collecting, and when two doors off the bank three men run upon him out of a lane, knocked down the clerk, attacked the coolie carrying the money, wounded him in two places with some large knives they carried, and escaped with the bag of money, containing about taels 160. The robbers were recognised as Cantonese by their clothing, but up to the present time no trace has been obtained of the actual robbers. Orders prohibiting the carrying of sycee in the streets after dusk are said to have been issued by the authorities, in consequence of the number of braves and other bad characters at present in Hankow."

In consequence of the general adoption in Shanghai of the local Chamber of Commerce Circular in lieu of outside market reports, the proprietors of the *Commercial Record* have determined to discontinue its publication. The issue on Dec. 25 was therefore the last.

We notice with pleasure that in spite of the gloom which for many months has prevailed in the commercial circles at Shanghai, the model settlement is keeping up its character for enterprise. Our advices report the launch of a steamer built for the Japanese Government and constructed by Messrs. Farnham and Co. of Hongque. She is no mere pleasure-boat, but is intended for rough service as a gun vessel. Her dimensions are length 102 feet, breadth 20 feet, depth 9 feet 6 inches. She is built throughout of oak, teak, and hacmatac, and bears a free comparison with vessels of her size constructed in English dockyards. So decided a sign of vitality is not to be despised at a time when all are expecting bad news from the eastern settlements.

FOOCHOW.

A correspondent writing from Foochow under date of the 10th gives the following information respecting the dock which is being established under Messieurs Giquel and D'Aiguebelle. The establishment is to consist of a dock and a foundry, where steamers are to be made, and also a yard for the construction of the hulls. There is to be a school for shipbuilding and a naval school, each to have thirty students, who will have to commence learning a foreign language. Those in the former will be instructed in French, while the latter will learn English, and will be under the management of Englishmen and Americans. I do not, therefore, see any room for the susceptibilities which have been evinced by some people, as there will not be any exclusiveness in the conduct of the matter. The Chinese authorities have been promised that in six years the students in shipbuilding shall be able to build a steamer, for which a plan is given to them, and to be able themselves to make plans for four more years. Four years is also the time stated to the Chinese authorities as requisite for the students in the naval school to become competent to navigate out at sea; and in six years they are expected to be able to take a vessel from port to port, and to require only one or two more years to complete their education. I do not think either of these anticipations unreasonable, as the regulations of the schools will be very strict. Except upon holidays, the students will not be allowed to absent themselves upon any pretext whatever. The steamers which are to be built are transports of 600 tons burden, carrying four or six guns, with engines of 150-horse power, and gunboats of 80-horse power. These, I understand from good authority, will be the species of vessel now most required by the Chinese. Everything seems to favour the undertaking. It has been warmly approved of in an Imperial edict, and a fund of Tls. 40,000 per month is to be set aside for its completion. As the Viceroy, who proposed the scheme, is to start for the Kansuh province, the ex footai of the Kiangse, by name Shu, a native of Fokien, has been specially appointed to look after the arrangements. Mr. Giquel will leave for Europe by the next French mail.

In spite of the presence of the Honan braves on the race-course, a chosen band of trainers are, says the *Advertiser*, sticking vigorously to the ground. The course, however, is spoiled for the time, and no races can come off till the departure of the troops. It may be well to remove a misapprehension that the occupation of the ground is due to any intentional thwarting of our programme for the races in December. These 5,000 soldiers are from Honan, and the Chinese authorities are obliged to locate them in their present quarters in order to prevent quarrels with the Tartar troops. They are as good specimens of Chinese soldiers as we have seen, and although they occasionally commit petty depredations on the Foochow shopkeepers, are generally civil and well behaved. They are worth a visit, but intending visitors should be warned by former experience in Hankow that they have a special antipathy to "bell toppers" and beards.

HONG KONG.

Dates are down to the 1st January. The latest mail from London, the 10th Nov., arrived on 27th Dec. with telegrams to the 25th Nov. from London. The *Daily Press* says:—The impossibility of dealing freely in a public newspaper with the commercial rumours at present agitating the minds of men in this colony again arises. By the last mail formal intelligence was received of what was already well known, the dishonour of certain bills drawn by Messrs. Dent and Co., on Dent, Palmer and Co., of London. The London papers, which in dealing with this matter put the worst interpretation on what has taken place, appear to be writing altogether in the dark. All that can here be said is that there is probably something behind what is visible at the first glance in connection with this matter. That bills of an amount in comparison so trivial as those here in question should be the subject of a serious breach between firms like Dent and Co. and Dent, Palmer, and Co. is not readily believed in China. As for matters disconnected with this affair, it is only possible to deal with them generally by saying that confidence is severely shaken, and that the worst of the crisis may yet be to come.

Whether or not the Stamp Act is destined to come into operation, the year 1867 will be one of great financial embarrassment for the Government of Hong Kong. The colony enters the year in debt. It is already reported about the town that the Governor has on his own responsibility borrowed a lakh of dollars from one of the banks.

The first mercantile changes at the end of the year announced are the following:—

The interest and responsibility of Mr. William Hargreaves and of Mr. Justus William Henry Escherich in our firms at Hong Kong and in China cease this day.—SMITH, KENNEDY, AND CO. Hong Kong, China, December 31, 1866.

Mr. Locan Russel is authorised to sign our firm per procuration from this date.—SMITH, KENNEDY, AND CO. Hong Kong, December 31, 1866.

The following items are from the *China Mail*:—

Locally the week has been a quiet one, nothing of a startling nature having occurred to break the monotony of colonial life. The Harbour and Coasts Ordinance and the Registration Ordinance become law this day. A proclamation has been issued by the Governor to the effect that the capital of the Hong Kong and Shanghai Bank, subscribed for by deed, is five million dollars, and that more than one-half of such capital has been paid up. A resolution has been passed at a meeting of the Executive Council on the 12th, that till further notice the seignorage charge for minting at the Hong Kong Royal Mint be reduced from 2 to 1 per cent.

We observe that the Hong Kong Hotel Company have at length commenced operations in good earnest, and the house formerly occupied by Messrs. Dent and Co. will shortly be completed for the reception of guests. As a general boon to the colony the public will be glad to learn of the vitality of

Digitized by Google

the company, and further that its prospects are highly encouraging to those interested in it. It is expected that accommodation for about thirty people will be available in about a month or six weeks, and the many single men now seeking for an establishment combining the advantages of an hotel and private boarding house will then have an opportunity of forming an opinion of the organisation of the new hotel.

The examination of the scholars at St. Saviour's School came off with great eclat the week before last, his Excellency the Governor distributing the prizes.

The Rev. C. F. Warren is appointed to officiate as Acting-Colonial Chaplain, *vice* the Rev. J. Wilson, from the 5th, until further notice.

J. C. Whyte, Esq., at present one of the police magistrates in this colony, which post we are informed he is shortly about to resign, was admitted, on introduction by the Attorney-General, a member of the Hong Kong bar by the Chief Justice. Mr. Whyte, we believe, is a member of the Queen's College, Dublin.

With reference to the prosecution for libel against the Editor of the *Evening Mail*, the Attorney-General, at the termination of the criminal business before the Court, addressed the Judge, and stated that as the above was a case of some public interest he was desirous, without expressing his opinion either upon the legal points involved or upon the merits, to which he had given very great consideration, to mention that having regard to the nature of the case, and to the circumstance that upon an ordinary information the defendant's mouth is sealed, and he is unable by the rules of criminal procedure personally to give evidence in his defence, he had come to the conclusion that the ends of justice, as well as the interests of the public, so far as they may be involved in the case, would be better served by leaving the complainant to seek his remedy by a less oppressive mode of proceeding than by a criminal information, by civil action for damages either in the Court of Summary Jurisdiction or in the Supreme Court, where both parties are equally entitled to step into the witness box. His Honour the Chief Justice also thought that as a general rule a criminal information was hard upon a defendant, more especially when he was the editor of a paper, and the person affected a private individual, and unless the libel complained of was grossly outrageous, or did not affect the public welfare. His Honour thought the procedure objected to by the Attorney-General was oppressive, and expressed his opinion that the honourable and learned prosecutor for the Crown had exercised a very wise discretion indeed in the matter.

It will occasion some surprise and much regret among the public of China and the East, to learn that the connection with Hong Kong of the Rev. Dr. Legge, the well-known Sinalogue, and whose name has become a household word in the colony, will shortly terminate. A short time ago a circular was issued stating that the rev. gentleman was desirous of being relieved of the charge of the Union Church, owing to the pressure of other duties, and in view of his departure for Europe at no distant day. Under these circumstances it became necessary to make provision for a successor, and a meeting of the congregation was held, at which certain arrangements were entered into, and the committee of management felt authorised to communicate definitely and satisfactorily with the London Missionary Society. It appears that the society have anticipated the action of the Committee. On Sunday week Dr. Legge intimated from the pulpit that before the resolution of the congregation could have reached home, the society had despatched the Rev. D. B. Morris, who might be expected in the course of a month, to take entire charge of the church. Dr. Legge remarked that it would afford him infinite pleasure if in a few weeks he ended his long direct pastoral connection with the church in the knowledge that satisfactory financial arrangements for his successor were complete. There was still a deficiency in the amount to guarantee. A few gentlemen had offered to accept the responsibility, but he felt that the privilege of supporting their minister should be shared by the congregation, and he hoped it would be recognised.

Her Majesty's gunboat *Banterer* proceeded to Aberdeen and back on a trial trip. She left her moorings at ten minutes before two P.M. and arrived at Aberdeen at three o'clock. Here the inspector of machinery, Mr. Oliver, came on board, and returned in the *Banterer* to Hong Kong; he expressed himself much pleased at the speed which she averaged, namely seven knots. The *Banterer* accomplished the return journey in exactly fifty minutes. She has lately undergone a thorough overhaul and repair, and is now reported fit for active service.

A sad affair occurred on Saturday morning, the 29th inst., near the Bogue, where a heavily armed junk was overhauled by the Canton Customs' steamer *Haiching*, in consequence of information that she had smuggled opium on board. On a boat proceeding towards the junk from the steamer no resistance was threatened until the boat was alongside, when a volley of musketry was poured into it, injuring most seriously the European about to board the junk, as also the Chinese in the boat. The wounded man, Mr. Brown, was carried back to Canton, where he now lies under medical care. The *Haiching* is said to have received several shots from the junk also.

The expedition fitted out by the Governor of Kwang-tung to operate against the piratical stronghold of Chu-choong, on the West Coast, left Canton on the 30th Dec., with a very powerful display of banners and gaily attired troops. The *Sir Jamsetjee Jeejeebhoy* has been chartered to convey troops and stores, as has also the *Cumfa*. About sixty heavily armed junks and rowing gunboats without number constitute the main body of the expedition.

We observe that in the last number of our Chinese contemporary, published at Canton, under the superintendence of Dr. Kerr, there is a drawing of the Atlantic Cable, in length and sections, together with various particulars respecting it. We should like to see a larger sheet issued, giving information to the Chinese on similar subjects of interest, but are aware that the difficulties which beset the path of any who conduct a Chinese newspaper render it almost impossible to carry out the idea as fully as could be wished.

The *Missionary Recorder* is the name of a new paper, the first number of which is dated January, 1867, and the publication of which is to be continued monthly. As its name implies, it is intended to be chiefly a record of missionary work The matter in the first number —4 pp. royal folio—is very interesting, and the typography is excellent. We wish our new contemporary success in the highly useful field of labour upon which it has entered.

The following has been sent us from Macao, being an extract from an article in the *Echo do Povo*:—"It appears that we are going to have electric telegraph in Macao as well as our neighbours of Hong Kong, and it seems also that it is intended to lay an electric cable between Hong Kong and Manila. The well known Dr. McGowan, the American Telegraphic Commissioner, has had, not long since, a conference with our Governor and also with Dom Sinibaldo de Mas, the Spanish Plenipotentiary, and with the Consul-General for Spain, Dom Aguilar, about his telegraphic schemes. Dr. McGowan proposes to join the ports of Hong Kong and Macao directly by means of a submarine cable, or indirectly and via Canton by means of poles and wires. The submarine cable offers more guarantees of durability and has less danger of interruption, but the indirect line gives the advantage of placing Macao in instantaneous communication with the city of Canton and the neigbouring towns. If poles and wires can be relied on, it would certainly be preferable to the indirect line, as it is less expensive and more useful in its results. His Excellency the Governor Ponte e Horta informed Dr. MacGowan that he will ask our Government to assist the enterprise, and it is to be hoped that the Home Government will render all the necessary assistance to carry out the undertaking. We hear also that Dr. MacGowan has already entered into communication with the Governor-General of the Phillippine Islands to lay a cable between Hong Kong and the northern point of the Island of Luzon. The Manila Government encouraged Dr. MacGowan to lay his proposal before the Spanish Government of Madrid. It is now unquestionable that Dr. MacGowan is determined to bring forward his schemes, and it is to be hoped that the Yankee tenacity will attain the desired object."

The *Daily Press* has the following remarks on the conduct of the soldiers at the late fire at Yokohama:—

"All who have read the accounts in the Japanese papers of the behaviour of the soldiers at the great Yokohama fire must be pained at the absence of any indications of an intention on the part of the military chiefs to institute a searching investigation into the truth of the charges which have been made. Col. Knox has written to the *Japan Times* giving a vague denial of the statements that had been made, and representing that the men had been perfectly well in hand and altogether innocent of the offences imputed to them. Forthwith the gentleman who wrote the long and interesting account of fire in the paper we have named, wrote a letter signed with his own name, describing minutely the acts of which he spoke in the first accounts and

Digitized by Google

mentioning the places where they occurred, and witnesses who can give evidence about them. These acts would be crimes if committed by street vagabonds; the excitement of the fire would be no excuse if the men charged with them were of the roughest sort, but committed by British soldiers they are utterly horrible, and scarcely any punishment would be too severe for men who really acted in the way described. The honour of the regiments at Yokohama generally as much as the interest of civilians, renders a strict investigation into this matter an imperative duty on the part of the military authorities. Surely they, more than anyone else, must wish to root out from the Queen's army men so lost to all soldierly, to all manly feelings as to take advantage of the confusion incidental to a public calamity to inflict outrages on the person and property of those interests they were bound by military duty and every generous feeling which can animate honest men to protect even at the risk of their lives. If these things have been done those who would be most deeply wronged if they are passed over in silence would be the men of the 9th themselves, forced to remain in association with the guilty ruffians."

THE HAVANA COOLIE TRADE.

The *China Mail* has the following figures, which answer conclusively the questions as to why the trade is kept up :—

PROFITABLE INVESTMENT.

Now that so much is said about the profits of those employed in shipping and transporting Chinese emigrants from this coast to other parts of the world, it may be interesting to compare the profits derivable from *bona fide* African slave dealing with those arising from a participation in the philanthropic efforts of the present day to introduce free Chinese labourers into the American Continent. We therefore copy below a document for the *bona fides* of which we can vouch :—

Account of Adventure Schooner *La Fortuna*, from Rio Pongo to Havana with 217 Bozales (1856).

Expenses to Havana.—Cost of *La Fortuna*, 90 tons	$3,700 *		
Sails, carpenters' and coopers' bill	2,500 *		6,200
Provisions for crew and slaves	1,115		
Wages advanced to 18 men before the mast ...	900 *		
Wages advanced to captain 2 pilots, maestro, cook and steward	440 *		
200m Manila cigars and 500 doubloons ($8,000) cargo	10,900 *		
Clearance and hush money	200		
Commission at 5 per cent.	987		20,742
Expenses to Home.—Captain's head money, $8 per head	1,736		
Mate's head money, $4 per head	873		
2nd do. and boatswain's head money, each $2 per head	873		
Captain's wages, at $219.78; 1st mate's $175.56	395 34	*	
2nd mate, boatswain, cook, and steward's wages	581 12	*	
Sailors' wages *...	1,972 ——		27,172 46
Expenses at Havana.—Government, $8 per head	1,736		
Don Joseph, commander, on 217 Bozales ...	5,565		
Consignees	3,873		
217 dresses at $2 each	634		
Extra expenses of kinds, say, ...	1,000 ——		39,980 46
RETURNS.			
Vessel sold at auction for a Madeira Packet ...	—		3,950
Proceeds 217 Bozales	—		77,469
			81,419
Total Returns	81,419		
„ Expenses	29,980		
Net Profit, Spanish	—		$41,438 54

The average cost of Chinese coolies from the date of their engagement to their arrival at their destination is, as we showed in our last overland edition, $165 per head, which includes "Consular fees," "clothing," &c.; 217 coolies would therefore cost $35,805 from China to Havana, against $18,601 54c. for the same number of Africans from the Coast to Havana (we except the items marked* in both cases). The *gross* profits of the slaving voyage are thus raised to $60,040 08c., out of which the working expenses of the vessel have to be paid; the purchase of the vessel does not affect the question, as in the example above given she was sold for more than her cost. The average profit of an emigration voyage from China to Havana is about $110 for men and $130 for women. A cargo of emigrants consisting of 200 men and 17 females would therefore yield $24,210, which compares but poorly with the $60,040 profit on slave cargo. But it must be recollected thet the philanthropic Chinamen, who in the first place induce the coolies to emigrate for their own and their country's good, receive about $45 per head in recognition of the active benevolence they have displayed; or for 217 coolies say $9,765. Slave dealers are exempt from these charges, which, if remitted, would increase the profit of a coolie emigrant ship to $33,975. The distance between China and the West Coast of Africa is, however, much more than half that from the first-named country to the Havana. So that, taken proportionally, the coolie emigrant ship may be said to yield a larger return to its charterers than a slave ship. What an encouragement to philanthropy in China! To know that you are benefiting 217 of your fellow creatures is in itself a glorious reward, but self satisfaction plus twenty-five thousand dollars, as a tangible evidence of the good you have done, must be irresistible. No wonder coolie "emigration" is flourishing at Macao!

MALACCA STRAITS.

SINGAPORE.

We have been favoured with a copy of the Budget of the Public Works Department for 1867-68, wherein is set forth at length the proposed expenditure for that period, amounting in all to Rs. 375,000. Owing, however, to the pending transfer from the Government of India to the Colonial-office no assignment of the funds has been made by the Supreme Government, and the budget under notice has therefore been framed upon an estimated expenditure, being the average of the outgoings for the past four or five years. The appropriations are as follows :—

	Original Work.	Repairs.	Total.
Military	... 59,260	... 15,740	... 75,000
Civil Buildings	... 1,02,078	... 20,710	... 1,22,788
Agricultural	... 21,624	... 3,530	... 25,154
Communications	... 56,114	... 16,000	... 72,114
Miscellaneous / Public Improvements	... 1,760	... 3,320	... 5,080
	... 2,40,836	... 59,300	... 3,00,136
Tools and Plant			... 6,300
Establishment			... 68,564
Total Rupees			3,75,000
Total			£37,500

Among the items on which it is proposed to spend the above sum, we notice a Government-house for Singapore, which has long been a want much felt by the settlement. The official report on the subject remarks :—

"The need of a Government-house has long been admitted by the Government of India, and some years back a sum was sanctioned for a suitable residence for the chief civil authority of these settlements, but the site which had been selected was eventually required for military purposes, and the work was consequently discontinued. Although the subject has been since frequently urged for the Government of India, the requisite sanction has been delayed, pending orders on the transfer of the Straits to the charge of the Colonial-office. The present residence of the Governor is a hired building, which is by no means suitable as regards accommodation, whilst the monthly rental is very high, and forms a heavy tax on the local revenues. As a matter of economy, therefore, it is strongly recommended that the proposed expenditure be authorised.'

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CAIRNS—On the 9th Dec., at Mosque-terrace, Hong Kong, the wife of Capt. R. H Cairns, of a daughter.

DENNYS—On the 15th Dec., the wife of N. B. Dennys, Esq., editor *China Mail*, of a son, which survived only a few minutes.

HOGG—On the 17th Dec., at Hong Kong, the wife of A. G. Hogg, Esq., of a daughter.

LAPRAIK—On the 23rd Dec., at Michael-grove, Hong Kong, the wife of John S. Lapraik, of a son.

NISSEN—On the 30th Dec., at Hong Kong, Mrs. Woldemar Nissen, of a daughter.

MARRIAGES.

PARKES—WILSON.—On the 22nd Dec., at Union Church, Hong Kong, by the Rev. Dr. Legge, the Rev. Henry Parkes, of the Wesleyan Mission, Canton, to Miss Anne Wilson, of Staffordshire.

PERRY—FIRTH.—On the 27th Dec., at St. John's Cathedral, by the Rev. C. F. Warren, Capt. Charles S. Perry, of the 2nd Battalion of H.M.'s 9th Regiment, son of the late Rev. George Perry, formerly vicar of Shudy Camps, Linton, Cambridgeshire, to Maria Marian, second daughter of the late Samuel Firth, Esq., of Sutton-at-Home, Kent.

SOLBE—SMITH.—On the 16th Dec., at St. John's Cathedral, Hong Kong, by the Rev. C. F. Warren, M.A., Edward Solbe, H.M.'s Consular Service, Amoy, to Katherine Sophia, youngest daughter of the late Rev. J. Smith, Dean of Long Buckby, Northamptonshire, and Prebendary of Lichfield. No cards.

DEATH.

BAKER—On the 2nd Feb., after a long illness, Thomas Baker, late of Shanghai, eldest son of Thomas Eld Baker, Esq., of 76, Porchester-terrace, Hyde-park, aged 45.

NEALE—On the 11th Dec. last, at the British Legation House at Quito, the capital of Ecuador, deeply deplored by his family and friends, Lieut.-Colonel Edward St. John Neale, C.B., H.M.'s Charge d'Affaires and Consul-General for the Republic of Ecuador.

SMITH—On the 22nd Dec., at Shanghai, from the results of sunstroke, William Smith, of Elgin, N.B., Inspector of Roads for the Municipal Council, aged 30 years

WOODFALL—On the 7th Feb., at Maidstone, Colonel Woodfall, formerly of the 47th Madras Native Infantry, son of the late George Woodfall, Esq., of Great Dean's-yard, Westminster, aged 62.

At Shanghai, bills on India, Rs. 302 to — per 100 taels. At Hong Kong, Rs. 219 to 220 per $100. Bar Silver at Shanghai, tls. 111·20; at Hong Kong, 10¾ per cent. prem. Mexican dollars at Shanghai, tls. 74·5 per 100; and exchange on Hong Kong, 28 discount. Hong Kong and Shanghai Bank shares, old, 7; new, 6 per cent. dis.; Gas Company, 2 pm; Hong Kong and Whampoa Dock, 10 to 20 per cent. prem.; Steam Shares, 10 per cent. dis.; Union Dock Company, 25 per cent. dis.; China Traders' Insurance, par.

The folllowing is from Sharp and Co.'s Circular:—

Gold.—The demand for India has been very steady throughout the fortnight. The receipts represent only 220,000 dols., while the amount sent away is 690,000 dols. worth, inclusive of the Ellora's shipments on the 15th Dec., and excluding those to leave per Benares.

Silver.—Is still the favourite remittance to Calcutta, wither the greater portion of the present shipments have been directed. $210,000 have come in from the coast and $840,000 have been exported.

Dollar Currency.—Amounts inward, $330,000; outward, $1,150,000, rather more than one-third of which has gone northwards, and the remainder as remittances against drug and cotton.

SHARES.—The complications of the period have had a depressing influence, and bank shares have been forced upon the market, rendering the quotations wide and uncertain, although it is believed that there is no real cause for the depreciation.

BANKS.—The branch here of the Bank of Hindustan, China, and Japan (Limited), suspended payment on the 28th instant, in accordance with instructions received from London. The local liabilities are merely nominal. The Hong Kong and Shanghai Banking Company (Limited) having obtained its charter on the 21st instant, has now assumed the style or name of the Hong Kong and Shanghai Banking Corporation.

EXCHANGE.—The events of the fortnight have not tended to restore confidence; and the transactions in exchange have been very limited. The business in rupees has also been very small, partly owing to the late arrival of the mail.

DISCOUNT AND MORTGAGE.—Money is scarce, and the Chinese are borrowing at extreme rates for the purpose of rebuilding the houses destroyed in the late fire; these it is expected will be completed very shortly.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

TEA.—CANTON.—Country Congous, further arrivals, but no offers or settlements; nor in country Greens. The settlements of Scented Orange Pekoes and Scented Capers have been 7,000 boxes, at 15 to 28 taels.

AMOY.—Since the last report the market has been very quiet, and settlements reported are only 1,827 packages Oolong, principally Common Cargo Teas, on which there appears a decline of quite $1 to $1.50. Only trifling supplies are reported during the remainder of the season, and the stock on offer comprises about 3,000 half-chests Oolong; 5,000 half-chests Common Mixed Ankoi, and 2,000 half-chests Common Ankoi kinds, besides about 1,000 packages Tea packed for Singapore. Congous.—The market may be considered closed for the season.

FOOCHOW.—Congou: Business for the fortnight has been on so limited a scale that no change in prices can be noticed, though the few purchases made have been on rather easier terms. Further arrivals are not expected to exceed 15,000 to 20,000 chests; they are at present retarded by the very low state of the river. Oolong: Large settlements have been made for New York at about former prices. The settlements reported amount to 3,324 chests and 843 half-chests at tls. 6.5 to 29.5, say 309 chests and 292 half-chests at tls. 6.5 to 11 for dust and broken leaf, 1,003 chests and 381 half-chests at tls. 12 to 14.5 for common to good common, and 2.012 chests and 170 half-chests at tls. 15.5 to 19.5 for flavory to good flavory. Souchong: Fair to good, 805 chests at tls. 18 to 28. Pekoe: Fair to good mixed leaf, 220 chests at tls. 22 to 26. Oolong: Common to fair cargo, 21,003 half-chests at tls. 17.7.5 to 22. Good cargo, 2,000 half-chests at tls. 23 to 26.

SHANGHAI.—Black Teas: A moderate business only has been done.

Digitized by Google

the early part of the fortnight the anxiety of native holders to realise enabled buyers to obtain a further concession in price, amounting to fully one tael on the previous rates. Latterly, however, this has been lost, and the market closes firm at quotations. Foreign holders have mostly transshipped their teas on arrival, and the stock is now reduced to 15,000 chests of all descriptions. Settlements for the fortnight have been as follows:—12,000 chests common to fair Hohow and Oonam, at 14½ to 19 taels per picul; common to good Ningchow and Oopack, at 20 to 23¼ tls. per picul; one chop fine (first crop) Ningchow, at 29 tls. per picul. Green Teas: The demand for these has been more general, and an unusually large business has been done. Fine and finest teas have fully maintained their previous value, but a further decline of nearly two taels has been established on the common and medium kinds, of which the bulk of the stock now consists. It is expected that future arrivals this season, including the present stocks at Kiukiang and Ningpo, will not exceed 50,000 packages. Supplies have come in freely during the fortnight, and the stock left is still estimated at about 40,000 packages. Settlement has been as follows: Common Fychow at 26 to 28 taels; medium Fychow and Moyune at 33 to 36 taels; fine to finest Moyune and Teenkai at 39 to 46 taels.

HANKOW.—One chop fair Oonam had been settled at 16.5.0 taels, and 4,000 packages common. Oonam purchased on Russian account or bartered against goods at 13.7.5 taels, or about previous rates. The Oopack kinds are still held above the ideas of buyers. 330 chests had been shipped on native account.

KIUKIANG.—Black Teas, no business had been done in the market, but 2,000 packages had gone forward on native account. The stock was reduced to 1,600 chests, and little or nothing was expected from the interior. Green Teas, only 2,000 half-chests had been sold; medium Moyunes at 31 to 35½ taels, rates which though showing a decline of one tael were still above the Shanghai parity. The natives had preferred shipping their fine Teas to Shanghai, 10,000 packages having gone forward during the fortnight. The stock was reduced to 13,000 half-chests, and about 10,000 more were expected to complete the season's supply.

YOKOHAMA.—The Tea market remains quiet, and the small business that has been done has been confined to two or three buyers, who have been operating about equally for New York and San Francisco. The advices received by the French mail, however, are not calculated to encourage buyers, as the New York market is reported dull and lower, with a heavy stock, which is hard to move except in retail quantities. In this market fine Tea cannot be quoted lower, but for the lower grades a decline of $1 to $2 per picul has been submitted to. Settlements are estimated at 2,650 piculs. Quotations and stocks stand as follows:—Good Common, $18 to $25 to 700 piculs; Medium, $30 to $32 to 4,000 piculs; Good Medium, $33 to $34 to 3,000 piculs; Fine to Finest, $34 to $45 to 2,800 piculs.

RAW SILK.—CANTON.—Operations for the European market appear to have subsided, the settlements reported being for either the American or Indian markets. Quotations remain as last advised, and the same remark applies to stocks. Limited arrivals continue to occur, but the season may now be considered virtually closed as far as the country is concerned.

SHANGHAI.—The enhanced prices shown by the table of quotations at foot do not strictly indicate the extent to which rates have advanced, seeing that the deterioration in the quality and size of the bulk of the silk going forward by this mail has not been sufficiently considered by purchasers. Barter and other unquotable transactions have nearly cleared the market of the doubtful portion of the stocks, and the China silk season may be said to have nearly closed, as it did at the same period last year, after which the shipments were very insignificant. The dealers appear to think that no more than 3,000 bales, at most, will be brought down from the country during the remainder of the season, and that the Chinese New Year (5th February) will terminate the supplies. The quotations are:—Tsatlees, Chops No. 1, tls. 620 to 635 per picul; 2, tls. 600 to 615; 3, tls. 580 to 595; Market 3, tls. 540 to 560; 4, tls. 510 to 535; 5 and com., tls. 470 to 500. Taysaams, Chops No. 1, tls. 515 to 535; 2, tls. 495 to 505; 3, tls. 456 to 475.

YOKOHAMA.—A steady demand and extreme prices having hitherto failed to draw to this market a fair supply of the finer sorts in the several descriptions of silk, it may probably be inferred that they will continue scarce till the end of the season. However, although unusually large quantities were rejected after inspection, the settlements of the fortnight amount to 800 piculs. They consist of about 650 piculs of Hank silk and Oshio of the medium and inferior grades and 150 piculs of Coshio Ida, Echizen and Sodai. Prices have been very firm throughout the fortnight; but the news brought here on the 13th inst. by the French mail of the 19th October having checked business to some extent, and the unsold stock being now large, say about 750 to 800 piculs, it may be expected that holders will submit to some reduction. Mybash and Sincuh, best, $910 to $960 per pcl.; ditto, medium, $850 to $900 per pcl.; ditto, inferior, $740 to $820 per pcl.; Ida, best, none; ditto, medium, none; ditto, inferior, $750 to $790.

DRUGS AND OTHER EXPORTS.—CANTON.—Cassia Lignea remains nominally at $19-50, there are no stocks at present, and supplies from the interior during the next month cannot but be small. Cassia Buds $43, stocks 100 piculs, no change. China Galls are rather lower, 100 piculs have been quitted, and the remaining 60 piculs may be had at $13-50. Galangal is without any alteration, and worth only $1 80, with a stock of 300 piculs. China root, 3-50 to $3-75; Vermillion, $39 per box of 50 catties; Rhubarb, no transactions, and only poor qualities on offer. Essential Oils are here.

CAMPHOR.—HONG KONG.—A further quantity of over 2,000 piculs arrived from Formosa, and the holders asking $30 per picul; no transaction took place in the early part of the fortnight. Since, however, the holders have accepted lower prices, and 350 piculs have been sold at $28.75 per picul, and 150 piculs at $28.53 per picul unpacked, at which the remainder is held. Stock about 2,300 piculs.

CHINA GRASS.—SHANGHAI.—Transactions trifling, and confined to Chinese. Stock remains very small, and best quality almost entirely wanting. Prices are nominally the same as last quoted. No. 1 White, tls. 15, none; No. 2 White, tls. 13.0.0 to 14.0.0; No, 3 inferior, tls. 11.0.0 to 12.0.0; Green and common, tls. 9.5.0 to 10.0.0, From Hankow no hange is reported in the position of the article.

COTTON.—AMOY.—Consumption does not appear to be going on at all satisfactorily. Sales reported are only 80 bales pressed *Tientsin* at $22½ and 112 bales Shanghai at $24½. Stock, 3,721 bales, of which 3,000 bales are in the hands of Chinese. We quote New Shanghai Staple $23½ to 25. Old, $22 to 23; New Ningpo Staple, $26 to 27; Old, $25½ to $26; Tientsin $21½ to 22½; Chefoo, $22½ to 24½; Bengal, $19 to 21.

SHANGHAI.—The demand for Japan having fallen off, medium qualities have declined in value about 40 candareens per picul; best staple, however, being small in stock, and continuing in demand for Hankow, has advanced in value, and cannot be purchased under taels 16.5.0 to 17.0.0 per picul.

HANKOW.—Supplies have again been considerable. Sales by native importers have been large, and there is still a fair demand. Best Shanghai, clean and dry, can be disposed of at taels 18.50 to 19. Tung-chow, being in small stock, is inquired for at taels 20 to 20.50 for best staple. For Tientsin there is no demand.

CHINA AND JAPAN—IMPORTS.

HONG KONG.

Considering the advanced stage of the season, and the interruption during the past fortnight occasioned by the Christmas holidays, business in manufactures, though very far from being active, or even satisfactory, still shows a respectable total. Prices have been governed entirely by the law of supply and demand, and there has been apparent the same cautious policy and disinclination to purchase beyond the exigencies of the moment, that has been so conspicuous a feature in the markets for some time back. Among the natives this is perhaps due, more especially at the present time, from a reluctance on their part in view of the near approach of their new year, to make any new contracts beyond immediate necessities, while among the other members of the mercantile community there is prevalent a general feeling more or less of distrust and want of confidence that much retards the easy movement of business, and causes every one to look upon his neighbour with more or less suspicion. It is to be hoped that this latter will soon be dispelled, but in view of the former no very great amount of business can be looked for until after the middle of February, when the Chinese will have made their yearly settlements among themselves, and be in a position to begin business upon a new basis as it were. The large destruction of goods by the fire at Yokohama has had rather a stimulating effect upon the market for manufactures, and in all some 30,000 pieces 8.4 Grey Shirtings have been sent thither, including 19,000 pieces noticed in the last report. The steamer Indore has been chartered and has sailed for that port. The Chusan from London August 1st and the Sea Belle are the only arrivals during the fortnight with manufactured imports. The larger part of their cargoes consists of Plain Cottons, Dyed Cotton, and Prints, and Cotton Yarn, much of the last article having already been sold "to arrive." Grey Shirtings are without any material change in price; some small lots of 8.4 have sold as high as $3.65 among the Chinese, but the ruling price has been $3.60 and the largest quantity has been for the Japan market. The movement comprises 9,500 pieces 8.4 at $3.60 and 2,500 pieces 7 lbs. at $3.30 to $3.35. Rather an important feature is the absence of any sales in White Shirtings during the fortnight, a fact that has not occurred before during the year. The stock of T-Cloths is small and entirely in the hands of two houses, who have demanded $3.25 for their goods, but have been induced to accept lower figures. The sales consist of 4,000 pieces 7 lbs. at $3.18 to $3.20, and 5,000 pieces 6 lbs. at $2.50, a slight advance upon last quotations. Cotton Yarn has been in request, but the quantity in the market is small, more especially of the favourite counts, and much has been sold to arrive. The sales of the fortnight embrace 147 bales 16.24 at $180 to $195; 36 bales 28.32 at $190 to $200; 50 bales 38.42 at $230 to $250. The market for fancy goods is quite dull, but prices are steady. The sales embrace 1000 pieces Chintzs at $2.60 to $2.75, and 500 pieces Brocades at $4.00 to $5.25, and 750 pcs. Turkey Reds at $3.75. Of this last stocks are quite light, and holders are asking advanced prices. Woollens are in better demand than at the date of last report, and although prices are without alteration the amount of business has been in excess of that last noted. Sales for the period under review are 340 pieces assorted Spanish Stripes at 85 cents to $1, 480 pieces HH Long Ells at $10, 640 pieces SS Camlets at $20.50, and 340 pieces Lastings at $18 to $18.50. In Metals, Iron has engaged the principal attention, the demand having been quite active, and prices slightly better. The movement comprises 3780 piculs Nail Rod at $3.28 to $3.31½, and 1420 piculs small Round Rod $3.21 to $3.37. Other Metals have been quite neglected except Quicksilver, of which a sale of 30 flasks is noted at $67.25, a slight decline from last quotations.

CANTON.

There is no change to report in the market. Lead maintains a firm position, but there are large quantities on offer, so that no material improvement can be expected for the present. 500 piculs of common and 150 piculs of W.B. have been settled at $6.65 to $6.75 for the first kind, and $7 to $7.05 for the latter. 9200 piculs remain on hand. 300 flasks of Quicksilver have been sold at $72 to $73, and 200 flasks remain on the market.

AMOY.

Cotton Yarn has declined to $69 for fair 16 to 21's with no inquiry; stock 105 bales. Grey Shirtings, a sale of 1000 pieces damaged 8¼ lbs. has been made at $3.40 to $3.60, 7 lbs. is quoted at $3.20 to $3.30, 8¼ lbs. at $3.80; stock 4400 pieces. T.Cloths, 1400 pieces have been sold at $2.80 for 6 lbs., and $3.30 for 7 lbs.—these are latest quotations; stock 1,100 pieces. White Shirtings, no sales, 60 reed quoted at $3.60, 64 and 66 reed at $4.10 to $4.40; stock 2,250 pieces. Quotations for other goods, of which no sales have been made, are as under:—White Brocades, $5, Dyed Brocades $5.70, T. R. Cambrics $3.60 to $4.10, Camlets $22 to $23, Long Ells $8.50 to $11.50, Spanish Stripes $1 to $1.10 per yard. Metals, Tin, sales of 376 slabs at $23.70; stock 2566 slabs. Lead $6.90 to $7.20; no stock. Quicksilver $72.50. Nail Rod Iron $3.20 to $3.60.

SHANGHAI.

But a limited business has been transacted during the past two weeks, and a revival of demand is not looked for until after the Chinese new year, which falls on Feb. 5 next. Quotations for Grey Shirtings exhibit no change, but sales have been more difficult to effect at last mail's rates. For White Shirtings the market is depressed. T-Cloths are not much inquired for, but prices are steady. Black Velvets are in good demand at

Digitized by Google

enhanced value. Turkey Reds are asked for at last quotations. Spanish Stripes continue difficult to move. Camlets, with the exception of black, which have been in demand for Japan, are very slow of sale. Scarlet Long Ells have been inquired for at last quotations, but assorted have met with little attention. Lastings have not found any buyers, even at the quotations. For Nail Rod Iron there has been a small inquiry at previous rates. Lead has been dull of sale. Quicksilver has further declined in value tls. 2.5.0. per picul. G. E. Grey Shirtings, sales 25,000 to 30,000 pieces; market weak. G. E. White Shirtings, sales 5000 to 6000 pieces; market depressed. American Drills, Jeans, Sheetings, and English Drills, no sales; stocks considerable. T-Cloths, sales 4000 pieces; prices steady. Handkerchiefs, sales 1000 dozen; small demand. Spotted Shirtings, white, sales 400 pieces. Dyed, sales 500 pieces. Brocades, sales 1000 pieces. Damasks, no sales. Chintz, sales 2000 pieces; fair demand. Turkey Reds, sales 1000 pieces; prices firm. Velvets, no stocks. Velveteens, sales 1000 pieces. Muslins, no demand. Union Spanish Stripes, no stock. Spanish Stripes, sales 240 pieces; dull of sale. Medium, Broad, and Habit Cloths, sales 180 pieces; dull of sale. Camlets, sales 1500 pieces for Japan. Black in great demand. Long Ells, sales 1500 pieces; scarlet and gentian wanted. Lastings, no sales. Crape Lastings, no sales. Crape Lustres, sales 500 pieces. Orleans, Figured, sales 1,500 pieces. Orleans, Plain, no sales. Iron.—Flat and Round, no demand. Nail Rod, small inquiry. Hoop and Pig, no demand. Lead, Tin Plates, and Steel, dull. Quicksilver, small demand for Hankow. Flints wanted. Stocks reduced. Window Glass, a little inquiry lately.

HANKOW.

Business in Manchester goods has been less active. Owing to tightness in the native money market and several fires in the native city, importers are more cautious in making sales unless to first-class dealers, while, on the other hand, the reports of an approach of the Neinfei, who are now supposed to be on the borders of this (Oopeh) province, has further interfered with trade, preventing the dealers buying more than their actual present requirements. Notwithstanding these drawbacks, prices of seasonable cotton goods have been fairly maintained, and in some instances can be called firmer. Woollens remain depressed; Worsteds have been more inquired after, while fancy cotton and woollen mixtures have been in good demand. Grey Shirtings: Sales of good makes of 8 lbs. 4.6 oz. have again been made on a fair scale at last quotations; heavier goods are not quite so firm, but 7½ lbs are five candareens per piece higher. White Shirtings: There has been a small demand for the Szechuen markets, 64 to 68 reeds being most inquired after; a further advance of 1 mace per piece can be quoted for these qualities. T-Cloths, the few sales made have been chiefly of 7 to 7½ lbs. goods, on which an advance of 1 mace per piece on last quotation has been obtained. Drills, American cargo has only declined about 1 mace per piece, whilst importers of English and Dutch cloth have made forced sales as low as Tls. 4.30; best makes and well-known chops are still worth Tls. 4.50 to 4.60 per piece. Dyed Spots, Brocades, and Damasks, there has been little done; the season for these goods being now nearly over, quotations are almost nominal. Chintz, the demand has fallen off, and sales are difficult to make unless for choice patterns. Camlets have met with a little inquiry, but sales are still limited even at a reduction of 3 to 5 mace per piece on last quotations. Long Ells have passed off more freely at about last quotations, HH Scarlet being still saleable at Tls. 7.50 to 7,60, and Assorted at Tls. 7.20 to 7.30 per piece. Dark Blue remain unsaleable; the nominal quotation is Tls. 6.80 to 7. Lastings, there is little alteration; a few small lots have been disposed of at rather firmer prices, Spanish stripes and other woollen goods are still neglected, and quotations may be considered nominal. Figured Orleans and crapes of good assortments and designs have been taken to a fair extent, and are still well inquired after, but at a decline of 3 to 4 mace per piece on last quotations. Plain Orleans are in no request, crape figures supplying their place. Metals—Lead, little business has transpired, and the value may be given as last quoted. Quicksilver, there was some demand early in the fortnight, and 150 flasks were placed at 54 tls. per picul, which is the present quotation. In tin and nail rod iron there is no change to notice, and no sales have been reported.

YOKOHAMA.

A fair business has been transacted in imports. The market, however, has hardly improved to the extent that was anticipated, the fear of large importations from China, no doubt, has exercised a prejudicial effect upon the market. Grey Shirtings, eagle chop 8.4 have been sold during the fortnight at $4.30, but the closing price is slightly weaker. White Shirtings 66 to 72, reeds are more inquired for, and there is some small demand for White Spots and Brocades. Turkey Red Shirtings and Black Velvets have been in active demand, and present rates show a considerable improvement. Dyed Brocades and Spots are saleable at quoted rates. Chintzes are in no inquiry. Camlets are more easily saleable at rather better prices, although the rise in this staple has been less than was generally anticipated. Black are in most demand, and sales are made at $25 to $25.50. Yarn has improved, 16 to 24s being the quality at present most wanted. Metals continue dull, and the demand for Lead appears to have fallen off.

NINGPO.

Grey Shirtings, 8¼ lbs., import 2,900 pieces, 1,000 being in foreign hands. The import of metals is confined to Nail Rod and Bar Iron. The former is in small stock, and better inquiry. Sales at $3.75 per picul. The quotations are: Grey Shirtings, 8¼ lbs., $3.70 to $3.87 per piece; Metals, Lead, $6.70 to $6.80 per picul; Tin, Malacca, $26 per picul; Tin, Canton, $25.80 per picul; Nail Rod Iron, $3.30 to $3.75 per picul; Flat Iron, $5,60 to $5.80 per picul; Tin Plates, $5.60 to $5.70 per box.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London, previous to 30th December, Erl King (str.); from Newcastle, 20, Joachim Christian; from Liverpool, Jan. —, Magellan.

At FOOCHOW.—From New Plymouth, Dec. 10, Lord Clyde.

At HONG KONG and CANTON.—From London, Dec. 29, Chusan.—(Reported by telegram).—Jan. 5, Ariel, from Newcastle, Dec. 29, Sjolk.

At MANILA.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From FOOCHOW.—None.

From HONG KONG and CANTON.—For Havana, Dec. 11, Nizam; for Buenos Ayres, 28, Bengal.

VESSELS LOADING.

At YOKOHAMA.—For London, Corea; for New York, Chaa-sze, Johanne Maria.

At SHANGHAI.—For London, Achilles (str.), Asphodel, Tamerlane (full), Tyburnia (full), John Bellamy, Beemah, James Shephard; for New York, Gabalva (full), Canvass Back (full), Dunkeld, Deucalion.

At FOOCHOW.—For London, John Lidgett (full), Charlotte; for New York, Isabella Ridley.

At HONG KONG and CANTON.—For London, Bankside, Stornoway, Acacia, Sea Bird; for New York, Amaranth, Portland, Diamant, Galatea.

At MANILA.—For London, Eleanor; for Cadiz, San Luis, Union Feliz, and via Cebu, A. Lloret; for Havana, Espana.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, cotton and tea, £2. 10s. to £3; silk, £4 to £4. 10s.

At SHANGHAI.—For the coast little inquiry exists, and rates for home and United States remain at £2 per ton of 50 cubic feet, and £2. 5s. for 40 cubic feet respectively.

FOOCHOW.—To London, £2. 5s.; to New York, £2. 5s.

HONG KONG and CANTON.—A good demand has existed for tonnage from the Burman ports to Europe. To London and New York no charters have been effected. The inquiry for Saigon and Bangkok is small. The circular of George Holmes gives the estimated number of disengaged vessels in harbonr at 57, representing 30,912 tons.

MANILA.—There have been no vessels available for charter during the fortnight, and rates remain £2 for sugar, and £2. 5s. for hemp, as the current freights to the United Kingdom, though probably a slight advance on these rates could be obtained.

REPORTS AND CASUALTIES.

SHANGHAI.

The British ship Dilkhoosh, arrived at Shanghai, reports having on August 27th passed the ship City of Palaces, from London to Hong Kong, in S. lat. 3.32 E., long. 48.0.

HONG KONG.

The British barque Sea Belle, arrived at Hong Kong, from London, reports having experienced a heavy gale, Sept. 8th, that lasted for two days, having to lighten the ship by heaving a quantity of cargo overboard. Dec. 11th experienced another severe gale, causing the loss of one man overboard. Spoke the following vessels off Borro Island, British ship James Russell, from London to Hong Kong, 126 days out; the American ship Endeavour, from New York to Shanghai, 124 days out; the British barque St. Fillan, from Antiga, bound to Nagasaki.

SINGAPORE.

Reported by Telegram.—The Contreath has been wrecked; cargo lost.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Feb. 7, off Dungeness, from Batavia, Elshout; 5, at Brouwershaven, from Batavia, Jan v. Schaffelaar, Maria Elizabeth; 9, at London, from Shanghai, Illimani.

DEPARTURES.—Feb. 9, from London, for Shanghai, Wild Deer; 11, Liverpool for Hong Kong, Senator Weber.

SPOKEN.—Delganey (?), Manila to London, 26 days out, Oct. 18, 5 N., 110 E.; Lady Ebrington, from Shanghai, 86 days out; Drydens, Amoy to New York, Dec. 5, 30 S., 43 E.; Red Deer, Shanghai to London, Nov. 1, 8 N., 109 E.; Elton (?), from Manila, Nov. 16, 1 S., 108 E.; Gillminer (? Cillminar), Manila to Bolivia (?), 10 days out, Nov. 17, 2 S., 108 E.; Broadwater, Amoy to New York, Nov. 18; Invincible, Foochow to London, Nov. 21; Fontenaye, Foochow to London, Nov. 24; Goede Nerwachting, Batavia to Amsterdam, Dec. 16, 31 S., 42 E.; Llandaff, Sourabaya to Rotterdam, Nov. 30, 61 (?) S., 26 (?) E.; Amaranth, Amoy to New York, Nov. 29, 25 S., 68 E.; Gaucho, Colombo to London Dec. 21, 35 S., 26 E.; Royal Diadem, Shanghai to New York, Nov. 11,, 5 N., 107 E.; Queen of the Sea, Foochow to New York, Nov. 13, 1 N., 107 E.; Amazon, Amoy to New York, Dec. 4, 32 S., 32 E.; Brouwershaven, Padang to Rotterdam, Nov. 11, 17 S., 85 E.

CASUALTIES.—Advices from Nieuwe Diep, dated Feb. 9. state that the Addison, Sloane, from Batavia to Amsterdam, with a general cargo, had been wrecked on the Haaks.

During the late gales, the City of Delhi (from Singapore to London) which was stranded near Dungeness, Jan. 28, went to pieces, and only a small portion of her remains visible. Divers are waiting an opportunity to commence operations for salving cargo.

Advices from Singapore, dated Jan. 22, report the Conheath, from that port to Liverpool, as having been wrecked in Banca (?) Straits.

MISCELLANEOUS.—At St. Helena, Dec. 29, Maria Adolfina, Blom, from Batavia, and sailed for Amsterdam, 30; Oscar, Gadda, from Batavia, and sailed 31 for Amsterdam; Jan. 1, Petronella, Strootman, from Batavia, and sailed for Amsterdam; 10, Konigin Augusta, Schaede, from Sourabaya, and sailed 11 for Rotterdam, 11, Brederode, Kruymel, from Tjilatjap, and sailed 12 for Rotterdam.

Off Mossel Bay, Dec. 19, Acapulca, from Hong Kong for New York.

COUNT ARESE, an officer in the Italian navy has arrived at Florence from the Far East, bringing with him the treaties of commerce concluded by Italy with China and Japan.

MAILS FOR THE NETHERLANDS POSSESSIONS IN THE EAST AND WEST INDIES.—On the 1st February, and thenceforward, the entire postage, British and foreign, upon letters addressed to the Netherlands possessions in the East or West Indies, may be paid in advance, or at the place of destination, at the option of the sender. The postage of registered letters must, in all cases, be paid in advance, and in addition, there must be paid a registration fee of 4d. each letter.—General Post-office, Jan. 22.

LONDON, MONDAY, FEBRUARY 11, 1867.

THE YOKOHAMA FIRE.

THE details brought by the last two mails of the calamity of the 26th November have naturally excited no little sympathy in the mercantile world of London; accompanied, as usual in such cases, with much speculation as to how so heavy a misfortune *might* have been foreseen and prevented. By the time this reaches our readers in Japan the "great fire of 1866" will already have become a thing of the past, and all idle regrets over the devastations it committed will have given way to energetic measures for repairing them; so that any moralisings on the evil of a "Gankiro" in close contiguity to the foreign settlement, or on the absurdity of interspersing mere lath-and-paper shanties among the so-called "fire-proof godowns," would alike be useless and out of season. But in the record of the fire and its results as published in the local papers, there is one announcement that we cannot allow to pass without a word of comment. It comprises the resolutions passed at a meeting of the agents of the several fire insurance companies, which were three in number, and worded as follows:—1st. "That a qualified surveyor be appointed to act for all the offices, and that all applications for risks be referred to him;" (2nd), "That the rates be raised all round 50 per cent.;" and (3rd), "That in future we refuse to consider as first-class risks any building when in the same compound there are uninsurable buildings, and that we look on wooden palings surrounding a compound as highly objectionable and as necessary to be considered in the risk."

With the first of these no one can cavil, for a competent surveyor is clearly as appropriate an adjunct to a fire insurance as to a marine insurance company; and the last may be dismissed in a few words as simply childish. If acted on, it would classify as "first-class" any well-constructed building standing in a separate enclosure, even though built in on all sides by wooden huts, and separated from them only by a low wall. Such an idea could only have been conceived in a moment of dire panic, for five minutes' calm consideration would surely have shown that the extent of danger to any insurable building from the proximity of a wooden shed or such like inflammable structure can be regulated only by the actual distance between the two. But it is the second resolution that will give rise to the most startling differences of opinion. The *Japan Times* unhesitatingly condemns it as unjust, suicidal, and opposed to all the fundamental principles of insurance; inasmuch as the rates of premium were originally fixed very high, on account of the known hazardous nature of the risks, and if every unexpected claim is to be followed by a further advance, the rates must soon become prohibitory. In this not unreasonable view the *Times* is doubtless supported by the bulk of the insurers; what, then, will the latter say when they hear that the head offices in London have sent instructions to their agents to raise the rates, not fifty, but a hundred per cent.? Yet such instructions are now on the way, the chief reasons given for this course being the fact of the native town having by degrees crept close up to the foreign settlement, and the absence of any properly organised fire-brigade. These will appear at the first glance quite insufficient; the first perhaps utterly worthless, for the site of the "Yoshiwarra," that standing menace to the settlement ever since its foundation, is to be removed, and the plan for rebuilding the part destroyed interposes a wide open space between the native and foreign towns, so that the risk of fire in the latter will in future be less than at any former time. The want of an efficient fire-brigade of course indicates extra risk—but this was doubtless taken into consideration in the beginning, for the lowest premium charged on a first-class risk in Japan was one per cent. while in London and elsewhere three quarters per cent. is the outside charge for "extra hazardous" risks. Viewed in this light the position taken up by the London companies would seem quite untenable, and certain, should it be persisted in, to result in their being permanently driven out of the field by the "China Fire" and other local companies. We are, however, assured that the London managers were in point of fact wholly unaware of the real nature of the risks they had accepted, having been kept in total ignorance of the close proximity of the native town to the buildings they had insured, and also of the existence of native-built houses, &c., in the midst of the foreign settlement. As soon as these causes of danger are permanently removed, it is intended to revert to the original scale.

As a rule, insurance offices should be able to base their scale of premiums upon such data as would enable them to look upon occasional heavy losses not as remote and improbable contingencies, but as matters of course, inseparable from their position; otherwise, why should people insure at all? Besides, such losses, however disastrous they may appear at the moment, ought to be certain sources of ultimate profit, inasmuch as every fire induces numbers of persons to insure who, from either carelessness or over-confidence, had neglected to do so; thus permanently extending the business of the companies. In Yokohama this rule will certainly apply, for we may be sure that no merchant or shipper will in future suffer his goods to lie there unprotected so long as it is possible to insure them at anything like a reasonable outlay. It must be remembered too that the great bulk of the merchandise stored in the godowns there is by no means of a hazardous nature, consisting as it does of piece-goods, metals, tea, and silk, which are very different from the tar, spirits, inflammable oils and other combustibles stored in such large quantities in London warehouses. The internal elements of danger being so very small, and the external ones being removed by the remodelling of the settlement and its entire separation from the native town, we can really see nothing to justify the permanent adoption of extreme measures.

THE outward mail of this day conveys several passengers for Singapore and Penang, including Colonel Ord (the Governor), Mrs. Ord, Captain Ord, a son of the Governor, appointed magistrate at Malacca, Mr. H. Ord, appointed, we understand, to a post in Penang, Mr. H. F. Plow, Governor's Secretary, Major McNair, Chief Engineer, Mr. A. W. Cousins, Clerk Colonial Secretary's Department, Mr. and Mrs. Padday, Mr. and Mrs. Buttery, Mr. Brown. By the mail of 26th Feb. Surgeon-Major Rose proceeds to Singapore.

THE first Japanese ironclad is now being built at La Seyne (Toulon), by the *Compagnie des Forges et Chantiers* of France. She will be on the frigate model, armed with six 350 and 450 pounders, and is to cost £140,000. Messrs. Dudgeon are constructing two gunboats, which are also intended for the Japanese Government.

WE are glad to be able to announce that Mr. HENRY HILL, after nineteen years' service in the P. and O. Company in various capacities, has been promoted to the post of Assistant-Secretary.

THE Kiachta Telegraph service reopens on Tuesday, the 19th February, until the 19th November. The London agency is at the Office of this Paper.

---

* THE STRAITS GOVERNMENT.

The departure by to-day's outward mail of the new Governor under the Colonial administration will commence a new era for the Straits Settlements, and we augur a prosperous one. There will be more scope for carrying out the measures required than ever existed under the India-office, and we are hopeful that Colonel Ord is the right man in the right place, able to at once grapple with all the difficulties necessarily attendant on the transfer. There will be doubtless much occasion for forbearance on the part of the representatives of the old and new systems, and we hope it will be duly exercised.

* The greater portion of this article appeared in our last issue, but contained some inaccuracies, which are now corrected.

The form of Government which is about to be instituted may be said to assimilate closely to that in force in the colony of Ceylon. It will consist of a Governor and Legislative Council; the latter body comprising six official members and four unofficial members, two of whom will represent Singapore and the other two Penang and Malacca respectively. The Governor is to visit Penang for three months and Malacca for one month in every year. The troops stationed in the island will be a wing of a European regiment, six companies of the Ceylon Rifles, and two batteries of Artillery. Of these, 880 men are to be considered as stationed in the settlements exclusively for colonial purposes. The Colonial Military Contribution will be £59,300 per annum.

The Executive Council will consist, amongst other members, of the Governor, the Colonial Secretary, the Attorney-General, the Commanding Officer, the Lieutenant-Governor of Penang, and the Lieutenant-Governor of Malacca. The official members composing the Legislative Council will, in addition to the Governor, be the Chief Justice of Singapore, the Colonial Secretary, the Attorney-General, the Treasurer, the Auditor-General, and the Chief Engineer. The unofficial members will be two members for Singapore, one for Penang, one for Malacca, and the Clerk of Councils. We believe that Colonel Ord has discretionary power to vary the establishment and to increase the number of the Executive Council should he deem it desirable.

The *Gazette* of the 5th inst. contains the official notifications to the effect that "the Queen has been pleased to erect the settlements of Prince of Wales Island, Malacca, and Singapore into one Government, to be called the 'Straits Settlements,' and to make provision for the government of those Settlements. Her Majesty has also been pleased to appoint Colonel Harry St. George Ord, R.E., C.B., heretofore Governor of the Bermudas or Somers Islands, to be Governor and Commander-in-Chief of the Straits Settlements."

An elaborate scheme of "Pension Rules" has been drawn up for the new Government, the provisions of which are briefly as follows:—All retiring pensions are based on a scale of sixtieth parts of the annual salaries. Officials of ten years' service are entitled to 15-60ths of their pay; eleven years', 16-60ths; and so on at the rate of 1-60th for each additional year of service, up to 35 years, which gives a maximum of 40-60ths (or two-thirds), beyond which no increase is allowed. The following are exceptions to this rule:—(1) Chief Justices, whose pensions commence after 7 years' service, and who become entitled to the maximum of 2-3rds after 25 years'; (2) the Judge of the Summary Jurisdiction Court, Colonial Chaplains, and Chief Engineers, whose allowance after 10 years' service commences at 20-60ths, and reaches the maximum after 30 years; (3) the present Recorders of Singapore and Penang, who are each entitled to pensions of £800 per annum after 10 years' service. These rules are subject to the following conditions:—(1.) No person to have an absolute right to claim a pension, the Government retaining full power to discharge without any compensation. (2.) No pension to be granted to a person under 55 years of age, unless incapacitated by infirmity or ill-health. (3.) In extraordinary cases higher pensions may be granted, but never above the full amount of salary. (4.) Deductions may be made where the full pension may not be considered deserved, or the allowance entirely withheld in cases of obvious inefficiency or misconduct. (5.) Pensions to be calculated in the salary of a *permanent* office, which must have been held for three years prior to retirement. (6.) Where the time of service does not justify a pension, gratuities may be given of a month's salary for each year of service; and (7,) all pensions may be cancelled or reduced on the recipient being re-appointed to any public office. The scheme includes a host of minor provisions and stipulations, but the above outline embodies the most important.

With a view to supply the Straits Civil Service with efficient interpreters a number of cadetships will be established the holders of which must study either Malay or Chinese. Three cadets will be appointed at once, after a competitive examination; they must be between the ages of twenty and twenty-three; no previous knowledge of either of the above languages is necessary. When duly qualified, the cadets will become interpreters, with salaries of £400, to be increased to £500 after two years' service as such; after three years' service they will be eligible for promotion to higher offices. After the first three shall have reached the grade of interpreter, the number of cadets will be permanently maintained at two, who will be subject to the same regulations.

The following is a list of the various offices under the new Government with the names of the employés where the appointments have been made. The total salaries amount to about £60,000. Some of these salaries appear to us most incongruous. The salary of the Judge at Penang is too high, and also the Judge of Summary Jurisdiction; that of the Secretary to the Governor far too low.

SINGAPORE.

CIVIL ESTABLISHMENT will be as follows:—Governor, Colonel Harry St. George Ord, R.E., C.B., £5,000; Private Secretary, £300, H. F. Plow; Colonial Secretary, £1,800; Chief Clerk, £300, A. W. Cousens; Second Clerk, £180, G. Perreau; Third Clerk, £96; three other Clerks and a Malay Writer; also three Cadets at £200 each. Auditor-General, £1,000, Chas. John Irving; First Clerk; £360; Second Clerk, £300; Third Clerk, £180; Chief Engineer Straits Settlements and in charge of Public Works Singapore, Major M'Nair, £1,400; First Clerk, £240; Second Clerk, £180; Estimator, £120, Draftsman, £120; Surveyor-General, £864, D. Quinton; Colonial Surgeon, £960; Government Printer, £112, L. F. D'Souza.

TREASURY AND STAMP OFFICE.—Treasurer and Commissioner of Stamps, £1,000, W. W. Willans; First Treasury Clerk and Cashier, £390, J. B. Leicester; Second Clerk and Accountant, £120, F. R. Frois; Deputy Commissioner of Stamps, £360, G. Norris.

LAND REVENUE SURVEY OFFICE.—Assistant-Surveyor, £180, J. Peel; Draftsman, £180, Wajid Khan.

REGISTRATION OF TRADE AND SHIPPING.—Deputy Registrar, £300, John Cooper; First Clerk, £96, E. Leicester, and two other Clerks.

PUBLIC WORKS.—Head Overseer, £300, J. M. Magalhaens; Second Overseer, £180, W. D. Baylis; and a Storekeeper.

ECCLESIASTICAL.—Acting Colonial Chaplain, £960, Rev. C. J. Waterhouse.

MEDICAL.—Acting Assistant Colonial Surgeon, £564, A. Fergusson.

LAW AND JUSTICE.—SUPREME COURT.—Chief Justice, £2,500, Sir P. Benson Maxwell; Clerk, £300, C. G. Baumgarten; Attorney-General, £1,000 and private practice, Thomas Braddell; Crown Solicitor, £250; Registrar, £1,200, C. Baumgarten; First Clerk, £600, G. W. Lecerf; Second, £300, W. F. Hendriks; Third, £120, A. A. Baumgarten; Chief Interpreter, £300, G. W. D. Geils; Chinese Interpreter, £120, Tan Kay Sing; and three other interpreters; Sheriff, £360, H. Hewetson; Jailor, £120, G. W. Ganno; Clerk and Bailiff, £96, Robert Jeremiah.

COURT OF SUMMARY JURISDICTION.—Judge, £1,500; First Clerk, £240, W. Norris; Second Clerk, £120, Henry Holloway, Head Jailor, £180, J. Burnett; Assistant Jailor, £60, C. Robeiro.

POLICE.—Senior Magistrate, £960, J. D. Vaughan; Junior Magistrate, £540, F. H. Gottlieb; Commissioner of Police, £1,200, T. Dunman; Deputy-Commissioner and Coroner, £528, C. B. Waller; First Clerk, Magistrate's-office, £264, S. Leicester; Second, £118, R. J. Duncan; First Clerk, Commissioner's-office, £132, H. Hewetson; two other Clerks, a Writer, and three Interpreters.

CHARITABLE INSTITUTIONS.—Superintendent Lunatic Asylum and Apothecary, £216, R. Watson; Senior Apothecary, General Hospital, £132, F. G. Eade; Apothecary, Pauper Hospital, £114, J. J. L. Wheatley.

MARINE.—Master Attendant and Shipping Master, £840, Lieutenant Burn, I.N.; Deputy ditto, £360; First Clerk, £144, H. D. Chopard; Second, £120, G. S. Reutens; and three other Clerks, Gunners, Lightkeepers, &c.; First Light-keeper, £108, T. Todd.

POSTAL.—Postmaster; Assistant Postmaster, £600, William Cuppage; Charge Taker, £400; First Sorter, £240, James Nicholson; Second, £100, William Brown; and three other sorters.

SUPPRESSION OF PIRACY.—Commander steamer *Rainbow*, £420, Ellis; Officer, £210; Engineer, £360; Second ditto, £150.

PENANG.

TREASURY AND STAMP OFFICE.—Lieutenant-Governor, £1,800, Lieutenant-Colonel Anson, R.A., formerly Inspector of Police at Mauritius; Collector of Stamps and Assistant Treasury Department, £480, Philip Jones; First Treasury Clerk, £120, J. E. Hogan, and two other Clerks.

COLLECTOR'S OFFICE.—First Clerk, Penang, £180, E. Loureiro, two other Clerks and three Collectors; First Clerk, Province Wellesley, £158, J. Hogan and three other Clerks.

REGISTRATION OF TRADE AND SHIPPING.—Deputy-Registrar, £121, J. Rodyk.

PUBLIC WORKS.—Executive Engineer, £720; Head Overseer of Works, £280, E. Scully.

ECCLESIASTICAL.—Acting Colonial Chaplain, £960, Rev. J. Mackay B.D.

MEDICAL.—Acting Assistant Colonial Surgeon, £564, J. B. King.

LAW AND JUSTICE.—SUPREME COURT.—Chief Justice, £2,000, Sir W. Hackett, Knt.; Clerk, £300; Crown Solicitor, £250; Registrar. £1,080, G. Maxwell; First Clerk, £600; Second, £900, A. W. S. Stewart; Third, £120, R. Scott; Chief Interpreter, £360, G. W Symons; Chinese Interpreter, £120, Koh Ten Choon; Sheriff, £300' J. B. D. Rodyk; Jailor, £96, R. R. Reutens.

COURT OF REQUESTS.—Commissioner Penang, Police Magistrate, *ex officio*; First Clerk, £180, T. G. Mitchell; Second, £90. B. Jeremiah; Commissioner, Province Wellesley, Police Magistrate *ex officio*.

POLICE.—Magistrate, Penang, £720, C. B. Plunket; Magistrate, Province Wellesley, £720; Commissioner of Police and Coroner, £528; Deputy Commissioner and Coroner, £300, K. Robertson; First Clerk, £180, J. Hogan; First Clerk, Commissioner's Office, £150, Martin Thomas.

CHARITABLE INSTITUTIONS.—Apothecary General Hospital, £120, J. Ash; Assistant Apothecary, Province Wellesley, £120, G. E. Lillywhite.

MARINE.—Harbour Master and Shipping Master, £660; First Clerk, £96, Z. C. Aeria.

SUPPRESSION OF PIRACY.—Commander steamer *Fox*, £420; Officer, £210, D. H. Thom; First Engineer, £360, Second, £150.

Digitized by Google

Postal.—Postmaster, Harbour Master *ex officio*; Assistant Postmaster.

MALACCA.

Treasury and Stamp Office.—Lieutenant-Governor, £1,500, W. W. Cairns, for ten years in various offices in Ceylon; Collector of Stamps and Assistant Treasury Department, £240, J. Overie; Treasury Clerk, £120, L. Fernandis; Record Office Clerk, £120, H. J. Leynard; Government Surveyor, £600.

Collector's Office.—First Clerk, £192, H. A. Baumgarten; Second Clerk, £132, A. D. Neubronner; and four other Clerks and Writers.

Public Works.—Sub-Engineer, £300, C. A. Evans; First Clerk, £120, C. J. Van Braght.

Ecclesiastical.—Colonial Chaplain, £420.

Medical.—Acting Assistant Colonial Surgeon, A. C. Maingay.

Law and Justice.—Supreme Court.—Clerk, £600, W. Rodyk; Chief Interpreter, £144, A. Neubronner; Sheriff, £180, F. D. Baumgarten; Jailor, £120, W. Boyd.

Police.—Magistrate, £720, Captain Ord; Commissioner of Police and Coroner, £360, C. J. Hanson; Clerk, Magistrate's Office, £107, C. S. J. Minjoot; and three Interpreters.

Marine.—Clerk, E. Neubronner; Deputy Registrar of Trade and Shipping, E. Neubronner; Commander Light-vessel *Torch*, £216, G. L. Baumgarten; Light-keeper, £96, J. Lineban.

Postal.—Government Agent, *ex officio*.

Monetary and Commercial.

We are glad to be able to state that satisfactory arrangements have been made for the funds of the Union Insurance Society, and that no anxiety need exist either on the part of shareholders or insurers.

We regret to announce that the drafts of Messrs. Lyall, Still, and Co., Hong Kong (for about £20,000), held by the Comptoir d'Escompte, have been refused by Messrs. Chalmers, Guthrie, and Co. Advices have been subsequently received stating that the difficulties had been arranged, but we understand that in consequence of the arrangements not duly protecting the interests of creditors in England, the firm must suspend.

In reference to the notice of the affairs of Messrs. Small and Co. in our issue of the 26th January, we have received the following letter from their solicitors, Messrs. Upton, Johnson and Upton:—

"Sir,—We are instructed by Messrs. Small and Co. to express their surprise at the paragraph in your impression of the 26th ult. in regard to their suspension, which has recently been brought to their notice; and we are directed to state that if you had taken the trouble to make further inquiry, you would have found that there was no foundation for any such complaint against them, and that their affairs became involved solely by the failure of other parties to provide for engagements entered into on their behalf. We beg to add that the liabilities are something over £410,000 and that the deficiency is estimated to amount to £50,000.—We are, Sir, your obedient servants, Upton, Johnson & Upton."

The biddings for £350,000 in bills on India took place on the 6th. The proportions allotted were—to Calcutta, £177,570; to Madras, £29,640; and to Bombay, £150,000. The *minimum* price was fixed, as before, at 1s. 10¾d. on all the Presidencies. Tenders at 1s. 10¾d. on Calcutta and Madras will receive in full, and on Bombay about 51 per cent. All tenders above price that will receive in full. These results show a slight increase in the demand for means of remittance to the East.

The dividend of the Comptoir d'Escompte for the first half of the year 1866-7, has been fixed at 32f. per share, and is to be paid from Feb. 1.

The subjoined letter refers to the proposed resuscitation of the Commercial Bank Corporation of India and the East:—

(TO THE EDITOR OF THE DAILY NEWS).

Sir,—In the notice of dividend on the above concern, which appeared n your columns some days back, I observed that you alluded to a contemplated resuscitation. It is to be hoped that in the interest of the shareholders this may be found feasible, and carried out. By allowing the assets to be realised at the present unduly depreciated values, and paying the unavoidably heavy liquidation charges, the shareholders are, to speak forcibly, "cutting their own throats;" while, looking at the fine opening at present existing in the East for more banks, coupled with the fact that the connections of the "Commercial" are of twenty years' standing, it seems a suicidal policy to allow the liquidation to be completed without an effort either to carry on the old concern, by a call, or to start a new bank on the basis of taking over the assets at a valuation to be agreed upon with the official liquidator, who, I am informed, is quite ready to entertain any fair proposal.—I am, &c.,

One of the Sufferers by the Suspension.

According to a circular addressed to the shareholders of the Scinde, Punjab, and Delhi Banking Corporation, it appears the liquidators have done all in their power to set free for distribution the sum of £200,000 and upwards which they still hold invested in Government securities, the proceeds of the liquidation to the present date. From the fact of two directors of the National Bank of India (Limited), resident here, having executed the agreement brought about by the efforts of the liquidators, and which has received the sanction of the Court of Chancery, there seems no reason to doubt that the necessary confirmation of the Board of the National Bank of India will be given, and, as it has been asked for by telegram, it may be shortly expected to arrive.

A circular has been issued by Mr. F. M. Page containing a comparative statement of the amount of bullion (gold and silver) and specie, exported from the United Kingdom during the past seven years, viz., from 1860 to 1866 inclusive. The export to China, Shanghai, Hong Kong, Amoy, Foochow, Swatow, and Japan was, during 1866, £757,078; in 1865, £1,034,382; in 1864, £2,199,156; in 1863, £3,076,364; in 1862, £2,830,477; in 1861, £1,222,151; and in 1860, £4,902,611. To Singapore, Penang, Batavia, and Saigon—the amount was, in 1866, £347,400; in 1865, £626,800; in 1864, £965,780; in 1863, £796,501; in 1862, £786,412; in 1861, £127,073; and in 1860, £415,106. The total value of the export to all parts was, in 1866, £10,032,626; in 1865, £13,933,183; in 1864, £24.318,189; in 1863, £21,455,844; in 1862, £18,168,303; in 1861, £10,141,149; and in 1860, £13,500,372. Of the amount for 1866 there was shipped per the P. and O. steamers from Southampton, £2,853,153; from Marseilles, £3,458,944; from Gibraltar, Malta, and Suez, £340,585, and per the Messageries Imperiales steamers from Marseilles, £3,362,935; from Messina and Suez, £17,009. It will be seen that the shipments during 1866 fell short of those made during 1865 by three millions and three quarters sterling, the shipments to China having decreased by half a million.

The banking house of Pollet, at Lille, which was of considerable importance, has suspended payment. The liabilities are estimated at about 15,000,000f. (£600,000); assets, it is feared, not large. Paris suffers, it is said, to the amount of 3,000,000f.; the rest of the loss falls chiefly on Lille and Roubaix, where it will be severely felt. M. Pollet died very suddenly in the night of Saturday, and it was after his death that the suspension took place.

The report of the Telegraph to India Company (Limited), to be presented on the 15th, recommends a dividend for the past half-year at the rate of 5 per cent. per annum, which has been earned by the lease of the land line in Egypt. The directors have agreed to continue the lease (which expired on the 31st of December last) on the terms of the original contract, only from month to month, as they anticipate the early and successful termination of the negotiations which have been for some time in progress for carrying out the complete and comprehensive system of telegraphic communication by the Red Sea, as recommended by the Committee of the House of Commons, between this country and India by the combination of all interests.

A meeting has been held at Boston to endeavour to establish a new American line of steamers to Liverpool, the directors of some of the New England railways being among its promoters. The project at present is to purchase the eleven steamers originally intended for the line between New York and San Francisco, by way of the Isthmus, and form with these a new service, the trip to be made semi-weekly.

At the meeting of the British and Irish Magnetic Telegraph Company at Liverpool, a dividend was declared at the rate of 6 per cent. per annum, leaving £7,025, by which the reserve fund is raised to £17.078.

The prospectus has been issued of the British and American Telegraph Company (Limited). This company proposes to adopt a new route across the Atlantic, namely from Falmouth to Halifax, by way of the Azores. The company has secured the exclusive right of using Mr. Allan's newly invented cable, which being lighter than the former Atlantic cable (one fourth the weight only), can be laid with far less difficulty and expense, besides effecting a saving of about one-third in cost of construction. This will enable the company to transmit messages at the low tariff of £4 per twenty words, which it is expected would ensure full employment and large profits. The capital is £600,000 in £20 shares.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton on the 4th inst., was, in silver, to Bombay, £710.

MANCHESTER MARKETS.

The demand lately reported proved of short duration; prices have again become weaker, with somewhat more pressure to make sales at and under the rates refused only some few days since. Grey Shirtings: 7 lb., 10s. 9d. to 11s.; 8¼ lb., 13s. Cotton Yarn: Nos. 16-24 1s. 6d. to 1s. 7d. Maddapollams, 4s. 9d.; Long Cloths, 13s.; T-Cloths, 8s. 3d. White Spot Shirtings, 14s. 3d.; Brocade do., 14s. 3d. Damasks, 24s. 6d. nominal

ARTICLES OF IMPORT.

Tea.—Our market during the past fortnight has been less active, the trade having bought to a fair extent, are now waiting to see the effect of the numerous arrivals on prices before adding to their stocks. Importers generally show great firmness, and there is little alteration since last mail. The deliveries for January show a large increase over last year, being 11,500,000 lbs., against 9,000,000 lbs., whilst the quantity afloat is 32,737,240 lbs., against 47,717,900 lbs., showing much in favour of this year. The stock in the United Kingdom on the 31st ultimo was estimated at 88,000,000 lbs., against 83,000,000 lbs. last year, and the quantity afloat at 32,737,000, against 47,717,900 lbs. The only

Digitized by Google

public sale of China Tea took place on the 5th instant, when 16,893 packages were offered, and 11,400 packages were sold, the whole being without reserve. Congous.—Teas free from dust, under 1s. per lb., are very scarce, and command full prices. Good common may now be quoted 1s. 0½d. per lb., with a small supply on offer. New season's have been sold from 1s. 3d. to 1s. 5d.; good, 1s. 6d. to 1s. 11d.; fine, 2s. to 2s. 4d. per lb. Pak Lings show no change. Common to fair black-leaf Congous, of old import, remain steady at 1s. to 1s. 1d. per lb. Fair to good, of which the arrivals have mainly consisted, have sold rather easier. Fine have been firm from 1s. 11d. to 2s. 1d., and a few finest have been sold from 2s. 2d. to 2s. 4d. per lb. In new-make Canton kinds there has been no change, boxes being still in fair request. Oolongs have been firmly supported. Souchongs show no change. In Flowery Pekoes there has been little or no business. Common to fair Scented Capers have been readily saleable at from 1s. to 1s. 4d. per lb. Foo Chow kinds are rather wanted. Scented Orange Pekoes, common to fair Canton-make are very difficult of sale at 1s. to 1s. 3d. per lb.; good, from 1s. 5d. to 1s. 7d.; fine are rather more saleable from 1s. 10d. to 2s. per lb. Foo Chow kinds have been saleable at from 1s. 6d. to 1s. 10d. for fair to good kinds. Green: Though the arrivals, especially of Ping Suey kinds, have been very heavy, prices have ruled wonderfully steady. During the last few days there has been more inquiry for export, and various parcels of Young Hyson have been taken for the Canada market at ½d. to 1d. per lb. advance. The new Moyunes to hand (so fair in moderate supply), have sold quickly at satisfactory prices. The bulk of the cargo of the Margaret Campbell, from Nagasaki, has been disposed of at good prices, several large parcels of common to good Twankays selling at 7d. to 10d. per lb., and uncoloured leaf at 1s. 3d. to 1s. 6d. per lb. A few sales of uncoloured Japans of good quality are reported at 1s. 5d. to 1s. 8d. The total export from China and Japan is 100,000,000 lbs. to 31st. Dec., against 102,000,000 lbs. in 1865, and 15,000,000 lbs. more may be expected to the end of the season, making a total of 115,000,000 lbs., against 115,000,000 lbs. in the previous year. The struggle between the buyers and importers has been equally maintained, and considering the late increase to our stocks, the importers have maintained their position better than could be expected. Should the export fall below 115 millions it will, of course, improve their position, but taking all points in their favour as compared with the determination of buyers, we cannot hope for an advance beyond 1d. or 2d., and these rates still leave a heavy loss on many invoices. The sooner the end of this disastrous season is reached the better for all parties, for we can hardly expect the rashness which has characterised the purchases in China in 1866 to be repeated in 1867. The native teamen in China must prepare for very different offers, and unless their Tea is brought down to the shipping ports in better condition they may expect a severe lesson. With the present stocks we can very well wait, and the best means of restoring a healthy condition is to reduce our enormous stock. If the next season's Tea is held back until the end of June it will arrive here quite as soon as wanted, and good Kaisow should be laid down at not over 1s. 8d. The arrivals have been large including no less than 25 vessels in January, with cargoes aggregating 23,000,000 lbs. The cargoes afloat up to the mail's advices are now reduced to the following:—

SILK.—We have a very quiet heavy market in Silk—a state of things which has existed with very slight modification from the commencement of the year. The deliveries are fully on the parity with preceding months, but the arrivals are large. This was expected, and was the apparent cause of the check at the close of the year; but trade is still far from good, and our high range of prices effectually prevents any possible profit, so that with the slightest hope of easier prices all hold aloof and limit their purchases to the smallest possible extent. Japan Silk, unless very good and fine, and free from the mixture so much complained of, seems to be losing favour, hence some few sales have been made at considerably easier rates. In Cantons the position remains unchanged. The deliveries from Jan. 1 to Feb. 8 inclusive were, China, 3,398; Japan, 661 bales.

COTTON.—Chiefly owing to the depressed state of the Manchester market, and the large arrivals from America, this market is extremely dull, and prices are ¼d. to ½d. lower than those current at our last report. The sales have been 7,800 bales, of which quantity 170 bales fair China sold at 10½d. to 10¾d., and 360 bales fair Rangoon at 9d. to 9¼d. per lb. The quantity sold "for arrival" has been 7,360 bales, including a small parcel of East India, but no China. During the week the Victoria has arrived with 922 bales from Hong Kong. The stock of China and Japan in the United Kingdom on the 7th inst. was 1,431 bales, against 321 bales at the corresponding period of last year, and 21,138 bales in February, 1865.

COFFEE.—A dull tone prevails in this market, especially as regards the business done in Colonial descriptions. This has been principally brought about by the early arrivals of the Ceylon crop, and an announcement of 172,000 bags Java for sale in Holland on the 13th inst. The following have been the transactions since our last:—Of Plantation Ceylon, 964 casks, 1,281 barrels and bags realised, for fine and fine fine ordinary to low middling, 72s. to 79s., and for middling to good middling, 80s. to 85s. Of Native Ceylon, 56 casks 1,400 bags were disposed of, at 64s. to 68s. for good ordinary. Of Java, 74 bags from Mauritius, chiefly damaged, sold at 52s. to 70s.; and 900 bags good greenish, from Singapore, at 66s. to 68s., one lot 70s. In addition, 1,271 bags low mixed to good ordinary, Singapore, were bought in at 42s. to 52s.; and 80 bags low garblings, Manila, sold at 12s. cwt. The stock of coffee in the United Kingdom on the 1st instant was 12,600 tons, against 13,650 tons in 1866, and 13,150 tons in 1865; the total quantity held in the five chief ports of the Continent was 46,700 tons, against 52,500 tons last, and 51,250 tons in the previous year.

COIR YARN.—Fair business has been done in Ceylon at rates similar to those of previous sales. The following offers have been made at the auctions:—13 bales Ceylon sold at £33. 15s. to £35; 34 tons Ceylon chiefly sold, medium £28. 5s. to £29. 10s., common £24; and 15 tons all sold, good £30. 15s., middling £25. 15s. to £26. 5s., common £23. 15s. per ton.

COIR FIBRE.—In public sale 24 bundles ordinary coarse Singapore realised £23. 5s., and 245 pieces (13 cwt.) Ceylon junk £24 per ton.

DRUGS.—Camphor: Rates for both China and Japan are higher, and all the offers at auction found buyers. Of China 100 cases realised £7. 5s., and a further quantity later the same price. Of Japan the sales have been 150 tubs at £7. 6s. 3d. to £7. 7s. 6d. per cwt. Dragonsblood: At auction 9 chests good lump sold at £10. 15s. to £11. 5s.; middling, £7. 15s. to £8. 5s. Rhubarb: Of 76 boxes China placed on offer, about half sold; very good, 10s. 9s. to 11s.; middling to good middling, 5s. to 5s. 4d.; mouldy and wormy, 3s. per lb.

GUMS.—Benjamin.—The offers consisted of 93 cases Sumatra, of which 12 cases fair to good seconds sold at £10. 10s. to £11. 10s., and 26 cases good fair brown thirds at £6 to £6. 2s. 6d. per cwt. Copal.—Of 30 cases soft yellow Manila 10 cases sold at 29s. 6d., the remainder, rather dark, being bought in at 25s. 6d. In addition, 74 cases bold hard coated Singapore realised 31s. 6d. to 32s. 6d. per cwt. Damar.—Scarce, and is considerably dearer, 80s. per cwt. having been paid for a small parcel sold privately.

HIDES AND SKINS.—Messrs. Dyster, Nalder, and Co.'s report is as follows:—The sales of East India Hides during the past month have been 279,935 Hides. A good demand for export, assisted by a fair inquiry from the trade, has led to a large extent of business at prices ranging from the quotations of December to ¼d. per lb. advance. Singapore, &c.—Buffalo Hides have met with only a limited demand, and barely maintained late rates. 1,387 Penang Cow Hides, and 2,794 Penang and Singapore Buffalo Hides have been sold. Cow Light, 7½d. to 7¾d. per lb.; Heavy, 5¼d. to 5½d. per lb.; Thirds, 3¾d. per lb.; Buffalo Hides Best, 5¾d. to 6¼d. per lb.; Seconds, 4⅝d. per lb.; Light, 5d. to 5¾d. per lb. Manilla.—3,692 Buffalo Hides have been cleared. Best at 4d. per lb.; Seconds, 3½d. to 3⅝d. per lb.; Thirds, 2½d. per lb.

INDIA RUBBER.—The business done in East India has been of extremely limited extent.

JAPAN WAX.—The only sale reported is of 55 boxes; ordinary saucers, at 55s. to 60s. per cwt.

MANILA HEMP.—This market continues firm, at the advanced rates, and the sales on the spot have reached 475 bales; Tobasco and Albay qualities at £49. 10s. to £50; to arrive the quantity has been about 2,700 bales of November shipment, at £47 to £48 per ton.

OILS.—The demand for Cocoa Nut Oil exhibits no improvement, but small private sales of Ceylon are reported at £50. 5s. cash, and 14 pipes at auction realised the same price with three months' prompt.

PEPPER.—Black.—There is a better demand, and 1,117 bags Singapore, at auction, were partly sold rather higher—viz., 3¼d.—the remainder being held thereat; 3,935 bags West Coast Penang met few offers, and were nearly all bought in, but 2,000 bags have since been taken at 2 15-16d.; 312 bags good Trang realised 3⅛d. By private contract about 1,500 bags Eastern have been sold, Singapore at 3 3-16d., Penang 2 15-16d. to 3d., Trang 3 1-16d., and good Tellicherry 3⅝d. White.—Of Penang 117 bags middling sold at 5⅝d. to 5¾d., and small parcels Singapore at 5⅞d. per lb.

RICE.—The market remains dull, and the business reported in soft grain is at rather easier rates, viz., 12,000 bags Rangoon and Nakrenzie at 11s. 3d. to 11s. 6d. per cwt. In public sale 5,624 bags Rangoon meeting lower offers were withdrawn.

SPICES.—Cinnamon: The quarterly sales took place on the 28th ult., and comprised 2,437 bales Ceylon, which were mostly disposed of, the fine qualities at a reduction of 1d. to 2d., but the medium and lower sorts at full rates to an advance of 1d. per lb., viz., fourths, 11d. to 1s. 4d.; thirds, 1s. 4d. to 2s.; seconds, 1s. 5d. to 2s. 5d.; firsts, 1s. 8d. to 2s. 6d.; and superior, 2s. 8d. to 2s. 9d.; 57 bales in auction on the 30th ult. went at similiar rates.

MACE.—Six cases sold at 1s. 7d. to 1s. 8d. for fair red, 2s. 2d. for palish, and 3s. to 3s. 1d. for good pale. Nutmegs: About 150 cases went off steadily, small to good middling at 1s. 2d. to 2s.; bold at 3s. 10d. per lb.

SUGAR.—Since our last report the market has exhibited an inanimate appearance, buyers taking only sufficient for their immediate wants, and business has been much restricted. The home trade hold back as much as possible, while importers do not press sales, and with a continuance of scanty supplies on offer, only small transactions have been effected at the previous value. Of Penang the sales have been 3,250 bags, at 31s. 6d. to 34s.; of Manila 7,000 bags clayed (duty 8s. 2d.) at 30s., and 4,600 bags Muscovado, at 26s. to 26s. 3d. The stock of sugar in the United Kingdom on the 1st inst. (including only 2,000 tons foreign refined, against 9,500 tons last year) was 159,500 tons, against 205,800 tons in 1866, and 210,000 tons in the preceding year.

SAGO.—At auction 60 boxes fair large grain sold at 15s. 6d., and 241 bags small pearl were withdrawn at 17s. 6d. per cwt. Of Flour 2863 bags were bought in at 16s. per cwt.

TAPIOCA.—Of Penang the sales at auction amounted to 1138 bags, the greater part realising 5d., only a small portion selling at 4¾d. Private transactions are reported in good quality at 5d. per lb.

TERRA JAPONICA.—Cutch: Of Pegue 300 boxes were bought in at 50s., and of Singapore 500 boxes slightly mixed sold at 44s. per cwt. Gambier: There is a slight improvement in this market, and fair common qualities realise 20s. to 20s. 6d. Of Cubes 1000 baskets fine were bought in at 28s. per cwt.

TIN.—The great activity observable in this market at our last report has somewhat abated, but prices have not declined, Straits being still quoted at £85 10s. to £86 for cash or short prompt, and Banca at £89 per ton,

Digitized by Google

TOBACCO.—Java: Some of the recent importations have been placed at rates which will leave a loss to the shippers, our manufacturers declining to pay prices for this growth relatively higher than those current for others. Medium sorts, when offered at moderate figure, have been taken freely; a good demand still exists. Quotations 5½d. to 13d. per lb. Japan: The Georges has arrived with 500 bales, which will be offered in public sale during the present month. Manila: No supply or offers. Manila Cheroots and Cigars: Eligible sizes are freely taken, but there is no sale for heavy descriptions. Quotations, tobacco 8d. to 3s. 6d., cigars, 5s. to 7s. 6d. per lb.

MISCELLANEOUS.—Aloe Fibre: Of Manila 58 bales sold at £29 15s. to £31 10s., and 15 bales first-class sea-damaged at £31 per ton. Blacklead: Of Ceylon 188 barrels were offered, out of which 150 barrels sold, chiefly middling fair dust, at 8s. 6d. to 9s., good lump at 24s. Also 140 barrels lump middling hard at 17s. 6d., good at 23s., and 88 barrels very low dust (without reserve) at 1s. to 2s. 6d. per cwt. Ebony-wood: At auction 216 logs (14½ tons) Ceylon realised £5 15s. to £6 2s. 6d. per ton. Orchella: Of Ceylon 87 bags 26 half-bales were bought in at 45s. Preserves: Of China, 199 cases ginger sold at 11d. per lb. Rattans: Of Singapore, 1889 bundles sold at 2s. 7d. to 3s. 6d. per hundred. Sticklac: At auction 150 boxes Siam unsifted of fair quality sold steadily at 47s. per cwt. Sapanwood: 9 tons Siam and 9 tons Manila realised £10 per ton. Isinglass: The offers at auction were 8 cases and 6 bags Penang, about half of which sold—good pale tongue at 3s. 9d.; middling 3s. 3d.; ordinary 2s. 8d. to 2s. 11d.; medium leaf 3s. 6d. to 3s. 7d.; remainder was bought in at 4s. Soy: Of 30 casks China about half sold at 3s. per gallon.

LIVERPOOL MARKETS.—Cotton: China is quoted, fair 10½d., good fair to good 11d. per lb. Pepper: The sales have consisted of 60 bags Singapore black at 3½d., and 250 bags Singapore white at 5½d. per lb. Rice: Of Rangoon 4,100 bags medium realised 11s. 9d. per cwt. Sugar: An offer of 500 mats common unclayed Manila resulted in their sale at 17s. 3d. per cwt. Sapanwood: Of Siam 27 tons sold with all faults at £9 17s. 6d. to £10 per ton.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £5 15s. to £6; nail rod, £7 10s. to £8; hoops, £8 17s. 6d. to £9; sheets, single, £9 17s. 6d. to £10; Staffordshire bars, £8 to £8 10s.; rails, £5 15s. to £6.

STEEL.—Swedish keg, £15 15s. to £16.

COPPER.—Sheet and Sheathing, £87 to £91 per ton; yellow metal, 7½d. to 7½d. per lb.

TIN.—£90 for block; £91 for common bars. Tin plates, best charcoal I. C., 32s. to 33s.

LEAD, &c.—English pig, W.B., £22 5s. to £22 10s.; shot, patent, £23 10s. to £24; sheet, £21; spelter, £22 to £22 5s.; zinc, English sheet, £28; quicksilver, £6 17s.

The following is from the Circular of Messrs. French and Smith:—

We had a moderate business in metals during the past month, but larger transactions might have been anticipated, considering the easy money market and the low prices ruling of all metals of importance. Iron: The Welsh makers have been short of orders; Bars are veryquiet; a few specifications of rails have been given out, principally for the United States. Scotch Pig is without animation, and we quote Warrants 54s.; Calder, No. 1, 61s. 6d.; Gartsherrie, No. 1, 67s.; G. M. B., No. 1, 54s. 9d. Copper: We commenced the year with the official quotation of £86 for Tough Cake, and although there has been no declaration of reduction, yet practically the price has ruled between £82 and £84. Ores have been in good demand, and since the arrival of the Chilian mail 15s. 6d. per unit has been paid. If this price is to be maintained for Ores, £86 per ton for Tough Cake will scarcely bring the Smelters home. We quote to-day: Burra £87; Wallaroo £86; Chili Slab £77; English Tough £84. Tin: The improvement we noticed in the early part of last month in the price of Tin promises to be maintained. We had a slight check a week or ten days since in the demand, especially for Foreign, and in consequence a few small parcels were sold at rather lower rates, but since the publication of the Dutch returns the quotation in Holland has improved to 52½ to 53 guilders—equal to £92 to £93 here. Our price, however, has not advanced as yet to this figure. We quote to-day: Banca £83, Straits £86. English steady, at Smelters' quotations. We give the usual statement of stocks here and in Holland for three years. Tin Plates: Have continued in steady demand during the month; but there has been the last week or two some slight falling off in the inquiry from the United States. The shipments last month were 90,000 boxes, against 95,000 boxes January, 1866. Lead has been very quiet lately, and prices have receded in consequence. A little more activity is noticeable the last few days, owing to an order for Government. Spelter is steady, and there is a little inquiry for India.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

Notwithstanding the recent numerous arrivals, we have no material alteration to note in outward freights.

Current rates of freight for vessels on the berth:—To Yokohama 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £45. For Singapore: £34. For Shanghai: £53. For Saigon: £50. For Yokohama: £50. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong: £2 2s. For Singapore: £1 12s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

Digitized by Google

The Admiralty have invited tenders for the conveyance from the Thames to Trincomalee, of 90 tons measurement, navy provisions, and 1 ton measurement, medical stores; and to Hong Kong of 17 tons shot and shell, 27 feet combustibles, and 5 tons measurement presses, tools, &c.

The Norwood from London, and the Zenobia from Liverpool, have been accepted for the conveyance of troops to Singapore.

CASUALTIES.

The Ortelius, Groote, which arrived at Texel, Jan. 30, from Batavia, had encountered heavy weather, off the Western Islands, during which she lost some sails, had several deck beams burst open, and received other damage.

MISCELLANEOUS.

At TABLE BAY.—Dec. 30, Jessie Jamieson, West, from Batavia; Jan. 1, Charlotte, Peterson, from Manila, for Falmouth.

At PORT ELIZABETH.—Dec. 16, Don Ricardo, Jeffrey, from Hong Kong.

The *Dunmail*, Capt. Peter Thompson, which arrived in the Downs on Feb. 2nd, left Foochow Oct. 24 and Anjer Nov. 28. The passage from Foochow is very good, being only 101 days, but the passage from Anjer, 66 days, is a most extraordinary one. It has been done on the outward passage by H.M.'s *Vindictive*, the *John o'Gaunt*, and the *Cairngorm*, in even less, but 70 days is always considered an extreme clipper passage. The owners of the *Dunmail* are Messrs. Bushby and Edwards, of Liverpool, and the builders were the Workington Company.

Telegraphic advices have been received from Hong Kong that the clipper *Ariel*, Capt. Keay, owned by Messrs. Shaw, Lowther, and Maxton arrived on Jan. 5, having left London Oct. 13, and the Start on the 15th being only 82 days, which stands unprecedented for the time of the year, the North-east monsoon. The *Vindictive*, *Dumfries*, and *Chrysolite* have done it in 87 days in the South-west monsoon.

THE steamer *Tai-wan*, Captain Roper, which left Falmouth on the 2nd instant for Hong Kong, put into Ferrol, Spain, on the 9th through stress of weather.

SOLID MAHOGANY FURNITUREFOR INDIA, CHINA AND THE COLONIES.

HEAL and SON are Manufacturing, ESPECIALLY FOR use in EXTREME CLIMATES BEDROOM FURNITURE, which is entirely Free from Veneer. A general Assortment always in Stock.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C Sole Manufacturer.

HOLLOWAY'S OINTMENT.—THROAT AFFECTIONS.—All the varieties of these distressing complaints may be readily and effectively treated by rubbing this Ointment twice a day upon the neck and chest, and supporting the strength by suitable nourishment. By this simple means, diphtheria, ulcerated and relaxed throat, irritation of the windpipe, quinsey, and all glandular enlargements will have their progress arrested, and the destruction they have caused repaired. Holloway's Ointment is the most trustworthy remedy for all intern l and external throat ailments, and may be safely and effectively employed in every case, without regard to season, sex, age, or constitution. It is highly extolled for its ready cures of spasmodic coughs, chronic hoarseness, and all disagreeable discharges from the throat and nose.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

PROSPECTUS.

The successful submergence and raising of the Atlantic cables open up to the public mind a wide field for commercial enterprise, the long vexed question of the practicability of establishing electric telegraphic communication between far distant points being thus satisfactorily solved; whilst the high tariff rates incident to the costly cables already laid, the amount of capital sunk and route adopted, only point to the great public advantages to be obtained from a healthy competition.

The results of the working speed of transmission through the Atlantic cable prove that the estimate hereinafter stated may with confidence be relied upon; whilst the large amount of income received by the existing Company, even at the high rate of £10 per message, shows what may reasonably be expected at the moderate charge which this Company will adopt. The newspaper press alone would furnish a large and constant revenue which could never be obtained at the high price of ten shillings for a word of five letters.

Experience proves that the scientific and commercial success of an ocean telegraph must depend on three considerations—1st, the nature and construction of the cable; 2nd, the expense attendant on its working; and, 3rd, the tariff or cost of transmission.

This Company has secured the exclusive right to use the well-known cable and system of deep sea telegraphy perfected and patented by Mr. Allan, which effect a saving of about one-third on cost of construction, with extra working powers, on the following terms, viz.:—A charge of 5 per cent. on the capital of the Company, with a deferred royalty on profits of 10 per cent., one-half only to take effect when the nett profits exceed 10 per cent., and the remainder not to take effect until profits exceed 20 per cent.

The cable, from its peculiar principle of construction, smallness of bulk and weight (only one-fourth that of the Atlantic), renders the carrying, submerging, and raising it for ocean depths and distances a simple mechanical operation, without risk of injury to its electrical integrity.

The physical elements of this cable, therefore, admit of the selection of a route that enables the line of communication to be most cheaply constructed and productively worked, thereby permitting the adoption of a tariff so low that it not only encourages traffic, but no other scheme of transatlantic communication at present known can in any way compete with or impair the commercial value of this Company, the object of which is to establish a cheap telegraphic communication between London and New York by submarine lines from Falmouth to Halifax, Nova Scotia, thus organising direct communication between Great Britain, the Canadas, and America generally, and entirely avoiding the land lines through Newfoundland, which have already been the cause of such frequent interruption to the telegraphic communication between the two continents.

The distance from Falmouth to Flores, one of the Azores, is about 1,250 miles, thence to Halifax about 1,350, and that from Falmouth to Halifax direct 2,400 miles. The expected increase of traffic consequent on the reduced tariff adopted by this Company will in all probability render it necessary to lay a second cable next season, with extensions to Bermuda and the West Indies.

A capital of £600,000 will be sufficient to complete the communication to Halifax, including an ample allowance for all contingencies; and the following is an estimate of what may be calculated upon as a return for that outlay:

Estimating the charge for a message, not exceeding 20 words, from London to Halifax at £4, and the power of transmission at the low rate of 400 words per hour, and assuming 300 working days, of only fifteen hours each, the aggregate receipts for the year would amount to	£360,000
Less working expenses, cost of management, and royalty	60,000
	£300,000
Deduct 20 per cent. to form a reserve fund ...	60,000
Upon this low estimate of traffic, a nett profit will be available for dividend of	£240,000

It must necessarily follow that this Company being able to adopt a much lower through tariff than the Atlantic Company, would always command preferential and full employment—with ample margin to reduce the tariff as the traffic increases.

A provisional contract has been entered into for the manufacture of the cable, delivered on board.

Prospectuses and Forms of Application for Shares can be had at the Offices of the Company, or at the Broker's, where the Articles of Association may be inspected.

FORM OF APPLICATION FOR SHARES.

To the Directors of the British and American Telegraph Company (Limited).

Gentlemen,—I request that you will allot me shares in the above Company, subject to the Memorandum and Articles of Association, and I hereby agree to become a member of the Company in respect of such shares, or in respect of any less number you may allot me, and to pay on allotment the deposit of £2 per share thereon, and I request that my name may be placed on the register of members for the shares so allotted.

The Bank negotiates and collects Bills and grants Drafts payable at its Branches and Agencies, and issues Letters of Credit and Circular Notes.

The Bank will undertake the Agency of parties connected with India and China, the Purchase and Sale of Indian Securities, the Safe Custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys.

The Bank receives money on Deposit, on which Interest is allowed according to the length of time deposited.

Particulars as to Rates, &c., can be ascertained on application.

65, Old Broad-street, London, E.C.

CHARTERED BANK of INDIA, AUSTRALIA, and CHINA.

HEAD OFFICE—HATTON-COURT, THREADNEEDLE-STREET, LONDON.

Incorporated by Royal Charter.
Paid-up capital, £800,000.

COURT OF DIRECTORS, 1866-7.

CHAIRMAN.
THOMAS ALEXANDER MITCHELL, Esq., M.P.

John Allan, Esq. | Thomas Lancaster, Esq.
James Fraser, Esq. | Wm. Macnaughtan, Esq.
John Jones, Esq. | Joseph R. Morrison, Esq.

LONDON BANKERS.
The Bank of England; the City Bank.

BRANCHES AND AGENCIES.

Bombay,	Rangoon,	Hong Kong,
Kurrachee,	Singapore,	Shanghai,
Calcutta,	Batavia,	Hankow.

The Corporation buy and sell, and receive for collection, bills of exchange, payable at the above named places, issue letters of credit, undertake the purchase and sale of Indian Government and other securities, hold them for safe custody, and receive interest or dividends as they become due.

Deposits of money are received for not less than 12 months, bearing interest at five per cent. per annum, and for longer periods at a higher rate.

TUPPER AND COMPANY.

MANUFACTURERS OF PATENT GALVANISED IRON, in Sheets, Tiles, Iron Roofs Sheds, Cisterns, Pails, Gutters, Wire for Fencing, &c.
WORKS AT BIRMINGHAM AND LONDON.
OFFICES—61A, MOORGATE-STREET, LONDON.
Merchants' orders executed with despatch.

THE CHINESE COMMERCIAL GUIDE.

CONTAINING Treaties, Tariffs Regulations, Tables, &c., useful in the trade of China and Eastern Asia, with an Appendix of Sailing Directions for those Seas and Coasts, by S. WELLS WILLIAMS, LL.D. Fifth Edition.

Hong Kong, SHORTREDE and Co.; London Agent, F. ALGAR, 11, Clement's-lane, E.C. Price Two Guineas.

HONG KONG AND SHANGHAI BANKING CORPORATION.

NOTICE IS HEREBY GIVEN, that the Company having complied with all the requirements of the Hong Kong and Shanghai Banking Ordinance (No. 5, of 1866), have now become and are a corporation thereunder, and their business will from and after this date be conducted under the style or name of the "Hong Kong and Shanghai Banking Corporation."

"The Hong Kong and Shanghai Banking Corporation (Limited)" having ceased to exist, shareholders are now liable for twice the amount of their shares, as is more particularly set forth in the said Ordinance."

For convenience sake, the bills, deposit receipts, notes, and all other documents and engagements whatsoever, bearing the name of the late Company, may be retained, and continue to circulate in their present form as in accordance with the provisions of the said Ordinance, the corporation assume and take over all liabilities, contracts, and obligations of the Hong Kong and Shanghai Banking Company (Limited).

By order of the court of directors,
(Signed) V. KRESSER, Manager.
Hong Kong, Dec. 20, 1866.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

NOTICE.—The undersigned have this day established a BRANCH of BUSINESS in BATAVIA, in connection with their Penang Firm, under the style of LORRAIN and CO., and its management will be under the care of Mr. Wm. Lorrain Hill and Mr. James G. Wilson, the latter signing per procuration.

WALTER SCOTT LORRAIN.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club)

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.
(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.

ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.
(The Morning of the Mail's despatch.)

PRICE.—To Subscribers to the Weekly issue, 8 dols to Non-subscribers, 12 dols. Single copies, 50 cents.

ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

A. SHORTREDE & CO.
Hong Kong, May 17, 1866.

GRANT'S TRANS-MONGOLIAN TELEGRAMS.

VIA KIACHTA.

This line, which has for its object the most rapid transmission of Telegrams between Shanghai and Europe and *vice versa*, was organised in the spring of 1866, and although during the first two months it did not realise the expectations of the projector, who proposed to forward messages between Europe and China in 12 days, yet, considering the fact of its being a new scheme and one subject to many difficulties at first, it is satisfactory to know that all the Telegrams despatched from Shanghai for London have invariably during the last three months reached their destination long before those forwarded *viâ* Galle, and the fact, which is patent to all the large mercantile houses of Shanghai, that many thousands of pounds have been saved by the earlier Telegrams which have been transmitted by this line, is a sufficient proof of its sound and practical utility.

Until recently the undertaking was a monopoly to the original subscribers, who received their private communications by this service long before the public.

The Projector having made a proposal to the original subscribers to take over all their interest in the line and pay up the whole of the outlay, a general meeting was held, at which it was unanimously agreed to accede to the proposal.

THE LINE IS NOW THROWN OPEN TO THE PUBLIC.

There are employed in the service of Grant's Trans-Mongolian Telegrams—280 Ponies, and 40 Couriers. With Agencies at Kiachta (the residence of the Manager), Urga (the Capital of Mongolia), Kalgan or Chang-kia-kow (at the Great Wall), Tien-tsin, and Shanghai.

The days of despatch from Shanghai are advertised in the *North China Daily News*. Express Telegrams may be despatched by any steamer.

Telegrams for China by the regular weekly courier must be despatched from any Telegraph Station in Europe every TUESDAY, addressed "GRANT, KIACHTA." Express Telegrams may be sent on any day of the week.

Charges from Shanghai to Europe and from Kiachta to China :—

REGULAR COURIERS.

Twenty words	Tls. 15
Thirty words...	20
Forty words ... ... —	25

And for every Ten words in addition Tls. 5 extra.

EXPRESS COURIERS.

Twenty words	Tls. 150
Thirty words	155
Forty words	160

And for every Ten words in addition Tls. 5 extra.

Telegrams from Shanghai must be addressed thus :—

TELEGRAM (20) WORDS
GRANT, KIACHTA.

If Express, the word "Express" must be written on the Envelope. Telegrams from Europe must be addressed "Grant, Kiachta." If Express, "Grant, Kiachta, Express."

Courier charges to and from Europe must be paid in China to Messrs. Hall and Holtz, Agents, Shanghai, or to Messrs. Fergusson and Co., Agents, Tien-tsin. Mercantile houses in Japan, Hong Kong, &c., must appoint Agents for the reception of their Telegrams at Shanghai, or Tien-tsin.

SUBSCRIPTIONS FOR 1867.

Annual Subscribers from Europe to China	£120 stg.
Annual Subscribers from China to Europe	100
Annual Subscribers from Europe to China and China to Europe	200

These rates are exclusive of Express Couriers and Telegraph Charges, viz. :—Twenty words, 7 roubles or Tls. 2.50 Shanghai Sycee; and for every ten words extra, Rs. 3.50, or Tls. 1.25 Shanghai Sycee. Annual Subscribers have the privilege of sending Telegrams of any number of words to any *one* person or firm; the name and address of such person or firm must be given on payment of subscription. If an Annual Subscriber or his Agent publishes in any newspaper, or allows the contents of any Telegram to be made public without the special consent of the unde signed, the said Annual Subscriber shall forfeit his subscription.

Telegrams may be despatched from Europe from Tuesday, 19th February, to Tuesday, 19th November, inclusive. From Shanghai, on the departure of the first steamer to Tien-tsin, till the freezing of the river Peiho.

C. MITCHELL GRANT,

List of Passengers.

PASSENGERS OUTWARD.

Per French steamer Said, from Marseilles, Feb. 19.—To Shanghai: R. Scheibler, Esq.

Per P. and O. steamer Delta, from Southampton, Feb. 20—To Ceylon: Ensign James, Mr. T. H. Taylor, Mr. E. Giles. To Hong Hong: Vice-Admiral Keppel's Secretary and Flag Lieutenant, Mr. and Mrs. Oxley and four children, Mr. W. A. Payne, Mr. H. E. Woodhouse. To Shanghai: Mr. E. Hewett, Mr. W. Dorling, Mr. A. Hutton. To Singapore: Capt. A. R. Ord, Capt. Kirk.

From Marseilles, Feb. 28.—To Ceylon: Mr. P. W. and Mrs. Braybrooke, Lieut. Partridge, Mr. H. B. Ewald, Mr. Armstrong. To Hong Kong: Vice-Admiral the Hon. Sir. H. Keppel, K.C.B., Mr. H. B. Walker, Mr. J. Ferguson, Mr. W. Newman, Mr. A. Andrews, Mrs. Jackson, Mr. E. C. Smith, Mr. T. K. Ashton, Mr. R. Parr (*via* Bombay), Mr. Pemberton. To Shanghai: Mr. J. B. Hallam, Mr. P. Maclean, Mr. B. A. Mouilleseaux. To Singapore: Mr. John Brinkmann, Mr. R. B. Read, Surgeon-Major J. Rose, Mr. Ernst Krimpers.

Per P. and O. steamer Ripon, from Southampton, Feb. 27.—To Hong Kong (*via* Bombay): Capt. and Mrs. Gillson.

Per P. and O. steamer from Southampton, March 4.—To Hong Kong: Mr. Percival, Mr. H. G. Howlett. To Ceylon: Rev J. S., and Mrs. Jones and child, Miss Claughton, Miss Paterson, Mrs. Fyfe, Mr. B. T. Dowbiggin. To Singapore: Miss Robertson.

From Marseilles, March 12.—To Shanghai: Mr. W. Howie, Mrs. Winchester, Mr. A. M. White.

Per P. and O. steamer, from Solon, March 20.—To Shanghai: Mr. A. C. Margary, Mr. B. C. G. Scott, Mr. H. A. Giles, Mr. W. N. Abdy, Mr. P. Warren. To Singapore: Mr. and Mrs. Meldrum.

THE INCOMING MAILS.

As the next inward mails, with dates from Hong Kong to Jan. 15, will in all probability not be delivered until the 2nd March, we publish an extra number to-day, containing various items of news relating to the Far East (including shipping, market reports, &c.), which would by that time have in great measure lost their interest.

The P. and O. steamer *Surat* arrived at Suez on the morning of the 16th instant with the next inward mails from China, &c., and they will be conveyed by the *Poonah* from Alexandria. This vessel did not, however, leave Malta until the 17th, and cannot arrive at Alexandria until the 21st. Consequently, the mails and passengers will be again detained five days in Egypt. Surely the P. and O. Company will put an end to this unsatisfactory arrangement without waiting for the new contract.

LATEST TELEGRAMS.

(BY OVERLAND TELEGRAPH FROM GALLE.)

HONG KONG, FEB. 1.

Tea: Export for season, 105,125,000 lbs. Exchange on London: Bank bills, at 4 months' sight, 4s. 5d.

SHANGHAI, JAN. 25.

Silk: No. 3 Taatlees, 580 taels. Total export to date, 35,250. Exchange on London: Bank bills, 4 months' sight, 6s. 1d. Freights: Tea, £2 to London.

SHIPPING TELEGRAMS.—The steamer *Corea* (being the second of that name lost in China) has been wrecked on Breaker Piont. The powder hulk *Zephyr* and the Bremen schooner *Themis* have been blown up in Hong Kong harbour. The *Lady Louisa*, from Shanghai to New York, got ashore in Straits Sunda and put into Batavia. The *Glenclune* has arrived at Yokohama, the *Borealis* at Shanghai, and the *Shunlee* at Hong Kong.

Advices from Japan state that an agreement has been signed for a new settlement at Yokohama.

THE TROOPS FOR SINGAPORE.

IN a previous issue we announced that certain troops were about to be despatched to Singapore, and that the tenders for their conveyance by the *Zenobia* and *Norwood* had been accepted. We now learn that their departure is countermanded, ostensibly on account of the season of the year being unfavourable; but the real reason is, we understand, a disagreement between the Horse Guards and the War Office as to the dispatch of the troops. A very pretty quarrel this, for which of course the public will suffer. The Admiralty simply fulfilled the orders of the Horse Guards in inviting and accepting tenders, but the owners of the *Zenobia* and *Norwood* will doubtless claim compensation from that department for their detention and loss of contract, for the Admiralty would assuredly have compelled them to atone for any breach of agreement they might have committed, and it is not to be supposed that ship owners will allow themselves to be played with like shuttlecocks among the different departments of Her Majesty's Government. With regard to the time of year, the Horse Guards authorities seem to have imbibed the notion that Singapore must necessarily be included in the same category with Hong Kong; whereas all who are practically acquainted with the two places know that the climates are as different as possible, and that what would be a bad season at one is not necessarily so at the other. The sooner the relative powers of the War Office and the Horse Guards are clearly defined, the better it will be for the public service.

THE KIACHTA TELEGRAPH SERVICE TO CHINA.

ON another page will be found the prospectus of this service, which now affords the safest and most expeditious medium of communication with China. It will be open to the public tomorrow, and will be available for outward messages until the 19th November.

IT is intended that the Annual China Dinner, which has now become a recognised institution, shall take place this season (as it did last) during the Derby week. We understand that Major Brine, who as honorary secretary has hitherto arranged all matters connected with it, is now forming a strong committee to act with him.

IN reference to the proposed new postal service to India and China, we observe that H.M.'s Government has given notice to the P. and O. Company to terminate the present yearly contract, as a preliminary step.

THE launch of the screw beam engine steamer, built on the Clyde by Messrs. Napier and Co., under the superintendence of Captain Castilla, for Messrs. Jardine, Matheson, and Co., took place on the 16th. She was christened the *Lamont*.

THE decision previously given in the case of the Asiatic and Agra Banks has been reversed, and the claim of £6,000 on account of Dickson, Tatham, and Co. is allowed.

THE LATE COLONEL NEALE.—Colonel Neale, whose death was recorded in our last issue, was Secretary of Legation in China from 1860 to 1862, and Charge d'Affaires in Japan from 1862 to 1864. He wa with Sir Frederick Bruce when the British Legation was first established at Peking; was in charge of the Legation at Yedo, when the murderous attack was made on it in 1863, and was present at the battle of Kago-ima. He was made a C.B. in 1863. At the time of his death he was Charge d'Affaires at the Republic of Ecudor, where he is succeeded by Mr. F. Hamilton, Secretary of Legation at Stockholm.

TRIAL OF THE S.S. "HAYO-MARO."—On the 7th instant this fine twin-screw steamer left Cubitt Town moorings for Gravesend, and on the 8th proceeded to try her speed at the measured mile. The result of the trials gave an average speed of about 15 knots, the engines making 125 revolutions per minute. This must be considered highly satisfactory as there was a gale blowing at the time. The *Hayo-Maro* was built by Messrs. Dudgeon, of Milwall, and was originally designed for a blockade-runner. She has now been refitted with great care to adapt her for the China and Japan coast trade, and will shortly sail from Cardiff for Yokohama, calling at intermediate ports, under the command of Captain Carnes. She proceeds to the consignment of Messrs. Textor and Co., of Japan, and will doubtless prove one of the fastest and most comfortable steamers in those waters.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

The Second Chamber of the States General assembled on the 12th instant, and the discussions were at once opened upon the definitive budgets, now that the Ministers at last have answered the section reports upon the different chapters. These papers are very interesting, but very voluminous; so that I am obliged to mention only the principal facts and promises. The general political contemplations may be passed over. They are not only very short, but they relate only to the Constitutional questions that lead to the dissolving of the Second Chamber. The Ministers of course defend themselves against the censure of their measures, and they insist that the past ought to be forgotten, and that the Opposition must seek its force in the measures and Bills that will be proposed by the Government.

According to the promise of the Minister of Justice, the Military Code will be partly revised, a new Bill about the redeeming of the right of tithing will be laid before the members, a new police-law put in operation, a commission appointed to examine the improvement of the law relating to public notaries. The Minister is also busy with a scheme of a new penal code and as far as possible revoking laws of foreign origin that are still in force. He states further that it is not his intention to abolish capital punishment, this measure not being advisable without the total revisal of the whole code now in force.

A great many pages are filled up by the Minister of the Marine department with a description of his system; of course it is impossible to reproduce these reasonings here. His principal aim is the defence of our coasts, river mouths, and colonies; without giving up the idea of an active marine he gives the assurance that there will always be plenty of seamen for the equipment of the several men of war, the more now that only two hundred men are necessary for the ironclads and monitors instead of five hundred men for the steam frigates. The minister thinks it necessary to construct fortresses at Texel, Nieuwe Diep, Durgerdam, &c. He asks further a credit of 6,175,000f. for the construction of three monitors and for three first-class ironclads, which are to be armed with Woolwich guns of 9½ inch bore, for which a further 240,000f. is wanted. Notwithstanding the India marine will in future belong to a particular administration, he wishes to have but one corps of maritime soldiers. The minister desires also that the ironclads be built in this country, not only that we may have the free disposal of the ships under all circumstances, but because the Government has already experienced difficulties with foreign shipbuilders; the iron and steel plates, however, will be ordered abroad. The Government wharfs at Flushing will be removed to Amsterdam.

The smuggling treaties with Prussia and Hanover having expired, our Government is in course of negotiation with Prussia for a new treaty. Negotiations with England about an extradition treaty are not to be opened before there are proofs that such a treaty will be concluded between France and England. Notwithstanding the war that prevailed in Japan the Government had the pleasure to receive good news as to our commercial relations with that country. The Minister denies that our Consul-General in Japan is a tradesman or an agent of the Dutch Trading Company, so that thereabout no complaints can be made. As to the remark that the indemnification paid by the Japan Government for the expedition in the Straits of Simonoseki should not be divided in equal parts, so that our Government should have received a too small amount of that sum, the Minister denies this, and declines to propose to the States-General to indemnify private persons living at Japan for losses which they might have experienced by that expedition. The Minister does not deal with the wish of some members of the States-General that our *corps diplomatique* ought to be abolished, but he thinks it necessary that our *corps consulaire* should be re-organised.

I need scarcely say that the last measure of the Minister of the Colonial Department, viz., the abolition of the alternate charterings of vessels (built in Holland) for conveying produce from the East Indies to our harbours at a very high and fixed rate for account at the Government, created much sensation here, because the monopoly of our shipowners was totally annulled. Not only the Government will profit by the lower freights when this year will have elapsed, because only those ships will be chartered whose owners subscribe the lowest rate, but also those vessels that are built abroad and bought by Dutch houses may become concurrents. Even the Liberal Government that preceded the actual Cabinet hesitated to apply this measure which was proposed by four Rotterdam shipowners some years ago.

For three years some Dutch traders have complained to the Government, stating that they experienced heavy losses by the war between England and Japan in 1863. They assert that the Dutch Government has no force in that country for the protection of the Europeans living there and their valuable merchandise, so they were obliged to engage, for their own account, shipping room to save their goods. The Minister Cremers declined to grant indemnifications or to ask them from the Japanese Government, because the losses did not issue by any unjust act of that Government. When Mr. van Zuylen succeeded Mr. Cremers they again asked for an indemnification of f.158,537,50, but he also declined to make a proposal of that kind to the States General. But now the Amsterdam and Rotterdam houses have addressed themselves direct to the Second Chamber of the States General; they fully explain their grievance, and request that one of the members will take the initiative for this step, because the Minister declines to do so. In the meanwhile they ask that a pro-memoria post will be brought upon the budget of 1867.

The memoir of the Minister for the Colonial Department is of high interest, because the Minister gives at last positive explanations about his policy, which is as Conservative as possible. He states his plans as follows:—He wishes to maintain in a conscientious way the existing laws, to enforce a more extensive system of education for Europeans and natives, to regulate the distribution of grounds so as to enlarge private industry; to improve the justice and police laws; to maintain public order; and, lastly, to adopt all such measures that will tend to improve the welfare of our colonies. With regard to the Government cultures he thinks that any alteration would prove to be premature and dangerous; the Minister has taken the necessary measures to prevent these cultures being decreased or prejudiced, and is of opinion that it would be a true disaster for the Javanese if the Government should give them the right of possessing landed property. The personal services of the natives (*heerediensten*) are, according to his opinion, gradually to be decreased, which at last must lead to a total abolition. The expenses in behalf of India cannot be decreased, but he declines to abolish taxes which now are in force. A Bill to increase the salaries of the India heads will at once be laid before the House. The plans to construct a telegraphic communication between Batavia and Singapore in connection with Rangoon, and also between Java and Australia, have failed. A Dutchman has now communicated to the Government his plans for the construction of a European-Asiatic telegraphic system, but particulars are not yet known. In the meanwhile the Government is anxious to extend telegraphic communication to Java and Sumatra. The punishment of natives by flogging with canes will, as much as possible, be decreased.

The receipts from the Colonies on behalf of our treasury are estimated for the year 1866 as follows:—

	Piculs.	Total Proceeds.
Coffee	798,599 ...	f.34,797,597·16
Sugar	749,381 ...	10,602,214·01
Tin	117,286 ...	6,257,050·38
Indigo	4,440 ...	2,200,119·62
Cochineal	18	4,235·98
Tea	7,453 ...	508,075·35
Spices and different articles ...	— ...	730,707·50
		f.55,100,000·00
Profit on insurances		550,000·00
		f.55,650,000·00
The expenditure during that year is estimated at ...		32,150,000·00
So that the net profits will be		f.23,500,000·00

From the memoir of the Minister of the Home Department I only derive that the quarantine laws are to be altered, that a law will be laid before the members to regulate academical instruction, that the pawnbrokers' shops will be regulated by a new law, that the costs of telegraphic despatches will be decreased, that a new poor-law is in construction, and that the patent rights will be maintained by this ministry.

The memoir of the Minister of War states that within a very short period 40,000 rifles will be altered into breach-loaders, and that 2,000,000 cartridges will be ready at the same time. The cost will be 8f. per rifle, and for the cartridges 2½c., so that an extraordinary credit of 624,650f. is demanded. It is not yet decided which system will be preferred for buying new rifles, but so much is certain, that another 30,000 rifles are wanted, which perhaps may be bought at 40f. each.

The Trading Company has published a very important resolution of the Minister of the Colonial Department, regarding the chartering of ships for conveying produce from the East Indies to Dutch harbours, and by which it is fixed that from the beginning of the year 1868 the alternate charterings of the East Indiamen will be abolished, and likewise the fixed rate of freights of 110f. and 105f. per last. From the said date the charterings will be made by public tender, and the lowest tender will be preferred. The tenders will be invited here as well as in India; four fifths of the required tonnage will be contracted for here and one-fifth in India. All the Dutch and Dutch-India vessels with a tonnage of more than 175 lasts will have the right of competing under the stipulations in the charter contracts of the Trading Company. Vessels built in foreign countries, but which are now navigating under the Dutch flag, are no longer excluded. Very important alterations are made also in the charter contracts, and likewise the shipbrokers' fees are abolished. I need not say that these measures, however liberal and just they may be, meet with much opposition by our shipowners, who are suddenly delivered to self-help, to which they are not accustomed at all. It was formerly customary for their ships, having returned from the East, with a cargo for the Trading Company, to wait in harbour until their turn arrived again to be chartered, and then a freight was paid of twice to thrice the rate of the open market. Even our Rotterdam owners object to this measure, notwithstanding they are obliged to applaud it, they calling themselves "Liberals."

According to the statistical returns of the cholera that prevailed here from the 21st April to the 1st December, 1866, the persons attacked were 31,655, of which number 19,490 died. The epidemic prevailed in 653 of the 1,135 communities, with a population of 2,698,448.

A good deal of sensation has been created here by the address forwarded to the Minister of the Colonial Department by thirty-seven of the principal traders of Sourabaya, in which address they protest against the "hazardous" policy during the last four years of the Government in India; further, they state their adherence to and their sympathy with the Conservative policy of this Ministry.

The rinderpest still prevails here in a very vehement manner. The attacks during the week ending 26th January amounted to 3,251, against 3,886 and 4,392 in both the previous weeks. Notwithstanding the number of attacks is somewhat decreasing, the epidemic is spreading in such a frightful way that a special commission advised the Minister to slaughter the whole stock of cattle in the provinces that were attacked, and to burn the dead bodies, with the hay and straw of the farms, to destroy in that manner this frightful contagion.

In Amsterdam a new plan has been organised by Mr. W. C. Timmerman for enlarging that town, with new harbours, new embankments, and new piers, but the cost will amount to 20 millions. In the same town a gigantic brewery was opened some days ago, that will furnish us and our colonies with good and cheap beer; last, not least, I can mention about that town, that the lottery loan in behalf of the Crystal Palace, of 1,000,000 francs, was fully subscribed.

The report of the commission appointed for the re-organisation of the Military Academy at Breda is ready; the new Governor, Schonstedt, has already entered upon his functions.

A terrific gale prevailed here last week, by which the American [ship *Addison*, Captain Sloan, was totally lost. This ship arrived on our coast with a valuable cargo from Batavia, and was bound for Amsterdam. She foundered near the Noorder Haaks (Isle of Texel). The captain, mate,

Digitized by Google

and four men were saved by the lifeboat; twenty-three men, amongst which the wife and child of the captain, were drowned.

A telegram that was received here from Batavia (via Point de Galle), states that a fearful fire has prevailed in Palembang, by which two tobacco booths were destroyed. It is said that the damage done amounts to 200,000 francs, but undoubtedly this sum is overrated.

The Budget for 1867 shows a deficit of 6,961,028 francs.

The second iron paddle steamer *Timor*, destined for the service in the East Indies, has been launched with good success at the ironworks of Feyenoord. This steamer will be provided with engines of 200-horse power.

According to the last official returns about the rinderpest, there were attacked in the week ending the 2nd inst. 2,617 head of cattle, against 3,251 and 3,900 in both the former weeks.

In several parts of our Kingdom there is such an abundance of water, that it is feared that fearful inundations will occur.

COMMERCIAL.

COFFEE.—Before the auction of the Trading Company was known there was a very active demand for the consumption and good ord. was willingly paid with 42 to 42½c. A good deal of indignation has been created by the new stipulations on which the Trading Company will sell in future, and by which it is appointed that no samples will be given, but that the parcels may be *seen*, during the five days before the auction. The brokers will publish some days before the auction the descriptions, taste and valuations of the parcels. Undoubtedly these measures only are taken on advice of the brokers who wish to maintain themselves in that way and in favour of the first hand, because it is for the second hand and grocers made impossible to expose themselves to such an hazardous buying; they have no rights for claims at all, even should it be that green coffee should be delivered to them whilst they meant to buy brown sorts, and paid for this quality. Generally these stipulations are severely condemned. The Trading Company has held its auction of 172,498 b. Java and Padang. The white sorts were paid with ½ to ¾ c. above valuation, whilst for the other sorts the valuation was paid in full. No. 1 was paid with 40½c. to 40½c., No. 2 with 40c., No. 3 with 42½c., No. 5 with 39½c., No. 80 with 45½c., and No. 102 with 45½c. All was sold, so that the measure to give no samples any more, which caused so many claims, has not badly influenced upon this auction. The private transactions only included 3,155 b. Padang ex Ione at 40½c. to 46½c., and 500 b. Padang ex Ramsey at 45½ to 46c.

ARRACK.—75 casks Sowia Caya ex Nornew were sold at 186f.; and 33 casks Batavia alcohol ex Lammina Elizabeth at 145f.

RAW SUGAR.—There was an active demand, and the following transactions are to be reported: 1,704 kr. Passaroeang, floating, per Jane Avery, No. 15, fine and very fine, 35½f.; 200 kr. Batavia, per Ramsay, No. 15½, very good, 35½f.; 256 kr. Samarang, per Dagmar, No. 13, very good, 33½f.; 553 kr. Passaroeang, per Ymuiden, No. 15, fine, 35½f.; 2,242 kr. Passaroeang, per Glenrosa, No. 18½, fine, 37½f.; 696 kr. Sourabaya, floating per Majestic, fine 35f. The above and other parcels were sold but no particulars transpired; consignees of floating parcels now decline to sell at the actual quotations. Refined sugar very firm. The unsold Trading Co.'s stock of Java raw sugar was on the 1st, 65,866 mats and 1,528 b., against 86,950 mats and 3,539 mats in 1866. There was also a stock on warrant of 49,004 kr. The private stock was 6,211 kr.

RICE.—The market is unaltered. 13,100 bales Java afloat, per Johanna and Emilie, were sold at secret prices.

SPICES.—Firm, with a good business done, and principally in mace. The quotation now is for D, 110c.; E, 107c. For nutmegs, No 1, is offered 86c., but holders decline to sell at that price, so that an advance of 1c. is demanded. Stock: Nutmegs, 4,906 casks; mace, 800 casks; cloves, 3,115 cases; cinnamon, 53 fard, on warrants. Unsold stock: Nutmegs, 301 casks; mace, 155 casks; cinnamon, 164 fa d.

TEA.—The cargo arrived from Foo-chow-Foo per Monarchy will be offered for sale on 21st March.

DRUGS.—CAMPHOR.—The market is not so active, but holders demand 87c. for China and 88c. for Japan. Cassia Vera with a good demand—534 b. ex Ione and 475 b. ex Ramsay, both at secret prices. Nothing can be bought now under 38¼ to 39c. for fine Tigablas. Gummi Damar with an active demand; fine quality is paid with 42c., but floating parcels may be sold at 41c.

JAVA INDIGO.—There was an active demand, and 350 chests were sold at firm prices—26c. above October. The stock only amounts to 51 chests.

SAPAN WOOD.—20 tons Manila and 40 tons Bimas were sold at secret prices. Manila can be had at 7½f.

CUTCH.—Higher in price, and paid with 30f.

HIDES.—Since my last report 1,500 p. Samarang reindeer, ex Vyf Vrienden, were sold at secret prices.

MONEY.—The market has been generally dull, except for Austrian funds and some other favourites of foreign stocks, which have shown some firmness. In general, there was little business transacted. Dutch Two-and-a-Half per Cents., 55¾; Three per Cents., 65¾; Four per Cents., 87¼. Dutch Trading Company, 138¾. Spanish Two-and-a-Half per Cents., 31¼. Portuguese Three per Cents., 42. Russian Five per Cents., 93. Austrian Five per Cents., 47; Two-and-Half per Cents., 23⅜. United States 1874, 71⅛; ditto 1882, 76¼. Netherlands Indian Trade Bank, 79¾. O. J. Maatsch. van Lyfreute, 95. The Bank of Holland reduced its rate of discount on the 6th Jan. from 4 to 3½ per cent.

SHIPPING INTELLIGENCE.

ARRIVALS.—Hellevoet, Jan. 26: John, from Padang. Brouwershaven, Jan. 27: Mary Goddard, Hendrika, Scheuiningen, Ymuiden, from Batavia. Texel, Jan. 27: Three Gezusters, Insulinde, Noord-Braband, Bethevaer, Aria and Betsy, from Batavia. Brouwershaven, Jan. 29: Jason, from Batavia. Texel, Jan. 29: Peking, from Batavia; Doesbough, from Tjilatjap; Pauline Constance Eleonore, from Passaroeang; Belle of the South, from Samarang; Aquarius, from Batavia; Jan. 30: Ortelius, from Batavia; Dagmar, from Samarang; Jan. 31: Glenrosa, from Passaroeang; Hendrina, from Batavia. Brouwershaven, Feb. 1: Cornelis Gips, from Batavia. Texel, Feb. 1: Imperator Alexander II., from Batavia. Texel, Feb. 2: Dageraad, Joseph Willem, from Batavia; Slied echt, from Tagul. Zierikzee, Feb. 2: Alaria Anna, from Batavia. Texel, Feb. 3: Zeebloem, from Batavia. Zierikzee, Feb. 3: Kortenaer, from Batavia; Tayal, from Batavia. Brouwershaven, Feb. 4: Paul Johan, from Batavia; Whampoa, from Padang; Feb. 5: Jan. van Schaffelaar, Alaria Elisabeth, from Batavia; Feb. 6: General de Steurs, from Batavia; Jan. 28: Monarchy, from Foo-chow-foo. Zierikzee, Jan. 28: Grondwet, from Batavia. Texel, Feb. 7: Staatsraad van Ewyck, from Batavia. Zierikzee: Louisa Kroonprinses van Zweden, from Batavia. Texel, Feb. 8: Den Elshout, from Batavia. Brouwershaven, Feb. 9: Susanna, from Batavia; Brouwershaven, Feb. 10: Bulgersteyn, from Batavia. Brouwershaven, Feb. 12: Allegonda Jacoba, from Batavia. Texel: Nederland, Petronella Catharina, from Batavia.

DEPARTURES.—Hellevoit, Feb. 4: India, for Batavia, *via* Shields.

PASSENGERS INWARD.—From Java, per Noord-Braband: Messrs. Kach and Metselaar; per Scheveningen: Messrs. Kraayenhof and Bruynis; per Dageraad: Mr. Vetmenger; per Whampoa: Mr. Reesfanz. From Java, per Nederland: Mr. I. A. C. Enschut and family; Mrs. Nieuwenhuyzen; per Bulgersteyn: Mr. Barneveld and family; Mr. Warnaar; per den Elshout: Mr. Baron Clifford van Brengel.

According to the official returns about our commercial marine, there were floating on the 1st of Jan., 1867, 2,178 vessels, with a tonnage of 270,042 lasts, against 2,203 vessels, with a tonnage of 269,338 lasts, on the 1st Jan., 1866.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, FEB. 13.

The gentlemen on the other side of the Elbe have either no luck or do not understand the way to make money as shipowners, for several attempts made at Hamburg at different times have all signally failed, and now the Joint-Stock Shipowners Company, formed to monopolise the carrying trade to the Far East, has resolved to sell all their eight ships for what they will fetch, and then wind up the concern. The Hanoverian flag, under which they sailed, is no longer in existence, it having been abolished by Royal decree, signed by the King of Prussia on the 4th of last month, and all vessels of the former kingdom of Hanover, so suddenly and unexpectedly snuffed out, are ordered to wear the Prussian colours for the present.

Apropos de bottes, it is announced that the new flag for the North German Confederation has been decided on, and is to consist of three horizontal stripes—black, white, and red—this being a combination of the Prussian colours (black and white), with those of the Hanseatic cities (white and red), and will somewhat tend to enliven the hitherto painfully *triste* and lugubrious flag of Prussia. The distinguishing mark for the ships of war in addition to the usual pennant is not yet decided; some say it will be the Prussian eagle in the centre of the white field, others that a piece will be cut out as in the Danish and Swedish navies, but nothing has yet been officially published, and I do not believe anything is settled.

Herr von Brandt, the Prussian Consul at Yokohama, left Berlin last week to return to his post in Japan. On his arrival in Germany last year, on leave of absence for the benefit of his health, hostilities were just about to commence, and in his capacity of Landwehr Officer he repaired immediately to the seat of war, where he was appointed one of the aides-de-camp of General the Duke of Ujest, subsequently Governor-General of Moravia, and, after taking part in several of the great battles in Bohemia, went through the distressing period of the cholera, which swept off so many soldiers of the Prussian army. The senior aide-de-camp of the Duke fell a victim to the epidemic, and Herr von Brandt had a severe attack of it, from which he has only just recovered, having been obliged for a long time to use the waters of Schwalbach and Wiesbaden. He now returns to his civil post at the urgent request of the Germans at Yokohama, where he will probably be the future Minister.

The civil authorities at Altona call on all persons having claims on the late Captain Peter Heinrich Ahrenholdt, of the ship *Georg Andreas*, who was murdered by pirates in the China seas on the 26th of March, 1866, to send in their claims, accompanied by the needful vouchers, either personally or by letter, on or before the 9th of May next.

As the subscriptions in aid of the "National Invalide Institution" now amount to more than 252,000 dollars it is considered high time to take some steps towards its execution, and the King has now given his Royal consent to the deed authorising its constitution and containing the "statutes" or bye-laws for its regulation. The only alteration he made was a change in the name it is to bear, which is altered from the above into that of the "Victoria National Institution," a graceful compliment to his Royal Highness the Princess Royal of England, now Crown Princess of Prussia, as it was that exalted lady who originated the idea, and it was in consequence of her urgent representations that the Crown Prince issued his memorable proclamation from Brunn last summer, calling on all Germans everywhere to subscribe to the institution, which appeal has been so largely and cheerfully responded to in all parts of the globe. It is to be a sort of Chelsea Hospital, for the residence and support of military pensioners wounded and maimed in the late war. Among the latest contributions received is the munificent sum of 5,519 dollars, collected among the Germans at Hong Kong, including the proceeds of a concert given by the German Quartett Singing Club at that port, and I further notice a remittance of £316. 19s., collected by the Prussian Consul at Kanagawa from fifty-two Germans residing there.

The Hydographical Department at St. Petersburg has received intelligence of a dangerous reef being discovered in the Bay of Possiet, in the Sea of Japan, which had been surveyed and found to be in 42 deg. 34 min. north latitude, and 130 deg. 52 min. 4 sec. long. east of Greenwich. It is 6½ miles from the island of Tourojelm and 8¼ from Cape Ostreno. It is in the form of a triangle, and the greatest depth of water on it is only ten feet. It has been named "Klykow's reef," after its discoverer.

LAUNCH.—Messrs. A. Hall and Co. launched recently from their yard at Aberdeen a very fine clipper ship, constructed on the composite principle to class A1 at Lloyd's for 13 years, of 1,075 tons builder's measurement, and 1,014 tons register. The vessel was named the *Brucklay Castle*, and is intended for the Australian and China trades. She is the property of Messrs. Donaldson, Rose, and Co., and is to be commanded by Captain Smart, formerly of the *Benlomond*.

LONDON, MONDAY, FEBRUARY 18, 1867.

ANOTHER CHINESE FLEET.

WHEN the notable scheme elaborated by Mr. LAY, and carried out by the same gentleman in conjunction with Captain SHERARD OSBORN, came to an untimely end, we were disposed to prophesy that at least many years must elapse before a similar enterprise was again undertaken. The failure of the Anglo-Chinese expedition argued either the incompetency of the leaders or the ignorance and duplicity of the Chinese Government. Some were disposed to take one view, while many inclined to the other. It would seem, however, that Monsieur GIQUEL came to the conclusion that the fault lay in the mismanagement whereof either Mr. LAY or Captain OSBORN was guilty, and that the Chinese are capable of appreciating the advantage to be gained by acquiring a powerful naval arm. At any rate such is the deduction to be drawn from the conjoined action of MM. GIQUEL and D'AIQUEBELLE, both gentlemen well known by repute to those who are interested in the march of events in China. It will be remembered that M. D'AIQUEBELLE was the officer placed in command of the Ningpo Franco-Chinese contingent at the time when WARD was engaged in drilling a native force for action against the Taiping rebels in the neighbourhood of Shanghai. His services at that time were rewarded by large pay and various titles and decorations conferred upon him by the provincial authorities. M. GIQUEL has for many years been in the service of the Chinese Government, and strange to say, he has never had to complain of neglect or obstructive interference. The plan adopted by French officers employed by the Imperial authorities has always differed considerably from those in vogue amongst English officers in analogous positions. The former have invariably acted upon their own responsibility, have made up their minds to a course, and pursued it, trusting to success as an earnest of the approbation of the native officials. The latter have, on the contrary, claimed constant instructions, and by continual reference to the responsible Chinese officers have avoided even the appearance of aggression. It is easy to perceive which course was theoretically the more just, but it is also a fact that in practice the French system worked better than did ours. The French have been satisfied with a mere *locus standi*, and are content to leave the future to take care of itself; we demanded conventions, agreements and commissions, during the preparation of which the Chinese got tired of us. The practical success of French schemes was due to the principle of treating the Chinese nation as incapable of thinking or acting for itself; the moral beauty of ours lay in the scrupulous adherence they displayed to the rights of the Chinese as a Power equal to us in respectability.

But there are many other particulars in which the new scheme differed from the old. The first and most important was, that whereas Mr. LAY designed to supply the Chinese with a fleet ready made, M. GIQUEL proposed to teach them how to make one for themselves. Mr. LAY presented a set of very beautiful, very valuable, but rather expensive golden eggs; M. GIQUEL offered to supply the very goose that lays these treasures. Mr. LAY demanded vast sums to be laid out in English dockyards for vessels which, if disabled, would be obliged to return to England or to an English possession for repair; M. GIQUEL asked for a moderate sum to start a dockyard and foundry which, while supplying vessels and guns for Government use, would help by private engagements to pay the expenses involved. Again, the LAY-OSBORN expedition was essentially English, and could claim no support or sympathy from the other great Western Powers. On the contrary, it was calculated to excite jealousy and apprehension; for, as constituted, the Anglo-Chinese fleet was virtually an addition to the English force in China waters. To quote from the memorandum to which we have already alluded:—"OSBORN engages not to "attend to any order conveyed through any other channel than "through LAY, and LAY upon his part engages to refuse to be "the medium of any orders of the reasonableness of which he is "not satisfied." M. GIQUEL proposed that, in addition to the dockyard and arsenal, there should be a school for shipbuilding and a naval school, each to have thirty students, whereof those who attended in the former were to be taught French, and those in the latter English. The naval school was likewise to be under the management of Englishmen and Americans, who would thus share in all the details of the plan. Of course the general supervision would be in the hands of MM. GIQUEL and D'AIGUEBELLE, who as the originators of the proposal are certainly entitled to the highest posts. But it speaks eloquently for the far-sightedness of these gentlemen that their proposed institution is European in character—not exclusively French. It was proposed to build transports of about 600 tons burden, carrying four or six guns, with engines of 150-horse power; and 80-horse power gunboats.

So far, the new scheme for providing the Chinese with a fleet and dockyard of their own seemed promising enough, and until very recently there appeared to be a reasonable chance of its being successfully carried out. Tso, the Viceroy, was undoubtedly a warm supporter of the project, and caused a special appropriation of funds to be made for it out of the provincial treasury, 50,000 taels of which was received by M. GIQUEL "on account" before his departure for Europe. A Foochow correspondent writes in unqualified commendation of the undertaking, representing all circumstances as being highly favourable, and its accomplishment all but a certainty. But a correspondent at Hong Kong, whose sources of information we believe to be most reliable, takes quite a different view of the matter, and states that the scheme has been from the first disapproved by the Peking Cabinet, and that the VICEROY has been removed from his post in consequence of the support he has given it. Should this prove to be the case, M. GIQUEL's plan will simply be shelved as failure number two—for which the 50,000 taels "on account" may, or may not, be adequate compensation. We are far from wishing, however, that all attempts to provide China with a fleet should prove abortive. We have nothing to gain in keeping China degraded and powerless, but, on the contrary, we consult our own interests while we assist in fulfilling the destinies of nations, by raising her to a respectable position. She can never become too powerful for us, but she may be raised to such a position as will enable her to protect her own trade, and relieve England, France, and America of the responsibilities under which they now lie in view of the extent and importance of the European and American commercial relations with China.

THE CHANGES IN THE STRAITS GOVERNMENT.

NUMEROUS complaints reach us regarding the impending changes in the Straits Government, founded, not on the transfer from one department to another, but on the immediate removal of the Resident Councillors, whose experience and knowledge of the language and customs will, it is thought, be more than ever necessary during the transitional period that must elapse before the new Governor and his staff can become quite *au fait* in the affairs of the colony. Their removal from office is also regarded as a hardship to these gentlemen themselves; but in this opinion we cannot quite concur. The necessity of ultimately superseding them is clearly unavoidable, and we doubt whether it is not better for their own interests that they should be set free at once, and thus become eligible for other posts appertaining to their own proper department than be detained for an uncertain period to act as "warming-pans" while being "pumped" of their local knowledge by their intended successors, only to be cast off when done with. Moreover, we cannot suppose that these officials will be allowed to lose either position or emolument by circumstances so entirely beyond their own control. They will simply revert to the Indian Government, and on reporting themselves at headquarters after being

Digitized by Google

released from their present duties, will surely not have to wait long for employment at least equal in advantages to that which, through no fault of their own, they are now obliged to relinquish. For the rest, the case is simply an example of the "ups and downs" which, however inconvenient, are inevitable accompaniments of such changes of government as the force of circumstances occasionally necessitates.

THE LAST OF THE LAY-OSBORN FLEET.

A SUPPLEMENTARY estimate for the Civil Service has just been issued, and among the items it includes, we observe a sum of £101,300 which is to be voted this session, "to enable Her "MAJESTY'S Government to make good to the Chinese Govern-"ment the estimated value of certain ships which belonged to "the late Anglo-Chinese flotilla. This estimate" (it is explained) "is for the difference between the sum promised to the Chinese "Government on account of this property and the sum realised "by the sale of the ships. One of the vessels is still unsold, "and any sum which may hereafter be received from the sale "will be paid into the Exchequer." When this estimate comes before the House of Commons we trust that a well-timed question to Her MAJESTY'S Ministers will elicit some explanation regarding the gross blunder which alone could have made such a payment necessary. As we pointed out at the time, the failure of the LAY-OSBORN scheme must necessarily entail a very heavy loss upon the Chinese Government, and was in fact a misfortune which gave them every claim to our sympathy; but that is no reason why any portion of the loss should be made to fall on British taxpayers. The mischief is done, and we suppose is beyond remedy, for the present administration clearly cannot be held accountable for the faults of their predecessors. Still, the Foreign-office records must contain the details of these very misty transactions, and the estimates should not be allowed to pass without an effort to throw some light on them.

THE EASTERN ASIA TELEGRAPH.—RANGOON AND TO SINGAPORE.

THE discussion in our columns on the relative merits of a submarine cable and a land line between Rangoon and Singapore, has elicited some able arguments on both sides. So far, however, the preponderance of evidence is undoubtedly in favour of the land line, and this is further strengthened by the letter of "A Promoter" inserted below. It is true that the acts of hostile natives, and the rapid growth of the jungle in a wild and thinly inhabited country, might render the maintenance of an ordinary land line a work of some difficulty; it is true also that the ultimate cost of establishing one might prove heavier than is estimated in the company's prospectus. Still, experience shows that a submarine cable laid on a rocky bottom abounding with coral formations is exposed to far more destructive agencies than those above named, and that the enormous expense of constant repairs (to say nothing of the possible entire destruction of the cable) would be ruinous to any company. Under these circumstances it is impossible to doubt that the decision of the directors in favour of a land line is a prudent one, and we trust there will be no further unnecessary delay in commencing it. The hesitation evinced in formally launching the scheme here must, we suppose, be viewed as a concession to the public feeling that has lately prevailed against new undertakings; but in this the directors have been somewhat over-scrupulous, for the promptness with which the entire capital of the new British and American Telegraph Company has been subscribed is a clear proof that investors have once more regained the power of discriminating between *bona fide* undertakings and mere bubble schemes. The undeniable soundness of their project might, we think, embolden the directors at once to invite the public to subscribe the necessary capital, and they would soon find themselves in a position to commence active operations.

(To the Editor of the *London and China Telegraph.*)

SIR,—In your paper of the 26th November last you gave the opinion of Sir C. T. Bright on the subject of submarine *versus* land lines of telegraph, and you inserted a letter signed "An Engineer" upon the Eastern Asia Telegraph.

The opinion of Sir Charles Bright is undoubtedly entitled to respect, but it appears to me that he understates the difficulties which a sea cable is likely to encounter in these seas from rocky bottom and coral, not to speak of ships' and boats' anchors. "The failure of the Red Sea cable was not due to the nature of the bottom, but arose from circumstances quite unconnected with the locality;" but how about the lines between Singapore and Batavia? These seas are full of busy life, and the cable was found to be quickly destroyed by the attacks of numerous enemies. The rocky bottom at shallow depths chafed it quickly through; the coral either acted in the same way, or else the cable, becoming embedded in it, could not be disengaged when it was wished to overhaul the line, so that it ceased to work a few months after it was submerged, and very little of it was ever recovered.

"An Engineer" does not carry that conviction to my mind which he would had he known more of the subject he writes about. I am not aware that Colonel Robertson ever visited these countries, and therefore I receive with caution his evidence as to the "enormous practical difficulty to be encountered from the wild nature of the country," because it does not tally with my personal experience, nor with that of others who are better acquainted with the country than I am, and who have traversed it in all directions. The Dutch lines through Java work well, and considerable progress has been made with those carried through the jungles of Sumatra, whilst the British line from Calcutta to Moulmein is carried through a country presenting more physical difficulties than that lying to the south thereof. An officer of considerable experience in Indian and Birmah telegraphs writes me: "If the rulers of the countries through which you pass will protect the line, there is no fear of its working well, and being constructed with ease and small cost;" and the chiefs having undertaken to protect the line, and being able to do so, I am at a loss to divine the nature of the enormous difficulties which are said to be in the way.

I do not pretend to estimate the value of the opinion that "the scheme put forward in the prospectus is most immature, both from an engineering and political point of view," as it is enunciated by a person who has evidently never visited the country or studied the aspect of it, and who is ignorant of the nature of the governments of the provinces through which the line may pass; but "An Engineer" may be pleased to learn that the calculations have been based upon a knowledge of the prices of the various articles required (insulators included), of the cost of similar lines in neighbouring countries, of the engineering difficulties likely to be encountered, of the facilities for the conveyance of stores and workmen; and if "the *only reason* that the telegraphs in India have so lamentably failed is because they were constructed too cheaply," it will be easy for the Eastern Asia Telegraph Company to secure perfection at an enhanced price, though at a considerably smaller expense than a sea cable, whilst, to use the words of Sir C. Bright, "the regularity of the working of a properly constructed line would soon compensate for the additional outlay."—Your obedient servant,

A PROMOTER.

Singapore, Jan. 7, 1867.

—o—

RE THE AGRA AND MASTERMAN'S BANK (LIMITED), EX PARTE THE ASIATIC BANKING CORPORATION (LIMITED).—This appeal motion from Vice-Chancellor Wood was brought up for judgment on the 11th inst. The case involves a question as to the effect of what are known as "open letters of credit." The facts are as follows:—On the 31st of October, 1865, the Agra and Masterman's Bank granted to Messrs. Dickson, Tatham, and Co., who were merchants, carrying on business in Ceylon, a letter of credit in the following terms:—"No. 394. You are hereby authorised to draw upon this bank, at six months' sight, to the extent of £15,000 sterling, and such draughts I undertake to duly honour on presentation. This credit will remain in force for twelve months from this date, and parties negotiating bills under it are requested to indorse particulars on the back hereof. The bills must specify that they are drawn under credit No. 394, of the 31st of October, 1865." This letter was addressed to Messrs. Dickson, Tatham, and Co., and was signed by the general manager and the chief accountant of the Agra and Masterman's Bank. On the 24th of May, 1866, Dickson, Tatham, and Co. drew four bills for £1,500 each upon the Agra and Masterman's Bank, and these bills purported, on the face of them, to be drawn in pursuance of the above letter of credit. On the 26th of May, 1866, Dickson, Tatham, and Co. sold these bills to the agent in Ceylon of the Asiatic Banking Corporation. The letter of credit was then shown to this agent, and he indorsed on it the particulars of the bill so purchased by him. The official liquidator of the Agra and Masterman's Bank refused to allow the claim of the Asiatic Banking Corporation for this sum of £6,000, inasmuch as he claimed to set off against that sum a larger sum due to the bank from Dickson, Tatham, and Co. The official liquidator of the corporation carried in his claim against the bank, and on the matter being heard by Vice-Chancellor Wood, on the 21st of December last, his Honour disallowed the claim. Hence the present appeal.—Lord Justice Turner said that whatever might have been the effect at law of the letter of credit, it seemed to him that there would have been a very plain case in equity for the Court, at the instance of any person who had negotiated bills drawn in pursuance of the letter, to compel the Agra and Masterman's Bank to accept and pay those bills. The latter part of the letter was, though not in terms, yet in substance addressed to the persons who should negotiate bills drawn under the letter, and the whole effect of the letter was that the bank held out to those persons a promise that it would accept and pay those bills. It would be impossible, in his lordship's view of the principles of equity, to allow the bank to say to those persons who had read and acted upon the letter of credit that it would not pay the bills, because a larger debt was due to it from the persons to whom the letter of credit was given.—Lord Justice Cairns said that though the letter was in form addressed to Dickson, Tatham, and Co., it was evidently written with the intention that it should be shown to the persons who might negotiate bills drawn under it. The letter was, in fact, a general invitation on the part of the Agra and Masterman's Bank to all persons who should read it to negotiate the bills drawn in pursuance of it, upon the faith that they would be accepted and paid by the Agra and Masterman's Bank. The essence of the letter was that any persons taking bills drawn under it were to have the absolute benefit of the undertaking contained in it, without reference to any cross claim on the part of the bank against Dickson, Tatham, and Co.; for, if not, the letter would have been useless to them.

The claim of the liquidator of the Asiatic Bank must, therefore, be allowed; and the liquidators of both banks must have their costs out of the estate of the Agra and Masterman's Bank.

HODGSON AND OTHERS v. BORCHARDT AND OTHERS.—This was an action in the Court of Exchequer to recover damages sustained by the plaintiffs, Messrs. Finlay, Hodgson, and Co., on the resale of 470 chests of tea sold by them to the defendants. The Solicitor-General and Mr. Cohen were counsel for the plaintiffs; Mr. Manisty, Q.C., and Mr. F. M. White appeared for the defendants. The defendants carry on a large business at Moscow, Konigsberg, and other places, under the style of the Konigsberg Commercial Association, and Messrs. Borchardt and Hirschfeld are the managers in England. The plaintiffs were the owners of 670 chests of Ly-Wa tea, *ex* the ship *Min*, warehoused at the London Docks. The plaintiffs authorised Messrs. Moffatt and Heath, tea-brokers, to sell the whole for them at a price of at least 2s. 5d. per lb. Messrs. Moffatt and Heath had also on sale 350 chests of tea, *ex* the ship *Eliza Shaw*, warehoused in the India Docks, but in this tea the plaintiffs were in no way interested. The defendants on the invitation of Messrs. Moffatt and Co. had taken samples both of the tea *ex Min* and the tea *ex Eliza Shaw*. On October 19 Messrs. Moffatt and Co. sold to certain persons 200 chests of the Ly-Wa tea *ex Min*, at 2s. 5d. per pound, and the defendants were invited to buy the remainder of the "chop" at the same price, but they then refused to do so. On the 23rd of October Mr. Borchardt, jun., called on Messrs. Moffatt and Co., and asked whether the balance of the tea sold at 2s. 5d. was still unsold, and was told that it was. On the next day Mr. Borchardt, sen., called on Messrs. Moffatt and Co. and asked whether the tea about which his son had spoken could not be sold under 2s. 5d. Some bargaining ensued, and Mr. Borchardt at last contracted to buy it at that price. The bought-note was the same day made out and delivered to the defendants. On the receipt of it, however, Mr. Borchardt, jun., called on Messrs. Moffat and Co., saying there had been a mistake, as his father had intended to purchase the tea *ex Eliza Shaw*. On the part of the defendants it was said that they had all along considered themselves as purchasers of the tea *ex Eliza Shaw;* and the learned counsel endeavoured to show that the words "Ly-Wa" and *Eliza Shaw* when spoken rapidly might easily be mistaken by a foreigner. He also dwelt upon the fact that the tea had been described at various times as 440, 450, and 470 chests; and that, in fact, the brokers had altogether mistaken Mr. Borchardt. The Solicitor-General having replied, the Lord Chief Baron summed up, and directed the jury to answer the following questions:—1. Were Messrs. Moffatt and Co. duly authorised by the defendants to purchase tea either *ex Min* or *ex Eliza Shaw*? 2. Were Messrs. Moffatt and Co., having regard to the whole of the evidence, authorised by the defendants to buy the remainder of the tea *ex Min*? The jury returned an answer of "Yes, certainly," to both questions. The Lord Chief Baron said that, as that was their answer, the contract was binding in law, and directed the jury to return a verdict for the plaintiffs. A verdict was entered for the plaintiffs,—Damages, £1,076 14s. 9d., leave being reserved to the defendants to move on the question as to what was the proper measure of damages.

ROWLEY MILLER v. SAGGROVE.—Mr. Serjeant Tindal Atkinson and Mr. Philbrick were counsel for the plaintiff; Mr. Serjeant Parry and Mr. W. T. Marriott appeared for the defendant. This was an action brought by the plaintiff to recover damages resulting from breakage to certain portions of furniture which had been purchased from the defendants for the use of Mr. Rowley Miller, at Shanghai, which was alleged to have been broken through carelessness in packing. It appeared that the plaintiff had the misfortune to lose his wife previous to the arrival of the goods at Shanghai, and, not requiring the furniture for the purpose originally intended, they were landed and placed in the godown of Mr. Gamwell, and upon their being unpacked portions were found to be more or less broken. A survey was held, signed by Mr. Gamwell and another, and recommended to be sold by public auction for account of the shipper, the sale of which realising nearly the cost laid down at Shanghai. The plaintiff, however, was of opinion that he was entitled to the difference, together with 30 to 40 per cent., the estimated value had the goods arrived perfect. The case was heard before the Right Hon. Sir Fitzroy Kelly, at the Court of Exchequer, Guildhall, on the 15th and 16th inst., and the jury, after retiring for consideration, gave a verdict for the defendants. The costs of this action amount to nearly £900, which might have been settled for £30 or £40, but for the spirit in which it was demanded of the defendants.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ALT—On the 20th Dec., at Nagasaki, Japan, the wife of W. J. Alt, Esq., of a daughter.

FRASER—On the 6th Dec., at Yokohama, Japan, the wife of James Campbell Fraser, Esq., of a daughter.

STEEDMAN—On the 13th Feb., at Fyfield Rectory, Hants, the wife of the Rev. S. W. Steedman, of a daughter.

MARRIAGES.

HILL—CHATERTON.—On the 14th Feb., at Glasmire Church, Cork, by the Rev. Canon Hill, M.A., vicar of Peterborough, father of the bridegroom, assisted by the Rev. J. N. Woodruffe, M.A., Prebendary of Cork, William Lorrain Hill, Esq., of Penang, to Anna, eldest daughter of George Chatterton, Esq., J.P., Ballynamote, Cork.

MORRISON—BUSHBY.—On the 5th Feb., at All Soul's Church, Langham-place, George Staunton Morrison, late H.B.M.'s Consul at Nagasaki, in Japan, to Emma Louisa, youngest daughter of the late A. L. Bushby, Esq., of Lewes. No cards.

DEATHS.

ELMSLIE—On the 5th Feb., at Montabelle, Weston-super-Mare, Sarah, the beloved wife of Adam Wallace Elmslie, Esq., formerly Consul at Canton.

Monetary and Commercial.

Messrs. Smith, Preston, and Killick, of Liverpool, trading in conjunction with Messrs. Preston, Breuell, and Co., of Shanghai, have executed an assignment to trustees for the benefit of creditors.

We regret that the connection of Messrs. Smith, Simpson, and Co., of 12, George-yard, Lombard-street, with Mr. Holdsworth, and the *Severn*, together with liabilities on account of Messrs. J. B. Cumming and Co. (in the Singapore trade) and Barned's Bank, have caused them to suspend, and a deed of inspection has been executed for the purpose of winding-up their affairs. The inspectors are Mr. Kemp, the accountant, and Mr. Howard, of the London and County Bank. The unfortunate connection alluded to has borne with undue severity on Messrs. Smith and Simpson, as their career in this city for some thirty years is unimpeachable, and the impression in the City among well-informed merchants is that they were simply victims in the matter.

The repudiated tea contract case between Messrs. Moffatt and Heath and the Konigsberg Association, noticed in November, has been brought into Court, and a report will be found in another column. The plaintiffs, acting for Messrs. Finlay, Hodgson, and Co., obtained a verdict for the loss occasioned, amounting to over £1,000.

The recent subscription for the new shares of the Comptoir d'Escompte produced these results:—For the 80,000 shares to be issued, there were subscriptions for 72,193, at the rate of one new share for each old one, so that there were 7,807 to be disposed of. The demands from shareholders for more shares than they were entitled to amounted to 34,793. Dividing the 7,807 among them, each will get about 20 per cent. of what he asked for.

Messrs. Cahen, Lyon, and Co., of Paris, the proprietors of the patent for the Chassepot rifles, have issued a circular stating that the royalty to English and other manufacturers is fixed as follows:—Military arms, 6s. 8d. each; sporting guns or rifles, 12s. 6d. each; for quantities of 5,000 and upwards in one year, 5s.; for converted arms on the Chassepot pattern, 3s. 4d.; or for quantities of 10,000 converted in one year, 2s. 6d. each. All requisitions for licence to be addressed to Messrs. Thomas Christy and Co., 155, Fenchurch-street.

ARTICLES OF IMPORT.

TEA.—The market is extremely quiet, dealers buying only according to requirements; prices are the same for Congous, importers generally refrain from any pressure to realise. The demand for Green Tea has been more active, and better prices are obtained for fresh arrivals of the qualities suitable for shipping purposes. Foochow Congous: In dust and broken leaf we do not hear of any transactions, fair of old import sell in limited quantities at 1s. 0½d. per lb.; new are more readily saleable at 1s. 3d. to 1s. 5d. per lb., and in these classes the chief business has been transacted; medium sell at late quotations if of the quality required by the dealers; fine and finest remain quiet. Black leaf Congous: The demand is quite trifling for common and fair, at 1s. to 1s. 1d. per lb., and those of old import have been neglected; in fair and medium, occasional sales have been made at late prices; fine and finest are in limited demand. Souchongs have been sold at 2s. to 2s. 6d. per lb. for fine to finest. New made Canton Congous: Several parcels have lately been offering, but little business has resulted. Oolongs continue scarce; the finer qualities are wanted for America. Scented Capers and Scented Orange Pekoes show no alteration since our last, the demand being moderate. Green Teas: The late arrivals of all desirable qualities have sold readily at full prices. Young Hysons and Imperials of good to finest grades have been in demand for shipping at advancing prices. Moyune descriptions are extremely scarce. Japans: Some sales of uncoloured have been made at former quotations; coloured also sell readily. The quantity to be brought forward at this week's sales consists of about 16,000 packages. The cargoes afloat up to the mail's advices are now reduced to the following:—

				lbs.
Aug. 19	Conference	Japan		92,130

SILK.—Since the 9th inst. we have no change to report in this market, and but little business has taken place. Prices are unaltered, but to effect sales a further concession would have to be made upon all classes, except classic chops of Tsatlee, which are still in fair demand at 31s. 6d. for best No. 3. The quarterly public sales commence on the 20th inst. The deliveries have been, 1st to 15th Feb., 1867, China, 1.223 Japan, 273.

COTTON.—At the earlier sales of the past week there was a decided improvement, and ¼d. per lb. advance established. Since then the market has been dull and inactive, and prices close without any material alteration from those of the previous week. The total sales in London have been 3,410 bales, of which 30 bales fair China realised 10½d. per lb. No Dhollerah or Rangoon has been offered, but 250 bales of the former of December shipment guaranteed fair quality sold to arrive at 11d. to 11¼d. per lb. The stock of China and Japan in the United Kingdom amounts to 1.346 bales.

COFFEE.—The dulness and inactivity previously observable in this market, has to a great extent ceased to exist, and a considerable quantity of Ceylon descriptions offered at auction has been taken off at firm and improved rate, with a demand daily increasing. The early sales of the week consisted of 537 casks, 78 barrels, 70 bags Plantation, chiefly new crop which realised, triage 34s. to 58s. 6d., fine ordinary to low middling 71s. 6d. to 78s.; middling 79s. 6d. to 82s.; good middling to bold 84s. to 86s.; pea-berry 87s. to 90s.; 3 barrels, 843 bags native, good ordinary 64s., bold 70s. 6d. to 71s.; and 1,088 bags Singapore Java, good 67s. to 69s., 1 lot 72s. Later on a further offer was made of 321 casks, 27 barrels, 223 bags Plantation which was all sold, triage at 48s. to 57s. 6d.; gray 72s. to 75s.; fine ordinary to low middling coloury 75s. to 79s; middling 79s. 6d. to 83s. 6d.; good middling 85s.; pea-berry 87s. 6d. to 89s. 6d. per cwt. The only private sale reported is of 500 bags native at 63s. 6d.

CAMPHOR.—Of China, 30 cases realised at auction £7 2s. 6d. recent weights.

CANES.—Of Malacca the sales have been 140,000 canes at 7¾d. for good middling, 5d. to 5¾d. for middling, 2¾d. to 4d. for ordinary, and 1¼d. to 1¾d. each for very ordinary. Of Borneo 13,106 canes sold at 2d. to 2¼d. and of Manila 10,000 were bought in at 1½d. each.

GUTTA PERCHA.—Of Penang 3 baskets were offered and bought in at 9d. per lb.

INDIA RUBBER.—The only offer at auction was 26 baskets low damp Singapore which realised 1s. 2¼d. to 1s. 2½d. per lb.

ISINGLASS.—Of 24 cases Penang in public sale the greater part found buyers at, for good fair leaf, 3s. 8d.; mixed, 3s. to 3s. 1d.; very low, 1s. 8d.; good tongue, 3s. 6d.; Manila sort, 1s. 6d. to 1s. 7d.

MANILA HEMP.—Very small business has been done during the week, the only sales reported being of 100 bales of fair quality, at £48 10s., and 6 bales of fourth to second class and wet, at £47 10s. per ton.

OILS.—Ceylon Cocoa Nut is in very limited request at £50 to £50 10s.

PEPPER.—Black: The demand has increased, and of the large offers at auction the greater portion sold at fully the previous rates. The sales have been 1,252 bags Singapore at 3½d. to 3¼d., grey 3¼d., 1,146 bags good bright Trang Penang at 3¼d., 1,476 bags West Coast Penang at 2¾d. to 3d., and 250 bags Batavia at 3d. to 3¼d. per lb. White: Also in fair demand, and 96 bags fair Singapore sold at 5⅛d. to 5⅜d. The sales of Penang amounted to 398 bags fair at 5⅜d. to 5¾d., good at 5¾d. to 5¼d. per lb.

PLUMBAGO.—Of Ceylon 190 barrels were bought in, lump at 16s. to 19s., dust at 8s. 6d. to 10s. and subsequently 168 barrels dust at same price.

RICE.—A cargo consisting of 17,000 bags (1,300 tons) ex Cambrian sold at 10s. 9d. for sound, but without further guarantee of quality, and at 10s. for the broken portion. Also 4,000 bags Rangoon in warehouse (ex Hindustan) 11s. 6d. full prompt, and 3,000 bags at 11s. 4½d. short prompt. For arrival a cargo of Rangoon has realised 10s. 6d. per cwt. The stock of rice in the United Kingdom amounts to 26,510 tons, against 33,421 tons at the same period last year.

RATTANS.—The following have been the sales during the week: 6,098 bundles Singapore at 3s., 3,678 bundles Penang at 3s. 5d. to 3s. 7d., and 658 bundles Borneo at 3s. 6d. to 3s. 11d. per hundred.

SUGAR.—The market is extremely quiet, with scarcely any inquiry. The previous value is, however, steadily maintained, holders firmly refusing lower offers. At auction 1,500 bags Penang sold at 31s. 6d. to 34s. and 50 tons good unclayed Manila at 26s. 6d. Privately the only sale reported is of 7,500 bags unclayed Manila at 26s. per cwt.

SAGO.—At auction 391 bags good small Singapore realised 17s. 6d. to 18s., and 862 boxes Borneo sold at firm prices, good small medium 17s. 6d. to 18s., fine small pearl 18s. 3d. to 19s.

SPICES.—Cinnamon: Of Ceylon 14 bales thirds were bought in at 9d. per lb. Mace: The public sales consisted of 8 cases freshly imported Penang, good middling to good at 2s. 8d. to 3s., middling at 2s. to 2s. 5d., and 8 cases of old import at 1s. 8d. to 2s. 6d. per lb. Nutmegs: There was a considerable supply at the sales, amounting to 192 cases Penang, all of which sold at 3d. decline for bold descriptions, 1d. to 2d. for medium, and at previous rates for the lower and common sorts, fine bold, averaging 72 to 68 nuts to the lb., realising 3s. 1d. to 3s. 7d.; 78 to 74 to lb. 2s. to 2s. 4d.; medium, 87 to 82 to lb., 1s. 6d. to 1s. 8d.; 96 to 91 to lb., 1s. 4d.; 109 to 104 to lb., 1s. 2d. to 1s. 3d.; 126 to 111 to lb., 1s. 1d. to 1s. 2d.; 133 to lb. 1s. 1d. per lb. An offer of 10 casks Java was bought in at 1s.

STICKLAC.—Of Siam 471 boxes were all bought in, fair bold rather woody at 50s.; ordinary dull small at 37s. 6d. per cwt.

TOBACCO.—The bulk of 81 bales Java sold at 5d. to 8¾d.; and 5 cases Manila cheroots at 5s. 6d. per lb.

TIN.—The market during the week has been extremely quiet, only a few tons fine Straits having sold at £85 10s. with one month's prompt.

LIVERPOOL MARKETS.—Rice: The following sales have taken place. 9,788 bags Rangoon at 12s. to 12s. 3d.; 114 barrels cleaned at 13s. 9d.; 1,000 tons new crop Rangoon afloat at 11s.; 6,000 bags Necransie first-class damaged at 10s. 9d. to 11s. per cwt. Sugar: 650 tons ordinary unclayed Manila at 17s. to 17s. 3d. per cwt. Sago: 120 boxes large grain sold at 17s. 6d. per cwt. Sago Flour: 550 bags realised 17s. 6d. per cwt. Seeds: 100 bags small grain brown Akyab Rape realised for sound 51s. per quarter. Pepper: 60 bags Singapore black sold at 3¼d. per lb.

HER MAJESTY (ship), London to Hong Kong, Nov. 10, 18 S., 33 W.

LOTA, Shanghai to New York, Dec. 4, 36 S., 21 E.

CITY OF PALACES (?), London to Hong Kong, Oct. 22, 3 S., 48 (?) W.

No. 0934, 1st d. p. (barque), Foochow to N. York, Nov. 26, 33 S., 29 E.

GRAAFSTROOM (Dut. bq.), Bat. to Rotterdam, Jan. 1, 12 S., 10 W.

CASUALTIES.

The Addison, Sloane, from Sourabaya to Amsterdam, went ashore on the Hoaks Feb. 9, and subsequently broke up; master and five men saved, master's wife and child and 19 hands drowned.

The Jacoba, Schaap, which arrived at Mauritius Dec. 18, from Batavia for Amsterdam, had experienced a severe hurricane on Dec. 1, in 13 S., 91 E., during which she lost topmasts and boats, and sprung a leak.

The Julie, Guichow, which arrived at Mauritius Dec. 19, from Sumatra for Pernambuco, had experienced a cyclone on Nov. 30, which lasted 15 hours, when she lost mizenmast and all rigging attached, and made six inches of water per hour.

The Heros, Brolin, which sailed from Newport for Singapore Jan. 30 put back on Feb. 7, with port bow much damaged, having been in collision.

The Charlotte (Hamburg barque), Petersen, from Manila to Falmouth, put in at Capetown, Dec. 31, where she will have to repair, having lost topmast, jibboom, &c.

The steamer Taiwan, Roper, from Aberdeen to Hong Kong, which put in at Ferrol, Spain, on Feb. 9, had pumps choked and compartments filled with water.

The Catherina Wilhelmina, from Batavia to Schiedam, which put into Scattery Roads leaky Jan. 26, drove from her anchors during the gale of the 8th February, and was put on the mud east of Foynes; it is expected she will come off without damage.

Three hundred and twenty-two blocks of tin and two bags of gambier have been recovered by divers from the City of Delhi (from Singapore to London), which was stranded near Dungeness on Jan. 28.

MISCELLANEOUS.

At MAURITIUS.—Dec. 18, Jacoba, Schaap, from Batavia for Amsterdam; 19. Julie, Guichon, from Sumatra for Pernambuco; 23, Casti, Louis, from Colombo; 29, Jeanne Meyer, Loesewitz, from Singapore; Jan. 20, Hortense Dusautoy, Prevel, sailed for Galle; Dec. 28, Sumroo, Ledain, sailed for Galle; Jan. 1, Amiral Protet, Dannel, sailed for Singapore.

The Miriam, Rooney, which sailed from Cardiff April 13, 1866, for Shanghai, has been posted at Lloyd's as not having since been heard of.

The Falcon, which put into Plymouth, has refitted and proceeded to Hong Kong.

BUENOS AYRES, Dec. 4.—The barque Richard Thornton, of London, which arrived here Sept. 18 from the Clyde, has been condemned and sold, having been considerably damaged by fire at sea previous to her arrival.

GRANT'S TRANS-MONGOLIAN TELEGRAMS.

VIA KIACHTA.

This line, which has for its object the most rapid transmission of Telegrams between Shanghai and Europe and *vice versa*, was organised in the spring of 1866, and although during the first two months it did not realise the expectations of the projector, who proposed to forward messages between Europe and China in 12 days, yet, considering the fact of its being a new scheme and one subject to many difficulties at first, it is satisfactory to know that all the Telegrams despatched from Shanghai for London have invariably during the last three months reached their destination long before those forwarded *vid* Galle, and the fact, which is patent to all the large mercantile houses of Shanghai, that many thousands of pounds have been saved by the earlier Telegrams which have been transmitted by this line, is a sufficient proof of its sound and practical utility.

Until recently the undertaking was a monopoly to the original subscribers, who received their private communications by this service long before the public.

The Projector having made a proposal to the original subscribers to take over all their interest in the line and pay up the whole of the outlay, a general meeting was held, at which it was unanimously agreed to accede to the proposal.

THE LINE IS NOW THROWN OPEN TO THE PUBLIC.

There are employed in the service of GRANT'S TRANS-MONGOLIAN TELEGRAMS—280 Ponies, and 40 Couriers. With Agencies at Kiachta (the residence of the Manager), Urga (the Capital of Mongolia), Kalgan or Chang-kia-kow (at the Great Wall), Tien-tsin, and Shanghai.

The days of despatch from Shanghai are advertised in the *North China Daily News*. EXPRESS Telegrams may be despatched by any steamer.

Telegrams for China by the regular weekly courier must be despatched from any Telegraph Station in Europe every TUESDAY, addressed "GRANT, KIACHTA." Express Telegrams may be sent on any day of the week.

Charges from Shanghai to Europe and from Kiachta to China :—

REGULAR COURIERS.

Twenty words	Tls. 15
Thirty words...	20
Forty words ... ... —	25

And for every Ten words in addition Tls. 5 extra.

EXPRESS COURIERS.

Twenty words	Tls. 150
Thirty words	155
Forty words	160

And for every Ten words in addition Tls. 5 extra.

Telegrams from Shanghai must be addressed thus :—

TELEGRAM (20) WORDS
GRANT, KIACHTA.

If Express, the word "Express" must be written on the Envelope. Telegrams from Europe must be addressed "GRANT, KIACHTA." If Express, "GRANT, KIACHTA, EXPRESS."

Courier charges to and from Europe must be paid in China to Messrs. HALL and HOLTZ, Agents, Shanghai, or to Messrs FERGUSSON and Co., Agents, Tien-tsin. Mercantile houses in Japan, Hong Kong, &c., must appoint Agents for the reception of their Telegrams at Shanghai, or Tien-tsin.

SUBSCRIPTIONS FOR 1867.

Annual Subscribers from Europe to China	£120 stg.
Annual Subscribers from China to Europe	100
Annual Subscribers from Europe to China and China to Europe	200

These rates are exclusive of Express Couriers and Telegraph Charges, viz. :—Twenty words, 7 roubles or Tls. 2.50 Shanghai Sycee; and for every ten words extra, Rs. 3.50, or Tls. 1.25 Shanghai Sycee. Annual Subscribers have the privilege of sending Telegrams of any number of words to any *one* person or firm; the name and address of such person or firm must be given on payment of subscription. If an Annual Subscriber or his Agent publishes in any newspaper, or allows the contents of any Telegram to be made public without the special consent of the undersigned, the said Annual Subscriber shall forfeit his subscription.

Telegrams may be despatched from Europe from Tuesday, 19th February, to Tuesday, 19th November, inclusive. From Shanghai, on the departure of the first steamer to Tien-tsin, till the freezing of the river Peiho.

List of Passengers.

PASSENGERS INWARD.

By last mail to Marseilles, arrived Feb. 9.—From Shanghai: Mr. and Mrs. D. Smith. From Hong Kong: Mr. J. A. Green, Mr. S. Trake. From Singapore: Mr. F. Scholfield. From Galle: Mr. McKenzie.

By last mail to Southampton.—From Hong Kong: Mr. A. F. Miller, Mr. Bancroft, Mr. Geo. Payne, Mr. Kane. From Singapore: Mr. H. Wyse, Mr. J. D'Almeida.

PASSENGERS OUTWARD.

Per P. and O. steamer Delta, from Southampton, Feb. 20—To Ceylon: Ensign James, Mr. T. A. Taylor, Mr. E. Giles. To Hong Hong: Vice-Admiral Keppel's Flag Lieutenant, Mr. and Mrs. Oxley and four children, Mr. W. Dorling, Mr. W. N. Payne, Mr. H. E. Woodhouse, and one second-class passenger. To Shanghai: Mr. E. Hewett, Mr. A. Hutton. To Singapore: Capt. A. R. Ord and son, Capt. Kirk, Dep. Actg. Comsy. Gen. Thompson. To Calcutta: Mrs. Morton, Mrs. Bewsher, Mrs. A. F. Corbet, Mrs. Dowell, Mr. and Mrs. F. Marshall, Ensign Kirk, Mr. W. F. Male, Miss M. Bennett, two Misses Macintyre, Miss Simpson, Mr. McRitchie, Mr. R. M. Nott, Mr. W. Walker, Mr. R. Povser, Lieut. Dowman, Mr. G. A. Oliver, Mr. N. S Mackenzie, Mr. R. L. Locke, Miss Sturmer, Mr. P. Moir, Ensign G. F. Guyon, Ensign Dalrymple, Buzloor Ruheen, and servant, and two second-class passengers. To Madras: Mr. W. H. Linton, Major Kenny, Capt. W. T. Cox, Mrs. Cox and child, Mrs. M. Williams, Lieut. Col. and Mrs. O'Connell and child, Miss Mackenzie, Mr. W. B. Edmond, Mr. W. S. Adams, Mr. J. Rostron, Mr. W. E. Bryan. To Bombay: Mrs. Hutton, Mrs. A. Cassidy, Mr. A. A. Jones, Mr. and Mrs. J. Pile, and one second-class passenger.

From Marseilles, Feb. 28.—To Ceylon: Mr. P. W. and Mrs. Braybrooke, Lieut. Partridge, Mr. H. B. Ewald, Mr. Armstrong. To Hong Kong: Vice-Admiral the Hon. Sir H. Keppel, K.C.B., and servant, Mr. H. B. Walker, Mr. J. Ferguson, Mr. W. Newman, Mr. A. Andrews, Mrs. Jackson, Mr. E. C. Smith, Mr. T. K. Ashton, Paymaster Risk, R.N., Mr. R. Parr (*via* Bombay), Mr. Pemberton. To Shanghai: Mr. J. B. Hallam, Mr. B. A. Mouillescaux. To Singapore: Mr. John Brinkmann, Mr. R. B. Read, Surgeon-Major J. Rose, Mr. E. Kumper. To Yokohama: Mr. W. A. Malcolm, Mr. Just. To Penang: Mr. R. Grey. To Calcutta: Lieut. Col. and Mrs. Fullerton, Miss A. Perkins, Major and Mrs. Harris, Miss Mathews, Lieut. Col. and Mrs. Birch, Rev. Dr. and Miss Millman, and servant, Mr. Watkins, Assistant Surgeon Baker, Mr. J. McClymont, Mr. E. W. Campbell. To Madras: Mr. Schwatz, Major and Mrs. Bayley, Colonel Freese, Sir C. Scotland, Captain G. E. Borradaile, Captain A. A. Gordon. To Bombay: Mrs. Thomas Haggard, two children, and servant, Mrs. Schneider, child and servant, Mr. and Mrs. C. A. Winter.

From Gibraltar to Ceylon: Asst. Comsy. Gen. Crookshank.

From Malta to Hong Kong: Vice Admiral Sir H. Keppel's servant.

Per P. and O. steamer Ripon, from Southampton, Feb. 27.—To Hong Kong (*via* Bombay): Capt. and Mrs. Gillson.

Per P. and O. steamer from Southampton, March 4.—To Hong Kong: Mr. Percival, Mr. E. Goodlake, Mr. T. Kydd, Mr. H. G. Howlett. To Ceylon: Rev. J. S., and Mrs. Jones and child, Miss Claughton, Mr. Ford, R.N., Hon. A. Cadogan, Miss Paterson, Mrs. Fyfe, Mr. B. T. Dowbiggin. To Singapore: Miss Robertson.

From Marseilles, March 12.—To Shanghai: Mr. W. Howie, Mrs. Winchester. To Hong Kong: Mr. J. M. Beaumont.

Per P. and O. steamer, from Southampton, March 20.—To Shanghai: Mr. A. C. Margary, Mr. B. C. G. Scott, Mr. H. A. Giles, Mr. W. N. Abdy, Mr. P. Warren. To Singapore: Mr. and Mrs. Meldrum. To Ceylon: Mr. G. Crowe, Master de Lemos.

From Marseilles, March 28.—To Shanghai: Mr. P. Maclean, Mr. A. White.

Per Mail, April 28, from Marseilles.—Mr. and Mrs. J. Fittock.

THE INCOMING MAILS.

The overdue mail, with dates from Hong Kong to the 15th Jan. is not now expected to be delivered before the 4th March, owing to an accident which compelled the *Poonah* to put back to Alexandria; we are however enabled to publish in advance, having received some portion of our despatches *via* Trieste. Our next number will be issued on the arrival of the French mail (bringing Hong Kong dates to the 28th January), which reached Suez on the 25th, and will be delivered about the 6th March.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have advices to the 1st January. The following shows the state of the market:—

TEA.—The transactions of the fortnight have been confined to purchases for the American market. Settlements are estimated at 3,600 piculs, principally composed of the finest kinds, for which holders will not accept any lower rates. The total export for 1866 is given at 6,000,000 tls., against 6,150,000 in the previous year.

SILK.—Owing to a desire to realise on the part of native holders, prices had declined $20 for first qualities and $40 for inferior, at which rates about 600 bales had been settled. A few bales superior Maibash brought $1,025. The unsold stock was about 2,000 bales, chiefly coarse and inferior.

IMPORTS.—The market has been very depressed, and most decriptions of manufactured goods are quoted lower, owing in a great measure to the arrival of large supplies from China. Black Woollen goods are in great demand, and command extravagant rates, while others are quite neglected.

CHINA.

SHANGHAI.

The dates are down to the 9th January. Telegrams from London have been received up to the 6th Dec. *via* Kiachta.

The following is the report on the markets.

EXPORTS.

TEA.—In Black the settlements have been on a very limited scale, only ten chops having changed hands during the fortnight, and purchases could be made on more advantageous terms. The settlements were 2,800 chests, and reshipments on owner's account, 1,000 chests. Stock, 16,500 chests. Quotations: Oonam, common, tls. 17 to 19; Ningchow, common to fair, tls. 19¼ to 22¼. In Greens the business had been very small, and even considerable reductions by the teamen failed to induce an active demand; no actual change in prices can therefore be quoted. The settlements for the fortnight were 9,600 half-chests, and reshipment on owners' account 3,800 half-chests; stock, 60,000 half-chests, of which about 2,000 are Ping-suey and 2,000 Shanghai-packed. Gunpowder, Cargo, tls. 31 to 37; superior, 38 to 48; fine, 50 to 61, Young Hyson, Cargo, tls. 20 to 25; superior, 26 to 38; fine, 39 to 46. At Kiukiang (3rd January) no shipments of Black teas had been made by foreigners, all business being on nature account. The stock is 2242 packages. In greens no transactions whatever are reported; the stocks were 5816 packages. At Hankow (2nd January) settlements amounted to only five chops, and holders showed some anxiety to sell. Quotations were, Oopacks common to fair tls. 15 to 16.7. Oonams, common 12.5 to 18.—Stocks 4720 chests.

SILK.—A small business only has been transacted, owing to the failure of E-kee, one of the largest silk hongs, and involving several smaller ones. Settlements are estimated at only 300 bales, at prices current at the last mail, the unsold stock being about 1,500 bales. The quantity brought forward by the present mail is 250 bales China, and 750 Japan.

IMPORTS.

COTTONS.—The near approach of the Chinese New Year, coupled with the scarcity of money among native dealers, has caused business in manufactured goods to be confined to a small compass. Grey Shirtings are lower, both for 7 lb. and 8¼ lb. goods. White Shirtings and T-Cloths have also given way in value. Black Velvets and Turkey Reds have advanced in price and are enquired for.

WOOLLENS.—Spanish Stripes are very unsaleable. Black Camlets have been in demand for the Japan market at high prices, but assorted continue difficult to place. Long Ells have not been enquired for, and the market for these goods is weak. Lastings are quite unsaleable.

METALS.—Iron is dull of sale. Lead steady, but attracts little notice. Quicksilver, no demand.

COALS.—The market has continued active, but sales have been confined to Australian, Japan, and American sorts, there being no English coals on the market. The only arrival of Cardiff remains in first hands for consumption. Arrivals for the fortnight include 1,003 tons Anthracite, 965 tons Japan, 1,227 tons Cardiff, and 345 tons Australian, in all 3,540 tons. Sales have been made of Anthracite at taels 11.2.5; Australian, taels 9; Japan, (best) taels 7.5. The total importations of foreign coals into Shanghai for 1866 was 139,008 tons, of which 60,705 were English.

HONG KONG.

Dates are to the 15th of January. There was little news of interest, and no change in the state of affairs generally. Since the ordinances which lately excited so much opposition in the colony had been somewhat modified by Government, the Chinese inhabitants appeared reconciled to them. A general impression prevailed that the great apparent progress of the colony of late years was not real, but was due only to the large amount of capital which the various banks sought to employ, and which is now being withdrawn.

The Chinese authorities at Canton have at length commenced the purchase of steamers for the police of the inner waters, and in the course of a few months will probably be in possession of several such vessels. They have just purchased the *Fee Loong*, a little iron boat launched the other day at Hong Kong for Douglas, Lapraik and Co., having been got out in pieces from England. She is to be commanded by an Englishman, and will be employed as a despatch boat and transport on the interior rivers, thus both proving highly serviceable, it may be presumed, to the Government and familiarizing the Chinese with that idea of inland navigation by steamers which has been treated with so many real or affected apprehensions by the truculent Li Hung-chang, the Governor of Kiang-su.

IMPORTS.

The *James Russel*, *Chusan*, and *Ariel* have arrived with general cargoes, and the market has been freely supplied by foreigners, and also by Chinese who had bought "to arrive." In value there is hardly any change to notice either in goods or metals, but a fair business has been done as the native demand has been larger than usual, in anticipation perhaps of their new year holidays, which commence on the 5th February. Quotations: Cotton Yarn, 16-24, 170 to 180 dols.; 28-32, 180 to 190 dols.; 38-42, 220 to 230 dols.; Grey Shirtings, 7 lbs., 3 dols. 30c. to 3 dols. 40c.; 8¼ lbs., 3 dols. 60c. to 3 dols. 65c.; 8½ to 10 lbs., 3 dols. 90c. to 4 dols. 50c; White Shirtings, 54-62, 3 dols. to 3 dols. 30c.; 64-68, 3 dols. 60c. to 4 dols.; 68-72, 4 dols. to 4 dols. 50c.; T-Cloths, 32in. 6lbs., 2 dols. 60c. to 2 dols. 65c.; 7lbs. 2 dols. 85c. to 3 dols.; 36in. 8 to 9½lbs., 3 dols. 75c. to 5 dols.; Dyed Spot Shirtings, 4 dols. 25c. to 4 dols. 50c.; White Spot Shirtings, 3 dols. 90c. to 4 dols. 20c.; American Drills, 40 yards, 7 to 8 dols.; English Drills, 30 yards, 3 dols. 80c. to 4 dols. 50c.; Camlets S., 21 to 21¼ dols.; S.S., 20 to 21 dols.; B.B.B., 23 to 23¾ dols.; Dutch, 28 to 33 dols.; Long Ells, H. scarlet, 10½ to 11 dols.; H.H., 11 to to 11½ dols.; Blankets, 7 lbs., 3 dols. 40c. to 4 dols.; 10 lbs., 5 dols. 30c. to 6 dols.; Chintz assorted, 2 dols. 80c. to 3 dols.; Scarlet, 3 dols. to 3 dols. 10c.; Turkey Reds, 2½ lbs., 3 dols. 25c.; 3 lbs., 3¾ to 4 dols.; Handkerchiefs, 1 dol. to 1 dol. 20c. per dozen; Damasks assorted, 8 to 9 dols.; Brocades, white, 4 dols. 20c. to 4 dols. 30c.; assorted, 5 to 5¼ dols.; Blue Twills, 3 dols. 25c. to 3 dols. 45c.; Black Velvets, 18 to 22in., 20c. to 25c. per yard; Bombazettes, 7 dols. 50c. to 8 dols.

METALS.—Iron: Nail Rod, 3 dols. to 3 dols. 30c.; Round, Bar and Rod, 2¾ dols.; Flat Bar, 2¼ to 2¾ dols.; Hoop, 3½ to 3¾ dols.; Wire, 7 to 8½ dols.; Quicksilver, 67 dols. per picul. Lead: Small Pigs, 5½ to 5¾ dols.; L. B.. 5 dols. 90c. to 6 dols.; W. B., 6¼ to 6 dols. 30c. Steel: 3½ to 5 dols, Tin Plates: 6 to 6½ dols. Malacca Tin: 21 to 23 dols.

COTTON.—Advices of considerable supplies from India has made holders anxious to realise, but only about 3,000 bales of all kinds have found buyers and quotations are lower. Shanghai, 22½ to 23½; Tientsin, 21 to 22 dols. Ningpo, 25 to 26 dols.; Bengal, 19 to 22½ dols.; Bombay, 23½ to 24 dols.

CAMPHOR.—Packed, 26½ to 29 dols.

EXPORTS.

TEA.—CONGOU.—Canton: No settlements have taken place, and the position of the market is unchanged. Macao: Shippers have been operating to a small extent at greatly reduced rates. Amoy: There is nothing to report.

OOLONG.—Amoy: About 5,500 packages common cargo kind have been taken at 15 dols. 50c. to 17 dols. 50c. per picul. The stock consists of about 5,000 packages, of which only 3,500 are fit for exportation.

SCENTED TEAS.—Canton: The only settlement reported is of 500 boxes Orange Pekoe at 26 to 29 taels, and of 4,000 boxes Caper at tls. 11.5 to 23. These prices show but little alteration from those previously ruling.

GREEN TEAS.—Of Canton make 1000 boxes Gunpowder changed hands at 22 to 25 tls., and 600 boxes Young Hyson at 17 tls.

SILK.—Canton: We hear that buyers have taken 100 bales re-reeled Tsatlee at 515 to 610 dols., and 200 boxes re-reeled Cumchuck at 560 to 565 dols. per picul.

DRUGS.—250 piculs Cassia have been placed at 19 dols. 75c. to 20 dols. per picul. Of Camphor, small quantities have been placed at 28 dols. 75c. per picul packed.

FOOCHOW.

Dates from this port are to the 8th of January. Prior to the Christmas holidays the tea market continued inactive, but subsequently, holders of Congous having given way 1½ to 2 taels, considerable settlements were effected, and, teamen again becoming firm, prices recovered ½ to 1 tael. Pekoes show 3 to 5 taels reduction. Considerable transactions have been effected in Oolongs, but rates have been so irregular that no actual decline can be quoted. The arrivals of Congou and Souchong amount to 621,100 chests; of Oolong, 178,600 half chests. Settlements from Dec. 21:—Congou: 17,400 chests, dust to common, at 5¾ to 12½ taels; 13 400 half chests, coarse to good flavoury, at 12¾ to 17½ taels. Souchong: 900 chests, 150 half chests, at 16 to 25 taels. Pekoe: 800 chests, at 18 to 30 taels. Oolong: 11,800 half chests, at 18 to 35 taels. Stocks:—Congou, 47,000 chests; Souchong, 1,700 chests; Pekoe, 1,400 chests; Oolong, 19,900 half chests; Scented, 2,400 boxes.

THE PHILIPPINES.

MANILA.

(FROM A CORRESPONDENT.)

The appointment of Mr. Ricketts to this Consulate, confirmed in your last number, although it is to be hoped that it will prove satisfactory, was quite unexpected, it having been supposed by the English residents here that the absolute fitness for the post and the great lingual powers of Mr. Loney, the present Acting Consul, would have caused his appointment. It is questionable whether an officer of dragoons is exactly the man qualified to conduct the purely commercial interests of our countrymen.

The new Captain General, La Gandara, seems to be an intelligent and energetic man, quite different to the usual run of Spanish functionaries. To the disgust and alarm of petty official and local red-tapists he insists upon mixing himself up with such paltry but necessary things as roads, light, drainage, &c., initiating sundry reforms in the municipality, which may give a chance for Manila to retrieve its bad name of "a disgrace to the civilised world." He stopped a month in Singapore on his way here, and seems to have been greatly impressed by what he saw and heard. He declares he will not leave this place without inaugurating water and gas. As we said at school, *tempus monstrabit*, but meantime, *tempus fugit*, and if he do not carry these measures through during his first year of office he may find increased difficulty hereafter. People here have adopted the idea that "foreign capital" is to regenerate the colony, and the General propounded to me afew days ago the postulate, that "capital, like water, will always find its level." Notwithstanding this abstract doctrine we have to consider the material obstacles to be overcome 'ere foreign capital can flow hitherwards, amongst which the discredit of the Government and its obstructive and obsolete system of administration are not least.

The measures required most calculated at present to assist the development of this colony, are the abolition of the differential duties of such restrictions upon the free circulation of commerce as the various vexatious prohibitions affecting the purchase of foreign vessels by Spaniards, and the trammels and fetters with which both exportation and importation have been loaded in days gone by. And the angel that shall conduct these islands to immense prosperity and importance one day is, according to my idea, John Chinaman. The Chinese have now the monopoly of internal trade throughout the Phi-

Digitized by Google

lippines, the lethargic nature of the Indian impeding him from successful competition in any way. And when the Chinese shall be freely invited and encouraged to flow over here they will fill up every department of industry and agriculture, at which they excel. Production will begin without limits, but the population will be radically changed; and this is what actuates the Government in discouraging Chinese immigration. The Spaniard cannot be made to see that John Chinaman with all his faults is a better subject and fulfiller of the duties of humanity than the actual Indian occupant of the soil. Spain has Christianised the Indian (or imagines she has; really having only substituted one idolatry for another), and the religious element in Spanish affairs watches over him with protective and fatherly interest. Nevertheless, most Europeans, long residents in the country, agree in the opinion founded upon a painful experience, "That the Philippine Indian is by nature unfitted for the responsibilities of civilised life." I am aware that this same was formerly declared of the negro, and that nowadays the "everlasting" is expected to live it down, and whilst I affirm it as regards the present condition of the race, I by no means deny that with time and care the mind could be developed and imbued with the moral elements required.

November and December are exceedingly wet months this year, which very seldom happens, and the rice crops not got in may be expected to suffer considerably. The *Numancia*, ironclad, was to have sailed this week ostensibly for Madagascar, where she was to coal, &c. The Lenton troupe of acrobats is delighting the Manilese ladies, and drawing crowded houses, paying them better, so they state, than any other place they have visited in the East. What we greatly want here is a good opera company. High and low are passionately fond of music, and a company would find here a remunerative permanent abode. I have no doubts of that. The Mangard Company left last year and have not returned, on account of a quarrel with the authorities; but people had such a taste of regular operatic performances that to secure similar delights they will in future put up with any vagaries of managers or singers rather than lose them again.

LATEST TELEGRAMS.

Telegrams from Tientsin *via* Kiachta reach to the 3rd Feb. These come by the ordinary Russian service, the transmission of homeward messages by Grant's Trans-Mongolian Line not having commenced.

(RECEIVED VIA GALLE.)

SINGAPORE, Feb. 15.—The prisoners* in the *Erin* (barratry) case transported for life. Policies cancelled.

THE ANNUAL CHINA DINNER.

The committee recently formed to undertake the management of this annual banquet will hold their first meeting at Willis's Rooms on the 4th inst., for the purpose of electing a chairman, appointing an honorary secretary (pro tem.), fixing the date of the dinner for the present year, and making some arrangement to place the undertaking on a permanent footing. With this view it is proposed to constitute a sort of club, every member of which must have visited China or Japan, and must pay an annual subscription of a guinea, by which means also the price of the tickets can be reduced. The following are the names of the gentlemen who compose the committee:—Major the Hon. A. Anson, M.P.; Major-General George Balfour; Sir John Bowring; Major Frederic Brine, R.E.; Sir John Francis Davis, Bart., K.C.B.; Captain Roderick Dew; Sir James Elphinstone, Bart.; R. J. Gilman, Esq.; Lord Richard Grosvenor, M.P.; John Holliday, Esq.; H. M. Hozier, Esq., 2nd Life Guards; Rev. Hugh Huleatt, M.A.; Commander James Hunter, R.N.; Vice-Admiral the Hon. Sir Henry Keppel, K.C.B.; James J. Mackenzie, Esq.; R. Montgomery Martin, Esq.; Walter Ormiston, Esq.; Edward Pereira, Esq.; Sir W. J. Tyrone Power, K.C.B.; Colonel J. N. Sargent, C.B.; Admiral Sir Michael Seymour, G.C.B.; Charles J. F. Stuart, Esq.; T. Sutherland, Esq. Two of the above are ordered on foreign service, namely, Vice-Admiral Keppel and Major Brine.

* The prisoners here alluded to include, we believe, the captain, mate, and portion of the crew of the *Erin*. No fuller particulars are yet to hand, and we are at present unable to state whether the sentence includes Mr. Scott, of Bangkok, who had been arrested on a charge of complicity in this case, as stated in our issue of Feb. 11.

AT a private meeting held this day of some of the shareholders of the Hindustan Bank it was decided to form a committee forthwith for the purpose of carrying out plans for resuscitating this institution.

Births, Marriages, and Deaths.

BIRTHS.

CRUIKSHANK—On the 22nd Feb., at 21, Clarendon-road, Notting-hill, the wife of Augustus Walter Cruikshank, Esq., of a daughter.
COUPER—On the 16th Feb., at Craigiebuckler, the wife of J. C. Couper, Esq., of a daughter.
JARVIE—On the 18th Feb., at 9, Lynedoch-crescent, Glasgow, the wife of John Jarvie Esq., of a son.
LAY—On the 27th Feb., the wife of William Hyde Lay, H.B.M.'s Vice-Consul, Taku of a son.
SEVERS—On the 21st Feb., at 3, Royal-Crescent, Bath, the wife of Henry H. Severs, Esq., of a daughter.
ANGOVE—On the 22nd Feb., at Portswood, near Southampton, the wife of Captain W. C. Angove, P. and O. Company's Service, of a son.
KENNEDY—On the 24th Feb., at 14, Prince's-gardens, Prince's-gate, the wife of Colonel Clark Kennedy, C. B., of a daughter.
HOWELL—On the 25th Feb., at Sunbury, the wife of W. G. Howell, Esq., of a daughter.
WESTALL—On the 26th Feb., at the Waldrons, Croydon, the wife of William Mawley Westall, Esq., of a daughter.

MARRIAGES.

DOW—GOODWIN.—On the 21st Feb., at St. George's, Hanover-square, by the father of the bride, assisted by the Rev. James McConechy, M.A., James Dow, Esq., of Shanghai, China, to Marianne Letitia, only daughter of the Rev. Dr. Goodwin, of Croom's-hill, Greenwich. No cards.
KINGSMILL—WALFORD.—On the 21st Feb., at St. Luke's, Chelsea, by the Rev. Philip Williams, B.L.C., rector of Rewe, Henry Kingsmill, Esq., of China, barrister-at-law, eldest son of Henry Kingsmill, Esq., of Sidmonton, in the county of Wicklow, to Eleanor Mary, elder daughter of the late Arthur Walford, Esq., of Lowndes-square. No cards.
WATKINS—HANSARD—On the 26th Feb., at St. George's, Hanover-square, by the Rev George Eastman, Alfred Thomas Watkins, Esq., of Yokohama, Japan, eldest son of Thomas Watkins, Esq., of West Brompton, to Mary Elizabeth, only daughter of the late Albert William Hansard, Esq., of Yokohama. No cards.

DEATHS.

ELMSLIE—On the 5th Feb., at Montabelle, Weston-super-Mare, Sarah, the beloved wife of Adam Wallace Elmslie, Esq. [In our last issue it was erroneously stated that the deceased lady was wife of the Mr. Elmslie who was lately Consul at Canton; it should have been the mother.]
FRASER—On the 16th Feb., at 10, Burwood-place, Hyde-park, Jessie, the beloved wife of Mr. W. L. Fraser.
HALKET—On the 14th Feb., at Newcastle-upon-Tyne, of whooping-cough, Kate, infant daughter of Richard Webb Halkett, Esq., of Hankow, China, surviving her twin brother six weeks.
LE FORESTIER—On the 22nd Feb., at her brother's, 18, Surrey-street, Croydon, Elizabeth, widow of Mr. Augustus Le Forestier, merchant, of Batavia, Java, aged 65.
RICKETTS—On Sunday, the 17th Feb., at 42, Queen's-gate-terrace, Kensington, Captain Charles Spencer Ricketts, R.N., in the 80th year of his age.
GRISWOLD—On the 18th Feb., at Cannes, Charles Griswold, Esq., partner in the house of Russell and Sturgis, at Manila.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months' sight.		
„	4 ditto		
At Shanghai	6 ditto	6s. 3d.	6s. 3¼d. to 6s. 4d.
„	4 ditto	6s. 2d.	6s. 3d. to 6s. 3¼d.
At Canton	6 ditto	4s. 6d.	4s. 6¾d. to 4s. 7d.
At Hong Kong	4 ditto	4s. 5¼d.	4s. 6¼d. to 4s. 6½d.
At Macao			
At Singapore	6 ditto		
„	4 ditto		
At Manila	6 ditto		
„	4 ditto		

At Shanghai, bills on India, Rs. 300 to 302 per 100 taels. At Hong Kong, Rs. 219 to 220 per $100. Bar Silver at Shanghai, tls. 111·30; at Hong Kong, 10¾ per cent. prem. Mexican dollars at Shanghai, tls. 73 7 per 100; and exchange on Hong Kong, 27 to 27½ discount. Hong Kong and Shanghai Bank shares, old, 7; new, 6 per cent. dis.; Gas Company, 2 pm; Hong Kong and Whampoa Dock, 10 to 20 per cent. prem.; Steam Shares, 10 per cent. dis.; Union Dock Company, 25 per cent. dis.; China Traders' Insurance, par.

The introduction by the banks of the new usance of four months instead of six months' sight bills on London, has caused some irregularity in the business at Shanghai. At Hong Kong the local bank still draws at six months, all others only at four months.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From LONDON, January 1, 'Erl'King (st.); January, Silver Eagle; from Liverpool, 24th December, Achilles (st.); from Cardiff, January 4, Hamilla Mitchell; from New York, 25th December, Horatio; 30, Endeavour.

At HONG-KONG.—From London, January, James Russell.

DEPARTURES.

From SHANGHAI.—For London, December 27, Tyburnia, 28, Tamerlane; for New York, 31, Gabalva; January 3, Canvass Back; for Montreal, January 3, Avonvale.

From FOOCHOW.—For London, January 5, John Lidgett; for New York, Isabella Ridley.

VESSELS LOADING.

At YOKOHAMA.—For New York, Chassze, Johanna Maria, Golden State.

At SHANGHAI.—For London, Peter Denny, Beemah, Asphodel, Achilles (st), Earl Dalhousie, Burmah, James Shephard, John Bellamy; for New York, Dunkeld (full), Dencalion (full), Endeavour, Horatio, Crawshay Baily.

At AMOY.—For New York, Lord Clyde and Japan.

At FOOCHOW.—For London, Charlotte, Tynedale, Esperanza, Tavistock; for New York, Robin Hood; for Boston, Lubra.

At CANTON.—For London, Dilpussund, Stornoway, Sea Bird. For New York, Sea Serpent, Portland, Diamont.

At MACAO.—For London: Bankside.

FREIGHTS AND CHARTERS.

At SHANGHAI.—Vessels on the berth are loading for London at £2 to £1 15s. per ton of 50 cubic feet. The steamer Achilles is advertised to leave for London on 16th Jan., taking tea at £3, silk £6. The rate to New York is £2 per ton of 40 cubic feet.

At FOOCHOW.—To London and New York, £2 5s.

At HONG KONG.—To London, £2 per ton.

COMMERCIAL POSTSCRIPT.

SPOKEN.—Jeddo (Dutch barque), Batavia to Rotterdam, Jan. 30, 31, N., 37 W. Teesdale, Penang to New York, Dec. 20, 35 S., 24 E. Leon, Gaboon to China, Jan. 14, 17 S., 32 W. Marian (barque), Singapore to New York, January 6, 5 S., 17 W.

CASUALTIES.—640 bags of coffee, in a damaged state, have been sold ex Jacobus Martinus, Meppelder, from Batavia to Schiedam, which vessel put into Simon's Bay, Dec. 8, with mainmast sprung, decks strained, &c. The White Squall, Thirkell, from Singapore to Boston, went ashore on Cape Cod, Feb. 9, and became a total wreck; crew saved.

Naval and Military.

The *Army and Navy Gazette* states that a new regiment for service at Hong Kong is about to be formed. It will be about 700 strong, of all ranks, and will be composed, we believe, principally of Beloochees. The European officers will consist of one lieutenant-colonel, one major, six captains, six lieutenants, a paymaster, an adjutant and quartermaster; and the appointments, we may presume, will be made either from the half-pay list or from those officers who are supernumerary of their rank. [We believe our contemporary is in error, and that this regiment is the one reported in our issue of the 26th January.' We now add the full complement of this corps.]

HONG KONG CORPS.—1 lieut. colonel, 1 major, 6 captains, 6 lieutenants, 1 paymaster, 1 adjutant, 1 quartermaster, 1 sergeant major, 1 quartermaster sergeant, 1 subador major, 5 subadors, 6 jemadors, 1 havildar major, 1 paymaster sergeant, 1 native doctor, 29 havidors, 1 bugle major, 11 drummers, 1 moonshee, 30 naicks, 570 privates; total, 676. Pay and allowances £14,515. The Hong Kong corps will be officered by officers of the Ceylon rifle regiment, so as to allow of exchanges and reliefs. The subalterns of the new corps will be of the rank of lieutenant.

The Rodney, 78, screw ship, 2,770 tons, 500-horse power, Captain Algernon C. F. Heneage, is ordered to be ready to proceed to sea for her destination as the flagship of Vice-Admiral Sir Henry Keppel, K.C.B., on the China station, by the 16th March. Her crew numbers now nearly seven hundred officers and men, who are at present lodged in the Naval Barracks of Sheerness Dockyard, but on the 1st of March they are to be turned over to the ship.

The Duke of Edinburgh arrived at Devonport from Paddington, and having taken refreshments at the official residence of Admiral-Superintendent Drummond in the dockyard, went with his suite on board his ship, the Galatea, 26, in Plymouth Sound. On the 23rd the Commander-in-Chief, Admiral Sir William Martin, mustered and inspected the crew of the frigate, and she sails for Lisbon, Gibraltar, and Malta.

We are glad to be able to announce to the officers of Her Majesty's infantry that the present blue undress frock-coat is to be abolished, and a neat patrol-jacket substituted for it. We need scarcely say that the present garment is as generally as it is deservedly detested, and the change will be welcomed by all ranks, from the slim ensign to the sometimes portly field-officer.

The Navy estimates for the year 1867-8 have just been issued, and from them we learn that the sum required to be voted is £10,926,253, which is a net increase on the last vote of £491,518. The item required by the Comptroller of the Navy is £522,559 more than that voted last year, while the sum required for the Storekeeper-General of the Navy is £147,990 less. Wages to seamen and marines are increased by £34,393, and miscellaneous services by £62,500. A saving of £7,052 is effected in the vote for the coastguard service, &c. The total force in the fleet and coastguard services to be voted this year is 67,300, being some 60 more than last year. £88,350 is required for a ship to be built on the design of Captain Coles, leaving £191,650 to be voted in future years to make up the contract price. Another new item is a sum of £344,350 for armour-plated ships, iron ships, and gunboats—the amount to be voted in future years being £400,650. £20,000 more is wanted for the purchase of dockyard tugs.

THE JAPANESE ENTERTAINMENT.

The exhibition lately opened at St. Martin's Hall is one of the most singular ever offered to the curiosity of the British public. In the words of an advertisement, "the Japanese troupe have arrived," and the eleven members composing it perform nightly before an assembly of spectators not so numerous, to judge from a single occasion, as one would have expected. The exhibitors are declared to have been "imported entire and direct from Japan." Whether human curiosities do not usually arrive in this country from such distant places as Japan entire, but in pieces like the china one's friends take the useless trouble to send one, is best known to "spirited" and "enterprising" showmen; but the Japanese troupe is not now, whatever it may have been on its first arrival, exactly entire. The "chief," unfortunately, has lost the use of one hand, so that he cannot exhibit his feats; and, as he is said to be a "perfect miracle," those persons who do not believe in miracles have perhaps missed an opportunity of conversion. He however joins in the salutations with which the performances commence, and which are after this fashion: the eleven performers clatter on to the stage, having upon their feet apparently trestles, and round their legs petticoats, without crinoline or other artifice to enable the wearer to walk freely. They stand in a row before the footlights, and then they suddenly sink down altogether upon their hams, and bow their bodies forward, touching the ground with their foreheads; whereat, of course, the gravity of the Briton, impatient of "them rum furriners," is overcome, as it is also when one of the "troupe," still on his hams, bursts out, as if moved by an irresistible impuse, with some remarks in his native tongue, which may be complimentary or the contrary, and which remind one forcibly in sound and tone of a farrago of those ordinary street cries to which every Londoner is accustomed, but which "no feller can understand." The "chief," too, from time to time, appears upon the stage to direct the proceedings, and in an extremely affable manner and with great volubility addresses the audience in his native language. No doubt he gives explanations which are a great assistance to the polyglot spectator, but to the multitude it matters little whether he endeavour to explain or mystify, whether he bless or curse. There is now and then some native music (so called) written, one would imagine, in the key of Z minor, in comparison with which the marrow-bones and cleavers are melodious, and which, combined with the natural sombreness of St. Martin's Hall, creates a disposition to fall upon your neighbour's neck and weep. That is when the music (so called) is instrumental; when there is the addition of vocal, such as would be a fortune to the street-singer who knows "the value of peace and quietness better than to go away for fourpence," "tears, idle tears" would not do justice to your feelings. A girl having taken an instrument (of torture) something like a banjo, and having carefully untuned it, is joined by a younger relative (gender unguessable by reason of the costume), who adds to her instrumental noise a vocal noise, called a song, which seems to resemble "Do you know the muffin man?" in so far as it appears to have no natural end, but has to be stopped by the children's parent, who (probably when he can't bear it any longer) brings it to a conclusion by beating together two wooden things like those weapons with which buttermen attack great masses of butter. This is one part of the entertainment. For the rest there are juggling, acrobatism, top-spinning, and the "butterfly trick." The juggling and the acrobatism are certainly not superior, one would say, to what may be seen here any day in the week; but the top-spinning is marvellous, and the "butterfly trick" is very ingenious and elegant. Appearance is greatly studied. One acrobat gets himself up with a gigantic red wig, and looks like an imp in one of our pantomimes; and if the acrobat who swung about on a bamboo-pole really meant (as it is reasonable to suppose he did) to act a chimpanzee to the life, he must be allowed to have been eminently successful, to the extent even of shaking the disbelief of those who deny man's descent or ascent from the ape. Pharaoh had his chief baker and chief butler; and the Tycoon is said to have his "chief top-spinner." This is Ga-en-see, who, if he failed once or twice, failed chiefly through his gear not being in proper order, and at last succeeded triumphantly. Considering the conversation he carried on all the time with his family, and the series of observations he took the unnecessary trouble to make during his labours to the audience, it is wonderful he did not make more failures. He made a top spin all over his body, on the edge of a sharp sword, up and down and along a string which (if we properly understood his movements) he first greased by passing it through his anointed hair; and, still more wonderful, up and along, and round and down a succession of obstacles more easily comprehended at a glance than from verbal explanation. Suffice it to say that the top went up-hill and through the doors, and ascended a tower, and put up a ladder, and turned round corners, and careered along the flat, and "finished" down-hill. Asi-kitchi-san took some common looking paper, twisted pieces into a certain shape, and with the help of two fans and some flowers created quite an idea of butterflies hovering about their favourite haunts. For, of course, every one had a fan—even the acrobat who did the chimpanzee on the bamboo-pole.

WE observe the name of Bishop Smith, late of Victoria, among the clergymen nominated to perform special services in the English churches at Paris during the Exhibition.

THE screw steam frigate *Galatea*, 26, Capt. the Duke of Edinburgh, left Plymouth Sound yesterday morning for Lisbon, Gibraltar, and Malta. After a sojourn of a few months in the Mediterranean she will proceed to Australia, after which Bombay, Calcutta, China, and Japan will be visited. The voyage round the world will involve a total absence of about two years.

THE POSTAL SERVICE TO CHINA VIA RUSSIA.—At last the Postal authorities have arranged to forward correspondence to China through Russia. The notification should have stated the average time occupied by this route. Our experience of it is about 65 to 70 days from London to Tientzin. Letters should be posted on Friday or Monday specially addressed "*Via* St. Petersburgh" and will be charged as follows:—To Peking, Kalgan and Tientsin, half an ounce, 1s. 9d.; above half an ounce and not exceeding one ounce, 3s. 6d.; and for every additional half-ounce or portion thereof, 1s. 9d. To Urga, at the following rates:—Not above half an ounce, 1s. 2d.; above half an ounce and not more than one ounce 2s. 4d.; and for every additional half-ounce or part thereof, 1s. 2d. A fee of 4d. is charged on each registered letter in addition to the above rates.

THE ARMY ESTIMATES.—The total sum asked for in the Army Estimates, which have been published, is £14,752,200, being an increase of £412,200 over that of the previous year. The increase is chiefly in the charges for the effective services (£12,625,900, as against £12,224,700 for 1866-7), the estimates for the non-effective services being only some £11,000 more than last year. To the numerical strength of the army, which it is proposed shall be 139,163, there is an addition of only 11 men. There is an increase of £60,300 for the pay of the army, £155,200 for the commissariat and movement of troops, £115,600 for clothing and supplies, £12,900 for the Volunteers, £3,000 for the pensioners and army reserve force, and £56,700 for manufacturing departments and materials for warlike stores. The estimates contain charges amounting in the whole to £3,193,278 for military purposes in the colonies. This expenditure is distributed thus:—Canada, £635,604; Nova Scotia, £218,615; Newfoundland, £21,441; Burmuda, £167,819; West Indies, £275,898; Australasia, £170.696; China, £228,749; Ceylon, Straits Settlements, and Labuan, £239,964; Mauritius, £132,112; West Coast of Africa, £103,820; Cape and Natal, £289,379; St. Helena, £41,188; Gibraltar and Malta, £667,973. The sums that will probably be repaid by the colonies amount to only £348,700:—Ceylon and Straits Settlements, £220,000; Australia, £43,000; Mauritius, £45,000; China, £15,000; Cape and Natal, £19,500; Malta, £6,200.

DEATH OF CAPTAIN MACKINNON, OF THE "TAEPING."—From a communication received last week at the office of the City of Glasgow Insurance Company, it would appear that the celebrated China clipper *Taeping* has lost her able commander. On 3rd December last the *Taeping*, then on her outward voyage, put into Algoa Bay and landed Captain Mackinnon, who had been prostrated for three weeks previously with rheumatic fever. The captain went into hospital, where he remained till wholly or partially recovered. He then started on his homeward journey, but at Table Bay he was again struck down with illness, and there he died, in the forty-first year of his age. Captain Mackinnon was a native of Tyree. Bred a sailor, he has for upwards of twenty years past been voyaging in tropical climates, and his recent feats in navigation prove him to have been a seaman of great experience and more than ordinary skill.

JAPANESE WAR TROPHIES.—A Japanese metal cannon, weighing 5¼ tons, and a mortar, weighing 22 cwt., have arrived at the Gunwharf, Portsmouth, from Woolwich, "a present from Her Majesty to the borough of Portsmouth." A proper site is being prepared for mounting these valuable trophies of war on the Esplanade at Southsea.

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE ANGLO-CHINESE FLEET.

(19th.) On the vote of £101,300, to make good to the Chinese Government the value of the Anglo-Chinese flotilla, Colonel Sykes asked for some explanation of this vote.—Mr. Hunt said that in the year 1865 an arrangement was made with the Chinese Government that if they would not sell the Anglo-Chinese flotilla they should be compensated for any loss they might sustain. It was thought that if they were obtained by either of the belligerent parties in America Imperial interests might be prejudiced. The value put upon the flotilla when it left China for England was £152,500, and the value for which it had been sold was £51,350. The ships were all either sold or contracted to be sold but one, and if that were sold the money would be paid to the Exchequer.—Colonel Sykes said that Captain Sherard Osborn, who was sent out to command this flotilla, found that he was not to be in the service of the Emperor, but of a local governor, and he therefore very properly threw up the commission. This country was now called upon to incur a loss of £101,000 as the result of a policy which had been consistently deprecated by hon. gentlemen now sitting on the Ministerial side of the House from the year 1859 to the close of last session. The House was aware that he (Colonel Sykes) had also deprecated this policy, and he was still of opinion that we had committed a breach of neutrality in taking part against the Taipings. He therefore protested against this vote.—Mr. Baxter was afraid it was too late to protest against the vote, but he hoped it would be the last of a similar kind that would ever appear upon the estimates. The vote was then agreed to. The resolutions were ordered to be reported, and the House resumed.

THE ARMY IN CHINA, INDIA, &c.

(Feb. 26th.) Major Anson moved for a Select Committee to inquire into the duties performed by the British Army in India and the Colonies, and the possibility of employing certain portions of the Indian army in our colonial and military dependencies; and, in support of his motion, argued that while the British Empire comprised a larger number of military forces than any other, our military system was so arranged that it was on the British troops that the weight of Indian and colonial service fell. He need hardly point out to the House that the great amount of tropical service performed in India, China, the Mauritius, and other places, must have a very serious effect on the physical condition of our soldiers in case they had to undertake a hard campaign in Europe. In China it appeared, from the last returns, that during the 14 years ending in 1854 the loss of European troops amounted to something like 1,300 men, while 2,500 were invalided—in other words, actually lost to the service—out of an annual average force maintained there of 1,300; so that the whole force was sacrificed nearly three times within the period he had named. That he could not help thinking was a most scandalous waste of our soldiers for no good purpose whatsoever. Up to 1865, with the exception of the years 1858-4-5, we had employed in China native troops from India, and he would give the House some idea of the different effect produced by the climate on whites and blacks when he stated that in the case of the former the mortality had been at the rate of 57 per 1,000, while in that of the latter it was only 23; the proportion of the invalided—a most expensive item—being as 51 whites to 27 blacks, and the constantly sick 74 to 49. These statistics clearly established, he thought, the justice of the inference that black were, so far as health was concerned, more useful than European troops in China. When the black troops were withdrawn an epidemic set in among the Europeans, because they had to perform duties which were previously performed by the former; that course having been taken without the opinion of a single officer who had served in China having been asked as to the propriety of the step. The result was that the white troops had been so reduced by the epidemic as to have been rendered perfectly useless. There were, however, two objections made to the non-employment of European and the employment of black troops in China. The persons whose wishes seemed for the most part to be consulted on the matter were the Chinese merchants, and they seemed to be of opinion that they would not be safe if left to the protection simply of native soldiers. His answer was that there was hardly a Chinese merchant at Hong Kong who had not in all probability two-thirds of his capital at Shanghai, where there were no European soldiers.—Mr. O'Reilly moved, as an amendment or addition to the motion, that the committee should inquire into the best means of organising a force of Asiatic troops for general service in suitable climates, arguing that our policy was to use British troops as the backbone of our military troops, to place them only in healthy stations, and to supplement them by native troops and the use of the telegraph and steam transports. He remarked that if a colonial corps remained in one place, it could never meet any enemy but a local one, and the officers, deprived of the prospect of a distinguished career, must settle down to perpetual expatriation from their country and the command of a corps in which they could never rise beyond the rank of lieutenant-colonel. It was almost impossible that such a corps could attain distinction in military service; and yet such a corps was to be organised for China, and officered by officers on the half-pay list. Could men who had the prospect of spending their lives in China be expected to enter heart and soul into their military duties? It was impossible that a corps thus irremovable should attain to a state of satisfactory efficiency.—Sir H. Rawlinson expressed a doubt whether Indian troops would really be of much use in such climates as New Zealand, Australia, and the Cape, though they might be serviceable in the Mauritius and China.—General Peel consented to the appointment of the committee, but insisted that no report of a committee could relieve the Governor-General or Indian Secretary from requiring the presence of a certain number of British troops in India. He said, with reference to Hong Kong, the hon. member who seconded the motion referred to the regiment which we are about to raise for service in Hong Kong. We are doing in that case exactly what he wishes; that is to say, we are going to employ native troops where the climate is unhealthy for British troops. We have applied to the Secretary of State for India to advise upon the best method of arranging as to this regiment. A question arises as to how you are to officer these troops. It would be necessary that their officers should have a certain knowledge of their language, and should be able to command the respect of their men. The hon. gentleman opposite said I objected on constitutional grounds to the employment of the native troops which were employed during the Chinese war.—Mr. O'Reilly: I only said I understood the right hon. and gallant gentleman to object to their continuance in China.—General Peel: My objection to their continuance there certainly was a constitutional one. That is one of the objections which I think would apply to the employment of a great number of native troops. There were at one time no fewer than 12,000 to 16,000 Indian troops employed in China that were never voted by Parliament; and they might have been 20,000 or 30,000, as far as Parliament was concerned.—Mr. Laing assured the House, from his own experience, that we had in India a reservoir of martial force in such tribes as the Sikhs, Ghoorkas, Pathans, and Beloochees—equal or superior to the Cossacks or Turcos, without reckoning the Bombay and Madras armies, which were ready to serve anywhere. There was no novelty in the proposal, for Indian troops now garrisoned Aden, Singapore, and other points beyond sea; but the great difficulty was in finding officers, which had been increased by the amalgamation of the two armies.—Lord Cranborne suggested that the inquiry should not be confined to oral evidence, but that questions should be addressed to high Indian authorities who could not be conveniently brought before the committee.—The Marquis of Hartington professed his inability to foresee any good result from this committee.—After some observations from Major Parker, the motion, with the addition of the amendment, was agreed to.

Foreign Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Feb. 22.

In a former letter I gave some particulars of an address that was presented to the Second Chamber of the States General by some Rotterdam and Amsterdam merchants connected with the Japan trade, begging that one of the members would take the initiative in requesting an indemnification by the Government to those traders who experienced losses in the war in 1863. Several addresses to the same effect have been since received by the Parliamentary bureau, and amongst the signatures appear the names of L. D. Simons, from the Hague; Bonnike and Son, Wurfbain and Co., Josephus Jitta, de Coningh and Co., van Assendelft de Coningh, Bahlman and Co., from Amsterdam, and others. The first-named suggested that the Government should not relieve the Japanese Government of a part of the indemnification, which must be paid by it according to the treaties; as the opening of more harbours in Japan—as that Government promises to do—does not counterbalance that direct profit. It is quite certain that this gentleman does not profess the principles of Free-trade, because he suggests that the profits will gradually decrease with the extending of the Japan trade. The Second Chamber will undoubtedly disregard these claims.

In some of the foreign papers I find the following singular but true story of making money. Our Prince of Orange is defendant in a very curious suit that is now before the French courts. Last year he bought from a certain van den Daele an estate in the Ardennes for a sum of 300,000 francs, represented by acceptances. Upon the title deeds of this property the Prince tried to borrow 150,000 francs from the French Credit Foncier, but not succeeding, he put one of his friends in the chateau, with directions to buy cattle and all sorts of agricultural implements and to make the most out of the produce. But the Prince forgot to pay his acceptances or even the expenses incurred by his agent, and actions are pending for the recovery of the sums due. I sincerely regret that this is not the first time he has endeavoured to make money in this manner to recover the sums he squandered away.

It was with much regret that the news of the death of Mr. A. Prins, vice-president of the Council of India, was received here. The fact was published on the 15th of February by telegraph despatch *via* Point de Galle.

The 50th anniversary of H.M. the King was solemnised yesterday throughout the whole country in the usual manner. The knighthood of the Netherlands Lion was conferred on a great many persons, amongst others upon Mr. W. D. Lammers van Toorenburg, resident at Sourakarta. On the same day the Major-General of the N. I. army, W. C. von Schierbrand, was promoted to be Lieut.-General.

The last returns in reference to the rinderpest give the following results: In the week ending the 9th February, 2,048 head of cattle were attacked, against 2,620 and 3,251 in the two previous weeks. Not only are the peasantry suffering much by this calamity, but also by the water that has inundating a great part of our country; the dykes in some provinces being broken down.

There is no news about the Scheldt question; the Prussian engineer is ill, which has caused another delay in settling the dispute.

A very interesting book has been published upon Japan. It is written by Jkr. J. C. L. Pompe van Medervoort, who passed many years in that country as Governmental doctor and director of the Imperial Japanese Medical School of Nagasaki. The book is published by Messrs. van den Herwell and van Santen, of Leyden.

The cloth market in India and China being overstocked a meeting was convoked at Twenthe, the Dutch Manchester, to consider the question whether it was not advisable to decrease the working hours. The meeting carried the resolution, "That it was to the interests of industry and the workmen to apply that measure in the cotton manufactures."

An extraordinary incident took place at this day's sitting of the Second Chamber. Before the Chamber was opened a conference took place between the Ministers and the President of the Chamber, and it was resolved that the public meeting should be changed to a general committee. The reason is quite unknown; perhaps you will receive some particulars as "Latest."

COMMERCIAL.

Coffee.—Since the auction there is not much passing, but prices of all

Digitized by Google

sorts are fairly supported. The private transactions include 3,000 b. Padang *ex* Ramsey, at 45c. to 45½c.; 3,500 b. Java *ex* Kortenaer; 500 b. Padang *ex* Ione, at 45½c. to 46c.; 3,155 b. do. *ex* do., at 40½c. to 46½c.; besides 3,251 b. Macassar *ex* Petronella Catharina.

RAW SUGAR.—Without alteration, and the market is rather more inactive. The business has been limited to 1,762 mats Sourabaya per Oscar, No. 14¾, at f.34¾; 776 m. Indramayoe per Henriette, No. 13¾, at f.33¾. Refined sugar meets with more demand since the alterations in the sugar duties proposed by the English Government were carried by the House of Commons; November prices were paid in full.

RICE.—3,400 b. Necransie *ex* Freeland were sold at f.7¼.

SPICES.—Nutmegs No. 1 were in fair request, and an advance on the last quotation is paid, and nothing can be bought under 87c. Java Cinnamon very firm, No. 3 f.1.20; for China extreme rates have been paid in consequence of want of stock. The nominal quotation is 76 to 76c.

JAVA INDIGO.—Dull, in waiting for the arrivals of some floating parcels.

TIN.—Since my last report 800 slabs Banca were sold at 53f., and 400 slabs Billiton at prices that did not transpire.

HIDES.—700 p. Padang rinder 6 to ¼ lb., ex Ione, were sold at secret prices.

The produce markets have exhibited an extreme dullness, and in most articles transactions have been unusually small. Quotations, however, are not depressed, but they are to a great extent nominal.

MONEY.—The tone for the Dutch funds was much depressed; the foreign stocks, and especially the Austrian funds, close firmer. Transactions, however, remain still limited, because there is a general want of confidence. Dutch Two-and-a-Half per Cents., 55½; Three per Cents., 65⅛; Four per Cents., 86½. Trading Co., 142¼. Spanish Two-and a-Half per Cents., 31; Portugal Three per Cents., 41¼; Russian Five per Cents., 92 9-16ths; Austrian Five per Cents., 47; United States 1882, 77.

'CHANGE.—London: 3 months, f.11.72; 2 months, f.11.75; short, f.11.80. Paris: 3 months, f.46.57½; 2 months, f.46.67½; short, f.46.95. Hambro': 3 months, f.34.82½; 2 months, f.34.90; short, f.35.10. Berlin: 3 months, f.171.25; short, f.173.

DISCOUNT.—Bank, 3½ to 4½; open market, 4 per cent.

SHIPPING INTELLIGENCE.

DEPARTURES.—Feb. 14, from Texel for Sourabaya, Louisa; Feb. 15 from Brouwershaven for Batavia, Kosmopoliet II.; from Hellevoet for Singapore, Johanna Antonio; for Java, via Cardiff, Koffyboom.

PASSENGERS OUTWARD.—For Java, per Kosmopoliet II.: Mr. H. N. Grobbee and family, Mr. P. C. Wynmalen and family, Mr. H. van Berkel and family, Mr. H. J. G. Aars and family, Mr. T. E. Senn van Basel and family, Mr. J. van Velzen and family, Mr. J. M. van der Burg and family, Baron C. von Heerdt de Val, Messrs. E. M. C. C. and J. M. L. Kobold, Mr. Y. Wybrandi, Mr. L. Begeman, Mr. E. van der Burg, Messrs. C. Prey, J. Kroll, G. Beek, V. T. Priester, G. A. Ellenbaas and family, J. Weidner and family, and Miss P. E. van Lynscholten.

Freights and Premiums of insurance unaltered.

The Trading Company chartered the following ships to convey produce from India to Dutch harbours.

For Amsterdam: Wijk aan Zee, Capt. G. Mannoury; Hebe, A. H. Kiehl; Louis Meijer, G. H. Holtgreve; President Plate, C. D. Julius; Honigbij, J. van der Valk; Kandanghauer, W. Zeelt; Quintet, L. Slijboom; Johanna Maria Christina, C. N. Gorter; Helena and Henriette, P. J. Deterding; Cornelia Adolphina, J. G. de Roever; Batavia, J. D. van Dolder; Zes Gezusters, R. Rutgers.

For Schiedam: Copernicus, Capt. J. Algra; Henriette Gerardina Susanna, P. J. Dam.

For Dordrecht: Ary Scheffer, Capt. J. G. Kunst.

For Middelburg: Johanna Maria, Capt. E. A. Kleijnenberg; Minister Thorbecke, Capt. W. H. Kannegieter.

ROTTERDAM, FEB. 24.

In the meantime it is not these discussions that create the greatest interest. On the contrary, it is a strange fact that, before the discussions were opened, the President of the Second Chamber announced that a secret sitting was to be held, as the Ministry had to communicate some interesting particulars. It was soon rumoured that they were relative to some strong misrepresentations which were made by the Prussian Government to ours, respecting the Limburg Question. So much seems to be certain, that the Government of Prussia is wicked, in consequence of the speech from the throne, by which the Luxemburg Chambers were opened and which was delivered by Prince Henry, in name of our king, the Grand Duke. Several conversations took place in the last days between the Prussian Minister and our Minister of Foreign Affairs; on the other side it has transpired that two men-of-war have been ordered to return from Malta to Nieuwe Diep, whilst six men-of-war (ironclads and frigates) are to be equipped without the shortest delay in the said harbour. Add to these facts that the Prussian papers deal with our country in the most humiliating and hostile way, and then you will conceive that there are some matters that must disturb our public, and indeed it was desirable tha the Cabinet should give some calming explanations. It is true that in yesterday's sitting it was stated by J. de Casembroot that we were in good harmony with all the foreign Powers, but it should be highly preferable when this was assured by the Minister of Foreign Affairs, who is the only person who can state it.

From Brussels I hear that on our King's birthday a banquet took place, on which the principal Dutchmen living in Belgium met. It was resolved to constitute a Dutch union of charity, with the aim to support all the Dutchmen in a moral and financial way, who will want this, and who reside in Belgium. This is the first union that was constituted in foreign countries. It will be patronised by the Dutch Minister.

The Crown of Oaks (*eikenkroon*) was conferred by our King Grand Duke of Luxemburg to the Minister of Foreign Affairs, Mr. Van Zuylen.

From Rio we heard very good news about the *Kayoo-Mar*, a man-of-war which was built here for account of the Japan Government. The ship and machinery are said to be first-rate. She remained in perfect order, notwithstanding she met with very stormy weather on her passage. On the 25th of January she would start for Japan.

His Majesty has granted an honourable dismissal to Mr. K. Dekker, Assistant Resident of Judramayve (Cheribon).

COMMERCIAL.

COFFEE.—2.600 b. Java were sold at 40c. to 43½c.; 1,000 b. do. ex Kortenaer at 47½c. to 49c., and 800 b. at 42c.

RICE.—The quotations are: 1st Java Table, 16f. to 18f.; 2nd, 13f. to 14f.; White Java, 11f. to 12f.; Carga, 7f. to 8f.; Arracan and Rangoon, 7f. to 7½f.

TEA.—The nominal quotations are: China Congou 90c.; Ord., 80c.; do. Java, 80c. to 82c., and 73c. to 74c.

HIDES.—The following parcels were sold: 444 st. Padang, Buffel-von, 9½ to 9⅝ K. ex Jone; 699 st. Soerabaya, Rinder-von ca., 5⅛ K. ex Bristolian; 129 do. 10 do. Dageraad; 500 do. Soerabaya Rinder do. 3½ do. India; 639 do. 4½ to 4¾ do.

INDIGO.—When the result was known of the auctions in the English market an advance of 15 to 20c. on the October value was paid for 45 chests.

BANCA TIN.—1,200 slabs were sold at 52½f.

DRUGS.—Camphor: China 85 c., Japan 88 c. Gum Benzoe: 59 chests ex Jone 2a were sold at 110c. and 8 chests at 120c. Japan Wax: By want of stock there are no transactions to report. Ginger: No disposable stock. Gummi Elasticum: Unaltered, the nominal value is 100f. Cutch: 5,300 ex Jone were sold at secret prices. Rattans: 860 bundles ex Ymuiden and 150 piculs ex Kortenaer were sold at firm prices.

SHIPPING INTELLIGENCE.

ARRIVALS.—Texel, Feb. 22: Swanley, from Padang. Zierikzee, Feb. 22: Graafstroom, from Samarang; Brouwershaven, from Padang. Texel, Feb. 23: Maria Adolfina, from Batavia; India Packet, from Batavia.

The cargo of the American ship, from Java to Amsterdam, which was wrecked near Texel, was sold for 18,000f., a sum which will just be sufficient to pay the costs.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, FEB. 23.

Since last mail the great event in Germany, and a novelty it was in its way, was the general election of members for the new North German Parliament. Whilst in England the people are clamouring for Reform and an extension of the suffrage, the Germans, who without any trouble on their part have obtained triennial Parliaments, vote by ballot and universal suffrage, do not seem to appreciate the value of the political advantages they enjoy, for not one half of them have taken the trouble to go to the polling offices and vote at all. Here at Hamburg this apathy was still greater; the two electoral districts of the city contain about 53,000 registered voters, but the entire number that voted was under 20,000, the successful candidates being Mr. Charles de Chapeaurouge (a large merchant and banker of Swiss origin, but whose family have been established here for several generations) and Dr. Anton Ree, whilst in the rural district, Mr. Sloman, the eminent shipowner (whose father was an Englishman) was all but unanimously elected. At Prussia there are 236 electoral districts of 100,000 inhabitants each, in the minor States, 61, total 297, each of which returns one member. As far as is known at present of the result of the elections in Prussia, the conservative element has the preponderance. Of the 223 definitively elected members 107 are Conservatives, 91 Liberal-Conservatives, 41 Liberals, 11 Ultramontanes, and 43 Poles. Amongst the former are one prince of the blood (Prince Friederich Carl), 2 dukes, 4 princes, 26 counts, 9 barons and 71 other nobles. There are 9 ministers and ex-ministers, 12 generals, 33 civil officers of rank; also 1 banker, 2 manufacturers, two professors, two clergymen, one bookseller, and eight doctors of the different faculties. As the elections are decided by an absolute majority, in several cases a second one was required between the two highest on the poll, which is then decided by a simple relative majority; and as in the present state of infancy which parliamentary life is now going through in Germany, candidates have nowhere come forward to "solicit the honour of your vote and support," so it is but natural that in many places the same men are elected for several electoral districts, and take their choice for which they will sit. Thus Count Bismark, who is now very popular, has been elected for half a dozen different places. All this necessi- Altona Mr. Pustau was put in nomination, and would probably have been returned, but he declined the honour of becoming M.P., and preferred to stay at home and look after his business. The gentleman elected for Altona is Dr. Rudolph Schleiden, a retired diplomatist, for many years envoy and Minister Resident for the Free Hanseatic Cities at Washington.

It has been reported that Prussia is on the eve of sending out several ships of war to assist the *Vineta* in exterminating the pirates in China, but I am unable to trace the report to any authentic source. On the contrary, I have been assured by a gentleman well acquainted with what is going on in the Prussian navy, that no further reinforcements are likely to be sent out this year, but rather to wait and see how the Prussian ships of war are to be converted into the nucleus of a Federal and National German navy.

The Oldenburg Eastern Ship Company have begun to liquidate their concern, and announce a first return of 10 per cent. to their shareholders.

COMMERCIAL.

COFFEE.—The market continues in a satisfactory condition, prices being well supported and the demand being lively. Sales of the week, 25,000 bags.

SUGAR.—Raw dull, and prices can with difficulty be supported. A few small parcels taken for consumption. No alteration in refined.

RICE.—Demand not so brisk as hitherto, but prices are firm.

SPICES.—Cassia lignea lower, 1,500 chests imported from New York and London were sold at 11¾. sch. banco., Ginger more inquired for. Cloves firm. Pepper quiet.

CAMPHOR.—Refined may be had a trifle cheaper.

OIL OF CASSIA decidedly lower. 10 chests ex Victoria found purchasers at 5½ mks. banco per lb.

OIL OF STARANNIS.—60 chests have arrived by the above-mentioned vessel, and are in the market, the price demanded being 8 mks. banco.

SPELTER.—Owing to the absence of all orders, the dulness in the market continues, and prices are rather in favour of buyers, the quotations for Silesian in slabs being 14½ mks. banco in loco, and 14⅛ for delivery.

LONDON, THURSDAY, FEBRUARY 28, 1867.

THE FRENCH SERVICE *V.* THE P. AND O.

THE letter of "A China Merchant," which appears in another column, on the comparative merits of the P. and O. Company and the Messageries Imperiales, sets forth some undeniable facts, but none that have the recommendation of novelty. The shortcomings of the P. and O. service so circumstantially recounted by him have long formed the basis of comparisons between the English and French steamers, highly unfavourable to the former; and the feeling of dissatisfaction, already strong, is revived with increased intensity regularly once a month, when the homeward French steamer all but overtakes at Suez the P. and O. mail leaving China ten or twelve days before it. And as our correspondent justly points out, although exceptions sometimes occur, by the P. and O. vessels reaching Suez at or before their due date, any advantage that might accrue from this is generally nullified by the want of a spare steamer in readiness at Alexandria to provide for what is evidently an unexpected contingency. The whole root of the evil is in a nutshell, and it would be sheer waste of time to go over the arguments *pro* and *con.* which have been agitated for the past few years. The company are allowed too much time to perform the service. Reduce the contract time from Shanghai to Marseilles to forty-two days in the N.E. monsoon and forty-six in the S.W. and the P. and O. can do it as well as the French steamers. We have repeatedly urged that the China service should not be made to hang on the Calcutta steamer at Galle, but come on direct to Suez, and of course a steamer to be in waiting at Alexandria. As the time approaches for inviting tenders for a new service we may expect to see it revised accordingly.

Certainly there are extenuating circumstances that should not be forgotten, and these are generally overlooked by individuals who find cause of complaint against the company. The service should be viewed as a whole, and in passing judgment on it we should take as a basis for our verdict its relative efficiency over a long term of years, rather than its most prominent deficiencies during a transitional period such as the present. The system of communications it embraces forms such an intricate and wide-spreading network, and the distances from port to port are so long as compared with those in other parts of the world, that some slight indulgence might be accorded on this score. It is easy to say that there are other companies now that would perform the work as well as or better than the P. and O. Company, but we must remember in how many past years they have done it—and, on the whole, done it well—when no other company existed that was capable of undertaking it at all. Facts and figures, however, are stubborn things; and when a carefully prepared table shows that on the average the P. and O. Company take nearly seven days longer than their rivals to bring us our China letters, we fear they have little chance of an honourable acquittal on the score of previous good character. We have never sided with those violent detractors of the service who every now and then fulminate their wrath against it for no better cause than the discomfort resulting from an ill-cooked meal or a glass of inferior sherry; but these constantly recurring delays are vexatious in the extreme, and it is difficult to find any apology for them. We have often pointed out that it is intolerable that the service should be conducted in such a manner as to be unable to avail of an early arrival at Suez. The company's own interests demand that a steamer should be waiting at Alexandria. It is an injustice to their own vessels, captains, and engineers that the steamer which arrives out should be again despatched in a few hours, and no doubt the accident just reported to the *Poonah** is owing to this pressure.

FINANCE COMPANIES.

THE time has come to individualise the leading cause of that wide spread devastation of means and credit which has acted so injuriously on our home interests and so seriously affected our mercantile position in relation to other great countries. The Finance Companies are the true authors of it. They assumed to guide into new channels the overflow of surplus capital, and taking advantage of the refined organism of diffused credit and the comparatively untried experience of the public in limited liability, they represented the certainty of returns far beyond what capital had ever known. They set afloat masses of worthless paper, and obtained advances on questionable securities to an extent that curtailed legitimate accommodation to the mercantile and trading community. Theirs was the allotted task of drawing away the disposable means of the country from that systematic development that had led to a material progress unparalleled in national annals. Foreign to our soil, of a rank and unsubstantial growth, their blighting influence was ultimately exerted on the expansive activity of private enterprise. But even the French model was widely departed from. Had they acted simply as auxiliaries and intermediaries between money borrowers and investors, they would have fulfilled their professed functions, and this legitimate form of operation at the outset of their career resulted in a few splendid successes, which being blazed about generated a host of other finance and contract companies. All were bidders for public confidence, and this confidence increased the more for the mystery hanging about their mysterious achievements. Investors, misled by the splendid dividends withdrew their means from customary profitable employment, and for their hard cash the finance companies tendered securities which, for the most part, have proved absolutely valueless. The means thus obtained, aided by pledges of gigantic but unsubstantial credit, were applied to undertakings not only demanding, in most instances, long terms of years for their completion, but the remunerative character of which wholly depended on their being fully carried out. To find at once employment and profit, needless projects were multiplied. Railway companies experienced the full force of their reckless competition for capital, and were compelled to secure, at usurious rates, the means for extensions rendered necessary in self-defence, owing to the infinite number of new lines promoted by the aid of the Finance Companies.

It was not long before our great contractors were at their mercy. Not one half the cost with which the incomplete contract works were debited had been spent in actual cash. Successive advances were made by the finance companies on more and more exacting terms; nor did they really possess that command of means which the number and extent of their miscellaneous ventures implied. Allowing their investments to have been sound, the capital was locked up for periods too protracted to be safe, and even had the undertakings, so far as carried out, been money's worth, the country could not have sustained the burden. The wonderfully generative power of these finance companies, the multiplicity of schemes to which the public were asked to subscribe upon their judgment, gave them the means of securing funds to be used in the promotion of still wilder ventures, and of calling into existence a mass of paper bearing the signature of the contractors in these new enterprises which, with their acceptances attached, might in their turn be regarded by the banks as security for further advances. The scale of operations was thus continually enlarging, and with this additional circumstance, that the finance companies were working on the same ground which previously existing individual combinations were quite competent to fill. Operating in the spirit of unscrupulous competition, they destroyed substantial and lucrative businesses, leaving in their places only disorganisation and the wreck of inchoate enterprises. But for these finance companies men like Sir Morton Peto might have carried their individual undertakings to a successful issue, but neither executive skill, nor known

probity, nor large means could stand before their destructive influence.

The last reports of the existing financial companies, if read by the light of past experience and tested by their balance sheets, will hide from few, notwithstanding the specious character of their representations, the excessive weight of their commitments and the utterly irrecoverable character of a large portion of their former advances. The report of the International Financial Society shows that in the last year the so-called profits of £30,693 assumed to be brought forward from the previous year's transactions, had been absorbed, and a further loss of £23,934 incurred, and that the reserve fund was a merely nominal one, less than £5,000; and yet the International Financial had a board of directors second in business and financiering reputation to that of no other institution in London. The International Financial shares, on which £5 was paid, are worth but £2 10s. to £3 10s.; the shares of the London Financial Association, on which £25 have been paid, range from £7 10s. to £8 10s.; the General Credit and Discount shares, on which £7 10s. has been paid, must be sold at a loss of £2; Credit Foncier of England shares, on which £9 have been paid, have been sold at public auction for £4. There is reason to believe that the shares of not a few finance companies, even at their present depreciated rates, are bolstered up by adventtious influences. It is an error to suppose that financial companies that have been pursuing a reckless career can at the mere bidding of shareholders check effectively unwise operations. Shareholders are perpetually deceived by statements of "gross profits for the year;" the gross profits for the past year were stated by the chairman of the International Financial at £65,000, yet we are told in the directors' report "the profits have been absorbed." The losing game is perpetually represented as a winning one. It may be doubted whether any of these financial companies knew their true position, so wide had been the area of their operations, so purely speculative and contingent on innumerable risks, their advances. The happy thought of reconstruction or of forming a company *to take over itself*, will not deceive the initiated nor lead them to suppose that the reduction of nominal share capital is the sole object in view. The London Financial Association has made out a balance of accounts mainly by means of a heavy call.

Finance companies should be cleared from the soil of England. The Imperial Mercantile Credit and a host of other would-be financiers have already succumbed. There is ample scope for the productive employment of the capital of the country, ample means for securing aid to every sound enterprise, without them, and we may expect to see the remainder of them disappear almost as rapidly as they have sprung up. The fact that finance companies are essentially hostile to all those modes of sound combination and individual energy to which we clearly owe our national advance in wealth, is now beginning to be appreciated, and already their influence in bringing out new companies as so many floats to their own fortunes, has been shattered. The beguiled investors and thousands of ruined victims are unable to realise, in many cases, one tenth part of their outlay, and frequently are glad to forfeit all, and so escape the fangs of their directors or the Court of Chancery, that bourne to which so many concerns have been driven for vivisection. The following is from the report presented by the directors of the Credit Foncier of England at the meeting on the 18th inst. Notwithstanding these flourishing reports, it is singular that the shares should stand so low. The present prices are: Credit Foncier, £9 paid, £3 10s. to £4; International Finance, £5 paid, £2 10s.; General Credit, £7 10s. paid, £5 5s.; London Financial, £25 paid, £7. The report of the Credit Foncier opens with a statement that

The directors do not recommend any dividend, the current income having been applied to meet a reduction in the previously estimated valut of the assets, but states that the capital of the company remains intac and that each share on which £9 is credited is represented by an equa amount of assets, taken at the lowest fair valuation. Of the nature of the investments of the company an extent of information is at the same time given apparently as ample as could reasonably be desired. The amount in the London, Chatham, and Dover Railway stands in the books at £301,881, of which £180,341 consists of debentures taken at a discount, with overdue coupons, and £121,540 is Metropolitan A stock, "taken at a very low price." This asset represents the largest investment by the company in any single undertaking, and the directors believe that, considering the terms at which it was taken and the prospects of the line, "an early profit on the amount standing in the company's books in relation to it may be expected." The other principal undertakings in which the company are interested are—1. The City of Milan Improvements, Company, of whose works the first section is to be opened at midsummer, and on which, "if only a portion of the anticipated results take place" an increase of £100,000 may be obtained on the valuation now put upon them; 2. The Millwall Freehold Land and Docks, which are expected to be opened for business in August; 3. The Irrigation Company of France, a concern that "promises to be one of the most successful of its kind;" 4. The Paris Streets Company, for making two new streets in Paris, expected to be finished in July, and for which the directors count upon very satisfactory returns;" 5. The Varna Railway, now immediately about to be opened, with the prospect, it is said, of a highly remunerative grain traffic; 6. The Imperial Land Company of Marseilles, for which, "if it obtains, as is expected, the concession of making the new port of Catalans, competent authorities in Marseilles prognosticate a great future;" 7. The City Offices Company, which, from its premises in Old Broad-street and Bishopsgate-street, "is fast accumulating a rent-roll far in excess of the annual liability on the amount of £300.000 for which the Credit Foncier have guaranteed its debentures;" and lastly, the Belgian Public Works Company, for the drainage and embellishment of Brussels, "which promises the best results as to profit." In conclusion, the directors point out that from the date of the formation of their undertaking in February, 1864, up to the end of last month, the shareholders have received dividends for the whole time at the rate of 18¾ per centum per annum.

THE SAN FRANCISCO AND CHINA LINE.

Congress has at last passed an Act permitting the Pacific Mail Company to perform the service without calling at Honolulu, on condition that they establish a branch service between Yokohama and Shanghai. This course has been agreed to, and the branch steamers, it is expected, will be ready to correspond with the steamer leaving San Francisco on the 3rd July. The *Great Republic* and *Celestial Empire* are expected to be at San Francisco in time to take up the monthly service from that date.

ACCORDING to some accounts the affront offered by Mons. Aubaret to the King of Siam has been misrepresented. It is, however, agreed that it is highly improper for Mons. Aubaret to demand satisfaction from the King for statements in the *Bangkok Recorder*. We understand that this subject will be brought to the knowledge of the Emperor Napoleon, by Sir John Bowring, on his first interview as the special Ambassador of Siam to the Courts of Europe; we therefore reserve our comments on the matter.

MR. MICKLES, a director of the East India Telegraph Company of New York, has not yet arrived in London, and the delay is attributed to the death of Mr. JOHN P. YELVERTON, the president. Nothing will, we presume, be done until the arrival of this gentleman in the way of shipping out the necessary materials for laying the wires and cables in China.

AT the meeting of the Mont Cenis Railway Company it was stated that the line would be partially opened in May, and for the whole route in July.

FOREIGN-OFFICE.—APPOINTMENTS.—The Queen has been pleased to appoint R. Callander, Esq., now Her Majesty's Consul at Stockholm, to be Her Majesty's Consul for the provinces of Rio Grande do Sul and Santa Catarina, to reside at Rio Grande do Sul. G. R. Perry, Esq., lately Her Majesty's Consul at Rio Grande do Sul, to be Her Majesty's Consul for the eastern coast of Sweden. The Queen has also been graciously pleased to appoint W. Doria, Esq., Secretary to Her Majesty's late Legation at Hanover, to be Secretary to Her Majesty's Legation at Stockholm.

THE FRENCH v. THE P. AND O. LINE.

(To the Editor of the *London and China Telegraph.*)

SIR,—It is somewhat surprising that public opinion has not been more unreservedly expressed as to the very marked and serious shortcomings of the Peninsular and Oriental Steam Navigation Company in the conveyance of mails and passengers from the East. Surely it is a national disgrace that we who pride ourselves on being the first naval power in the world, essentially a maritime people, and understanding to perfection the management of ocean steamers, should quietly allow ourselves to be completely distanced by the French in the conveyance of mails from India and China.

It appears as if the P. and O. Co. either are wholly unable successfully to compete with the Messageries Imperiales (French Company), or that so long as they can secure the Government subsidy they care but little to perform the service as well as their competitors.

It is not occasionally that they are outrun by the French—it is quite the rule for the letters by the latter company to be delivered three to eight days in advance of those by the P. and O. Co., and the average for the year 1866 shows by the annexed statistics a difference of over six days in the passage from Shanghai in favour of the French company. I left that port last spring for England by the P. and O. steamer, the French mail boat starting at the same time; yet, notwithstanding the latter incurred a loss of two days by calling at Saigon against six hours that we remained at Penang, we found to our chagrin on arriving at Ceylon that we had been beaten in the race halfway some six days, the passengers by the French boat travelling about one-third faster than we did.

The very marked preference now shown for the Messageries Imperiales service as compared with the P. and O. Company is sufficiently exemplified by the following extract from a letter penned by my correspondents at Shanghai in November last, and which I especially commend to the notice of the directors and shareholders as tending to explain the large falling off in the quantity of silk lately entrusted to them for conveyance as compared with that shipped by the French company:—

Digitized by Google

"The Messageries Imperiales, by showing an evident desire to accommodate the requirements of shippers and passengers, are daily acquiring a more marked preference over the P. and O. Company. This is strikingly shown in the respective lists of cargo and passengers on the present occasion. The P. and O. steamer, from Yokohama, brought 137 bales of silk and only a few passengers, whilst the French steamer had a full complement of passengers and 1,620 bales of silk; both steamers were loading at the same time, and the English left one day in advance of the French. From here (Shanghai) the French steamer has 2,800 bales China silk, whilst the English has only 500 to 600 bales.

"We do not hear any complaint against the agents of the P. and O. steamers to account for the preference given to the French, but consider it due entirely to the superior class of steamers on the French line and the general arrangements of that company to afford greater accommodation and more rapid transit."

Even when the P. and O. Company's boat does manage to make a good passage and arrive before contract time at Suez, it is rendered of no avail by the neglect to keep a spare steamer at Alexandria. It is asserted that their steamers are sometimes checked in their speed in the Red Sea, if it is probable that they will arrive at Suez before the due date. Thus I notice that the letters and passengers by the incoming mail will be detained five days in Egypt on this account, at the expiration of which time I calculate the following French mail with twelve days later news will probably be within three days of overtaking the P. and O. steamer.

As the telegrams from China already announce the arrival at Hong Kong of the first of the American line of steamers across the Pacific to Japan and China, does it not behove the P. and O. Company to bestir themselves and see how best to hold their own against this formidable double competition, instead of endeavouring to bolster up their old system by elaborate defensive statements which, now their monopoly is at an end, cannot lull the fears of shareholders, or appease the wrath of complaining passengers and shippers?—I am, Sir, your obedient servant,

20th February, 1867. A China Merchant.

For the Year 1866.

LECTURE ON SIAM.

Sir John Bowring delivered a lecture on Sunday evening, the 17th inst., to an audience of nearly 2,000 persons who crowded St. Martin's Hall; the subject was "Siam and the Siamese." He detailed the various attempts which at different periods had been made by the Portuguese, the Dutch, the Spaniards, the Americans, the French, and the English, to establish commercial relations with that country, and the final success of his mission in 1853, which led to the opening of the Siamese ports to foreign commerce and to a succession of treaties, of which the Anglo-Siamese served as the model. He gave some striking evidence of the development of the resources of the country, since the emancipation of the native trade from the old monopolies which fettered it, and intercourse with other countries had impelled production, introduced capital, created shipping, and augmented the general prosperity. He gave an account of the usages of the Courts and of the character of the King, which created the greatest interest among the very large auditory. Very beautiful sacred music from Handel, Haydn, and other great artists, introduced and concluded the proceedings; and we understand the committee have urged upon Sir John that he should deliver a second lecture, which he declined, as it was most likely his nomination as Ambassador from Siam to the Courts of Europe would soon compel his absence from England.

SAM MENDEL'S EXPORT TABLES.

We have received Mr. Sam Mendel's tables containing the quantities of Cotton Goods exported from the ports of London, Liverpool, Southampton, and the Clyde during the month ended 16th February, 1867, and during the two months ended 16th February of the years 1865, 1866, and 1867 to China, Japan, Singapore, Batavia, Manila, and Ceylon

To Hong Kong and Whampoa.—For the month ended 16th Feb. the exports were: Of Plain Cottons, 2,498,940; Coloured Cottons, 61,834; Printed Cottons, 12,483 yds.; Cotton Yarn, 358,870 lbs.; total value of Cotton Goods, £80,392. For the two months of 1865: Plain Cottons, 2,258,422; Coloured Cottons, 190,296; Printed Cottons, 7,100 yds.; Cotton Yarn, 401,610 lbs.; total value £104,612. For the two months of 1866: Plain Cottons, 7,894,731; Coloured Cottons, 898,001; Printed Cottons, 98,850 yds.; Cotton Yarn, 708,710 lbs.; total value, £286,689. For the two months of 1867: Plain Cottons, 5,914,335; Coloured Cottons, 196,854; Printed Cottons, 133,993 yds.; Cotton Yarn, 504,900 lbs.; total value, £165,978. Decrease 1867 against 1866, £120,711.

To Shanghai.—For the month ended 16th February: Plain Cottons, 5,272,921; Coloured Cottons, 1,176,841; Printed Cottons, 893,886 yards; Cotton Yarn, 20,000 lbs.; total value, £153,250. For the two months of 1865: Plain Cottons, 7,259,028; Coloured Cottons, 187,740; Printed Cottons, 297,128 yards; Cotton Yarn, 23,000 lbs.; total value, £182,143. For the two months of 1866: Plain Cottons, 12,733,894, Coloured Cottons, 865,400; Printed Cottons, 647,174 yards; Cotton Yarn, 5,000 lbs.; total value, £353,098. For the two months of 1867: Plain Cottons, 12,961,181; Coloured Cottons, 3,019,710; Printed Cottons, 1,132,466 yards; Cotton Yarn, 93,132 lbs.; total value, £372,774. Increase, 1867 against 1866, £27,776.

To Japan.—For the month ended 16th February: Plain Cottons, 1,296,741; Coloured Cottons, 110,460 yards; Printed Cottons, no return; Cotton Yarn, 191,480 lbs.; total value, £50,367. For the two months of 1865: Plain Cottons, 463,845; Coloured Cottons, 109,380; Printed Cottons, 177,910 yards; Cotton Yarn, 4,000 lbs.; total value, £21,301. For the two months of 1866: Plain Cottons, 5,781,408; Coloured Cottons, 706,160; Printed Cottons, 570,786 yards; Cotton Yarn, 502,500 lbs.; total value, £218,378. For the two months of 1867: Plain Cottons, 1,974,571; Coloured Cottons, 288,860; Printed Cottons, 93,600 yards; Cotton Yarn, 349,500 lbs.; total value, £75,519. Decrease, 1867 against 1866, £142,859.

To Singapore and Penang.—For the month ended 16th February; Plain Cottons, 3,609,396; Coloured Cottons, 320,134; Printed Cottons, 346,202 yards; Cotton Yarn, 91,330 lbs; total value, £98,074. For the two months of 1865: Plain Cottons, 3,918,346; Coloured Cottons, 505,708; Printed Cottons, 200,362 yards: Cotton Yarn, 176,600 lbs.; total value, £131,166. For the two months of 1866: Plain Cottons, 8,010,211; Coloured Cottons, 1,685,062; Printed Cottons, 340,294 yards; Cotton Yarn, 271,105 lbs.; total value, £273,886. For the two months of 1867: Plain Cottons, 7,063,046; Coloured Cottons, 1,033,642; Printed Cottons, 673,879 yards; Cotton Yarn, 179,830 lbs.; total value, £203,641. Decrease, 1866 against 1866, £70,245.

To Batavia.—For the month ended 16th February: Plain Cottons, 1,205,704; Coloured Cottons, 548,080; Printed Cottons, 1,347,439 yds.; Cotton Yarn, 81,100lbs.; total value, £82,520. For the two months of 1865: Plain Cottons, 810,286; Coloured Cottons, 819,576; Printed Cottons, 1,202,999 yds.; Cotton Yarn, 54,400 lbs.; total value, £82,797. For the two months of 1866: Plain Cottons: 3,954,643; Coloured Cottons, 1,718,408; Printed Cottons, 717,246 yds.; Cotton Yarn, 36,000 lbs.; total value, £160,671. For the two months of 1867: Plain Cottons, 4,178,590; Coloured Cottons, 2,283,569; Printed Cottons, 2,939,026 yds.; Cotton Yarn, 139,640 lbs.; total value, £237,374. Increase, 1867 against 1866, £76,703.

To Manila.—For the month ended 16th February: Plain Cottons, 2,869,571; Coloured Cottons, 2,423,193; Printed Cottons, 101,985 yards; Cotton Yarn, 13,600 lbs.; total value, £135,929. For the two months of 1865: Plain Cottons, 1,280,330; Coloured Cottons, 1,551,902; Printed Cottons, 275,716 yards; Cotton Yarn, 16,000 lbs.; total value, £82,295. For the two months of 1866: Plain Cottons, 1,077,664; Coloured Cottons, 1,953,196; Printed Cottons, 3,720 yards; Cotton Yarn, 6,200 lbs.; total value, £84,528. For the two months of 1867: Plain Cottons, 2,915,212; Coloured Cottons, 2,423,193; Printed Cottons, 101,985 yards; Cotton Yarn, 29,689 lbs.; total value, £138,907. Increase, 1867 against 1866, £54,379.

To Ceylon.—For the month ended 16 February: Plain Cottons, 875,752; Coloured Cottons, 47,115; Printed Cottons, 78,196 yards; Cotton Yarn (no return); total value £29,582. For the two months of 1865: Plain Cottons, 1,022,132; Coloured Cottons, 333,648; Printed Cottons, 287,002 yards; Cotton Yarn, 31,039 lbs.; total value, £56,704. For the two months of 1866: Plain Cottons, 2,456,628; Coloured Cottons, 354,616; Printed Cottons, 809,395 yards; Cotton Yarn, 52,275 lbs.; total value, £100,709. For the two months of 1867: Plain Cottons, 4,506,750; Coloured Cottons, 395,195; Printed Cottons, 708,516 yards; Cotton Yarn, 11,500 lbs.; total value £134,904. Increase, 1867 against 1866 (as regards Plain, Coloured, and Printed Cottons), £40,954; decrease, 1867 against 1866 (as regards Cotton Yarn), £6,759.

DIPLOMATIC AND CONSULAR STAFF IN CHINA AND JAPAN.

CHINA.

Peking.—Envoy Extraordinary, Minister Plenipotentiary, and Chief Superintendent of British Trade, Sir Rutherford Alcock, K.C.B.; Secretary, Chinese Secretary, and Translator, Thomas F. Wade, C.B.; Second Secretaries, Sir Eric R. T. Farquhar, Bart., Richard Conolly; Assistant Chinese Secretary, J. M. Brown; First Assistant, J. P. M. Fraser; Assistant and Accountant, J. G. Murray; Physician and Medical Attendant, R. V. Powles, M.D.; Student Interpreters, H. P. McClatchie,

Edward Egan, Edward McKean, A. S. Harvey, F. K. Porter, E. C. Baber, E. L. Oxenham, Byron Brenan; Chaplain, Rev. J. Burdon.

AMOY.—Consul, W. H. Pedder (on leave); Acting Consul, Robert Swinhoe; Interpreters, John Gibson, George Phillips; First Assistant, C. Treasure Jones; Second Assistant, E. Solbe.

CANTON.—Consul, Daniel B. Robertson, C.B.; Interpreter, and Acting Vice Consul, W. S. F. Mayers; First Assistant, W. N. Payne, Chaplain, Rev. J. H. Gray, M.A.

WHAMPOA.—Vice-Consul, H. F. Hance.

CHINKIANG.—Consul, Frederick Harvey; Assistant, C. P. R. Allen.

FOOCHOW.—Consul, Charles A. Sinclair; Interpreter, A. R. Hewlett; Second Assistant, H. J. Allen; Chaplain, Rev. George Hamilton.

HANKOW.—Consul, W. H. Medhurst; Interpreter, W. E. King; First Assistant, J. A. Webster (on leave); Second Assistants, E. D. Jones and R. A. Mowatt.

KIUKIANG.—Consul, M. C. Morrison (on leave); Vice-Consul in charge, P. Hughes; Interpreter and Assistant, G. P. Thomson; Chaplain, Rev. D. Purkis.

NEWCHWANG.—Consul, Thomas T. Meadows; First Assistant, A. Davenport.

NINGPO.—Consul, W. H. Fittock (on leave); Interpreter and Acting Consul, R. J. Forrest; First Assistant, H. F. W. Holt; Second Assistant, C. T. Gardner.

SHANGHAI.—Judge of Supreme Court for China and Japan, Sir Edmund Hornby; Assistant-Judge, C. W. Goodwin; Law Secretary and Registrar, John Fraser; Private Secretary to Judge and Chief Clerk, R. S. Medard; Interpreter, Windsor Lowder; Consul, Charles A. Winchester; Vice-Consul, John Markham; Second Vice-Consul, Thomas Adkins (on leave); Interpreter and Acting Second Vice-Consul, Chaloner Alabaster; First Assistant, C. Treasure Jones (absent at Amoy); Second Assistants, J. J. M. Beatty, W. G. Stronach, and George Jamieson; Chaplain, Rev. C. H. Butcher.

SWATOW.—Consul, George W. Caine (on leave); Interpreter (in charge), W. M. Cowper; Second Assistant (vacant), acting temporarily, William Steuart.

TAIWAN.—Consul, Robert Swinhoe (absent at Amoy); Interpreter and Acting Consul, Charles Carroll.

TAMSUI.—Vice-Consul and Interpreter, William Gregory.

TANG-CHOW.—Vice-Consul, P. J. Hughes; Assistants, J. T. Middleton and M. J. O'Brien.

TIENTSIN.—Consul, James Mongan; Interpreter, H. G. Howlett; Second Assistant, J. P. M. Fraser.

TAKU.—Vice-Consul, William Hyde Lay (on leave); Acting Vice-Consul, J. B. Goddard.

JAPAN.

YEDO.—Envoy Extraordinary, Minister Plenipotentiary, and Consul General, Sir Harry S. Parkes, K.C.B.; Secretary of Legation, Sidney Locock; Interpreter and Japanese Secretary, Richard Eusden; Interpreters for Japanese Language, E. M. Satow, Alex. von Siebold, and J. F. Lowder; Third Secretary (temporarily), A. B. Mitford; Assistant Accountant and Medical Officer, William Willis, M.D.; Student Interpreters, Owen A. Vidal, W. G. Aston, Hiram S. Wilkinson; Judge of Supreme Court, Sir Edmund Hornby; Assistant Judge, C. W. Goodwin; Law Secretary and Registrar, John Fraser.

HAKODADI.—Consul, Abel A. J. Gower; Dutch Interpreter, J. J. Enslie; Third Assistant, James Troup.

YOKOHAMA.—Consul, Dr. F. G. Myburgh; Vice-Consul, Marcus O. Flowers (absent at Nagasaki); Dutch Interpreter, Martin Dohmen; First Assistant, Lackland Fletcher; Second Assistant, P. W. Walsh; Chaplain, Rev. M. B. Bailey.

NAGASAKI.—Consul, Marcus O. Flowers (Acting); Dutch Interpreter, K. E. Schmidt; First Assistant, Adolphus A. Annesley; Second Assistant, R. B. Robertson.

Literature

Miss Martineau (says the *Guardian*) is reprinting, for private circulation among her own friends, and friends of the families most nearly concerned. her Memoirs of the late Lord Canning and the late Lord Elgin, from *Once a Week* and the *Daily News* respectively. The little work is to be called *A British Friendship*; it is full of reminiscences, not only of India, but also of Christ Church days, when those two great men and the late Lord Dalhousie were all at Oxford together. It is understood that ths is Miss Martineau's last "literary leaflet."

The *St. Stephen's Chronicle*, which has just appeared, enjoys the advantage of being as unlike every other weekly magazine as it is possible. It contains 148 pages 8vo. in an ornamental wrapper, and a full report of the proceedings in Parliament of the previous week, a summary of the week, a selection of articles from the daily and weekly press, and a list of the Houses of Lords and Commons, and of the Cabinet. There is no doubt that, for the general reader, this is a much more handy book than Hansard, and it is certainly cheaper.

Mr. W. Gifford Palgrave is writing a narrative of his travels in Georgia and Circassia, and Mr. Blanchard Jerrold is writing a Guide to Paris and the Exhibition, under the title of *Paris for the English in* 1867. It will be published by Messrs. Bradbury and Evans.

A new illustrated serial is announced by Messrs. Cassell, Petter, and Galpin, with the title of *Cassell's Magazine*. It will be published weekly, price one penny; and monthly (in an ornamental wrapper, with a frontispiece), price sixpence. Among the contributors to the first monthly part Messrs. Cassell and Co. announce—Messrs. Dutton Cook, Tom Hood, John Hollingshead, John Oxenford, Godfrey Turner, Hain Friswell, Walter Thornbury, W. J. Prowse, Savile Clarke, J. C. Parkinson, Andrew Halliday, C. W. Quin, F.C.S., Thomas Archer, Richard Whiteing, the Author of "Grandmother's Money," Edward Copping, J. C. Brough, Moy Thomas, the Author of "No Church," and numerous others. Each weekly number will contain 16 pages crown quarto, printed on toned paper, double columns, and with four or five original illustrations by eminent artists.

The *New York Round Table* announces that the late Mr. N. P. Willis's career and literary labours will shortly be comprehensively narrated in the pages of a biography. Mr. Willis, as is well-known, spent many years in London and Paris, and was a sort of lion of literary circles in those cities thirty years since. His letters and journals, therefore, may be expected to be interesting to English readers. It is also announced that the life and correspondence of Nathaniel Hawthorne is to be prepared by Mr. William B. Pike, of Bradford, Massachusetts (who was with Mr. Hawthorne in the Custom House), familiar to all readers of the introduction to his "House with the Seven Gables."

Monetary and Commercial.

We understand that Mr. Chadwick, the accountant, is co-operating with Mr. Holyland, official liquidator of the Commercial Bank Corporation, in the arrangements now pending for the resuscitation of that undertaking.

The directors of the Hong Kong Gas Company have issued a circular announcing that their losses and difficulties have now been surmounted, and proposing a dividend of five per cent. to the shareholders.

It appears that many of the Mexican dollars which now reach London bear the likeness of the Emperor Maximilian, and are not suitable for transmission to China, because, unlike the old coinage of Mexico, they do not contain any gold. Another reason is that the alteration of the head may not suit the prejudices of the Chinese.

The biddings for £350,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £197,840; to Madras, £2,160; and to Bombay, £150,000. The *minimum* price was fixed at 1s. 11d. for all the Presidencies—an advance of a half per cent., and tenders at that rate on Calcutta and Madras will receive about 63 per cent., and on Bombay about 42 per cent. These results show a further moderate increase in the demand for means of remittance to the East.

The Dutch Indian Railway Company have published a prospectus inviting subscriptions for preference shares to the amount of four millions of florins (£339,000), in obligations of 1,000 florins (£48 15s.) each, bearing interest at the rate of 4½ per cent. per annum, which is guaranteed by the Dutch Government. The price of issue is £75 8s. 6d., payable as follows: £10 on allotment, £15 on the 18th of March, £10 on the 1st of April, May, June, and July respectively, and the balance of £10 8s. 6d. on the 15th of July. Discount of 4½ per cent. is to be allowed on prepayments. The dividend is to be paid half-yearly, in London by Messrs. Horstman and Co., at the company's offices at the Hague, and at their banker's in Amsterdam. The first coupon is due next July. The bonds are to be redeemed by annual drawings at par within thirty-three years from 1872. The line is in Java, and will be 125 English miles in length, one section being already finished, and the remainder in an advanced stage of progress. It passes through a populous and fertile district, and all the land required by the company has been granted gratuitously. The rails, locomotives, &c., are said to be purchased in England. Including the benefit of redemption at par, the return to the investor in these obligations will be equal to about 5½ per cent. per annum.

Mr. Mackrill Smith has resigned his seat at the board of the Credit Foncier of England.

A telegram from Hong Kong, dated the 1st of February, announces that the first of the new line of steamers (the *Colorado*) established between San Francisco, Japan, and China, which left San Francisco on the 1st of January, arrived at Japan on the 22nd and Hong Kong on the 30th.

The following letter, which appeared in the *Daily News*, explains some misconceptions in regard to the telegraph service to China *via* Kiachta. The public must be careful to address their telegrams "Grant, Kiachta," or they may be forwarded by the Russian Government route to Peking, and will not reach Shanghai much under thirty-five days instead of seventeen. Any information can be obtained at the office of this paper:—

[To the Editor of the *Daily News*.]

SIR,—Any relief from the vexatious delays which occur in the transmission of messages to China is most acceptable, and I am glad to see the announcement in your article that the service by Russia, Kiachta, and Tientsin is again opened to the public. You will however confer a favour to the public by pointing out that the ordinary courier service of the Russian Government (of which circulars have been issued by the Electric and International Telegraph Company, occupies twenty-five to thirty days between Kiachta and Peking, whilst Grant's line—the one used by China merchants—is only twelve to fifteen days, being in fact what is

Digitized by Google

termed an Estafette Service. I have this morning received a message which has been twenty-one days *en route* from Galle, which quite confirms your complaints of this route.—I am, &c.,

Old Broad-street, Feb. 20. A CHINA MERCHANT.

The directors of the Land Mortgage Bank of India are proposing a further issue of £500,000 debentures, bearing 5 per cent. interest, payable half-yearly at £87 for every £100, redeemable at par within thirty years by half-yearly drawings.

The report of the Southampton Dock Company recommends a dividend for the half-year at the rate of five per cent. per annum, which will absorb £9,008, and leave £1,037 to be carried forward. The earnings have been better than at any previous period, notwithstanding the fact that the business of some of the steam companies has decreased, owing to the depression of trade.

With reference to the £4,000,000 of capital required for the Intercolonial Railway, there is a rumour that only £500,000 of the amount will be put out at first, and the rest by instalments, but it is believed that the whole must be raised within three years. A guarantee of 4 per cent. from the Imperial Government will of course render this an unexceptionable investment, and will, it is thought, ensure the placing of the loan at about 97 or 98 per cent., should the aspect of the money market and of politics continue favourable. According to some, the Bank of England, which has of late reduced the amount of railway debentures held by it, is likely to take a large interest in this stock.

At the meeting of the Tahiti Cotton and Coffee Plantation Company the directors' report was adopted. It is anticipated that 70,000 lbs. of clean cotton will be picked per month during the year, and that it will yield three times the amount of expenditure required. Since the balance-sheet, extending to 31st December last, was made up, a cargo of cotton has arrived, and has been sold for £8,000.

The meeting of the Charing-cross Hotel Company (Limited) was held on the 18th. The net profit for the half-year has amounted to £6,716, making, with the addition of £1,358 brought forward, a total of £8,074 now available. A dividend was declared at the rate of 10 per cent. per annum, free of income-tax, leaving £74 to be carried forward.

The report of Reuter's Telegram Company shows an available total of £11,451, and recommends a dividend at the rate of 10 per cent. per annum, which will absorb £10,282, and leave £1,169 to be carried forward. The Hanoverian cable has been working since the end of December, but the land lines in connection with it will not be completed till the end of next month, when, according to assurances from the Prussian Government, they will be employed to their fullest capacity. A modification has been required of the concession as originally granted by the King of Hanover, the Prussian Government having refused to allow one of the four wires to be retained exclusively by the company, but arrangements have at the same time been made by which the company are guaranteed a certain number of messages.

A prospectus has been issued at Berlin of the Kozlow Woronesch Railway Company, which proposes to raise 4,562,400 thalers (£689,360) by the emission of 5 per cent. preference shares of £30 each, at the price of 77 per cent. net. The interest is to be payable half-yearly at Berlin, Frankfort, and Meiningen, and the periodical redemption of the security is to be at the rate of 1-10th per cent. of the nominal amount of the loan. Subscriptions can be tendered from the 23rd to the 25th instant, and the amounts allotted for distribution are: 3,000,000 thalers by the Handels Gesellschaft, Berlin; 1,000,000 thalers by Sulzbach Brothers, and A. Siebert, Frankfort; and 562,400 thalers by the Credit Bank, Meiningen. The interest upon the whole amount is guaranteed by the Russian Government, but only from the day the line is opened for traffic. It is believed that the contract for rails for this undertaking will be given to an English house.

The circular of Messrs. W. C. Sillar and Co. contains the following:—

SILVER.—The general position of the market is unchanged since last week, there being still no demand for India, and the bars by the *Atrato* have been sold for Holland at 5s. 0¾d. per oz. standard, being the price lately current, and the same as that obtained for those by the previous packet. Except for the Continent, there is no export demand for silver at present. The Mexican dollars by the French mail steamer *Imperatrice Eugenie*, amounting to about £104,000, and those by the *Atrato*, have been sold, partly for Holland, 4s. 11⅛d. per oz., showing a decline of ⅛ from the price previously current. The *Delta* on the 20th inst. took out £23,000 in this coin for China, £5,000 being for Singapore and £18,000 for Shanghai, besides £2,350 in sovereigns for Galle and Madras. Many of the dollars now sent here from Mexico bear the likeness of the Emperor Maximilian, and, unlike the old dollar, do not contain gold, and are therefore considered unsuitable for transmission to China, and are at present being sold either for the Continent or melting purposes.

EXCHANGE ON INDIA.—Until the result of the tenders for Council Bills on Wednesday last became known, the rates for Bank bills were flat, and the transactions for the mail of the 18th were limited; since then, however, a considerable rise has occurred in the rates, as compared with last week's, and we annex those now current. Transactions took place for the mail in Council bills, on Bombay and Calcutta, at 1s. 11d. and 1s. 11⅛d. per rupee, but those offered for tender on Wednesday, the particulars of which we annex, were taken at rates at least half per cent. dearer than on the previous occasion. This has caused the market to become very firm, and they are now quoted 1s. 11⅛-⅜d. This rise appears to have been generally unexpected, and is chiefly owing to the large sum paid this week by the Commercial Bank of India in the shape of dividend to the creditors, a considerable portion of which has to be remitted to India. The rupee paper has also been in good demand at higher prices, and a considerable business has been transacted. We annex the rates for this now current.

The amount of bullion by the P. and O. Company's steamer *Delta*, from Southampton on the 20th inst., was, in gold, to Galle, £373; to Madras, £1,974; in silver, to Singapore, £4,940; to Shanghai, £17,995; total in gold, £2,347; in silver, £22,935.

MANCHESTER MARKETS.

The tone of this market has continued in the same dull state as reported on the 12th inst., with prices slightly more in favour of buyers, and a further limitation of sales. Grey Shirtings: 7lb., 10s. 3d. to 10s. 6d.; 8¼lb., 13s. Cotton Yarns: Nos. 16—24, 1s. 5½d. to 1s. 6½d.; Maddapollams, 4s. 7½d. to 4s. 9d.; Long Cloths, 12s. 9d.; T-Cloths, 8s.; White Spot Shirtings, 14s. 3d.; Brocade do., 14s. 3d.

ARTICLES OF IMPORT.

TEA.—We have had a very quiet market, the trade having bought very sparingly. Prices have however been generally maintained; importers holding firmly, the only reduction being in good medium blackish-leaf and reddish-leaf Congous, of which large supplies have been on offer. Congous—siftings, Moning kinds, have sold ½d. per lb. lower, Kaisow kinds at about previous prices. Broken-leaf and Teas free from dust have fully maintained former rates. Good common have realized 1s. 0½d. to 1s. 0¾d. per lb. at public sale, without reserve. Fair flavoury kinds, of old import, have been sold at former prices. In new season's sales have been made at a decline of ½d. to 1d per lb. for fair to good; fine to finest have been in limited demand at former prices. In Pak Lings there is nothing new to quote. The finer kinds have been well maintained, but business has not been large. New-make Canton kinds show no material alteration. In Oolongs there has been a fair business done at 2s. to 2s. 2d. for fine. Souchongs remain in steady demand at 2s. to 2s. 6d. Flowery Pekoes show no alteration. Common to fair Scented Capers have been wanted, and prices have been firmly maintained. Good show no change, but fine have been scaree and inquired for at full prices. Foo Chow kinds remain as before. In Scented Orange Pekoes there is not any change; the common kinds continue dull of sale, especially the Canton kinds; fine have also been only in limited request. Green Teas show no material change, but there has been a fair demand for Export, which has taken off some of the commoner kinds of Young Hyson at an advance of ½d. to 1d. Fine Teas remain steady at late quotations. Canton-made Gunpowders of fine quality are still in demand. In Japan Leaf, coloured sorts have been taken by the trade in anticipation of their being wanted for Export, but complaints reach us from Canadian buyers that this class has greatly fallen off in quality. Uncoloured Leaf has sold at 1s. 3d. to 1s. 4½d. per lb. for Good Common to Fair. The Sales of China Tea on the 19th comprised 17,365 packages, of which 14,086 packages were sold, the whole being without reserve. The export from China and Japan to 1st February is reported by telegram to be 105,125,000 lbs. The following cargoes are now afloat, up to last mail's advices:—

				lbs.

* Put into Singapore for repairs. † Put into Cape dismasted.

SILK.—The public sales of silk took place on the 20th and 21st inst. About 750 bales of Chinas were sold at an advance upon the taxed prices, which in most instances were 2s. to 3s. below quotations. Since the sales there has been rather more business doing, but without any improvement upon the fall then established for common kinds, whilst best chops of China remain without change, No. 3 Tsatlee Classic chops being still worth 31s. 6d. Importers generally are anxious to realise, and amongst this class are to be found several foreign houses who until lately have been merely dealers in and buyers of silk for shipment to the Continent. This new element in the trade acts prejudicially to all interested as importers, and during the last season may be considered responsible for the extremely high prices paid in China and Japan in execution of orders given from this side, in some instances without limits. This example was unfortunately followed by many instead of being confined to one or two houses who really held such orders, and now of course the result is simply that a heavy loss ensues. The following are the quotations of to-day, and a better demand is current. Deliveries from 1st to 23rd are—China, 1842 bales, and Japan, 563.

COTTON.—The depression noticed in our last report has continued throughout the past week, the result being a general decline of ¼d. per lb. for all descriptions except China, 400 bales of which fair quality realised the former rate of 10½d. per lb. The total sales during the week have been 2,810 bales on the spot and 2,850 for arrival. The total stock in the United Kingdom amounts to 54,072 bales, against 66,082 last year, the stock of China and Japan being 1,316 bales, against 321 bales last year.

COFFEE.—The market for Colonial descriptions is extremely quiet, and good qualities of Plantation Ceylon alone maintain their previous value, a decline of 6d. per cwt. being experienced for dull and grey sorts. The sales of Plantation have amounted to 564 casks, 46 barrels, 518 bags, which realised as follows:—garblings, 25s 6d. to 35s.; triage 47s. to 63s.; good ordinary gray, 70s. 6d. to 71s. 6d.; coloury, fine ordinary to fine fine ordinary 75s. 6d. to 77s. 6d.; low middling small to middling 78s. 6d. to 83s.; fine 89s.; pea-berry 82s. to 89s. For Native there is even less demand than for Plantation, and 99 casks 16 barrels and 161 bags at auction were all bought in; bold at 70s., good ordinary at 64s. 6d. to 65s., except 10 casks very small, which sold at 60s. 6d. In addition to the above sales, 285 bags Manila of low quality mixed with black sold at 42s. to 43s.; 44 bags inferior were bought in at 40s., and 472 bags Singapore good ordinary Siam sort sold at 63s. to 65s. 6d., chiefly the latter rate. The stock of Coffee in the United Kingdom on the 16th inst. was, of Ceylon 5,860 tons; of Java 1,940 tons; of all descriptions 10,690 tons.

DRUGS.—Anniseeds: Of an offer of 61 cases China Star at auction, one lot slightly mouldy sold at £5; £5. 12s. 6d. was bid for the remainder, which was refused, and they were eventually bought in at £5. 15s. to £6 per cwt. Cubebs: Of 894 bags at auction, 792 sold without reserve, stalky at 49s. to 51s., second to first class mouldy at 43s. to 49s., fourth to first class sea damaged at 34s. to 48s. per cwt. Cardamoms: 2 cases ordinary Ceylon were bought in at 1s. 9d per lb. Dragon's Blood: At auction, of 8 cases in reeds 6 sold at £10. 5s. to £11; and of 29 cases lump 20 sold at £9. 5s. for fair, £5. 10s. for ordinary, and £2. 10s. for very ordinary per cwt. Galls: No China has been offered, but 500 boxes Japan sold readily at an advance of 2s. 6d. on former rates, the quotations commencing at 59s. 6d. to 62s., and closing at 62s. to 62s. 6d. per cwt. Arrivals are expected and sales advertised of both China and Japan descriptions. Rhubarb: Prices are slightly lower, and of 205 cases China at auction 172 sold as follows:—Very good 9s. 9d. to 10s., good 9s., fair 6s. 1d., middling to good middling 4s. to 5s. 3d., low middling 3s. 5d. to 3s. 6d., very ordinary 2s. 6d. to 3s. per lb. The stock on the 1st inst. was 768 cases.

GUMS.—Benjamin: At auction of 130 cases Sumatra, 18 cases dark seconds sold at £8. 10s. to £8. 17s. 6d., and 77 cases brown thirds realised for fair £5. 10s., for good middling £5. 2s. 6d. to £5. 7s. 6d. The remainder, seconds, was bought in at £10 to £12 per cwt. The offers of Siam, 48 cases, were all either withdrawn or bought in; bold almond, chiefly in block, at £37; small almond, in block, at £28; rather dark almondy, drossy, at £17 to £18 per cwt. Stock on the 1st inst., 714 cases. Copal: Of Manila 301 cases hard were offered, out of which 50 cases were sold privately previous to the sales, and the remainder was bought in at 40s. to 45s.; of 132 cases soft, 15 cases ordinary quality realised 24s., the remainder being bought in at 25s. The only other offer at auction was 90 boxes small rough Singapore, which were all bought in at 32s. 6d. per cwt. Damer: Very scarce, and 18 cases Batavian were bought in at 80s. per cwt. Stock on the 1st inst., 958 packages. Gamboge: Only 2 chests were offered at auction; one sold at £36 per cwt. for good pipe, but holders have since refused to sell at the same price. Stock on the 1st inst., 74 chests.

HIDES AND SKINS.—There was a good demand for East India Hides at the sales, both for export and consumption, and the greater part of the large quantity offered found buyers at full rates for the better descriptions, and at from last sale prices to ¼d. per lb. decline for low qualities, of which there was a large proportion. The offers were—2,031 Singapore and Penang Buffalo, 404 sold, best at 5⅜d. to 5½d., seconds at 4¼d.; 644 Manila Buffalo, none sold; 427 Java Buffalo, none sold; 1,862 Penang Cow Hides, all sold, Light at 7½d., Heavy at 5d. to 6d., Small at 7¼d. to 7¾d., Thirds at 4d. per lb.

HORNS.—Of Ceylon Deer 2,715 horns (2 tons) sold at 62s. to 64s.

INDIA-RUBBER.—The market exhibits much improvement, but supplies of East Indian descriptions are extremely limited. At auction 49 baskets Borneo sold at 1s. 2½d. to 1s. 2¾d.; 23 baskets low damp Singapore at 1s. 3¾d.; and a small quantity Penang at 1s. 6d. to 1s. 7d. per lb.

JAPAN WAX.—Fine qualities are advanced 3s. to 5s., and on the other hand common sorts are proportionately depreciated. At auction 750 boxes found buyers, 115 boxes fine Yellow unmixed saucers at 95s. to 97s.; the remainder, consisting of mixed qualities, sold (according to the amount of adulteration) at 61s. 6d. to 69s.; a few lots at 72s. 6d., 81s. 6d., and 85s. 6d. per cwt.

MANILA HEMP.—There is still but limited business doing, and of 198 bales fair current quality at auction, one-half sound was bought in at £48 10s., the remainder, first-class damaged, selling at £46 10s. to £46 15s. Privately small sales of Sorsagon have taken place at £51 per ton. Stock on the 1st inst. 1528 tons.

MUSK.—Of Tonquin 33 caddies were placed, good at 23s. 6d. to 28s. 6d., inferior bally at 17s. 6d., and 2 tins grain at 50s. to 50s. 6d. per oz.

PEPPER.—At public sale 102 bags fair Black Singapore found buyers at 3⅜d. to 3½d., and 1411 bags fair to good West Coast Penang at 2 15-16ths to 3d., being steady. Privately, 500 bags Singapore have been sold at 3⅜d. to 3 3-16ths, and 50 bags fair White at 5¼d.

RICE.—Without much general demand on the spot, there has been a good business in soft grain at rather higher rates. About 19,000 bags Rangoon have been sold at 12s., and 3000 bags Nakrenzie at 11s. 6d. to 11s. 9d. During the last few days a demand has arisen for floating cargoes, and several have changed hands, one of 1500 tons Nakrenzie at 10s. 4½d. Continental terms, one of 950 tons Rangoon at 11s., London, or 10s. 6d. ex ship, and three of Nakrenzie are said to have been sold at 10s. 9d. or 10s. 3d. ex ship. Stock on the 16th inst. 24,056 tons.

SUGAR.—Messrs. Carey and Browne report as follows on the condition of this market:—"The slight tendency towards an inclination for business in this article observable on Friday last did not increase; on the contrary, the market relapsed into a more depressed condition. Though sales have not been forced, bids have been solicited, and in many instances rather lower prices would have been accepted, but buyers have evinced no disposition to act, and the transactions reported this week are insignificant." Of Manila 8,141 bags unclayed, import 1866, were offered and bought in at 25s. 6d. to 26s. Of Penang, 500 bags brown and yellow realised 30s. to 34s. 6d. per cwt. No other business is reported in East India descriptions, and no private transactions have taken place.

SAGO, &c.—Arrowroot: Of 1,425 bags Penang 600 sold at 1¾d. to 2½d. per lb. Sago: About 130 bags small medium Borneo realised 18s. per cwt. Tapioca: At auction 200 bags Penang sold,—good medium, at 4½d. to 4¾d., medium 4d. to 4½d., ordinary dark at 3¾d. per lb. Privately 120 bags good white have realised 5¼d. per lb.

SPICES.—Cloves: At auction 17 cases Penang of old import sold at 11d. to 11½d. per lb. Cinnamon: Of 12 bales Ceylon, half sold,—seconds at 1s. 9d., thirds at 1s. 5d., fourths at 1s. 3d. per lb. Mace: At auction 3 cases Penang sold, fine 3s. 2d., medium 2s. to 2s. 1d., and 1 case low Singapore was bought in at 1s. 7d. per lb. Nutmegs: Of 112 cases Penang, import 1859-60, about 95 cases sold at full previous rates; fine bold, 63 to lb. at 4s. 1d.; 68 to lb. at 3s. 6d.; medium, 74 to lb. at 2s. 9d.; 77 to lb. at 2s. 2d.; 87-80 to lb. at 1s. 6d. to 1s. 8d.; common, 102-100 to lb. at 1s. 3d. to 1s. 4d.; 116-106 to lb. at 1s. 1d. to 1s. 3d.; 125 to lb. at 1s. to 1s. 1d.; 135 to lb. at 1s. per lb.

TOBACCO.—Of Japan, 497 bales realised 6½d. to 9¾d.; inferior, 2d. to 3d.

TIN.—The earlier auctions of the week included 1,000 slabs fine square Straits at £85 cash, and a small quantity round bottom at £84. 7s. 6d. per ton. The market has since become less active, but no alteration has as yet taken place in the quotations.

MISCELLANEOUS.—Aloe Fibre: 21 bales Manila were bought in at £33. Beans: 4 cases Tonquin sold at 1s. 7d. to 1s. 8d. Blacklead: At auction 355 barrels Ceylon of recent import sold readily, good bright lump at 25s. to 25s. 3d.; middling at 20s.; good and fine chips at 16s. 6d. to 17s. 3d.; middling at 15s.; fine bright dust at 11s. to 11s. 6d.; fair at 10s. to 10s. 3d.; medium at 9s. 3d. to 9s. 9d. per cwt. Cassia: 120 mats Japan were bought in at 48s. per cwt. Preserves: Seven cases (350 tins) China ginger realised 1s. 6d. to 1s. 7d. per lb. Roots: Of 60 bags Colombo, 10 bags good fair bright sold at 40s. Turmeric: At auction 72 bales China were offered and withdrawn. Soy: Nine casks China were bought in at 3s. per gallon. Seedlac: Of Singapore 62 cases were offered and bought in, ordinary at 65s.; very small at 57s. 6d.; very ordinary at 30s.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 15s.; nail rod, £7. 10s. to £8; hoops, £8. 17s. 6d. to £9; sheets, single, £9. 17s. 6d. to £10; Staffordshire bars, £7. 17s. 6d. to £8. 10s.; rails, £6.

STEEL.—Swedish keg, £16 to £16. 10s.

COPPER.—Sheet and Sheathing, £86 to £91 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£90 for block; £91 for common bars. Tin plates, best charcoal I.C., 32s. to 33s.

Digitized by Google

Lead, &c.—English pig, W.B., £22. 5s. to £22. 10s.; shot, patent, £23. 10s. to £24; sheet, £21; spelter, £21. 10s.; zinc, English sheet, £26 to £28; quicksilver, £6. 17s.

The following is from the Circular of Messrs. French and Smith:—The Metal Market has been very dull the last few days, and all descriptions of metals are selling on rather easier terms.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

There is still a good demand for suitable tonnage, notwithstanding that several vessels have lately been laid on the berth for the Eastern ports. Coal freights from the Northern outports remain very firm at enhanced rates.

Current rates of freight for vessels on the berth:—To Yokohama 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £57. For Saigon: £50. For Yokohama: £50. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 4s. For Singapore: £1 16s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

The Admiralty have invited tenders for the conveyance from the Thames to Hong Kong of 110 tons navy provisions, and to Trincomalee of 90 tons navy provisions, 1 ton medical stores, 5 tons (meast.) naval masts, 9 tons (weight) and 21 tons (meast.) naval stores, 30 tons cordage, 24 tons sails, and 20 tons coal, and have accepted the Naomi for conveyance of 37 tons (meast.) naval common stores, 98 tons (meast.) naval boilers, and 3 tons (meast.) victualling stores from the Thames to Hong Kong.

CASUALTIES.

146 casks arrack, 964 bales tobacco, 4,500 kilos. tobacco, in bulk, some rattans, gutta percha, boats, sails, copper, &c., have been saved from the Addison, Sloane, from Sourabaya to Amsterdam, which was stranded Feb. 9, on the Haaks, and will be sold with the wreck.

The Amphion, Backman, which arrived at St. Helena Jan. 18, from Penang, had experienced heavy weather off the Cape of Good Hope, during which she lost spars and sails.

The Agamemnon (s.), from Liverpool to Shanghai, left Mauritius Jan. 24, but returned to port on the 29th with machinery out of order, which was rectified, and she proceeded Feb. 1.

The Elshout, Akkerman, from Batavia, which arrived at Texel, Feb. 8, struck three times whilst going in.

The Catherina Wilhelmina (Dutch ship), from Batavia to Schiedam, which was put on the mud east of Foynes, Feb. 8, having driven from her anchors, floated the same tide and was brought up without any apppparent damage to her bottom; a vessel has been chartered to take from 300 to 400 tons of her cargo to its destination.

MISCELLANEOUS.

At Ascension.—Jan. 16, Blandina Dudley, Ballard, from Singapore, and sailed 19 for Liverpool.

Off Ascension, Jan. 5, Niko, from Batavia, for Amsterdam; 7, Leonce Lacoste, from Foochow; 8, Punjaub, from Manila, both for London, Swanley, from Padang, for Amsterdam; 11, Scindian, from Shanghai, for London; 17, Mercia, from Manila, for Liverpool; 19, Fontenaye, from Foochow, for London, County of Argyle, from Sourabaya, for Rotterdam; 20, May Queen, from Colombo, for London; 30, Spanker, from Colombo, for London; 31, Norah Creina, from Batavia, for Amsterdam.

At St. Helena.—Jan. 16, Rockcliff, Drew, from Penang, and sailed 19 for London; 18, Loyala, Aurrecoechea, from Macao, and sailed 19 for Havana; Amphion, Backman, from Penang; 19, Jonkheer Mr. v.d. Waal v. Puttershoek, Lammerts, from Batavia, and sailed for Dordt; 25, Jeanne and Joseph, Castro, from Nagasaki, and sailed for Havre; Sarah Watson, Bellas, from Colombo, and sailed for London; Gauntlet, Hudson, from Foochow, and sailed 26 for London; Cieas, Santos, from Macao, and sailed for Havana; Joven Tomas, Campos, from Macao, and sailed 26 for Havana; 26, Annam, Rivet, from Singapore, and sailed 27 for Bordeaux.

Off St. Helena.—Jan. 14, Royal Diadem, from Shanghai, for New York; 24, Joachim, from Batavia, for Amsterdam.

At Table Bay.—Jan. 12, Caroline, Wennersolin, from Java, and sailed 17 for Amsterdam.

At Mauritius, Jan. 13, Ho Hoang, Allardyce, from Singapore; Admiral de Mackau, Devauriex from Saigon; 14, Herman Doctor, Greve, from Batavia; 17, Guillurme, Ketelsen from Singapore; Golden Hind, Davis, from Singapore; 3, Cromwell, Hedge, sailed for Batavia; 6, Lady Bird, Mantle, sailed for Ceylon.

At Bahia, Jan. 27, Telanak, Popken, from Amsterdam, short of water, and sailed, 28, for Yokohama.

HEAL and SON, Bedstead, Bedding, and Bedroom Furniture Manufacturers 196, 197, 198, Tottenham-court-road, London, W.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

65, Old Broad-street, London, E.C.

HONG KONG AND SHANGHAI BANKING CORPORATION.

NOTICE IS HEREBY GIVEN, that the Company, having complied with all the requirements of the Hong Kong and Shanghai Banking Ordinance (No. 5, of 1866) have now become and are a corporation thereunder, and their business will from and after this date be conducted under the style or name of the "Hong Kong and Shanghai Banking Corporation."

"The Hong Kong and Shanghai Banking Corporation (Limited)" having ceased to exist, shareholders are now liable for twice the amount of their shares, as is more particularly set forth in the said Ordinance."

For convenience sake, the bills, deposit receipts, notes, and all other documents and engagements whatsoever, bearing the name of the late Company, may be retained, and continue to circulate in their present form as in accordance with the provisions of the said Ordinance, the corporation assume and take over all liabilities, contracts, and obligations of the Hong Kong and Shanghai Banking Company (Limited).

By order of the court of directors,
(Signed) V. KRESSER, Manager.

Hong Kong, Dec. 20, 1866.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay.*—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope. Clipper Ships, weekly.

Prospectuses, with through rate to a thousand places free on application.

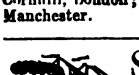
G. W. WHEATLEY and Co. (late Wagnorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W. and 32, Regent-street, S.W.

INDIA, CHINA, AND JAPAN.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations:—

Destination.	Ships.	Class.	Dock.	To Sail.
Shanghai ...	Juanpore ...	Brockleb	W.I.D.	With des.
Hong Kong ...	Solent ...	A1 13 yr.	W.I.D.	With des.
Hong Kong ...	Chetah ...	A1 10 yr.	W.I.D.	With des.
Nagasaki ...	Chanticleer .	A1 10 yr.	W.I.D.	With des.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.



STEAM to CHINA.—The undermentioned SCREW STEAMERS are intended to be despatched from LIVERPOOL, at their respective dates, with cargo and first-class passengers, for MAURITIUS, Penang, Singapore, Hong Kong, and Shanghai:—

Name.	Tons.	Captains.	Sailing Day.
Ajax	1,550	Kidd	March 9
Achilles ...	1,550	Russell ...	May 18
Agamemnon...	1,550	Middleton .	To follow.

Each vessel carries a surgeon and stewardess. Apply to ALFRED HOLT, No. 1, India-buildings, Liverpool.

HAYO-MARO.—The DEPARTURE of this beautiful extreme clipper twin screw steamer for CHINA and JAPAN, via Singapore (also Cape de Verds and Cape of Good Hope, should sufficient inducement offer), has been DEFERRED. Can accommodate a few more first-class passengers. Carries an experienced stewardess for ladies' attendance. No cargo taken.

For Passage apply to Captain Carnes, at Mr. John Preston's, 98, Gracechurch-street.

COLOMBO Direct (to follow the Ravensbourne), the beautiful British-built clipper ship BOLDON LAWN, A 1 11 years, 551 tons register, now newly coppered; W. B. HOPPER, Commander; West India Docks. Has a large portion of her cargo already engaged, and will meet with immediate despatch. This magnificent vessel will be found the best opportunity to shippers of fine goods, and has very good accommodation for passengers.

Apply to JOHN C. CAMPBELL, 22, Great St. Helen's, or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, E.C.

Proceeds under Steam.—At Glasgow.

FOR SINGAPORE, HONG KONG, and JAPAN (NAGASAKI and YOKOHAMA), the splendid new Clyde-built powerful screw-steamer DRAGON, 9 years A 1 at Lloyd's, 626 tons gross register, will sail on the 10th March positively. Rate of freight for Singapore, 70s.; Japan, 100s. Shippers are requested to mark the port of destination distinctly on their goods.

As this vessel proceeds under steam, is well rigged and takes only measurement freight, shippers may confidently expect that she will make a rapid passage.

For terms, &c., apply to ALLAN C. GOW and Co., 87, Union-street.

To sail on the 5th of March.

FOR SHANGHAI, the well-known clipper DUNMAIL, A 1 14 years, 771 tons register, PETER THOMPSON, Commander; lying in the East India Docks. This ship has just made the passage from Anjer to the Downs in 66 days, being the shortest on record.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the well-known clipper, INVINCIBLE, A 1 13 years, 657 tons register, C. BEECHING, Commander; lying in the London Docks. This ship is in first-rate order, having been dry docked and newly metalled. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR HONG KONG and WHAMPOA direct, with immediate despatch, the well-known China clipper-ship NORTHFLEET, A 1 14 years, 876 tons register, W. SYMINGTON, Commander, loading in the East India Docks. This splendid vessel, newly coppered, is strongly recommended to shippers.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C.; or to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

Has a large portion of her Cargo engaged, and will meet with very quick despatch.

DIRECT for BOMBAY, the splendid Scotch-built clipper ship JANET MITCHELL, A 1, 13 years, 711 tons register, J. S. BINNEY, Commander; East India Docks. This splendid vessel is well-known in the Bombay trade for the good order in which she has always delivered her cargoes, and will be found a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

With quick despatch.

FOR KANAGAWA (YOKOHAMA), JAPAN, direct, the splendid China clipper ship CARACTACUS, A1, 13 years, 679 tons register, G. MURRAY, Commander, East India Docks, has good accommodation for passengers.

For freight or passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The latest date from this port is January 16th. The English mail of November 10 arrived out on the 10th January, and the French mail of November 17 on the 13th January; the latter bringing London telegrams to the 29th November. It will be observed that the telegrams lately published announcing extensive fires at Yedo and the instalment of Stotsbashi as Shiogoon, are confirmed by the present mail's advices.

The newly-elected Shiogoon has already given ample and substantial evidence of his friendly disposition towards foreigners by the important concessions made in the recent convention for the reconstruction of the settlement. The announcement that he has invited the foreign representatives to a conference at Osaka to settle the important question of the opening of Hiogo leads us to expect that still more intimate and satisfactory relations will shortly be established.

Stotsbashi, the new Shiogoon, has recently had a conference with the Mikado, followed shortly afterwards by an official meeting at Osaka with the principal Daimios. Amongst those present at this latter were Shimadz Saburo (or, as he is now called Mats'daira Onami no Kami), Mats'daira Kanso (Hizen retired prince), Hosakawa Rionoske' (Higo), Mats'daira Mino no kami (Chikuzen), Ariwa Nakats' kasa no Tayu (Kurume), Mats'daira Sagami no kami (Inaba), Mats'daira Yoodo (Tosa, retired prince), the Daimios of Awa, Bizen, Echizen, Kanga, Sendai, Ise, &c., &c. The minutes of the meeting not having yet been officially published, it is impossible to give them *in extenso*, but reports from a reliable source state that the two conferences promise well for the foreign status in Japan.

With regard to the first of these it has transpired that Stotsbashi intimated to the Mikado in a respectful but quietly determined manner, that although it was far from his wish to accept the honourable post of Shiogoon which had been offered to him, still he was willing to take upon himself the duties of the position on two conditions:—First, that the Mikado shall give ear to his advice, as that of a person who would by his office be brought into close contact with foreigners, in preference to that of the Kunges, who were very naturally opposed to any innovation, simply because it was innovation; secondly, that all the Daimios should not only approve of the appointment, but promise him their entire and unconditional support in the interior and foreign policy he might deem it necessary to adopt. He is stated further to have suggested that the continuance of hostilities against Choshiu on the part of the Government would, in his opinion, be productive of no beneficial result, but would tend rather to excite the minds of other liberal minded Daimios to a similar policy. The Mikado is reported to have "surrendered" entirely to Stotsbashi's views, and to been given him full powers to act as he pleased.

The conference with the Daimios took place a few days afterwards, when it is said that Stotsbashi opened the meeting by expressing his aversion to the acceptance of the office offered to him, and demanding whether any Daimio present was willing to take upon himself its duties. No Daimio coming forward as a substitute, he proceeded to inform the assembly that, although contrary to his desire, he found himself placed by their silence in a very unenviable position, and one which he considered as altogether untenable except by their support, and that he should not hesitate in relinquishing upon the first signs of hostility or disaffection. At the same time, in order that they might know what measures he invited their accord to further, he would proceed to inform them that as Tycoon, while acting to the best of his ability, he should expect their aid, and that every cause of dissension

Digitized by Google

should be intimated to him in a respectful and dutiful manner, as the representative of Government. With regard to the Choshiu question, it was his intention to settle it as soon as possible on as peaceable terms as lay in his power, with a view of subsequently consolidating the whole forces of Japan into a regular and effective army. The foreign treaties he considered to have been duly and deliberately concluded by the Tycoon, who owed it to himself and the empire at large to prove to the foreigners by a radical and thorough change of policy that the Japanese were both as willing and as desirous of performing their treaty obligations as themselves; and that an opportunity would be afforded to himself as well as to the assembly on the occasion of the opening of Hiogo, of entertaining the foreign Ministers at the official castle at Osaka in such a manner as to prove to them the sincerity of the future intentions of the Government of Japan.

Official notice has been given of the terms of a convention made for the reconstruction of the settlement. This agreement, which is most satisfactory in its nature, was concluded on the 29th December, between the British, American, and Dutch Ministers and the following high officials, as representatives of the Japanese Government:—Shibata Hionga-no Kami, Minister of Foreign Affairs; Oguri Kodzukenoske, Minister of Finance; and Midzuno Wakasa-no Kami, Governor of Kanagawa. The following is an abstract of its provisions:—

1. The Japanese Government, in return for being freed from their engagement made on the 19th Dec., 1864, to fill in the swamp behind the settlement as a race course and recreation ground, formally make over the new race course at a rent of $10 per 100 tsuboes and engage to enlarge, plant, and lay out as a public garden the site of the *Kosaki Matchi* (or *Yoshiwarra*, lately burnt) without charge. Measures for keeping the grounds in order when laid out will be concerted hereafter. The necessary land is to be filled in within seven months.

2. The right conceded to foreigners to compete at public auction with Japanese for lots on a new bund to run as far as Benten, the extreme west point of the settlement, is given up. In lieu, the native government undertakes to make a bund 60 feet wide to that point, thence to make as wide a road so far as the Yoshida bridge and from that point another road, to run along the north bank of the canal to the Nishiro-bridge. These roads will nearly surround the place, and with the bund give us a drive three miles long. They are to be made within fourteen months, and kept in repair by the Japanese Government.

3. The arrangements for the new public buildings, with a street 120 feet broad running through them (which is to have a sideway twenty feet wide on each side and to be planted with trees) are confirmed. Eight blocks of buildings will be alloted, two of which, on the east side of this road, will be put up to public auction.

4. A sufficient market place and an extension of the cemeteries are provided for.

5. The canal is to be dredged by the native Government and an uniform depth of four feet to be maintained at low water.

6. After the lapse of three months from this date the Bluff (hills to the east of the settlement, on the crest of which is now encamped the garrison) is to be thrown open to lease by foreigners at a ground rent of $12 per 100 tsuboes—the leases of lots to be sold at auction.

7. A hill lot in this direction is to be reserved for a public park or garden at a rent of $6 per 100 tsuboes.

8. So soon as all the ground now in occupation by foreigners shall have been built on, and the foreign ministers shall represent that more is required—but not earlier than December 1870, the Homura will be given up to foreign residents. This is a village lining the side of the creek east of the settlement and just under the Bluff mentioned above.

With regard to this convention, the *Herald* remarks:—"There are few in the community who were prepared for such a liberal agreement between the Japanese and Foreign Treaty Powers as that which we have published during the past week. It seems almost incredible that, in the absence of any particular pressure from without, the old jealous and exclusive spirit, always more or less displayed hitherto, should have been so completely banished as it appears to have been on this occasion, and that those who only the other day wished for the closing of the port of Yokohama, are to-day granting concessions, and themselves making improvements which will render it one of the most desirable places of residence in the East. To say that the convention, as such, is satisfactory, is nothing. It is indeed so in every particular, but it is really valuable as a sign of the times, and is an earnest of the good time coming; and in this spirit do we receive it. In all its articles we find a reasonableness and consideration on both sides that do infinite credit to the negotiators, and evince an intention of fair and liberal dealing, such as must bear good fruit."

With reference to the recent destructive fires in Yedo, the *Japan Herald* says:—"In Yedo, a series of fires have taken place; the last, which commenced on the night of Friday, the 14th inst., being the most extensive they have had for a great many years. Our fires in Yokohama sink into insignificance beside such a conflagration. We have not information of sufficient exactness to be able to give details, but we are told that four miles of houses have been destroyed in the commercial quarter. Other and official accounts declare it to have been in the part bordering on the official quarter, not far from the Tycoon's burial-ground. We believe that both accounts may be true. It is said to have commenced near the Niphon Bashi, the great bridge from which all roads are measured, and little doubt is entertained of its being the work of an incendiary. It was about five miles from the English Legation. Exaggeration may be allowed for; but we heard it stated that placing the houses that were burnt in single file, they would extend to a distance of 16 ri; and if the statement be true that it reached four miles in a direct line from its starting point, we can imagine that such an estimate may not be unlikely, as the fire in Yokohama of the 26th ult. consumed buildings which placed side by side in line would, we estimate, reach as nearly as possible one ri. The fire consumed all the dwelling-houses constructed of wood, but most of the godowns considered fire-proof proved to be so, only about from 100 to 200 being consumed, and as they are counted by thousands this is not a large percentage."

The following particulars are given of an attack on H.B.M.'s Minister, which occurred on the 31st December. Sir Harry Parkes was riding through Sinagawa, when he was confronted by a Yaconin, who, planting himself in the middle of the road, stood in a threatening attitude with his sword partially drawn. The Yaconins who composed the Minister's escort being called on to arrest the man, looked every other way, and allowed him to walk off. Sir Harry Parkes, determined not to let the fellow escape, rode after him, followed by the troop sergeant-major. The man, finding he was closely pursued, took to his heels, but was soon brought to bay, pale as death. At the order of the Minister the man was then seized by the Yakonins and disarmed, the two swords, after some show of reluctance on the part of the Yaconins, being handed over to the Minister. The disarmed Yaconin was then led a prisoner to the British Legation, where he was soon given over to the custody of a Japanese official who had been sent for to receive him.

One sad event offers an unhappy contrast to the many satisfactory items of news now received from Japan; it is that of the death of a French marine, by the hands of Japanese. This, however, is no case of murder; the man was killed by some outraged natives in self-defence, and the event should therefore produce no new misunderstanding with the Japanese Government. It appears that the unfortunate man, whose name was Hourdot, a sergeant of marines on board H.I.M.'s steamer *Guerriere*, had got very drunk, and rendered himself extremely annoying to all the Japanese he met by assaulting them quite indiscriminately. At last, reaching the square in which stands the temple Kompera Sama, he went into a house and molested a woman, pulling her into the street and beating her. A foreigner (Mr. Hatton) passing at the time witnessed his behaviour, and saw him turn upon a Japanese officer and assault him, but not feeling himself competent alone to take him in charge, hastened to obtain assistance, and in a few minutes returning with some others found the man lying dead. He then went to the police station, and informed the superintendent who accompanied him back to the spot, and discovered that death had been caused by a wound six inches long upon the side of the head, through which the brain was protruding. The weapon used was a stake about the size of a very thick bamboo. The body was at once removed, and the Japanese police arrested three persons as having been concerned. The deposition of Mr. Hatton clearly shows that the whole blame rests with the deceased. He says, "I was passing down Otto-machi, when I saw a French sailor follow a small Japanese boy. The boy outran the Frenchman, who was very drunk. Some Yaconins and others were measuring a newly made bridge, when the French sailor went up and struck a Japanese official who was measuring the bridge: he then took a stick from him and beat him most brutally and tried to throw him into the canal. I called him and begged of him to come to me, when he raised his stick and threatened me. I then called to the people to run away, which they did. I saw him follow them and bring a Japanese woman from a house and raise his stick to strike her. I called to him and ran to see if I could find any European about to help me to take this man. I could not, and returned to the spot when I saw him fall; a crowd collected, and when I touched him I found he was dead. The Frenchman most brutally illused and beat the Yaconins, who did not in any way attempt to retaliate the Frenchman was very drunk and I consider that his death

Digitized by Google

was brought on by his most cowardly, brutal, and savage conduct."

The *Japan Herald* remarks that the new San Francisco route appears to be likely to take the principal number of passengers going from Japan to Europe. Already several well-known residents were preparing to leave by the *Colorado*, which was expected to touch at Yokohama *en route* to Hong Kong about the 20th January, and to leave Hong Kong for San Francisco on the 13th February. That the expense will be considerably less than *via* Suez (says the *Herald*) is certain, and we should imagine that the journey will be much more pleasant.

The M.I. steamer *Alphee* brought out the French officers to whom is to be entrusted the formation of the Japanese army. There are, in all, fifteen, viz. :—Five officers and ten non-commissioned officers belonging to various corps of the Garde Imperiale, and specially chosen for this service. Monsieur Chanoine, capitaine d'etat-major, who is in command, is already honourably known in connection with the Chinese expedition.

One of the Shiogoon's Ministers, who recently visited Yokohama, dined with M. Leon Roches, and inspected the French war-steamer *Guerriere*. In the course of his visit he proved himself intelligent and affable; and expressed his warm satisfaction at the improved state of relations, every day developing themselves more and more amicably, between the native Government and foreign Powers.

The winter race meeting is the only thing recorded in the way of public amusements; this was, however, a great success, and nothing could have passed off more pleasantly than it did; Japanese might have been counted by thousands, and appeared to take the liveliest interest in the sports. The whole road from the settlement to the racecourse, a distance of more than two miles, was an unbroken string of pedestrians, almost all Japanese, going and returning throughout the whole afternoon on both days. The Governor of Kanagawa was present with his suite, and moved about freely and pleasantly amongst the foreigners chatting and smiling, and evidently as satisfied with the proceedings as anyone there.

The new racecourse now used for the first time is thus described by the *Herald*:—"It is at a distance of two to two and a half miles from the settlement, and is formed on the level top of two spurs that jut out inland from the range of hills that form the boundary of Mississippi Bay—making an oval course about one mile and a few yards in circumference, having within it fields in terraces on the slopes of the two hills, a rivulet at the bottom, and all the means of making a pretty stiff steeplechase course. A very substantial, neat and commodious Grand Stand has been erected on the N.W. bend, from which the whole course is visible—and which is the centre of one of the most charming panoramas we have ever seen.

It is the universal remark—and we quite agree in it—that a more excellent racecourse—or a more beautiful situation—it would be difficult to find anywhere. The grand stand was erected by a Japanese contractor from designs from Messrs. Whitfield and Dowson, and it does credit to both architects and builder. The seats under roof are very comfortable and capable of accommodating about 150 people. In front are a series of steps the whole length of the structure, which form an excellent stand for those who care not to mount higher than just sufficient to see over the heads of those before them, whilst stairs at the back lead to the terrace on the roof capable of receiving perhaps sixty or seventy persons. Underneath are the stewards'-room, refreshment-room, and accommodation for the various purposes of the sports—such as weighting, &c., and at the back is a space fenced in, in which are sheds for stabling the horses, and plenty of room for all the necessary preparations. In fact, we know not to whom to attach most praise—the selectors of the course, the Japanese Government in constructing it, or the committee who have managed to arrange and complete all things so satisfactorily."

The *Japan Herald* records two painful cases of sudden death. One was that of a Mr. Green who had recently arrived from Nagasaki, and was staying at the Commercial Hotel. He had been seen shortly before by a gentleman, who rallied him on his laziness in lying on his bed, and an hour or two afterwards his China boy went to Mr. Curtis and asked him to go and see his master as he thought he was dead. It was too true. A *post mortem* was held, and it proved the cause of death was hemorrhage in the stomach. The second death was that of Mr. Caulfield the British Consular gaoler, who awoke about 1 A.M. feeling so unwell that he rose up, and went to consult Dr. Jenkins. On his return, not having found him at home, he got into bed again, but had hardly lain down more than a few seconds than he seemed to be seized by a sort of fit, apparent in a few twitches, in the midst of which he quietly expired. Mr. Caulfield was well known and much respected, and great sympathy was felt for his widow, to whom he was only married within the present month.

It may be added that Stotsbashi is expected shortly to arrive in Yedo, and that a numerous guard is already awaiting his arrival at the several stations on the road from this to Osaka. He is reputed, however, to be averse to a numerous retinue, preferring a simple bodyguard of some twenty or thirty men.

The following notifications of changes of firms have been issued :—

Mr. Alexander Hutchison Yule's authority to sign our firm, per procuration, ceases from this date.—Ross, Barber, and Co., Yokohama, 31st December, 1866.

The partnership hitherto existing between James Samuel Barber, John Bailey Ross, and James Campbell Fraser, and conducted under the style and title of Ross, Barber, and Co., is this day dissolved through lapse of time, so far as Mr. James Campbell Fraser is concerned, whose interest and responsibility in the firm ceases from this day.—Ross, Barber, and Co., Yokohama, 31st December, 1866.

Mr. James Campbell Fraser is duly authorised to conduct our business and sign our firm, per procuration.—Ross, Barber, and Co., Yokohama, 31st December, 1866.

NAGASAKI.

We hear from Nagasaki that the *Indore* has been chartered to take the young Satsuma Princes and their suite as far as Hong Kong on their way to the Paris Exhibition. The steamer *Chusan* has been sold to the Japanese for $80,000—to be paid by instalments completed in three years—Government security. The *Spunkie* has also been sold for $20,000 payable in five years.

CHINA.

SHANGHAI.

The London mail of November 26 arrived out on January 14. The dates are down to January 24.

The following items are from the *North China Herald* of the 12th and 19th of January :—

We are glad to find from the annual report by the trustees of the Seamen's Church, that a sum of 2,350 tls. has already been collected, with which it is intended at once to commence building. A plan of a very simple but pretty little edifice has been drawn by Mr. Oliver, and the Municipal Council, the report tells us, have given a site on Pootung Point. We were not aware that they had any right or jurisdiction over that side of the river; but gladly waive the doubt when so laudable an object is in view. The building is expected to cost 3,500 tls., towards completing which amount the sale of the present hulk is expected to contribute $500, and there are certain stores given over by Mr. Fitzroy, worth about 250 dols. These sums, with tls. 106 collected since the balance sheet was drawn up, will raise the available funds to tls. 3,200 and a sufficiently liberal subsidy is hoped from Government, not only to cover the deficiency, but to leave funds for running up a reading-room. Another difficulty remains to be met, namely the residence of the chaplain, as the sale of the hulk will deprive him of his present quarters. The suggestion has been made, and we cordially endorse it, that he should be considered resident chaplain at the Sailors' Home. So many complaints are made about that institution that the presence of a chaplain could not otherwise than beneficial.

The report of the Shanghai Library during the past year shows a slight falling off in the number of subscribers.

The Comptoir d'Escompte has given notice that the 75,000 tls. owing to it on account of the Municipal loan must be repaid in four months—that is, early in May next. The means of complying with this request will form a pleasing topic of discussion for the land-renters at the annual meeting in April.

Trefancha farm has been sold at auction for 2,700 tls. The house opposite the grand stand, lately occupied by Mr. Dore, for 605 tls. A plot of land measuring 18 mow adjoining Birt's bungalow brought 360 tls., and a half share in another plot measuring 35m. 6f. near the Stone Bridge, 160 tls.

A fire broke out in the block of houses to the west of the Fohkien road, bordering on the Yang-king-pang, and consumed a large block before it could be got under. Both the engines of the Shanghai Fire Brigade and a large number of the members of the company were quickly on the spot, together with several smaller engines, a number of sailors and marines, and the English and French police. To the active exertions of those engaged, and the judicious disposition of the engines,

Digitized by Google

must be attributed the confinement of the fire. At one time it seemed likely that the whole block of buildings between the Hoopeh and Fohkien roads must have gone.

Native rumour asserts that there is soon to be another change in the Taotaiship of Shanghai. Ting, the late Taotai, and present Salt Commissioner at Yang-chow, is obliged to retire on account of his ill-health, and is to be succeeded in his post by Ying.

A letter has been published from Sir Rutherford Alcock, regarding the Municipal government of the settlement. The different Ministers have agreed to recommend the new Land Regulations to their respective Governments.

The last returns of trade at Tientsin show that nearly 9,200 piculs of opium, representing in value nearly £1,800,000 sterling, expended on an article purely of luxury. The import of Grey Shirtings—826,811 pieces—is less in quantity by 10,000 pieces than in 1861, when 872,500 pieces were imported; but the higher prices now prevailing carry the value represented by the present returns infinitely above that of the larger quantity. White Shirtings and T-cloths are represented by 175,818, and 98,012 pieces respectively, against 124,064 and 85,000 in 1865; while English Drills show an increase of more than 30,000 pieces, the import last year having barely reached 10,000 pieces.

Letters from Nanking state that the Viceroy is about to take the field against the Honan Nienfei. The disciplined troops and artillery will be held in readiness to aid Li if necessary.

Hankow advices report that the Nienfei are still pursuing their way westward, with the intention, it is surmised, of gaining a position on the Han and Yangtze above Hankow, and making a descent on Woochang from an opposite direction to that they chose last year.

Our Ningpo correspondent mentions the occurrence of a large fire on the Quantung side of the river on the 9th inst., by which it is estimated that 50,000 dols. worth of property and goods, and upwards of a hundred houses were destroyed. He again refers to the salt question, and the brilliant prospects that would open out for Ningpo, if it could be made a central depot. At present there is nothing to be done there, but go to the Lakes shooting. Wild geese and other water fowl are to be found there in thousands, but the weather has not been cold enough to make them tame.

HONG KONG.

The London mail of the 10th Dec. arrived out on the 24th Jan. and telegrams to 19th Dec. The latest dates are to the 28th January:—

The following is an account of the loss of the steamer *Corea*, owned by Messrs. Denny and Co, Dumbarton:—She left Hong Kong for Yokohama on the 18th January, and on the 20th struck on a rock off Breaker Point, and went down in eleven fathoms. When her loss became evident, the boats which had been prepared were lowered, and the officers, crew, and passengers got into them in a very orderly and creditable manner. The last people only left as the water was rushing down the engine room sky-light. Four boats out of the five remained together, and by noon reached a junk, which conveyed them to Swatow. The remaining boat, containing three Chinese, one Malay, and fourteen Japanese, and which was the first to get clear of the ship, became separated from the other. The Consul has sent down the coast to make inquiries A court of inquiry sat on the 23rd, but was adjourned for further evidence

A later account states that the missing boat has been heard of; two of the crew reached Swatow, and the rest are being sent for.

H.M.S. gunboat *Algerine*, Commander Domvill, was despatched to Breaker Point to make a complete survey of the locality. Messrs. Lys and Coglan, of H.M.S. surveying ship *Rifleman*, are engaged in the expedition.

A public Meeting was held at Government House, Macao, to take into consideration the advisability of establishing a bank; there was a very numerous attendance, and we understand that $40,000 was subscribed towards the project.

The *Tai-ping*, which left London on Oct. 11th, was reported as outside Shanghai on the 19th Jan., but our Shanhai contemporaries have been unable to ascertain whether the report was correct.

Captain Quin, the late respected Captain Superintendent of Police in Hong Kong, took his final departure from the colony this afternoon in the *White Cloud*, for Macao. The force lately under his command turned out in full uniform, and escorted their late chief down to the steamboat pier. On the steamer moving off, three rounds of hearty cheering were given for the captain's future health and welfare. Captain Quin's family had, we believe, already preceded him, it being, as we are informed, his intention to take ship at Macao on his homeward voyage.

The Marine Court of Inquiry which sat at Singapore to inquire into the loss of the British barque *Sea Bird*, fully acquitted the captain of all blame, as the vessel was in a leaky condition when she left Sarawak.

Now that the first blow, so to speak, has been struck and the junk ordinance has become one of the working laws of the colony, it is a matter for satisfaction that the results of the measure have been so much less alarming than even many who approved of it had anticipated. A far less proportion of junks has deserted the harbour than was expected, and even the three days' experience already gained of the new ordinance have had their effect in partially restoring confidence amongst the Chinese. Under any circumstances the introduction of new and stringent regulations respecting the Chinese population are sure to drive away temporarily all who fear that their illicit occupations will be interfered with, or that they will be vexatiously prosecuted if through ignorance of the law they infringe its provisions. Of this latter class, the "poor but honest" natives, but few have left, and those few will speedily return. Of the former class a large proportion have disappeared, and, it is devoutly to be hoped, will remain in their self-imposed exile.

The following are the returns of average amounts of notes in circulation and of specie in reserve in the undermentioned banks for the month ending Dec. 31st:—

	Notes.		Specie.
Oriental	$280,800	...	$200,000
Chartered Mercantile ...	823,524	...	200,000
Chartered of India	69,900	...	69,900
Hong Kong and Shanghai ...	697,559	...	300,000

We learn that Lieutenant Francis Brinkley, R.A., has been appointed Private Secretary and Aide de-Camp to his Excellency the Governor from the 15th inst., in the room of Lieutenant H. S. Stewart, 11th Regiment, resigned, on departure for England. Malcolm S. Tonnochy, Esquire, is appointed Assistant Harbour Master of Hong Kong provisionally, and until further notice, from 1st January.

The following notices have appeared:—

Mr. Warren Delano, jun., Mr. George Tyson, and Mr. Henry J. Grew, have retired from our firm in Hong Kong and China, their interest and responsibility ceasing this day.—Russell and Co., China, Jan. 1, 1867.

Mr. Edward Cunningham has re-entered our firm, to which also Mr. William H. Foster, jun., is admitted partner, their interest and responsibility commencing this day.—Russell and Co., China, Jan. 1, 1867.

"CHINA CHALLENGE CUP," VALUE £500.—The above cup, manufactured and designed by Lee-ching, being completed, is now on view at his store, Queen's-road, prior to being forwarded to the National Rifle Association.—Hong Kong, Jan. 18.

ROYAL INSURANCE COMPANY.—The undersigned beg to announce to all parties holding policies against fire on buildings in the above company that although the company is not liable for losses occasioned by gunpowder explosions, such risk being especially excepted in the policies, they are prepared to follow the course adopted by the Royal Insurance Company in February, 1864, on the great explosion of gunpowder on board the ship *Lotty Sleigh*, while lying in the River Mersey, by compensating the assured for all damages occasioned to buildings insured under Royal policies, by the explosion of gunpowder on board the *Zephyr* and *Themis*, which took place in this harbour on the 17th inst.—ROB. S. WALKER, Agents.—Hong Kong, Jan. 19.

The following account of the explosion of the *Zephyr* is from the *Daily Press*:—

A fearful explosion took place on board a hulk called the *Zephyr*, used for the storage of gunpowder, and lying in this harbour near the Kowloon shore. The hulk and a vessel called the *Themis*, lying alongside and receiving powder at the time, were both blown to atoms. Of course all persons on board were killed, and probably torn to shreds, so that no signs of them will ever be recovered. Others in boats near at the time were killed without being blown to pieces, and their bodies have been found. From thirty to forty persons have probably fallen victims to the catastrophe. The shock made the town of Hong Kong tremble as if an earthquake had been shaking the ground, windows were blown in, the frames in many cases being torn from their fastenings, and glass has of course been shattered in enormous quantities.

The *Zephyr* was an old condemned vessel lying over on the Kowloon side near the police chop, and was the property of Messrs. MacEwen and Co., chartered by Messrs. Lammert, Atkinson, and Co., and used by them as a powder hulk. The *Themis* was a fine three-masted Bremen schooner chartered for Shanghai, with a general cargo, among which she was to carry a quantity of powder, and was lashed alongside the *Zephyr* for the purpose of taking it in. The latter vessel had on board at the time of the dreadful catastrophe some 200,000 lbs. of gunpowder—a quantity sufficient to have blown up half the ships in the harbour had this accident happened in their midst; but fortunately the *Zephyr* was moored well over on the Kowloon side in the bight opposite the police chop, and no other vessels were near her.

Digitized by Google

The crew of the *Themis* consisted of the captain, mate, six other Europeans and two Chinese; the only one of them left is the captain, and he was saved only by the merest accident, having a short time before the dreadful occurrence left his vessel to dine on board the hulk *Helvetia*, a vessel lying at some little distance from the *Zephyr*, and to this little accident Captain Bowmann alone owes his life. On board the *Zephyr* were only two Europeans, Mr. Coleman who had but lately taken charge of her, and Mr. James the former master. The crew consisted of four Chinese boatmen, and there was a sampan made fast astern in which their food was cooked, no fire being allowed on board the *Zephyr*. But besides these there were yesterday some twenty extra coolies and a sheriff belonging to the firm of Messrs. Schellhass and Co., the agent of the *Themis*, employed only on board the two vessels in passing the powder along, and of all these people there is now nothing left but four blackened and charred bodies that were picked up by the police and men-of-war's boats. Four of H.M.'s gunboats, too, had a very narrow escape—the *Banterer*, *Opossum*, *Algerine*, and *Haughty*, they having been ordered over to the Kowloon side only yesterday in consequence of the increasing prevalence of small-pox here; in fact the *Banterer*, the last who went over, had only just let go her anchor when the explosion took place; she was smothered with the falling ashes and a number of portions of iron bolts fell all round her. One fell on the deck with great violence and rebounded overboard, but fortunately no one was injured, nor on board the *Opossum*, where a similar occurrence took place.

Immediately on the first sound of the explosion boats were lowered from these gunboats and sent to the scene of the disaster as well as a large fleet from all the British men-of-war on this side, from the U.S.S. *Hartford*, the *Ashelot*, and the Italian frigate *Magenta*, but on their arrival on the spot nothing but a disturbed sea of small pieces of charred wood with here and there a larger piece of a timber stanchion or bit was to be seen. The police boats and some from the military were promptly in attendance, but it was impossible to expect to find any living thing amongst the ruins of an explosion of such an immense quantity of powder stowed in the hold of one vessel or of two lashed together.

As soon as every one recovered from the shock on shore and saw the dense mass of smoke rising from the harbour, crowds rushed to the Praya, and boats were in such demand that in a short time it was difficult to find a disengaged sampan, nearly every house possessed of a private boat quickly called it into requisition, so that in a short time the scene of disaster was crowded with pull-away boats and gigs of all descriptions. After gazing at the spot for a few minutes, however, most of the visitors returned and left the police to their task of searching for dead bodies, in which they were so far successful that up to dark last evening, four, two being women and two children—probably those living in the sampan used by the captain of the *Zephyr*, for cooking purposes –had been recovered, and others will doubtless come to the surface in the course of a day or two.

At the village of Ya-mah-tee, on the Kowloon shore, opposite where the *Zephyr* was lying, considerable damage is reported to have been done, some 180 houses having been more or less shaken down or unroofed; several people have been wounded by falling substances, but none of them seriously. It will be always impossible to come to any conclusion as to the number of lives actually lost, as some portions of sampans have been found that were supposed to be pulling round in the neighbourhood of the explosion, and of course their inmates were involved in the general ruin. The hills on the Kowloon side are strewed with pieces of iron, Chinese clothing, &c., and it is reported that some chain cable and part of a mast were found in a field nearly three quarters of a mile from the water's edge.

It is of course impossible to obtain any clue whatever as to the cause of this shocking catastrophe as there are no survivors to tell the tale, but the horror which must strike every one at the sacrifice of so many lives ought to be sufficient to impress upon the authorities the imperative necessity for having the strictest regulations with regard to the storage of powder in the harbour enforced, and the careless placing of it in Chinese houses, or, indeed, storing it at all in large quantities in the colony ought to be utterly forbidden.

Some idea may be formed of the magnitude of the explosion when it is stated that the steamer *Kinshan* on her way down from Canton was abreast Woochow, thirty miles from here, at the time, and distinctly heard the noise. The damage in town had been but slight, and chiefly confined to the breaking in of a few window frames and unhinging some shutters, but the destruction in glass has been considerable, and two men are now in the Civil Hospital who were wounded at Kowloon by the falling of some of the debris on shore.

We have heard that the chief engineer of the *Yesso* who was known to have been pulling across the harbour in the direction of the *Zephyr* shortly before the explosion occurred, has not since been heard of, and that the *Yesso* had to start without him. If this be the case it is lamentably probable that he must have been within the sphere of the explosion at the time, and have shared the fate of all so situated.

It appears that the information we received as to the state in which the *Zephyr* was found under water by the divers was incorrect, From various people who have sent down divers we now hear, after further inquiries, that there is nothing at the bottom larger than a twelve-foot piece of keel. It does not follow from this that all the powder exploded. It seems impossible that this could have been the case, when it was all in separate barrels, but the bulk may easily have been shattered to pieces without a complete explosion of all the powder on board.

STRAITS OF MALACCA.

SINGAPORE.

From this port we have advices to the 3rd February. The outward mails of December 26 were delivered on the 30th January. French mail of December 17 on the 21st.

The appointment of Sir Henry Keppel to the command of the China Station, as communicated by telegram, has given very general satisfaction here. It was at one time expected that he would have succeeded Major-General Cavanagh as Governor, and his nomination as Admiral of the Station is little less welcome.

On the 18th January the volunteers competed for the Governor's Cup at the rifle butts in the centre of the race course. There were twenty competitors, these being the only ones entitled to compete, owing to their having attended twenty-one company drills during last year. All commenced firing at 200 yards, nine at 250, and three at 300 yards. The successful competitor was Mr. W. Krohn, who obtained 16 points; the second was Mr. J. Angus, who scored 14, and the third Mr. Edwin Kraal, who got 13 points. The Governor on presenting the cup to the winner made an able speech, and expressed an earnest hope that in future the attendance of the volunteers would be more regular, and that more energy would be displayed by the members of the corps.

A public meeting had been held in the Exchange Rooms, at which it was resolved that an address from the community to his honour the Governor, Major General Kavanagh, should be presented to him upon his approaching departure from the settlement, accompanied by a testimonial in the form of a service of plate.

With reference to a local currency for the Straits, the *Singapore Free Press* says:—"The importation from Hong Kong by one of the banks of a large number of half and quarter dollars and ten cent pieces, and the circulation of them in exchange for dollars, has been well seconded by the European mercantile community here, and in their transactions with one another these pass current for their full value. But it will be a difficult matter to pass these coins for their par value among the natives, until such time as an ordinance shall be enacted declaring them legal tender. The local press has repeatedly called attention to this subject, but the authorities have been unable to take any measures to remedy the annoyance, their hands having been tied while the settlement remained under the old Indian law. The question of a suitable local currency will no doubt be one of the first to be brought before the notice of the Legislative Council, and a law be enacted declaring the coinage of the Hong Kong Mint the currency of the colony. It will take several months to perfect all the arrangements necessary for the proper carrying out of such an enactment, until which time we shall be more or less annoyed and subjected to squeezes of from three to ten per cent. in all our petty transactions with the natives. These natives, as a rule, receive the ten cent pieces for eight and nine cents, and deal them out again to Europeans at their full value, thus realising from ten to twenty per cent profit each way."

PENANG.

Our latest advices from this port are to the 24th January. The English mail of 10th December reached Penang on the 11th January at midnight. The steamer conveying it (the *Baroda*) left again at 4 A.M. the next morning, making a stay of only four hours—a breach of the mail contract which gave rise to much complaining on the part of the residents.

It appears that her advertised time, according to the table issued by the Postmaster-General, was the 11th. Her arrival on the 12th at such an extremely inconvenient hour caused several people living at a distance, who were not aware of it until a considerable time after she had anchored, either to lose a passage or to miss posting their letters as the case might be. The *Penang Gazette* says:—"The P. and O. Co. has a mail contract, to the terms of which, it is to be presumed, they ought to adhere. If we are to have only the small time of six hours allotted to us, let us at all events have that, if we can get no more; let us have the bond to the letter, or none at all. We are told that neither the Admiral nor the Post-office authorities care much for Penang, in fact 'don't like us at all.' We are not aware that we have given them any reason for disliking us beyond the fact of our asking for a right which we believe we are entitled to; and perhaps, also, that we have on more than one occasion requested for a little more than our strict contract right, viz.—six hours of daylight, a request which, considering our position, is not out of place."

The following items are also from the *Penang Gazette*:—

We understand that Mr. Tan Kim Cheng, a J.P. and Siamese Consul at Singapore, has arrived here on a special mission from his Majesty the King of Siam to inquire into, and settle, questions concerning certain export duties which have been levied upon cattle and other articles. The Government of the Straits, looking principally to the treaty made with Siam in 1827, protested against these duties, and were referred by the Rajah to the Siam Government. The duties alluded to have been levied for the last twenty years at least. It is certainly strange,

Digitized by Google

to say the least of it, that our Straits authorities have been so long oblivious of a custom which now by usage has become a legitimate practice.

We learn that some tin ore has been discovered at, or close to, Teloh Bahang, in the north of the island, on some Government ground there. While glad to hear of any such hopeful prospect we are doubtful whether this discovery, as it is called, is of much value. Several years ago there was some tin ore found in the same place, but shortly after abandoned; no doubt there are some remains of the tin ore as well as of the former tin smelting furnace, and perhaps small portions of the tin ore may lately have been found, deluding people into the idea of a tin mine as existing on the island sufficiently remunerative to be worked.

Amongst the changes which are on the *tapis* on the transfer of these Settlements we hear that our resident councillors will likely be removed. This change will, we believe, be anything but a beneficial one for the Straits, as these officials are men who have devoted the best years of their lives to the interests of the Straits, and who would be the very best assistants for the new Governor, who cannot be supposed to be quite *au fait* in the affairs of a colony to which he must be an almost complete stranger. Colonel Ord will find no better coadjutors in the Government of the Straits than our present resident councillors, who have resided here so long, and who have occupied such prominent places as advisers and aides to the Governor. These gentlemen are thoroughly acquainted with the people, their language and customs, and are intimately associated in the memory of the leading inhabitants of the Straits. It is not to be supposed that Colonel Ord can be perfectly independent of such an assistance, and we trust for the interests of the Settlement that such changes as we allude to will not be amongst the first.

The *Penang Argus* says:—"We hear from a good and reliable source that a new rice port, at thr head of the Bay of Bengal, up the Haringofa River, about twenty miles inside, called Morelle Gunge, has been opened, which affords excellent facilities for vessels loading and discharging, as well as watering. Rice is to be had there in great abundance, at very low prices, owing to the large supplies which are brought from the surrounding places. Late the finest quality rice was procurable at two rupees and two annas per maund, which is equivalent to one hundred and twenty-seven rupees per coyan. There are no port charges, and betelnut and cocoanuts are to be had in considerable quantities. Morrelle Gunge is in longtitude 89· 54' east and latitude 22· 22' north, and being to the windward of Chittagong and Arrakan, vessels coming out in the southward monsoon do not experience the difficulty uncountered in getting out of the former ports. We recommend the matter to the notice of our Penang merchants and shipowners engaged in the rice trade, as offering some advantages over places less favourably situated."

Births, Marriages, and Deaths.

BIRTHS.

DOHMEN—On the 11th Jan., at Yokohama, the wife of Martin Dohmen, Esq., of a son.
GIBSON—On the 16th Dec., at Yokohama, the wife of F. F. Gibson, Esq., of a son.
GLOVER—On the 25th Dec., at Nagasaki, Mrs. A. J. Glover, of twin daughters, stillborn.
MICHIE—On the 18th Jan., at Shanghai, Mrs. Alexander Michie, of a son.
PEREIRA—On the 30th Jan., at Everton-house, Singapore, the wife of F. E. Pereira, of a daughter.
SWINHOE—On the 14th Jan., at Amoy, the wife of Robert Swinhoe, Esq., H.B.M. Consul at Amoy, of a daughter.
VON DER HEYDE—On the 10th Jan., at Singapore, the wife of F. Von der Heyde, Esq., of a son.
WISHART.—On the 11th Jan., at Singapore, the wife of C. Wishart, Esq., of a son.

MARRIAGE.

WESTLAKE—LUDWIGS.—On the 31st Jan., at Singapore, by the Rev. J. M. Beurel, Mr. Charles H. Westlake, of New York, to Mrs. F. A. Ludwigs, of Singapore.

DEATHS.

BUSH—On the 27th Dec., at Bangkok, the wife of Captain John Bush, Master Attendant.
CAULFIELD—On the — Jan., at Yokohama, J. Caulfield, British Consular Gaoler.
DICKIE—On the 30th Dec., at Foo-chow-Foo, Capt. Dickie, of the schooner Spray, from the pot-shot of Mr. Custom Officer Briscoe.
GREEN—On the — Dec., at Yokohama, Mrs. Green.
MOYLE—On the 5th Dec., at sea, on board the steamer AJAX, Emily Jane Moyle, the beloved wife of Mr. J. M. Moyle, Superintendent of the Sailors' Home, Singapore, aged twenty-six years.
OTTOSON—On the 18th Jan., at Arthur's Seat, Siglap, John M. Ottoson, late of Shanghai, aged 50.
RODRIGUES—On the 14th Jan., at Macao, Joaquim L. Rogrigues, aged fifty-six years.
STEEL—On the 18th Jan., at Shanghai, David Steel, of Glasgow, lately with Messrs. Gilman and Co., aged twenty-two years.

AMONG the passengers by the P. and O. steamer, which left Southampton on the 4th, were twelve police-constables, who proceed to Yedo to form a mounted police guard for Sir Henry Parkes.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, Jan. 13, Glenclune; 15, Mountain Ash; from New York, 13, Resolute; from Baltimore, 7, Cordillera.

At SHANGHAI.—From London, Jan. 18, Borealis; 12, Silver Eagle; from Newcastle, Dec. 31, Charlot; from Liverpool, Jan. 9, Magellan; (reported by telegram, from London, previous to Feb. 5, Taeping, Fiery Cross) from Cardiff, 11, West Wind; from Sunderland, 14, General Havelock.

At HONG KONG and CANTON.—From London, Jan. 5, Ariel; 18, Lucerne; (reported by telegram) Her Majesty, from Newcastle, Jan. 10, Alice Mary; from Newport, 5, Nyverheid; from Shields, 5, Cleveland; from Cardiff, 17, Venus; from New York, 12, Amaranth; from Baltimore, 4, Magnet.

At MANILA.—From Liverpool, Jan. 4, Cinco Hermanos; from Cardiff via Labuan, Dec. 23, Andromade; from Barcelona, Jan. 4, Nuovo Lantero.

At SINGAPORE.—From Swansea, Jan. 8, Cornelis Smit; from Newport, 10, Louis de Geer; from Cardiff, 12, Maria Elise; from Liverpool, 25, Chloris; from Glasgow, 30, James Paton.

At BATAVIA.—From Liverpool, Engel; from Glasgow, County of Ayr.

Reported by Telegram.—From Queenstown, Golden Fleece (str.), with troops.

DEPARTURES.

From YOKOHAMA.—For New York, Jan. 15, Golden State.

From SHANGHAI.—For London, Jan. 9, Beemah; for New York, 18, Deucalion.

From HONG KONG, CANTON, and MACAO.—For London, Jan. 25, Achilles (str.); 20, Bankside; for New York, 9, Portland.

From MACAO.—For Havana, Dec. 30, Egmont Hoorn; Jan. 4, Hong Kong; 4, Delangle; for Falmouth, 19, Jupiter.

From MANILA.—To London (reported by telegram), Dec. 24, Eleanor.

From SINGAPORE.—For Liverpool, Jan. 8, Conheath; 21, Petchelee; for London, 19, Loon Hong; 29, John Rennie; for Bordeaux, 27, Liberia; for New York, 28, George Canning.

VESSELS LOADING.

At YOKOHAMA.—For London: Carioco. For New York: Chaasse, Johanne Marie.

At SHANGHAI.—For London: Peter Denny, Burmah, Asphodel, Earl Dalhousie, James Shephard, James John Bellamy. For New York: Crawshay Baily, Endeavour, Dunkeld.

At FOOCHOW.—For London: Charlotte, Esperanza (full), Tavistock, Bucton Castle. For New York: Robin Hood.

At AMOY.—For New York: Lord Clyde, Japan.

At HONG KONG and CANTON.—For London: Dilpussund, Stornoway, Sea Bird. For New York: Sea Serpent, Dramant.

At MANILA.—For New York, Queen of the East; for Cadiz, Felix, San Luis; for Havana, Espana. At Manila, for London: Canaan, San Fernando. For Cadiz: San Luis, Union. For Havana: Espana. For Barcelona: Nuevo Landtaro. For New York: Gamecock.

At SINGAPORE.—For London, Gazelle, Sophie, Agamemnon, Maude for Liverpool and Glasgow, Union; for Channel, for orders, Carlota; for; Rotterdam, Bengal; for Bordeaux, Prefet, Paul Feart; for Gibraltar, Helena; for New York, Bravo; for Boston, Pride of the West.

At PENANG.—For London, Amersham.

At BATAVIA.—For Channel, for orders, Kennington, Sultana; for Amsterdam, Kanagawa, Bantam; for Rotterdam, Maasluis, N. Waterweg, Lichtstraal, Fernate, Princes Amalia, Mary and Hellegonda, Twee Cornelissen.

FREIGHTS AND CHARTERS.

AT YOKOHAMA.—To London: Cotton and Tea, £2. 10s. to £3 per ton; Silk, £4 to £4. 10s.

AT SHANGHAI.—To London: rates have not improved; vessels on the berth are loading at £2 to £1. 15s.; and to New York, £2. Telegrams to Feb. 9 report 35s.

AT FOOCHOW.—To London, £2. 5s.; to New York, £2. 10s.

HONG KONG AND CANTON.—Rates to London remain at £2, and to New York, £1. 15s. Small vessels for coasting purposes are scarce, and rates for the coast have improved. The Circular of George Holmes estimates the number of disengaged vessels in harbour, exclusive of Siamese, at thirty-four, representing 17,909 tons.

MANILA.—There are no transactions to report, and, therefore, rates to United Kingdom may be quoted as before—say £2 for Sugar and £2. 5s. per ton for Hemp; but, owing to the scarcity of suitable tonnage, next settlements will probably be at an advance on these rates.

AT SINGAPORE.—Tonnage in harbour remains plentiful, and no improvement has taken place in freights, which, for United Kingdom, remain at £2 light cargo, and £1. 10s. dead weight.

AT PENANG.—The Amersham has reduced her rate to £2 for Pepper; very little cargo is offering.

AT BATAVIA.—To Amsterdam and Rotterdam: Coffee, 40f.; sugar, 40f. to 42.50f.

REPORTS AND CASUALTIES.

HONG KONG.

The British ship Ariel reports having left Gravesend on October 14th with a fresh breeze down the channel. Had moderate N.E. trades and passed the line on the twentieth day out, in long 25 30 W. had fresh S.E. trades and generally fine weather until passing the Cape, which passed Nov. 22nd in lat. 44 S., being thirty-nine days out—from there had successive gales and calms until off St. Pauls when got a fine S.E. trade, taking her up to the Island of Savoby the 18th Dec., from whence got clear through the Gillolo passage on the seventieth day out, and from there past the Pelew Islands to the Bashees, had strong weather with occasional squalls passing the latter on the 3rd Jan. From thence had fine weather into port, taking the pilot on board at nine A.M. on the 5th, and anchoring at Hong Kong at eleven P.M. of same day, having made the passage in eighty-three days.

BATAVIA.

The steamer Fransen van de Putte arrived at Batavia on the 11th Jan., having in tow the English ship Lady Louise, which vessel had been aground to the north of the Island of Lucipara in the Straits of Banca. The Lady Louise was from Shanghai to New York with a valuable cargo of tea.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Feb. 27, at Bremen, from Batavia, Johanna; March 1, at Falmouth, from Singapore, Ida Maria; off Penzance, from Foochow, Fontenaye; off Fowey, from Shanghai, Elizabeth Nicholson; off the Lizard, from Colombo, Percy Douglas; Feb. 28, at Cuxhaven, from Amoy, Bernhard Carl; 18, at New York, from Penang, Teesdale; March 5, at Penzance, from Penang, Anna; Feb. 12, at New York, from Foochow, Queensland; from Singapore, Marion; 13, from Canton, Royal Minstrel; 14, from Yokohoma, Eliza Hands; 15, from Canton, Runnymeade. At Manila, from Liverpool, Jan. 6, Cuico Hermanos; from Cadiz, 15, Emigrante; 19, Elena. At Shanghai, from London, Jan. 18, Borealis.

DEPARTURES.—Feb. 28, from London for Yokohama, Philomela; from Hamburg for River Amoor, Mozambique; 27, from Falmouth for Batavia, Helena and Anna; March 1, from London for Hong Kong and Canton, Naomi; Feb. 28, from Cardiff for Batavia, Pallas; March 1, from Newport for Singapore, Heros; Feb. 28, from Penarth for Hong Kong, Chalgrove; from Glasgow for Sourabaya, Annie Storie; from Shields for Batavia, India; from Rotterdam for Batavia, Ouder-Kerkaan den Amstel; March 4, from Liverpool for Manila, Adan y Eva; for Galle, Charles; 2, from Shields for Singapore, Marion; 6, from Liverpool for Hong Kong, Sardinia; Feb. 16, from New York for Nagasaki, Bhering. From Manila, for New York, Jan. 11, Queen of East; for Cadiz, 18, Feliz. From Shanghai, for New York, Jan. 18, Deucalion.

SPOKEN.—Lochnagar, Cardiff to Hong Kong, Feb. 24, 20 miles S.W. of the Smalls. Boanerges, Cardiff to Hong Kong, Jan. 23. 11 S. 31 W. Mercia (brig), Manila to Liverpool, Jan. 28. 5 N., 24 W. Panther, Manila to New York, Dec. 5, in the Java Sea. Gemini, Singapore to New York, Dec. 6, in the Straits of Sunda. Eliza Shaw (ship), London to Japan, Jan. 23, 21 S., 25 W. Bon Albert (?) (ship), Shanghai to London, Feb. 19, 37 N., 38 W. Valentia (ship), Newcastle to Hong Kong, 8 N., 158 E. Resolute (ship), for Shanghai, Dec. 19, in the Gillolo Passage. Diamond, Shields to Shanghai, Dec. 31, 22 S., 28 W. Magellan (ship), for Shanghai, Dec. 19, in the Gillolo Passage. Sea Flower (ship), Sunderland to Shanghai, Feb. 28, off the Lizard. Sterling, Manila to Liverpool, Jan. 25. 12 S., 13 W. Luconia (Dutch barque), Batavia to Schiedam, Feb. 25, 48 N., 14 W. St. Andrew's Castle, London to Colombo, Feb. 24. 50 N., 7 W. Brederode (Dutch barque), from Java Jan. 30, 5 N., 20 W.

CASUALTIES.—The Ellen Rodger, from Foochow to London, which went ashore on the Belvidere reef, Gaspar Straits, Sept. 20, was passed Dec. 3 with hull apparently but little broken up, masts gone, bowsprit and jib-boom standing. Advices from Amsterdam, dated Feb. 28, state that the Presto, Teekes, from that port to Samarang, got in contact with the Ortelius, Grook, from Batavia, while in the North Holland Canal, and damaged her bulwarks, which were repaired. She subsequently came into collision with the Quartet, Mulder, from Amsterdam to Samarang, and sustained severe damage. A letter, dated Feb. 4, received from Deas, the captain of the Titania, from the Clyde to Shanghai, states that on Jan. 29, in lat. 19 N., off the Cape de Verds, she lost foremast, maintopmast, and mizen topgallant-mast, and received other damage. She had jurymast up, and intended making for Rio Janeiro. The Falcon (barque), from Macao to Cuba, has been wrecked at Mariana; the crew and 247 coolies with some merchandise, sails and rigging, &c., were saved. A telegram received from Galle, dated March 1, states that the Marette (?), from Singapore to London, has been wrecked in the Rhio Straits.

MISCELLANEOUS.—At Rio Janeiro, Jan. 31, Welfenfwist, Schramm, from New York, for Hong Kong, leaky. At Callao, Jan. 17, Light of the Age, Porter, from Hong Kong, and sailed 24, for Islay.

LATEST TELEGRAMS.

The following were received via Galle on the 3rd and 4th inst.:—

JAPAN.

HONG KONG, Feb. 15.

Intelligence received here from Yokohama announces that Denmark has concluded a Treaty of Commerce and Navigation with Japan.

Stotsbashi has been formally installed as Tycoon.

The London & China Telegraph.

LONDON, WEDNESDAY, MARCH 6, 1867.

SAIGON.

FROM most of the commercial ports in the Far East we have annual Consular reports, which give an approximate if not always an exact idea of their progress. Saigon, however, although rapidly advancing into a position of importance, is still an exception to the rule; we have no Consul there, and, consequently, receive no authentic statistics of its trade. Information gathered from private sources shows that (as might be expected from its being the nearest rice port to China) the export of rice has increased in a remarkable degree during the last few years, the quantity shipped having risen from 1,040,000 piculs in 1864 to 2,148,000 piculs in 1866, or more than double in three years. Cotton, which not long ago was produced in trifling quantities only, for home consumption, now also forms an article of export, some 30,000 piculs having been shipped in 1866; and there is also a large trade in hides, horns, ivory, dried fish, and other miscellaneous products of which no reliable statistics are at present obtainable. But the most important fact with regard to the necessity for establishing a British Consulate here has yet to be noticed; it is that out of 317 foreign vessels which entered the port during the past year, no less than 134 were under the British flag; the residue including 62 French, 60 Hamburg and Bremen, 18 Prussian, 12 Dutch, and 11 American.

In adverting to the growing importance of this place in a commercial point of view we are constrained to state that its development is due more to the energy and perseverance of the foreign and Chinese merchants than to any assistance or encouragement bestowed upon it by the French Government. Indeed, the French laws, as they are administered at Saigon, tend rather to obstruct and hamper trade, and the operations and decisions of the Tribunal de Commerce very much discourage the subjects of other countries from continuing to do business in or with the place. We understand that the appointment of a Consul for Prussia has already been decided on, and look forward with anxious interest to the time when the announcement of a similar appointment is made on the part of Great Britain, whose commercial interests here, as we have already shown, are much in excess of those of any other country.

SHANGHAI AS A NAVAL STATION.

THE commercial importance of Shanghai has so often been dealt upon in these columns, that even those of our readers whose interests are more intimately connected with other ports are at least familiar with the statistics published from time to time which establish the claim of Shanghai to the title of the greatest foreign emporium in China. Accordingly all that mercantile enterprise and scientific skill can accomplish towards increasing the facilities for trade has been lavished upon the wharves, building yards, foundries, docks, and warehouses at that port. Each year witnesses some improvement. At one time we have to note the extension of an already existing public wharf, at another, the construction of a new dock, the establishment of a foundry, or the erection of an important line of bunding. The exceptional circumstances which have hitherto prevented the more recent adventures of this kind from returning an adequate profit, form no argument against the utility and even the necessity of such speculations. When commercial prosperity shall again reign paramount, having been established upon a more enduring basis than that upon which it was before built, Shanghai will be found provided with all the requisites for an increasing trade. So far those who are now perhaps disposed to mourn over capital sunk in apparently unprofitable investments will find their present anticipations belied, and the hopes which first encouraged their expenditure fully realised. Of course, we refer only to such of the many Shanghai joint-stock schemes as depend for ultimate success upon the revival and subsequent growth of a legitimately lucrative commerce. There are many "companies" which have sunk crushed by their own weight, and these, it may be assumed, will, at least for many years, remain in the state at which they have now arrived. But while the mercantile community, not discouraged by present difficulties, have continued to keep up the machinery by which trade is to be fostered and manipulated, the English Government has neglected to avail of the opportunities which the temporary lull in trade has thrown in its way. The same inaccessible and incommodious premises which for want of better were used as a naval yard when land was at a premium, are still retained, although the officers in charge must of necessity constantly report upon the inadequacy of the accommodation, and the difficulties and loss which accrue from the continued occupancy of the present site. While the English naval yard is in a situation which has from the earliest days of the settlement commanded the highest price for building ground, it is utterly unfit for the purposes to which it is applied. On the mere question of expenditure, a very handsome margin of profit would be realised by the sale of the land now occupied by the Government stores, and the purchase of one out of the many plots which are eligible for the purposes required. If, as many fairly be anticipated the renewal of hostilities against the Corea, brings an increase, to the strength of the English naval squadron as well as to that of the French, the difficulties which now attend coaling and fitting her Majesty's ships at Shanghai will of course be much increased.

From its geographical position Shanghai must necessarily be the port of call for all vessels engaged in warlike operations on the northern and eastern coast lines. There is no other place of equal pretensions as regards security and convenience, and with this fact in view the French Government has erected wharves and stores at Woosung, where French ships can be supplied with all needful stores without a moment's unnecessary delay. So also we learn that the American Government is in treaty for building ground on the bank of the Woosung River, and we may, therefore, expect soon to hear of the erection of stores and wharves over which the stars and stripes will wave. Meanwhile the English coal godowns are built in the centre of the settlement, at a distance of at least a quarter of a mile from the nearest wharf, and at a considerable distance from even a landing jetty. In order to arrive at the part of the river closest to the stores, men-of-war are compelled to pass through all the dangers of constantly shifting shoals, and the more permanent but no less formidable chow-chow water, which has ever been the the bugbear of vessels ascending the Wang-poo for commercial purposes. This part of the river, being in the immediate vicinity of the Custom-house, is naturally sought by the tea-ships, steamers, and all trading craft whose object is to land and embark cargo with the greatest possible expedition. Hence, irrespective of the unnecessary inconvenience to which men-of-war are themselves put, they are the cause of still greater inconvenience to others by trespassing seriously upon that section of the anchorage which, for many reasons, is the most important to the community.

Anybody who has watched the adventures of a boat-load of loose cargo from the time it has left the ship in which it has arrived at a Chinese port until it is landed at a jetty, and who has further followed it from the jetty through streets lined by thievish coolies and still more barefaced beggers, until at length it reaches its destination in a godown, will be readily able to form a rough estimate of the loss resulting from the transport of coals in this manner from a collier to the naval yard. Persons qualified to judge in this matter, place the average loss upon coals thus carried in baskets by coolies at sixteen per cent., and this must be doubled when we attempt to arrive at the loss which is sustained between the time when coal is disembarked from a collier and again put on board a man-of-war. It may be said that a guard should be set, or that a few sailors and marines detached to accompany each party of

Digitized by Google

coolies might effectually prevent such peculation as we refer to. But those who so reason have but little notion of the resources of a Chinese thief bent upon plunder, and place too high a value upon the watchfulness of soldiers and sailors Besides this, it would be impossible to keep a guard so employed during the heat of summer, and the evil is thus, for at least a considerable portion of the year, rendered quite irremediable so long as the present arrangement obtains. Some years ago all cargo was landed and shipped under similar unfavourable circumstances. A stroll along the Shanghai streets was then calculated to supply an indefinite amount of amusement to anyone anxious to study the working of the system by which the hordes of beggars that infested the settlement were supported. The observer in order to enjoy the spectacle should of course possess no personal interest in the depredation carried on, else he was apt to regard the matter in a new and unpleasant light. But where there was no such interest, he might at his leisure admire the dexterity with which incisions were surreptitiously made in rice bags and cotton bales—the ingenuity with which large flakes were extracted from the latter, and little calabashes were held under the streams of grain pouring from the former—the boldness wherewith formidable lumps were snatched from coal baskets, the coolness wherewith all these miscellaneous treasures were transferred to the omniverous pouch which every beggar bears suspended from his or her girdle, and the charming insouciance of the coolies meanwhile, who would not or could not make any attempt to check the vagaries of their lively compatriots. The loss on each individual package was perhaps insignificant, but it rapidly mounted up when an entire cargo was thus submitted to black mail. Hence, amongst other reasons, it was that wharves were built alongside which vessels could lie and discharge or receive cargo into or from immediately adjacent warehouses.

The advantages of the new system were at once appreciated by the community, and accordingly when every other investment commenced to look down, wharf shares continued to look up. When a truck ran directly from the weighing machine in the godown to the steamer or ship at the wharf, and emptied itself into the bunkers without the aid or intervention of kleptomaniacal coolies and beggars, the chances of getting as much coal as was paid for were very largely increased; and similar reasoning was found to hold good in discharging coal and all other descriptions of loose cargo. The lesson learned and acted upon many years ago by the merchants has still to be learned by the English Government, which continues to be victimised in the manner we have indicated. Granting, therefore, that no loss, but, on the contrary, gain, would accrue from selling the present naval yard, and purchasing a more eligible site, and assuming that the situation of the yard is about as badly chosen as it could be, there seems to be a difficulty in understanding upon what grounds the naval stores are retained where they are. We have no preference for one bank of the river rather than the other, we suggest no site as presenting peculiar advantages, we would merely suggest that river plots, with quite sufficient depth of water alongside to float the largest ship that could come over the bar at spring tides, might be bought at various parts of the river below the much-dreaded Pootung Point and its surrounding chow-chow water. A haze of doubt and uncertainty pervades the official mind with regard to all questions relating to the Far East. That uncertainty it has hitherto been our object to dispel by painting in their truest and simplest colours the various facts with which our close connexion with China supplies us. We do not attach undue importance to the considerations we have advanced above, for it will be manifest to every thinking mind that in whatever position of advantage the French and American naval squadrons in China may place themselves, the English Government should endeavour to secure at least equal facilities for its ships of war. As the matter stands at present, we would suggest that the Commander-in-Chief on the station should be requested to report upon the present condition of the naval yard at Shanghai, the difficulties and losses involved by the existing arrangements, if they be indeed such as we have represented them, the enormous expense to which men-of-war are put when it is found necessary to overhaul them in private docks, and, on the other hand, the possibility of obtaining without any serious expenditure, or, more probably, with absolute gain, a lot of ground presenting all the requisites for a naval establishment which might, should unforeseen circumstances arise, be extended to include a dock and foundries.

JAVA AND THE DUTCH.

IT does not surprise us that Dutch statesmen should be found unwilling to carry into practical effect those concessions to the Javanese which so lately were pompously announced as introducing a new era in Dutch colonial administration, for timidity as to results is the unfailing concomitant of the assumption of principles not thoroughly understood. The past history and present condition of the natives of one of the noblest islands in the Eastern Archipelago reveals how ill the Government has acquitted itself of its responsibilities. Only a fractional portion of the island is under cultivation, and the regulations adopted, with the conditions under which Government controls the culture, are not calculated to lead to the investment of additional means by private cultivators; in fact, to keep the natives in a low and servile condition has been their continuous aim. We find the COLONIAL MINISTER expressing his opposition to any grant to them of the power of acquiring land, and viewing with actual dismay the carrying out of announced concessions which might tend to interfere with the existing culture; and this denial to the mild unenterprising Javanese of the possession of land certainly intensifies the feeling of hostility which a long course of oppression has engendered. The finances of Holland have already suffered, and in a form not generally suspected, by the impolicy of its course in seeking to augment the quantity of cultivated land paying rent; with the profits of their labour appropriated by exacting officials, the natives constitute but indifferent consumers of imported articles, and cultivation has been carried out on a far more diminished scale than if the Government had not been so active a competitor with European planters. And now that a large proportion of the Crown estates are to be submitted under contract to individual enterprise the Government takes care that the hold on native labour shall not be lessened, still more that natives shall not, by becoming owners of land, enter into active competition. What is this but monopoly in its worst form? And, blind to the fact that it is this hollow system that is diminishing its profits from the Dutch East Indies, the Government seeks after new acquisitions of territory, attempting thus to forestall the enterprise of other nations possessing different administrative systems.

Happily our own colonial possessions are sufficient for the almost indefinite development of the leading products for which Java is conspicuous. The acquisition by the Dutch of the most valuable portions of Sumatra, in violation of an existing treaty (which has already resulted in serious injury to the pepper trade of Penang), will afford but temporary and adventitious facilities to the maintenance of the principles underlying her colonial rule, for the selfishness of monopoly, based on injustice, cannot long maintain itself against the more free and liberal principles which elsewhere are asserting their ascendancy. Unless the productions of Java increase in a far greater ratio than has been the case the past few years, that island, notwithstanding its natural advantages, must be left far behind in the race of competition, and the Dutch Treasury be compelled to submit to yet more diminished profits. Indeed, it has been doubted, with good reason, whether these profits are even now as great as they have been represented; and the Government, whilst continually professing greater liberality, appears continually to stop short at the point at which the improved principles sought to be carried out would become fully efficacious. Thus, whilst admitting foreign vessels purchased by its own subjects to carry colonial produce at a minimum price to be fixed by competition, foreign carriers are excluded. Dutch calculations for the allotted tasks of planting coffee trees on the part of the natives, or of securing their personal services, have always been grossly in favour of the Government agents. If a reduction in the weight of the picul or sack has been made, the number of these required to be delivered has been increased. Out of this overweight, indeed, the pay of officials has been entirely or in part defrayed, their exertions being thus secured in driving the cultivator to produce the utmost possible. We should be glad if public opinion in Holland would compel those statesmen in whose hands the welfare of millions is placed to consider the vast responsibility they incur in neglecting favourable conjunctures for placing the industry of Java on a more equitable, satisfactory, and stable basis. With so many powerful rivals for colonial produce, it is for Holland to try without reservation the efficacy of the same means by which our own colonial greatness has been

Digitized by Google

achieved. Commercial and industrial enterprise would revive, and if the returns were not so direct, the influx from subsidiary channels would be a more abundant and more permanent source of wealth.

STRAITS GOVERNMENT APPOINTMENTS.—The *London Gazette* of the 1st March contains an official notification of the appointment of Lieut.-Col. Archibald Edward Harbord Anson, R.A., to be Lieut.-Governor of Prince of Wales's Island and its dependencies; and William Wellington Cairns, Esq., to be Lieut.-Governor of the town and fort of Malacca and its dependencies. The names of these gentlemen appeared in their proper places in the list of Straits Government officials which we gave in a recent issue.

Literature.

Dr. Hepburn, of the Presbyterian Board, who has occupied himself almost exclusively with the preparation of a Japanese and English Dictionary, at length has it completed and ready for printing. A late number of the *Record* contains the following information:—"One of our countrymen, a merchant at Yokohama, kindly and liberally offered to take the risk and be at the expense of its publication; this expense will probably be reimbursed by its sales. This work, the first and only one of the kind, has involved great labour, but it is regarded as indispensable to the translation of the Scriptures into the Japanese language, and it will be very useful also to missionaries and others."

The Colonial Office List for 1867. By W. ROBINSON and A. N. BIRCH, of the Colonial-office. Harrison, Pall-mall.—We have received the sixth annual publication of this useful hand-book to the colonies. There is much information given in this volume which has not appeared in its predecessors, for instance, that portion of the work which relates to the constitutional government of the various colonies now appears in a much more comprehensive form. Several pages are devoted to an account of the former and future administration of the Straits Settlements, and a list of the new Government appointments is given so far as they had been filled up at the date of publication. Under the head of Jamaica we find an account of the disturbances which took place there in 1865, compiled from the report of the Royal Commission. The editors, at the conclusion of their preface, state that although they have not been able to adopt all the suggestions received from time to time, they nevertheless trust that advice and criticism will not be withheld so long as anything is wanting to complete the accuracy and usefulness of the *Colonial Office List*. This is the surest road to success.

The Foreign-office List; and Diplomatic and Consular Handbook for 1867. Compiled by EDWARD HERSTLET (Librarian, &c., of the Foreign-office). Harrison, Pall Mall.—We have received the thirtieth annual publication of this work, which shows a marked increase in size, substance, and utility. The authenticity of the varied information it embodies is of course undoubted, and evidently no exertion has been spared to bring it up to the latest possible date. In addition to the classified lists and other usual contents, there is a well-executed map, showing all the places where British diplomatic or Consular agents are resident throughout the world.

CONTINENTAL WORKS ON THE FAR EAST.

Korea, and the Far East generally, occupies considerable attention on the Continent. M. Léon de Rosny has published some papers in the *Journal Asiatique* which will shortly appear, with additions, in the form of a volume from the press of the Imprimerie Imperiale of Paris, under the title of "Apercu de la Langue Coréenne." This is said to be the first work which has appeared, in France at least, on the subject, and its appearance is promised in a month at latest. The first part of the work will be purely linguistic, and has been translated and published in Professor Summer's *Repository*, of London. The second part of the volume will treat principally of the Ethnography of the Koreans, giving the names of all the races included under that title, ancient as well as modern, with information concerning the history and geography of the country, and lists of Chinese and Japanese sources of information respecting Korea.

Another volume, now in the press, will shortly be published under the title of "Variétés Orientales," and a portion of it will be published previously entitled "La Géographie Physique et Historique de la Corée," with a map of the peninsula. The author announces that all the names of localities will be given according to the Korean nomenclature instead of the Chinese form as has been the custom heretofore.

A small work has just appeared at Florence with the title of "Guida della Conversazione Giapponese," dialogues in Japanese and Italian, by M. Antelmo Severini, professor of Chinese and Japanese in the Institute of Florence.

Lastly, M. Léon de Rosny has issued a small pamphlet containing extracts from the *Revue Orientale*, with the title of "Vocabulaire, Chinois-Coreen-Aino," and containing remarks on the three languages and comparative tables of a number of simple words. This little work may serve as an introduction to that translated by Mr. Medhurst and others, which M. de Rosny quotes as his chief authorities.

The works issued during the past fortnight are not numerous, and include none of special interest in our own particular field. The following summary includes all that are of any importance:—

In History and Biography we have, in 2 vols., the long-promised "Correspondence of the late Earl Grey with his Majesty King William IV. and with Sir Herbert Taylor," which will, we hope, set at rest all controversy about the secret history of the Reform Act of 1832; the present Earl Grey edits his father's correspondence, with an introduction; we have also, in separate volumes, "Records of the 13th Light Infantry, the 44th Regiment, and the 82nd Regiment," with plates and photographs; and the first volume of a "History of the Norman Conquest of England, and its Causes and Results," by Edward A Freeman.

In Geography and Travel we have "A Lady's Glimpse of the Late War in Bohemia," by Lizzie Selina Eden, which contains some good illustrations; a narrative of a mountain campaign on the borders of Afghanistan, in 1863, by Col. John Adye, published under the title of "Sitana;" "Madagasca Revisited," describing the events of a new reign and the revolution which followed, setting forth also the persecutions endured by the Christians and their heroic sufferings, with notes of the present state and prospects of the people, by the Rev. William Ellis, the well-known missionary; and "Half Round the Old World," a narrative of a tour in Russia, the Caucasus, Persia, and Turkey in 1865-6.

In Fiction we have "Dumbleton Common," by Eleanor Eden, 2 vols.; "Sowing the Wind," by E. Lynn Linton, 3 vols.; "Sir Cyrus of Stonycleft," 3 vols.; and "Maidenhood," by Mrs. S. A. Marsh, 3 vols. Mr. Trollope's new novel, "The Last Chronicle of Barset," has so far progressed as to allow of the first volume being issued by Messrs. Smith, Elder, and Co.

Among the announcements of forthcoming works we notice "A Trip to the Tropics," by the Marquis of Lorne, and "Wild Life Among the Pacific Islanders," by E. H. Lamont; both published by Messrs. Hurst and Blackett.

Among the Magazines, *Macmillan* is notable for a short but instructive article on the condition of India, and also for two very clever papers, entitled respectively, "A Hard Day's Work" and "What is Materialism?" The *Cornhill* still maintains the partiality for German, and especially for Austrian subjects, which has been noticeable for many months past. Out of six miscellaneous prosé articles it contains, three are on German subjects. *Temple Bar* is almost altogether made up of stories, which unless the essays are particularly valuable are what one first turns to in a magazine. "The Heiress of Monte," by the author of the "Iron Casket," "Under Greek Fire," "Lost from Rescue," and "The Man who lived by his Wits" are among the contents of the latest number. In *London Society* the liveliest article is one by Mr. James Greenwood, entitled "The Private Life of a Public Nuisance." It has all his well-known vivacity and descriptive power. It treats of organ-grinders, certainly the greatest nuisances of London life.

A new story by Mr. Henry Kingsley, entitled "Mademoiselle Mathilde," a tale of the latter part of the last century, will be commenced in the April number of the *Gentleman's Magazine*. This is, we believe, the first time since its start 136 years ago that the *Gentleman's Magazine* has published a work of fiction. The leading serial fiction in *Cassell's Magazine*, the first number of which will appear on the 6th of March, is entitled "Anne Judge, Spinster," and is written by Mr. Frederick W. Robinson, the author of the popular novels, "Grandmother's Money," "A Woman's Ransom," and "Christie's Faith." A proof-sheet of the first number shows it to be well printed on toned paper, and copiously illustrated, and it promises to be a good pennyworth. A new morning paper, of Liberal-Conservative politics, is about to appear, under the title of *The Latest News*.

THE ARMY ESTIMATES.

These Estimates for the Military Service of 1867-68 show a total of £14,114,733, which is a net increase of £293,000 over the estimates for 1866-67.

Among the several amounts voted for the various departments engaged in the administration of the army, the first is a sum of £31,715 for the department of the Secretary of State for War. This shows an increase of £820 over the estimate for 1866-67, which was £30,895. The salaries of clerks and other expenses of the War-office show a still larger increase, amounting to £5,438, the estimate being £163,454, against £158,016. The next charge is for the topographical department, where only thirty-one persons appear to be employed, the total of their united salaries being £5,385, against £5,217, an increase of £168. Last in order is the Horse-guards Department, which is subdivided as follows:—Department of the Field-Marshal Commander-in-Chief, £21,948, against £21,727; Office of the Commander-in-Chief, £9,884, against £10,415; Office of the Adjutant-General, £13,174, against £12,876; Office of the Quartermaster-General, £4,222, against £4,049. In addition to these charges there is an estimate of £500 for travelling expenses and contingencies, the same sum being allowed in the previous year. Thus the total for the Horse-guards Department is £49,728, against £49,567, the increase being only £161. It will be seen by these figures that the administrative departments will cost £5,767 more than in 1866-67, the totals being £218,567, against £212,800.

The numerical strength of the Ceylon Rifle Regiment is stated at 1,376 of all ranks, and the amount to be expended for regimental pay and the incidental requirements of the corps is £37,633. This is £458 over the estimate for the previous year.

Another item in these estimates is a vote of £14,515 for the Hong Kong corps, £14,000 being for pay and the remainder as follows:—Command pay, £55; allowance in aid of regimental messes, £150; contin-

Digitized by Google

gent and non-effective allowances, £219; agency, £61; regimental stationery and postages, £21. This regiment is composed of 15 officers and 660 non-commissioned officers and privates.

The two regiments of Gun Lascars for Hong Kong figure for an amount of £3,166. Each regiment is composed of 1 Havildar Major at 2s. 3d., 2 Havildars at 1s. 4d., 1 bugler at 11d., 4 Naicks at 1s., and 80 privates at 11d. per day. Thus the total regimental pay is £3.036, an item of £10 being set down as additional pay, and of £120 as "Contingent allowance to officer of Artillery in charge of corps."

In the estimates for "Works, Buildings, and Repairs" is an item of £20 000 for huts at Hong Kong, the portion required to be voted for 1867-68 being £10,000. A vote will also be required for providing additional magazine accommodation in China. The cost when completed will be £8.000, but only £1.000 is required to be voted for the present year. For the erection and maintenance of Fortifications, Military Store Buildings and Barracks the estimate for China and Japan is £8,387, for the Straits Settlements £4,555, and for Ceylon £7,173.

The charge for Clerks, Police, and Inspectors in the Military Store Departments amounts to £4,835 for China and Japan, £523 for the Straits Settlements, and £2.428 for Ceylon. The Purveyor's Department figures for a sum of £5,783 for China, £874 for the Straits Settlements, and £3,288 for Ceylon. The Medical Department costs for China £2.549, for the Straits Settlements £881, and for Ceylon £2,305. The Chaplain's Department in China is maintained for the sum of £510, in Ceylon for £30), and in the Straits Settlements for £50. The charge for Clerks and others in charge of Barracks for supplies of fuel and light, and for the hire of Barracks, Quarters, &c., is £33,731 for China, £8.875 for Ceylon, and £3,242 for the Straits Settlements. The estimate for the Commissariat Department, including transport and staff of officials, is £3),367 for China, £30,009 for Ceylon, and £14,395 for the Straits Settlements.

A sum of £100 is included in the estimates for 1867 68 as a reward for the distinguished services of Colonel Franklin Dunlop, C.B., who served in China from the breaking out of the war in 1856 to the end of April 1857, where he suffered severely from an attempt made by the Chinese to poison the inhabitants of Hong Kong by mixing arsenic with the bread sold on the 16th January, 1857. Colonel Dunlop also commanded the Artillery at the capture of Canton, December, 1857. He received a medal with clasp, and was invested with the order of Companion of the Bath.

THE CHINA CLUB.

THE meeting of the newly-constituted committee, previously announced, duly took place at Willis's Rooms on the 4th instant. An amended list of the committee, together with a full report of the resolutions adopted, will be found in our advertising columns; the chief points of interest may however be briefly summed up as follows.—Messrs. Willis will at once open a list, on which members must enrol themselves. Only such officers and gentlemen as have resided in or visited China or Japan, are eligible. The annual subscription will be a guinea, payable in advance. Sir John Davis is Chairman, and Mr. J. J. Mackenzie Honorary Secretary during the temporary absence of Major Brine. The date of the dinner this season is fixed for the 21st May, being the day before the Derby. At present the operations of the Club will be confined to keeping up this annual banquet, but it is not unlikely that it may ultimately become the germ of something more imporant. At all events we trust it will not be allowed to languish for want of cordial support and co-operation.

Monetary and Commercial.

Rumours continue to be circulated respecting the position of firms in China, but they are simply idle rumours. The story was current on the 2nd inst. with some persistence, but there is no foundation for it. The telegrams from Bombay are not satisfactory, and telegrams, if they prove correct, report a heavy fall in the shares of the Bank of Bombay, but we know that the rumours as to the stability of the bank are groundless, there is no question but that all the difficulties of 1866 have been surmounted.

A dividend of seven per cent. per annum for the past half-year has been declared by the directors of the Delhi and London Bank.

Tenders have been invited for £250,000 Ceylon Government debentures at 108, bearing interest at six per cent. The rate is extreme, and would not in ordinary times of business be entertained.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton on the 4th inst., was, in silver, to Bombay, £17,080.

TEA SALES.—The sales which commenced yesterday comprised 15,575 packages, 12.661 were printed "without reserve." 9,591 packages passed to-day and 6,424 were sold, all being "without reserve." The sales proceeded fairly, but prices were, in some instances, rather in favour of buyers. Several breaks of fair and medium red-leaf congou brought from 1s. 2¼d. to 1s. 5½d. per lb. 400 half-chests "tea dust" realised only 3¼d. to 4d. per lb. About 1,500 boxes Canton scented orange pekoe, "with all faults," sold at 1s. 1d. to 1s. 1¼d. Packages offered:—Congou, 8,125; congou siftings, 422; scented caper, 413; pouchong, 9; oolong, 106; souchong, 423; hyson pekoe, 45; scented orange pekoe, 4,567; Twankay, 28; hyson, 124; young hyson, 498; Imperial, 114; gunpowder, 289; sorts, 41; dust, 408; Assam, 28. Total, 15,575 packages.

SILK.—There has been some excitement, owing to the blunders of the Galle telegrams as to the stock, &c.

MANCHESTER MARKETS.—At the close of last week the demand became slightly more active, with steadier prices, attributable to the increased cotton sales rather than any marked desire on the part of buyers to purchase on a free scale; to-day we have a return of the dull tone previously existing, and more or less increased disposition to press sales at prices somewhat under quotations.

The Board of Trade Returns for the month and twelve months ended 31st December, 1866, have just been issued, their publication having been delayed in order to afford time for the making up of the landing accounts of all cargoes properly appertaining to the trade of the past year.

For the month of December the value of the exports was £14,914,563, against £15,030.088 in 1865, and £12,095,437 in 1864; showing a decrease of £115,525 against 1865, and an increase of £2,819,126 against 1864. The total value of our exports for the year is shown to have been £188,827,785; being an increase of £22,992,060, or nearly 14 per cent. on 1865, and of £28,378,732, or about 18 per cent. on 1864. Thus it will be seen that the decrease observable for the month of December has been counterbalanced by an increase during the earlier months, a circumstance which occurs to a greater or less extent every year.

The shipments of Cotton Yarns exhibit an increase of 32 per cent. in value and 34 per cent. in quantity, and of Cotton manufactures 30 per cent. in value and 28 per cent. in quantity. The total value of Cotton Yarns and manufactures was £74,565,426 or about 40 per cent. of our entire trade. Among the other principal articles Haberdashery figures for an increase of 7 per cent.; Linen manufactures 5 per cent.; Woollen manufactures (which amount to £21,725,821) 5½ per cent.; and Iron manufactures (which amount to £14,829,369) 10 per cent.

The Imports are returned only for the month and eleven months ended 30th November, their value during that month being £17,841,738 in 1866, £19,910,403 in 1865, and £16,164,570 in 1864; showing a decrease of £2,068,665 against 1865, and an increase of £1,677,168 over 1864. The imports during the eleven months have amounted in value to £211,539.785 in 1866, to £180,820,357 in 1865, and to £197,448,426 in 1864. These figures denote an increase in value for 1866 over both the preceding years amounting to £30,719,428 over 1865, and to £14,091,359 over 1864.

The extent and value of our trade with the ports and countries of the Far East are shown in the following statement:—

IMPORTS.

The total quantity of Raw Cotton imported into the United Kingdom during the month and twelve months ended 31st December, and its value for the month and eleven months ended 30th November, are thus given:—

Quantity for the Month ended 31st Dec.

From	1864.	1865.	1866.

Apply to Mr. SWELLING, 163, Fenchurch-street, City.

HOLLOWAY'S OINTMENT AND PILLS have over and over again proved the best friends to persons afflicted with ulcerations, bad legs, sores, abscesses, fistulas, and other painful and complicated complaints. Printed and very plain directions for the application of this Ointment are wrapped round each pot. Holloway's alterative Pills should be taken throughout the progress of the cure, to maintain the blood in a state of perfect purity, and to prevent the health of the whole body being jeopardised by the local ailment. Bad legs (old age's great grievance) are thus readily cured, without confining the patient to bed, or withdrawing him from the nutritious diet and generous support so imperatively demanded when weakening diseases attack advanced years, or constitutions evincing premature decrepitude.

CHINA CLUB COMMITTEE.

CHAIRMAN—Sir JOHN FRANCIS DAVIS, Bart., K.C.B., F.R.S., (late British Plenipotentiary in China, and Governor of Hong Kong)	Athenæum Club, S.W.

* Ordered on Foreign Service.

At a MEETING of the COMMITTEE, held at WILLIS' ROOMS, King-street, St. James', this day (Present, ELEVEN MEMBERS), the following RESOLUTIONS were unanimously agreed to :—

1. Proposed by Major Brine, seconded by Mr. Ormiston: "That Sir John Davis be Chairman of the China Club Committee."

2. Proposed by the Chairman, Sir John Davis, and seconded by Sir John Bowring: "That the cordial thanks of the China Club Committee be given to Major Brine for his valuable services, the Committee being mainly indebted for its existence to his exertions; that Mr. J. J. Mackenzie be requested to fulfil the duty of Hon. Secretary (pro tem.) during Major Brine's absence, and that he be authorised to ask the aid of an associate Hon. Secretary."

3. Proposed by Mr. Montgomery Martin, and seconded by General Balfour:—"That the Third Annual China Dinner be held at Willis' Rooms, at 7.30 P.M., on Tuesday, the 21st May next (the day before the 'Derby')."

4. Proposed by Colonel Sargent, and seconded by Captain Hunter:—"That Mr. E. Pereira be requested to act as Honorary Treasurer."

5. Proposed by Major Brine, and seconded by Mr. Mackenzie: "That every Nobleman and Gentleman joining the 'China Club' must have been in China or Japan; that he should be proposed by a Member of the Committee; that Messrs. Willis should record the names and addresses in a special book; that the Annual Subscription should be One Guinea, payable in advance on the 1st January; and that the price of the Dinner Ticket to those who dine should by that means be reduced."

6. Proposed by Sir John Bowring, and seconded by Mr. Pereira: "That the thanks of the Meeting be given to the Chairman, Sir John Davis."

FREDERIC BRINE, Honorary Secretary.

Willis'-rooms, King-street, St. James', March 4, 1867.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 12, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

"Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Bottled Ales and Wines, &c.

"NO BUYERS FOR THE BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov 16.—Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 87, Eastcheap, E.C., Sole Manufacturer.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club)

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.

ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents and 10 cents.

The "China Mail" has been permanently enlarged in size namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

Threadneedle-street, London, 1867.

CHILDREN'S WORM TABLETS (KEATING'S).

The great remedy for these disorders in children can now be administered IN THE FORM OF A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.

Prepared and sold in tins and bottles by THOMAS KEATING, Chemist, &c., 79, St. Paul's Church yard, London, E.C. and retail by all druggists and patent medicine vendors in the world.

Observe the words "KEATING'S WORM TABLETS" are engraven on the Government Stamp of each tin, without which none are genuine.

TESTIMONIAL.

Loughton, November 28, 1865.

DEAR SIR,—I write to inform you I purchased a box of your Worm Tablets, and they have brought no less than 30 worms some 3 or 4 inches in length, from my child, two-years-and-a-half old. I feel it my duty to make this public, as others who may be similarly afflicted may derive benefit.—I am, your obliged,

EDWARD BUSH.

GRANT'S TRANS-MONGOLIAN TELEGRAMS.

VIA KIACHTA.

This line, which has for its object the most rapid transmission of Telegrams between Shanghai and Europe and *vice versa*, was organised in the spring of 1866, and although during the first two months it did not realise the expectations of the projector, who proposed to forward messages between Europe and China in 12 days, yet, considering the fact of its being a new scheme and one subject to many difficulties at first, it is satisfactory to know that all the Telegrams despatched from Shanghai for London have invariably during the last three months reached their destination long before those forwarded *vid* Galle, and the fact, which is patent to all the large mercantile houses of Shanghai, that many thousands of pounds have been saved by the earlier Telegrams which have been transmitted by this line, is a sufficient proof of its sound and practical utility.

Until recently the undertaking was a monopoly to the original subscribers, who received their private communications by this service long before the public.

The Projector having made a proposal to the original subscribers to take over all their interest in the line and pay up the whole of the outlay, a general meeting was held, at which it was unanimously agreed to accede to the proposal.

THE LINE IS NOW THROWN OPEN TO THE PUBLIC.

There are employed in the service of GRANT'S TRANS-MONGOLIAN TELEGRAMS—280 Ponies, and 40 Couriers. With Agencies at Kiachta (the residence of the Manager), Urga (the Capital of Mongolia), Kalgan or Chang-kia-kow (at the Great Wall), Tien-tsin, and Shanghai.

The days of despatch from Shanghai are advertised in the *North China Daily News*. EXPRESS Telegrams may be despatched by any steamer.

Telegrams for China by the regular weekly courier must be despatched from any Telegraph Station in Europe every TUESDAY, addressed "GRANT, KIACHTA." Express Telegrams may be sent on any day of the week.

Charges from Shanghai to Europe and from Kiachta to China :—

REGULAR COURIERS.

Twenty words	Tls. 15
Thirty words...	20
Forty words	25

And for every Ten words in addition Tls. 5 extra.

EXPRESS COURIERS.

Twenty words	Tls. 150
Thirty words	155
Forty words	160

And for every Ten words in addition Tls. 5 extra.

Telegrams from Shanghai must be addressed thus :—

TELEGRAM (20) WORDS
GRANT, KIACHTA.

If Express, the word "Express" must be written on the Envelope. Telegrams from Europe must be addressed "GRANT, KIACHTA." If Express, "GRANT, KIACHTA, EXPRESS."

Courier charges to and from Europe must be paid in China to Messrs. HALL and HOLTZ, Agents, Shanghai, or to Messrs FERGUSSON and Co., Agents, Tien-tsin. Mercantile houses in Japan, Hong Kong, &c., must appoint Agents for the reception of their Telegrams at Shanghai, or Tien-tsin.

SUBSCRIPTIONS FOR 1867.

Annual Subscribers from Europe to China	£120 stg.
Annual Subscribers from China to Europe	100
Annual Subscribers from Europe to China and China to Europe	200

These rates are exclusive of Express Couriers and Telegraph Charges, viz. :—Twenty words, 7 roubles or Tls. 2.50 Shanghai Sycee; and for every ten words extra, Rs. 3.50, or Tls. 1.25 Shanghai Sycee. Annual Subscribers have the privilege of sending Telegrams of any number of words to any *one* person or firm; the name and address of such person or firm must be given on payment of subscription. If an Annual Subscriber or his Agent publishes in any newspaper, or allows the contents of any Telegram to be made public without the special consent of the undersigned, the said Annual Subscriber shall forfeit his subscription.

Telegrams may be despatched from Europe from Tuesday, 19th February, to Tuesday, 19th November, inclusive. From Shanghai, on the departure of the first steamer to Tien-tsin, till the freezing of the river Peiho.

Prospectuses, with through rate to a thousand places free on application.

G. W. WHEATLEY and Co. (late Wagnorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W. and 32, Regent-street, S.W.

INDIA, CHINA, AND JAPAN.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations:—

Destination.	~~Ships.~~	Class.	Dock.	To Sail.
Shanghai ...	Jusanpore ...	Brockleb	W.I.D.	With des.
Hong Kong ...	Solent ...	A1 13 yr.	W.I.D.	With des.
Hong Kong ...	Chetah ...	A1 10 yr.	W.I.D.	With des.
Nagasaki ...	Chanticleer .	A1 10 yr.	W.I.D.	With des.
Kanagawa (Yokohama) ...	Swanley ...	A1 13 yr.	W.I.D.	With des.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

STEAM to CHINA.—The undermentioned SCREW STEAMERS are intended to be despatched from LIVERPOOL, at their respective dates, with cargo and first-class passengers, for MAURITIUS, Penang, Singapore, Hong Kong, and Shanghai:—

Name.	Tons.	Captains.	Sailing Day.
Ajax	1,550	Kidd	March 9
Achilles ...	1,550	Russell ...	May 18
Agamemnon...	1,550	Middleton .	To follow.

Each vessel carries a surgeon and stewardess. Apply to ALFRED HOLT, No. 1, India-buildings, Liverpool.

HAYO-MARO.—The DEPARTURE of this beautiful extreme clipper twin screw steamer for CHINA and JAPAN, via Singapore (also Cape de Verds and Cape of Good Hope, should sufficient inducement offer), has been DEFERRED. Can accommodate a few more first-class passengers. Carries an experienced stewardess for ladies' attendance. No cargo taken.

For Passage apply to Captain Carnes, at Mr. John Preston's, 98, Gracechurch-street.

Proceeds under Steam.—At Glasgow.

FOR SINGAPORE, HONG KONG, and JAPAN (NAGASAKI and YOKOHAMA), the splendid new Clyde-built powerful screw-steamer DRAGON, 9 years A 1 at Lloyd's, 696 tons gross register, will sail on the 10th March positively. Rate of freight for Singapore, 70s.; Japan, 100s. Shippers are requested to mark the port of destination distinctly on their goods.

As this vessel proceeds under steam, is well rigged and takes only measurement freight, shippers may confidently expect that she will make a rapid passage.

For terms, &c., apply to ALLAN C. GOW and Co., 87, Union-street, Glasgow.

STEAM to YOKOHAMA and NAGASAKI Direct.—To sail from Glasgow on the 25th March, will touch at St. Vincent and Singapore to coal, the splendid new composite, Clyde-built screw steamer COQUETTE, A 1 13 years, 626 tons register, horse power 90 nominal, 380 indicated; W. LOBNITZ, Commander. This beautiful vessel, just launched and built under special survey, is confidently expected to make the passage in 80 days, and is strongly recommended to shippers of fine goods.

For freight apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C. Goods to be consigned to Messrs. ALLAN C. GOW and Co., Glasgow, and to be distinctly marked for which port they are intended.

FOR SHANGHAI, to sail on the 8th March, the well-known clipper DUNMAIL, A 1 14 years, 771 tons register, PETER THOMPSON, Commander; lying in the East India Docks. This ship has just made the passage from Anjer to the Downs in 66 days, being the shortest on record.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the well-known clipper, INVINCIBLE, A 1 13 years, 657 tons register, C. BEECHING, Commander; lying in the London Docks. This ship is in first-rate order, having been dry docked and newly metalled. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR HONG KONG and WHAMPOA direct, to sail on the 19th March, the well-known China clipper-ship NORTHFLEET, A 1 14 years, 876 tons register, W. SYMINGTON, Commander, loading in the East India Docks. This splendid vessel, newly coppered, is strongly recommended to shippers.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C.; or to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

With quick despatch.

FOR KANAGAWA (YOKOHAMA), JAPAN, direct, the splendid China clipper ship CARACTACUS, A1, 13 years, 679 tons register, G. MURRAY, Commander, East India Docks, has good accommodation for passengers.

For freight or passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

COLOMBO Direct (warranted first ship), the beautiful British-built clipper ship BOLDON LAWN, A 1 11 years, 551 tons register, now newly coppered; W. B. HOPPER, Commander; is rapidly loading in the West India Docks, and shippers are requested to send their goods down immediately. Has very good accommodation for passengers.

Apply to JOHN C. CAMPBELL, 22, Great St. Helen's, or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St Helen's, E.C.

Has a large portion of her Cargo engaged, and will meet with very quick despatch.

DIRECT for BOMBAY, the splendid Scotch-built clipper ship JANET MITCHELL. A 1, 13 years, 711 tons register, J. S. BINNEY, Commander; East India Docks. This splendid vessel is well-known in the Bombay trade for the good order in which she has always delivered her cargoes, and will be found a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate street, E.C.; or to JOHN C. CAMPBELL, 22, Great St Helen's, Bishopsgate-street, E.C.

By last Bombay mail to Marseilles, per P. and O. steamer Tanjore, arrived March 6.—From Singapore: Mr. Paterson, Mr. and Mrs. Leveson, two children, and servant, Miss Iveson, Mr. Greenshields. From Hong Kong: Mr. Whyte, Mr. Stewart.

PASSENGERS OUTWARD.

Per P. and O. steamer Nyanza, from Southampton, March 4.—To Yokohama: Inspector Peacock, Sergeant J. Allen, twelve constables, and six women. To Hong Kong: Mr. Percival, Mr. E. Goodlake, Mr. T. Kydd, Mr. H. G. Howlett. To Singapore: Miss Robertson. To Ceylon: Rev. J. S. and Mrs. Jones, child, and servant, Miss Claughton, Mr. Ford, R.N., Hon. A. Cadogan, Miss Paterson, Captain Henzell, Mrs. Fyfe and servant, Rev. B. T. Dowbiggin. To Calcutta: Mr. G. Hadcock, Mr. R. Smith, Lieutenant La Fouche, Assistant-Surgeon Patterson, Mr. and Mrs. F. Parker, Ensign H. F. Heathcote, Mr. H. C. Hobson, Mr. and Mrs. Garben, two children, and servant. Mr. Saunders, Mr. W. Cubbard, Mr. A. Hay, Mr. Dutt, Mr. L. Balfour. To Madras: Colonel and Mrs. Triscott, Mr. J. R. Anderson, Mrs. O'Connell. To Bombay: Mrs. Goldsworthy, Mr. P. H. Brown, Mrs. H. Walker and child, Colonel and Mrs. O'Connell, Mr. R. C. Hobden.

From Marseilles, March 13.—To Shanghai: Mr. W. Howie, Mrs. Winchester, Mr. W. Birt. To Hong Kong: Mr. J. M. Beaumont, and one second-class passenger. To Singapore: Mr. D. K. Mason. To Calcutta: Mr. D. L. Henry, Mrs. Stewart, Miss Twiner, Miss E. Rose, Miss A. Rose, Miss Beatson, Colonel W. H. Norman, Mr. and Mrs. F. E. Hogg, Major-General Fordyce, Mrs. Benedict, Mr. C. Rebsch, Major Catty, Major G. N. Money, Colonel T. B. Butt, Mr. J. Talboys Wheeler. To Madras: Mr. H. O. Dunsford, Mr. and Mrs. E. Thompson, Dr. and Mrs. Mair, 2 children, and ayah, Major and Mrs. Bayley, Miss Kindermann and servant, Mr. J. Bates. To Bombay: Miss Quinton, Captain G. Young.

Per P. and O. steamer China, from Southampton, March 20.—To Shanghai: Mr. and Mrs. Dow, Mr. A. C. Margary, Mr. B. C. G. Scott, Mr. H. A. Giles, Mr. W. N. Abdy, Mr. P. Warren. To Hong Kong: Mr. A. G. Hogg. To Singapore: Mr. and Mrs. Meldrum. To Ceylon: Master de Lemos, Mr. Brighouse, Mr. Pollard, R.N., Mr. W. D. Bosanquet.

From Marseilles, March 28.—To Shanghai: Mr. P. Maclean, Mr. A. White, Mr. M. E. Towell. To Hong Kong: Mr. W. Lowe, Mr. J. Hogg.

Per P. and O. steamer, from Southampton, April 4.—To Shanghai: Mr. Hugh Fraser.

From Marseilles, April 12.—To Ceylon: Mr. and Mrs. Dunlop and two children, Miss Layard.

Per P. and O. steamer, from Marseilles, April 28.—To Shanghai: Mr. and Mrs. W. H. Fittock.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port the P. and O. Mail brings us one day's later news than that received nine days since by the French mail. Consequently there are no important events to chronicle; but the following remarks from the *Japan Times*, on the forthcoming visit of the Foreign Ministers to Osaka, are interesting:—

The principal political occurrence of the fortnight is the determination come to by the Foreign Ministers to accept an invitation tendered them by 'Stotsbashi, the new Shiogoon, to visit him at Osaka. It is believed to be their present intention to leave Yokohama for that purpose in about a fortnight. Such a visit some time before the opening of the port next January, would in any case have been necessary—as there is much to settle regarding the position of the new foreign settlement, the anchorage, the tenure of land, erection of buildings for the Custom house and Bonded warehouses, residences of diplomatic agents, &c. It would be a great assistance to Ministers, we should think, if they were to ask the Chamber of Commerce to send its Secretary, or a duly authorised member, possessed of the wishes of the mercantile community here, whom they could consult with upon many points of detail, with which they must themselves, necessarily, be unacquainted. A serious mistake, and one which led very unfortunately to disagreeable results, was made by Sir Rutherford Alcock when the port of Kanagawa (so-called) was opened to foreign trade. It would be a most regrettable circumstance were the opening of the new port of Osaka, which will in all probability ultimately be the centre of Japanese trade, to be marred by any similar error of judgment on the part of the representatives of treaty Powers, who are sent here to make *commercial* treaties and whose earnest wish—as it is their first duty—is, in all they do, to consult the interests of the merchants of the nations which they represent. In a new trade, like this of Japan, it is especially necessary that those entrusted with diplomatic and political functions should make themselves conversant with the wishes of those whose interests are chiefly concerned. There are many points connected with the conduct of negotiations with the native Government, and especially regarding the important move of opening Osaka, in deciding which the opinion of the Chamber of Commerce would be of great use to the Ministers, and should be invited by them, and we shall be glad to hear that an expression of its ideas upon this one point has been sought. There are a number of merchants here whose opinions are opposed to opening the new port at all in the present depressed state of the trade, and if report be true, opinion is divided among the Ministers themselves as to the wisdom of the proposed measure, but on the other hand the new Shiogoon is believed to be very favourable to it.

The admirers of Japanese art and manufactures will have (says the *Japan Times*) shortly after these lines are read in Europe, a most favourable opportunity of gratifying their curiosity by the examination of a splendid collection of articles sent from Yedo to the Paris Exhibition. The *Azof*, one of the P. and O. Company's steamers, was chartered some time back, as we mentioned at the time, for the purpose of carrying these goods to Suez, where they will be received and forwarded on to France. She will sail to-day or to-morrow. The curios, &c., are spoken of by the very few who have seen them in most extravagant terms of praise, and some idea of the extent of the collection may be gathered from the fact that it takes up 500 tons of the *Azof's* capacity. The ship is expected to make the trip to Suez, touching, of course, for coal, &c., at several ports on her way, in 35 days, and, putting the charter out of the question —a fair and not excessive one—the *Azof's* voyage will be very useful to the Company as an experiment, which we ourselves shall watch with much interest.

Many Japanese of high rank have left or are leaving this country for the purpose of being present at the French Exhibition. We have mentioned the departure of Satsuma's brothers and suite from Nagasaki, and almost every mail now carries away Japanese passengers. A large number of young gentlemen have been sent to Europe for education, and the very best results are to be anticipated from the evidently strong desire manifested amongst the upper classes of Japanese to see for themselves the nations of the West. Nor are their efforts at self improvement confined to foreign travel. A school under French direction has been for some time established at Benten, near the residence of H. E. the French Minister, and we are now able to announce that a school and college on the English system will shortly be opened here under the direction of an English principal; orders were sent home by the mail before last for the necessary books. By the *Alphee* arrived a number of French officers, commissioned and non-commissioned —all men carefully picked for the service—whose mission, though of perhaps not so useful a character to the people, will, when fulfilled, materially strengthen the power of the Shiogoon's Government. They have been engaged as drill instructors to the Yedo army, which will be trained, clothed, and armed on the French model. Already a striking alteration is to be observed in the dress of the native officials, who, as may be imagined look particularly absurd and far more like monkeys than men in European trousers dreadfully ill made, enormous boots, which the old habit of dragging the sandal quite unfits them to wear, and black coats overladen with silver lace and split up the back, to allow the long swords to stick out and stand for the tails of the animals to which we have irreverently compared them. But, though a violation of all æsthetic propriety, the change in dress is, after all, evidence of a striving upward after what they deem a higher and better state than their own; and when they can be induced to drop the murderous sabre of semi-barbarism, in favour of the humble walking stick of common life, we shall be delighted to put up with the offence to our taste of the ugliness of their dress—for the sake of their moral and political improvement.

The *Japan Times* notices the arrival of Dr. Macgowan in Yokohama, and says, "It would be very well worth while for the Yedo Government to ask Dr. Macgowan to construct a line for them between Yokohama and the capital. The Gorojiu have often complained of the expense to which they are put by the necessity of keeping up the large corps of mounted guards and couriers which are constantly passing and repassing along the Tokaido. Indeed, it is not long since they showed themselves ready to pay as much as $30,000 for a little steamer, sold afterwards to Chosiu for $45,000—which they proposed maintaining solely to take the Ministers to and from Yedo and Yokohama. A wire would save them many a *cobang* and the foreign plenipotentiaries and their suites many a weary mile's ride. The Governments of Japan are, each in its own district, so strong and so well obeyed by the people that there need be no apprehension of wilful damage to the communication—the great impediment hitherto met with in the East to the extension of the telegraph. Dr. Macgowan has the reputation of being an active-minded and energetic man, and it is more than probable that one of the onward steps to be chronicled at the end of 1867 will be the introduction into this part of Japan of —the lightning letter writer."

A very important case arising out of the late fire has been decided in H.B.M.'s Court by the Consul, Mr. Myburgh, assisted by Messrs. W. G. Aspinall and W. Marshall as assessors. In it the plaintiffs, Messrs. Bavier and Co., sued the defendants, Messrs. Hooper and Clarke, for $10,509.25, the value of waste silk and cocoons, press-packed by the latter for the former, and burnt in defendants' godowns on the 26th November, 1866. According to the plaintiff's evidence, they believed the goods to be insured on the statement of Mr. Clarke to them that they were so, and that the price they paid, $2 per bale, included every charge, including insurance. After the fire the plaintiffs sent in their claim, when Mr. Clarke replied "that he was not responsible for loose bales, but only for pressed bales." To this he was told that all their bales were pressed, when he answered—"Well, then, it is all right, I am under-covered, and I shall have to pay you out of my own pocket. It's all right—you are insured." The next day Mr. Clarke met Mr. Bavier and told him that at the time he spoke to him before he had not looked at his books, but he had since done so, and he found he was not liable for these bales as no insurance had been charged for. Messrs. Bavier and Co. had the silk and cocoons insured in their own godowns for $15,000, and would not have allowed them to remain in the defendants' godowns a single night after they were packed had they not relied on their being insured by Messrs. Hooper and Clarke. The defence was that Messrs. Bavier and Abegg, both being foreigners, did not understand what Mr. Clarke had said; which was—"I do not remember an engagement of that kind, but I do remember telling you on one occasion that I would let some goods lie in the godown, and as I was then fully covered I would protect you." The goods thus allowed to remain protected by insurance had already been shipped, and the bales for which the claim was made were not covered, no charge having been made for insurance. Judgment was given for the defendants; plaintiff to pay costs.

NAGASAKI.

A letter from this port, dated January 1, conveys the following interesting items :—

A few days ago, to the astonishment of all—foreigners at least—the *Otentosama* (belonging to Chosiu, and very actively engaged in the recent hostilities in the neighbourhood of Simonoseki) made her appearance in our harbour. She came in flying Satsuma's flag. She has since left for Kagosima, and I have ascertained that she has on board ambassadors from Chosiu to Satsuma, whose mission is to thank the latter prince for the very useful moral, and indeed material, assistance afforded by him to the patriot chief of Nagato, and to cement still more firmly the friendly relations which have for so long existed between the two Daimios. The fact of the *Otentosama* being able to venture into a Government port under the Satsuma flag, remain there unmolested, and depart without hindrance, is an undeniable proof of the influence which that great prince must have with the Shiogoon's Government, or of the awe with which his power is regarded by the officials of his so-called Majesty; who, rather than run the risk of embroiling their master with him, are perfectly willing to ignore the presence in this port of a "rebel" steamer flying his colours. I have the best authority for stating that this is the reason why the *Otentosama* enjoyed this impunity, and you will, I should think, regard the fact as one not without weighty meaning. Several other Japanese princes have sent messages of congratulation to Chosiu on the successful issue of the war sustained by him against the Shiogoon, whom they look upon as the common foe of themselves, the Mikado, and progress in this country. I have recently learnt also that Chosiu has demanded a heavy indemnity for the expenses of the war, thus taking a leaf out of the book of his own old foes, and adopting into his own vernacular the classical proverb "Fas est ab hoste doceri." To enforce payment of this, he has marched a large body of troops into the Kokura territory. If the indemnity demanded be paid, I understand that Chosiu is willing to restore to the Prince of Kokura all, or the greater part, of his territory which he at present occupies; but should the Shiogoon's Government reject his demands, he is prepared to exact it *vi et armis* on the lands he now holds. The gunboat *Slaney* witnessed the transmission of troops to the Kokura side for this purpose. Considerable bodies of men were observed, whose manœuvres were plainly visible from the deck of the vessel. The dress, accoutrements, and arms of the men appeared to be mostly of European make and fashion.

Messrs. Glover and Co. gave a great ball on 31st December, which went off very successfully. Dancing was kept up with great spirit until three o'clock the following morning.

Messrs. Glover and Co. announce the admission of Mr. Ryle Holme as a partner from the 1st January.

CHINA.

SHANGHAI.

The new publication, entitled the *Supreme Court and Consular Gazette*, has reached its third issue, and appears admirably calculated to answer the purposes for which it is intended. Besides a full record of all legal proceedings, criminal and police reports, bankruptcy cases, and so forth, these three numbers contain original articles on the Law of Bankruptcy, the Mixed Court, the new system of Consular Registration, and other interesting subjects. There are also legal "Notes and Queries," a record of general weekly news, a commercial summary, and a record of all changes in firms, &c. The new publication promises to become useful and necessary, without trenching on the province of the local press generally.

SHANGHAI—PAST AND PRESENT.

We have before us a Hong list for 1852 and a Hong list for 1867; the one containing only forty names of foreign houses, the other more than 300; the one issued when the only Chinese residents were the few who had not yet been disturbed in possession of their original tenements, the other when the native population within the English settlement alone numbers about 70,000. It must be strange to the few old residents who can remember these primeval days, to compare the two, and to note the changes that have taken place, to recall Toong-foo as "The Commercial House," and the old Bank of India as "Victoria Hotel;" when Hong Kong-street was occupied by native docks, and the Maloo not yet dreamed of; when the old racecourse was still the scene of exciting struggles, and the banks of the Yang-king-pan were a mere suburb of the native city. For there are still some left in the settlement who can remember the pulling down of the old E-wo op the New Year's eve of 1852-53, and the bonfires on the bund with which the residents in those days were wont to celebrate the festival; when Kun-ping was ruled by Sykes, Schwabe, and the *North China Herald* shone in solitary splendour under the management of H. Shearman; when the men who have given their names to firms were active partners, and many of their successors were still assistants in the hong; when Sir Rutherford Alcock was Consul, and the Supreme Court had not entered into the imagination of the wildest dreamer; when medical practitioners were but three, and lawyers had not yet set foot on the soil. The Fives' Court stood alone in those days, unencumbered by China houses and unrivalled even by the Racquet Court. One of Messrs. Olyphant's godowns was habitually used as a theatre, and the site of the Club had not yet been purchased from its native owners. Jarvie, Thorburn's and Fletcher's were not established in 1852; while Lindsay's and Blenkin, Rawson's were in high esteem. W. R. Adamson had not yet aspired to the dignity of a firm, and shared with W. Broughall the silk inspection of the port. The Oriental was the only bank, and J. Wright was a cabinet-maker.

From a small foreign settlement, Shanghai has since then grown to be a great commercial emporium. Business has greatly altered, but it has also wonderfully increased. The commerce of the Yang-tze of the North and of Japan has since come to swell its trade, and foreign steamers by dozens ply to and from it on the coast of Yang-tze. Three mails instead of one disturb the tranquility of its merchants, and telegrams *via* Kiachta anticipate by a month the news which the P. and O. were formerly the first to bring. Yet in the face of this enormous development of trade and communication, the growl is uttered that Shanghai has run its course, and that the days of profitable business have departed. Those who say so can hardly have looked back to its early days, or must entertain an opinion little flattering to foreign, as compared with native, enterprise. Doubtless, fortunes are not to be made with the ease now that they were in 1852, because, though business has largely increased, there are hundreds more to share it. But those who remember the fate of other new ports which, from exceptional causes, have risen to a sudden and unexpected pitch of prosperity, will hardly condemn the prospects of Shanghai because it has undergone a reaction from the piping days of 1862-3 and '64. Many have succumbed in the struggle, and many others have been sorely tried. But those who remain will hardly let a trade of £30,000,000 annually slip through their hands without culling some of the profits involved.

The *Recorder* of the 19th Jan. says:—"At Messrs. Cowie and Co.'s auction yesterday the house and land, about 4 mow, belonging the late Mr. J. P. Dore, R.N., were sold for tls. 605. The lot bounded on the east by Mr. Birt's bungalow, and measuring 21 mow, fetched tls. 360; and the half interest of a plot of land situated on the Stone Bridge-road, measuring 35 mow, for tls. 160. The enormous decline in the value of land, &c., is indicated by the fact that the property of J. P. Dore, Esq., was formerly leased at £500 per annum. The lot of land next to Birt's bungalow was sold actually for about one-third of the value of average land for the purposes of agriculture. From such a state of things as this we may surely hope for a reaction before long, as it is clear landed property cannot for any time keep below the value at which it will pay to plough it up without attracting capital for its purchase."

HANKOW.

The following is from the *Hankow Times*:—

Great astonishment was not unnaturally excited not only in China but also in England at the ridiculously high prices which were paid at the various ports for fine and finest teas at the commencement of the season. The result of the investments, if we may judge by what we hear respecting most of those realised from the early arrivals from Hankow, must be disastrous in the extreme; and it is a matter of interest to investigate at whose instigation, in some measure, these losses have come to be incurred. The export for China for season 1865-6 was moderate, and less than the estimated deliveries; at the same time, handsome profits had resulted from the early shipments. For these reasons, we presume, operators in China were sanguine as to a very high range of prices ruling this season in the London market. In course of time, however, it was seen that a considerable quantity of fine tea was still in the dealers' hands, they being unable to quit them except at a considerable discount. Their realisation became compulsory when advices were received in England of very heavy shipments of new season's teas being hurried forward, and thus large sales without reserve were resorted to, which weakened and considerably lowered the value of all higher classes. The true position of the market must have been apparent to all who were in any way acquainted with these facts, and from the experience of former seasons it would have required but little foresight to predict that, if fine teas of the old season were forced off in any quantity just before the arrival of the new crop, they would meet with a very cool reception and at very poor prices. Notwithstanding this, however, we find the London brokers advising their friends in the most extravagant strain as to the prospects. As a specimen, we give the following, received in China in May last, as the opinion of one of the first brokers in London, respecting the "Expected prices before the 31st December, 1866:"—

Extra fine Oopacks and Monings	2-8 10
Two or three crack chops may bring up to	3
Usual first-class and finest	2-4 7
Usual second-class fine and finest	1-11 2.3

In contrast with which the sales have actually been 2 chops at 2-5, the finest at 2-1 to 2-4, and the class below at 1-10½ to 2, and a drooping market at these prices.

Whence arises this discrepancy? We do not pretend for one moment to justify buyers in China for paying prices higher on the average than ever realised in England in any previous season, but at the same time we feel certain that never were such extravagant anticipations conveyed to intending operators. It is a notorious fact that the opening of the market is rarely very much under the limits at which purchases are authorised, the Chinese holders being generally well aware as to what prices buyers can afford to pay, and combine to obtain as near to them as possible. This information is all the more easy to elicit when contracts are entered into, as it is deemed advisable, having once sent money into the country, to stretch a point to purchase rather than not invest at all; and when once armed with the power, the easy way in which the natives can play with the funds of others, and rival each other in paying high prices, can readily be imagined, as doubtless in many such cases a liberal discount is returned to the hong man. Those at home who would be inclined to rail at the recklessness and precipitancy of tea buyers in China should bear in mind that much of the mischief results from the prospects held out from England, and that at present they view the position of the tea market in quite a different light from that afforded to any one in China in May last; and the depression now existing in London has chiefly sprung from causes which have arisen in the meantime. A considerable quantity of fine old

Digitized by Google

season's tea was in the hands of the trade, the losses realised on which have very materially crippled their resources and necessarily increased their caution, in addition to which the tremendously heavy shipments sent from China from June to September must infallibly have inspired the London dealers with the most exaggerated estimate of the total supply of the season. We hope, however, that the lesson now being taught, though it may be severe, will work good for the future of the tea trade, and that the home advisers may inquire more carefully and accurately into the true state of matters before venturing to promulgate such sanguine and erroneous prospects as we have shown above.

HONG KONG.

The *Evening Mail* ceases on the 31st January, and the *China Mail* will be issued daily.

The following comments on the Mint are from the *Daily Press*:—By the mail which has just arrived we receive intelligence that £50,000 worth of silver has been purchased at home and forwarded on to this colony for the use of the Hong Kong Mint. From what we can ascertain, it appears that the silver has been forwarded to the Commissariat, with instructions that it shall be coined at the Mint. Under the present arrangements as to the amount of seignorage to be charged, the sum named will not give the Mint any great profit, only £500, but the act of the Home Government in sending the bullion forward may be taken as a favourable sign of its disposition to support the Mint. There is no doubt that if the Home Government perseveres in that policy it may throw a great deal of work into our hands, and do something towards establishing the trembling fortunes of the Mint on a secure basis. Already there are some signs of renewed activity at East Point. One of the banks has sent in a parcel of silver for coinage within the last few days, about $20,000 worth, and some silver has been received from Japan, silver which was partially melted during the late fire at Yokohama, and which is now sent as an experiment, to see how far it may be profitable to send down more.

A Court of Inquiry has been held on the loss of the *Corea*, reported in our previous issues. The finding of the court was as follows:—"(1) That the steam-vessel *Corea* left the port of Hong Kong on the 19th January, laden with a cargo of general merchandise, under the command of Henry Vernon Russell, bound on a voyage to Yokohama; (2) That the loss of the said vessel happened on the morning of the 20th January, by her striking on a rock off Flat Reef by Breaker Point; (3) That we fully believe in the existence of a rock not laid down in the charts, inside of which coasting steamers have been in the constant habit of passing; and (4) That under the circumstances, as appear by the evidence, we do not consider that any blame can be attached to the commander or any member of the crew of the steamer *Corea*, on account of the accident which befel that vessel and her consequent loss."

On the subject of railways in China the *Daily Press* says:—"We are given to understand that the Chinese Government has granted the Imperial sanction to the construction of a railway from Soochow to Shanghai. From what we learn it would seem that the present scheme has nothing to do with that project for a railway between Soochow and Shanghai which was laid before Sir MacDonald Stevenson's company by two English engineers a few months ago, but is altogether a French undertaking, the Imperial sanction having been obtained through the French legation. The smallest things in which the Chinese Government and the foreign diplomatists are concerned is always shrouded in a haze of mystery; and it is not surprising, therefore, that the commencement of so important an era in the history of European relations with this country as the introduction of railways should be enveloped with all the secrecy and elaborate solemnity which is compatible with the circumstances."

An important transfer of steamers has lately been made at Shanghai, Messrs. Dent and Co. having sold to the Shanghai Steam Navigation Company their two splendid vessels, the *Fusiyama* and the *Hirado*, together with the wharves and godowns at Shanghai used in conducting the traffic of the Yangtze. The same company has purchased Messrs. Jardine's interest in a new steamer launched for them in the Clyde, and now coming out, and will in this way command the navigation of the river; but the sale by Messrs. Dent and Co. has been made conditionally on an undertaking by the company not to charge more than a certain rate of freight.

The steamer *Colorado*, the pioneer of the Pacific Mail Steamship Company's fleet, reached Hong Hong from San Francisco *via* Yokohama on the 31st January, with freight and passengers and with telegrams from England to December 30, and from New York to the 29th. The *Colorado* was saluted on entering the harbour by the U.S.S. *Hartford* and by other ships.

The following is the purser's report:—

The P.M.S.S. Co.'s steamship *Colorado*, Geo. H. Bradbury, commander, sailed from San Francisco, January 1st (or January 2nd, Hong Kong time), with passengers, mails, merchandise, and treasure for Yokohama and Hong Kong. During the greater part of passage she experienced head winds and heavy weather between San Francisco and Yokohama, at which port she arrived January 24th, having made the passage in 22 days, and steamed 5,250 miles without once stopping the engine. At Yokohama received on board passengers, merchandise and treasure for Hong Kong, and sailed at noon of the 25th instant, arriving at Hong Kong January 31st. She had 42 passengers for Yokohama. The following is a list of the *Colorado's* passengers for Hong Kong:—

Orator H. Gardner, Samuel Hort, Capt. John Eldridge, R. F. Strickland, Chalmers Scott, F. K. Dumaresq and wife, Mrs. S. K. Richardson, E. W. Stevens, A. L. Phelps, Capt. S. L. Phelps, wife, daughter, governess and servant, Jas. Otis, wife, three children and servant, E. H. Greenleaf, E. McLaugalin, A. Weillar. Tun-man, Ching-chou, Ching-lan, and 191 in the steerage.

The Hon. W. H. Rennie has been appointed acting police magistrate, in place of F. W. Mitchell, Esq., during the absence of the latter gentleman on an official tour of inspection through the northern points.

The following mercantile changes have been noted:—

W. Pustau and Co.—Mr. W. S. van Reeseema's interest ceased Dec. 31, 1866. Mr. Theodor Probst admitted from Jan. 1, 1867. Mr. O. C. Behn and Mr. J. F. Cordes sign.

Turner and Co.—Hinton Daniell Stewart's interest ceased December 31, 1866.

Reid and Co.—John George Dunn's interest ceased December 31, 1866.

W. Watson.—Style W. Watson and Co. from January 1, 1867. Edward Byrne signs.

Shaw Brothers.—Alfred Adolphus Krauss admitted January 1, 1867.

(FROM A CORRESPONDENT.)

JANUARY 31, 1867.

The approach of the Chinese holidays—we are within five days of China New Year—has paralysed all business operations of the more important descriptions, and in the political world there is likewise nothing stirring to relate. A month's trial of the Ordinances introduced for the better government of the colony has shown their highly beneficial tendency in the way of promoting control over the native population both ashore and afloat, and the most persistent opponents of Sir Richard MacDonnell's policy, as, for instance, the *Daily Press* newspaper, have been constrained to confess that the ordinances providing registration of all Chinese ashore and supervision over all junks in harbour have been brought smoothly into operation and have produced good results.

The New Year's holiday time is to be utilised by the two most prominent public companies here for the purpose of holding general meetings. The Hong Kong and Shanghai Banking Corporation will, it is understood, declare a dividend of $7½ per share ($125 paid up) for the half year, or at the rate of 12 per cent. per annum, a most favourable prospect for the investors in this well-managed concern; but in the case of the Hong Kong and Canton Steamship Company there can be no prospect of any dividend to shareholders for some time to come, in view of the heavy preliminary expenses to be wiped off, and the large amount of capital locked up in unproductive steamers.

Another steamship company, viz., that established at Shanghai under the title of "the Shanghai Steam Navigation Company," and which was constituted in 1862 through the transfer of Messrs. Russell and Co.'s direct interest in their river steamers plying on the Yang-tze, has, according to the latest accounts, taken over the two steamers hitherto owned by Messrs. Dent and Co., and running in competition with the company's vessels. The latter have now the monopoly of the river traffic, and it may be presumed that this circumstance will put the directors in the pleasurable position of declaring one of these days a dividend for the first time since the formation of the company. The same corporation has also purchased for about $530,000 all the property owned by Messrs. Dent and Company at Shanghai, with the exception of the land on which their business premises stand. The tracts of land they have now parted with measure I believe some fifteen acres in extent, and were purchased at fabulous prices in 1861-2-3, with the view of deriving immense future profit from their position on the water

Digitized by Google

frontage. Mr. Edward Webb, who was until 1864 the managing partner in Dent and Co. at Shanghai, is expected shortly to return to China in connection with the house of Birley and Co.

By the French mail which left this a day or two ago three Chinese females went on their way to Paris, to form part of the "curios" to be exhibited at the coming Exposition, but they were not, as is erroneously stated in the local newspapers, singing women or actresses, though doubtless French ingenuity will cause their ultimate development into imposing characters of some description, most probably Mandarins' wives. They are most commonplace persons in reality, one being a domestic servant in a foreign household at Canton, the other a gardener's wife, and the third possibly no better. Unlike the Japanese, the Chinese, both merchants and officials, have declined to take any interest in the Exposition, and I have not heard of a single article being despatched, with the exception of those purchased by the French agent, M. de Meritens, who was allowed 200,000 francs for this purpose. On the other hand, the more enterprising Government of Japan has despatched a large assortment of native productions and manufactures.

A scandalous transaction has recently taken place at Amoy. Some U.S. citizens of that energetic class from which so many promising specimens of the *genus* rowdy have been known in China having entered into arrangements with a barracoon keeper at Macao, proceeded some distance into the interior, kidnapped a couple of hundred villagers and boatmen, carried them by force to Amoy, and shipped them on board the French barque *La Vierge*, which at once put to sea without a Customs' clearance, and made sail for Macao. On the affair becoming known, one of the foreign Customs' employés at once proceeded to Macao, bearing despatches from the Chinese authorities, demanding the rendition of the kidnapped Coolies; but Governor Horta's past actions do not encourage a very lively hope of this being promptly acceded to. This desperate action on the part of the coolie-agents is properly due to the difficulty which prevails in obtaining recruits for the barracoons, owing in a great measure to the increased vigilance of the Chinese officials near Macao.

COCHIN CHINA.

SAIGON.

From this port two incidents are reported that show the absolute necessity that now exists for the establishment of an English Consulate without delay. The first is the loss of the British barque *Wallaroo*, of 611 tons, in the river. Although she had a full cargo, which was insured for £29,000, no Court of Inquiry could be held on the spot, owing to there being no Consul. No lives were lost, and the crew were taken on to Singapore in H.M.S. *Pearl*.

The other case is one of some commercial interest. An action was brought before the *Tribunal de Commerce* to recover payment of a promissory note for over £9,000; and although the defendant admitted his signature, the claim was dismissed *because the body of the note, as well as the signature*, was not in his handwriting! This is strong confirmation of the remarks made in our last issue on the utter uselessness of this tribunal as a court of justice, and the urgent necessity for affording adequate protection to British interests.

SIAM.

BANGKOK.

The *Bangkok Recorder* states that M. Aubaret has commenced an action for libel against the publisher of that paper, for having given circulation to certain comments on his conduct towards the King of Siam. The following is the paragraph announcing the action:—

"We regard it our duty to inform the public that the editor and proprietor of the *Bangkok Recorder* has been sued by M. Aubaret, the French Consul, on the plea of damages for libel; that both plaintiff and defendant appeared at Court before J. M. Hood, Esq., United States Consul, on the 3rd inst.; and that the trial of the case was then postponed to the 21st inst., at ten o'clock A.M. Plaintiff grounds his charge on that part of our report where we say the French Consul spoke disparagingly of his Excellency the Prime Minister, and was said to have proposed to nominate another man as his successor."

The following letter has been sent by the editor to M. Aubaret, apparently as an apology:—

"Sir,—I pray that you will allow me through J. M. Hood, Esq., U.S. Consul, to come in this way before you for the purpose of offering some explanation, and proposing some amicable settlement of the affair in which you feel that I have aggrieved you. After further and careful inquiry I am now inclined to think that the reports which I made in the *Bangkok Recorder* of the 20th ult. were based on some misunderstanding of the true sense of that part of your conversation with his Majesty the King of Siam relating to H.E. the Prime Minister.

"The Siamese Government affirms that there was a great mistake made in this matter, and there seems to be collateral evidence that what it affirms in regard to that point is true—to wit—that you did not demand or even request that H.E. should be removed from his place as Premier, but only that he should be removed from his post as Chief Commissioner in reference to the Cambodian Treaty.

"For any expressions in the article with which you feel aggrieved, and which may not be true, and in regard to which I have been misinformed, I am willing to make all reasonable apologies and corrections.

"Allow me to declare unto you that my only object in writing that article was to perform faithfully what I regarded my duty as a public recorder."—Yours respectfully,

"Bangkok, Jan. 2nd, 1867." D. B. BRADLEY.

STRAITS OF MALACCA.

SINGAPORE.

From this port our advices are to the 7th February (three days later than by the French mail delivered on the 6th instant). No later English mails had arrived out in the interval.

The chief subject of interest is the *Erin* barratry case, the decision in which has already been briefly announced by telegraph. It will be remembered that the *Erin* foundered at sea eleven days after leaving Bangkok. At a Court of Inquiry held by the British Consul there, some suspicious circumstances were elicited, and the master and mate were sent to Singapore to be tried for wilfully casting away the ship. In the meantime some evidence transpired implicating Mr. Scott, whose firm had effected several heavy insurances on the cargo. It was discovered, in fact, that the quantity of cargo was largely overstated, and its value exaggerated, and these facts not being satisfactorily explained, Mr. Scott was included in the indictment. The trial began on the 23rd January, but after proceeding three days the jury had to be discharged in consequence of some irregularities. The case was begun *de novo* on the 29th, and concluded on the 2nd instant. All the prisoners were found guilty, and sentenced to penal servitude, Mr. Scott and the master for life, and the mate for ten years. Mr. Scott, whose firm had always been esteemed a respectable one, was the subject of great commiseration.

PENANG.

Dates from this port are to the 9th February. We take the following items from the *Penang Gazette*:—

"Sir William Hackett, the new Recorder, and Lady Hackett, arrived on the 21st January last in the P. and O. steamer *Behar*. At twelve o'clock on the same day he went into court and took the usual oaths of office and allegiance, which were administered to him by the Resident Councillor in the presence of the members of the bar, the magistrate, coroner, and other officials, after which these were invited to the Judge's chambers and introduced to Sir William by the Resident Councillor.

His Excellency Sir Gaspard le Marchant, Commander-in-Chief of the Madras Army, and Staff arrived here from Burmah in the steamer *Cheduba*, on a tour of inspection to the Straits. His Excellency, after holding a review of the troops at the lines, departed the same evening for Malacca and Singapore. We understand his Excellency will probably, should there be time, visit Java previous to his return.

We understand that the Government of India have instructed the local Government of British Burmah to adopt measures for obtaining an accurate survey for a line of railway, to pass from the port of Rangoon through Pegu territory to the Burmese boundary, and thence onward by the most practicable route to reach Western China. The survey is to commence from Rangoon in the direction of the old city of Pegu, thence onward to the east side of the Sittang river, and follow any practicable course between the Sittang and Salwan rivers towards the northern boundary, where it would terminate for this year, and be continued at the next cold season into Burmese territory. Maulmain and Martaban have been brought into telegraphic communication

LATEST TELEGRAMS.

With the exception of the following brief commercial telegram we have no telegraphic advices in advance of the next inward mail, except those published in our last issue. The morning papers of the 12th inst. published a telegram dated Hong Kong, February 1, but full details of all the items it contained had been already given in our issue of the 6th.

CHINA. HONG KONG, Feb. 15.

Total export of tea to date, 109,125,000 lbs.

SHANGHAI, Feb. 7.

Total export of silk to date, 35,750 bales.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

ANNESLEY—On the 19th Feb., at Farringdon, Alton, the wife of Francis Charles Annesley, Esq., 28th Regt., of a daughter.

BENNETT—On the 22nd Jan., at Singapore, the wife of John Bennett, Esq., of a son.

LOCOCK—On the 5th March, at 9, Cambridge-square, the wife of Charles Brodie Locock, Esq., barrister-at-law, of a daughter.

MACDONALD—On the 20th Jan., at Singapore, the wife of W. Macdonald, Esq., of a daughter.

MAITLAND—On the 31st Dec., at Shanghai, Mrs. John Andrew Maitland, of a son.

DEATHS.

DEWSON—On the 25th Jan., on board H.M.S. Melville, William Dewson, wardroom-servant, H.M.S. Osprey, aged 24 years.

HALKET—On the 8th March, at Newcastle-on-Tyne, Mary Rose, eldest child of Richard Webb Halkett, Esq., of Hankow, China, aged 3¼ years.

HOUGHTON—On the 14th March, after a short illness, at his residence, 33, Gordon-square, Henry James Houghton, Esq., aged 46, deeply lamented.

MCKENZIE—On the 12th Jan., at the Government Civil Hospital, Hong Kong, John McKenzie, police-constable, aged 30 years.

NELSON—On the 29th Jan., at the Government Civil Hospital, Hong Kong, William Nelson, police-constable.

TEMPLAR—On the 27th Jan., at the Hotel Francais, Hong Kong, Arsese Templar, chemist, late of Shanghai.

THOMPSON—On the 25th Jan., on board the U.S.S. Hartford, Joseph Thompson, seaman

COMMERCIAL REPORT.

CHINA EXPORTS.

CANTON.—TEA.—The market remained perfectly quiet until within the last few days, when an unexpected settlement of the two best chops Congou was effected at the extreme price of taels 30 per picul. The chops settled are "Oan Thie," and "Tan Qui," for which holders some ten days since were anxious to accept considerably lower rates; the present settling prices bring the market up again to the highest point it attained throughout the past season, at which it closes for outgoing mail; holders naturally at once becoming again very firm, and thus entirely precluding most intending buyers from entertaining any ideas of operating.

AMOY.—The remaining stocks in the market, amounting in all to about 5,000 packages Oolong and 200 packages Congou, have been settled during the past fortnight at about previous rates, and this season is therefore closed.

FOOCHOW.—Congou: A large business has been done for England, Australia, America, and the Commissariat of India, and the stock is now reduced within very narrow limits. A purchase (on the 8th January) of 8,000 chests was made half a tael cheaper than prices current before the departure of last mail. Since then prices for all grades have steadily advanced, and a rise of 1½ to 2 taels is quoted. Oolong: The market has been cleared of these for America. The settlements reported include 83,328 chests, 19,854 half-chests, and 2,746 boxes of Congou at taels 6 to 24, say 1,209 chests, and 3,242 half-chests, at taels 6 to 12 for dust and broken leaf, 10,494 chests, 4,059 half-chests, and 1,746 boxes, at taels 12 to 15 for common to good common, 21,625 chests, 12,552 half-chests, and 1,000 boxes, at taels 14 to 24 for flavory to good flavory. Souchong: Fair to good, 2,620 chests at taels 16 to 25.5. Oolong: Inferior, 1,190 half-chests at taels 12.5 to 15. Common to fair cargo, 20,000 chests at taels 15.5 to 19. Scented: Common to fair, 946 boxes at taels 16 to 20.

SHANGHAI.—Black Tea has continued to decline, and a further concession on the part of holders has only resulted in the settlement of about 3,000 chests. The rates paid for these, though averaging one tael per picul less than in the previous fortnight, are stillnearly 1d. per lb. above the latest London values. Arrivals have been few, and the stock is now reduced to 14,000 chests of all descriptions.

HANKOW.—2,000 chests Congou had been settled, at 12.2.5 taels to 13.7.5 for common Oonams and 16 to 16.2.5 taels for common to fair Oopacks, prices which show no decline on the rates previously paid. One chop of 650 chests had been shipped to Shanghai. 2,700 chests remained in stock.

KIUKIANG.—There has been no business done either in Black or Green Teas, the increase in the export being due to shipments on native account. There were still about 15,000 packages Green Tea to come from the country.

YOKOHAMA.—There has been very small business in the tea market since the date of the last report, viz., 29th December. The teamen have given way considerably in their demands, showing a decline in rates of $2 to 3 per picul in some instances, and they are very eager to dispose of their stocks prior to the New Year holidays. Quotations as given below must be considered quite nominal. Settlements are estimated at about 1,500 piculs. Quotations and stocks stand as follows:—Good common, $15 to 22; stock, 1,000 piculs. Medium, $23 to 28; stock, 2,000 piculs. Good medium, $29 to 32; stock, 2,000 piculs. Fine, $33 to 36; stock, 1,000 piculs. Finest, $37 to 43; stock, 400 piculs.

RAW SILK.—CANTON.—Transactions towards the latter part of the fortnight have been large as regards Tsatlee Reel. During the early part of the fortuight arrivals were gradually taking place, and rates were becoming somewhat easier, when a buyer entered the market and prices became firmer. Settlements for the fortnight and stocks are as follows:—Tsatlee No. 1 412 bales, $590; Loong-kong, No. 1, 40 bales, $570; Kowkong, 30 pcls., $510; Lacklow and Cumchuck, no sales, $550; Seulam, do., $420; Re-reeled Cumchuck, 200 boxes, $620; Punjum, 200 pcls., $150; Pierced Cocoons, 20 pcls., $95; Waste Silk, 50 bales, $75.

SHANGHAI.—Settlements of China Silk are estimated at about 900 bales for the past fortnight, about 100 bales of which went forward by the last English mail after the statistics relating to this port in the last issue were made up. Transactions have been chiefly in barter against imports, so that the prices paid have been naturally irregular. Good chop Silk still maintains its price, a few bales of best No. 3 Tsatlee having been taken for America at taels 570 to 580. It is generally believed that but little more Silk will be brought down to this market after the Chinese New Year.

YOKOHAMA.—Prices having further receded in consequence of the paucity of purchases during the earlier part of the fortnight, an active business sprang up, which was rather encouraged by the intelligence brought by the mail of the 10th November, but again checked by that of the 19th November, which arrived on the 13th instant. As the native dealers on the approach of the Japanese new year are generally eager to dispose of their stock, it is expected that under the depressing influence of the last news from Europe prices will further go down. Arrivals during the fortnight have been on a very reduced scale; they brought a few parcels of hank silk of good quality, but none of the finer sizes, and the unsold stock is now under 600 piculs. Owing to the enormous quantity of silks rejected after inspection its general quality is poorer than ever.

DRUGS, &c.—CANTON.—Cassia Lignea very scarce, and a small arrival of 200 piculs was sold immediately placed at $19-30. Inquiry continues, but there is no stock left. Cassia Buds, offered at reduced terms; say at $40, but no disposition exists to purchase stock 100 piculs. Cassia Oil, 6 piculs offering at $185. China Galls, quiet at $13-50, with 60 piculs on the market. China root, $3-50. Galangal, $1-80, neglected; supplies amount to 300 piculs. Vermillion, somewhat easier at $39 per box of 50 catties for present quality. Rhubarb in low quantities remains on offer, but no transactions have occurred.

CHINA GRASS.—SHANGHAI.—Stock, 3,000 to 4,000 bundles. No. 1, none, Tls. 16.5, nominal; No. 2, Tls. 14 to 15.5; No. 3, Tls. 13.5 to 14; Green, Tls. 11. Business continues confined to Chinese, as these prices are considerably above the parity of London quotations.

CHINA AND JAPAN IMPORTS.

The usual depressing effect of the approaching China New Year has been felt, in some of them to a greater extent even than usual, and the operations of the fortnight have been devoid of any general characteristics.

COALS.—HONG KONG.—The coal arrivals during the fortnight comprise 1,568 tons Welsh, 1,250 tons Australian, and 1,300 tons patent fuel. Of this quantity none came in the market except 850 tons of Australian, the remainder being for consumers. The market is firm, English may be quoted at $13-50; Welsh, $14; Australian, 8½ to $9.

SHANGHAI.—The market is firm. The only sales effected have been small parcels from godown at higher rates, viz.:—English Steam Coal, Tls. 12.5.0; Australian, Tls. 9.5.0 to 10.0.0; American Anthracite, Tls. 12.0.0; Japan, Tls. 6.5.0 per ton. Of Cardiff and North Wales Coal none on the market for sale. Arrivals since the 7th inst. were 1,212 tons from Great Britain, 900 tons from Australia, and 200 tons from Japan,—in all, 2,310 tons. The quotations are:—English, Tls. 12.0.0 to 12.2.5 per ton; Cardiff, Tls. 13.0.0 per ton; Welsh, Tls. 12.0.0 per ton; American Anthracite, Tls. 11.5.0 to 12.0.0 per ton; Sydney, Tls. 9.0.0 to 9.5.0 per ton; Japan, Tls. 6.0.0 to 8.0.0 per ton; Formosa, Tls. 5.0.0 to 6.0.0 per ton.

YOKOHAMA.—The import market has remained in the dullest possible state. At this time of the year there is never much demand, as the native merchants are mostly employed in settling up their accounts; in spite of this, however, goods have in past years generally been saleable at a slight concession in price, and for delivery after the Japanese New Year. This year, however, an entire absence of demand for the chief staples appears to be the feature in the import market, and prices for nearly everything must be considered nominal. No doubt the large importations of every description of goods from China has materially assisted the general dullness. Dyed Brocades and Spots, Turkey Red Plain and Figured are all lower, and very difficult of sale. Black Camlets from $28 have receded to $23. Black Velvets are saleable, but a few arrivals would soon weaken the market. Yarn 16-24 continues in demand, as there is little or none here. Metals are difficult of sale.

EXCHANGES ON LONDON.

At MANILA.—From Cadiz, Jan. 15, Emigrante; 19, Elena.

At SINGAPORE.—From Rotterdam, Feb. 6, Johannes Martinus; from Liverpool, Indiana (reported by telegram).

At PENANG.—From London, Feb. 2, Katinka; 3, Champion; from Newcastle, 4, Bertha.

DEPARTURES.

From SHANGHAI.—For New York, Jan. 23, Dunkeld.

From FOOCHOW.—For London, Jan. 10, Esperanza; 11. Charlotte, for Boston; 22, Lubra, for New York; 26, Robin Hood.

From AMOY.—For New York, Jan. 26, Lord Clyde, Japan.

From HONG KONG and CANTON.—For London, Jan. 25, Dilloussund; 23, Diamant, for New York.

From MACAO.—For Havana, Jan. 8, Confucius.

From MANILA.—For Cadiz, Jan. 18, Feliz; 11, Queen of the East, for New York.

From SINGAPORE.—For Falmouth, Feb. 1, William; 2, Stirlingshire, for Liverpool; 4, Helensbank, for London; Bravo, for New York.

From PENANG.—For London, Feb. 7, Amersham; 6, Achilles, (str.) for Liverpool.

At SINGAPORE.—Cleared for London, Agamemnon; Feb. 4, Helensbank, Gazelle; 6, Maude, for Boston.

VESSELS LOADING.

At YOKOHAMA.—For London, Carioca; for New York, Johanne Maria.

At SHANGHAI.—For London, Burmah, Peter Denny, John Bellamy, James Shephard; for New York, Crawshey Bailey, Endeavour, Horatio, Magellan.

At FOOCHOW.—For London, Bucton Castle, Tavistock, Red Riding Hood (all full); for New York, Tynedale (full).

At HONG KONG and CANTON.—For London, Sea Bird; for New York, Sea Serpent, Ariadne.

At MANILA.—For London, Canaan, San Fernando; for Cadiz, San Luis, Union; for Havana, Espana; for Barcelona, Nuevo Lantaro; for New York, Gamecock.

At SINGAPORE.—For London, Agamemnon, Sophie, Gena; for Liverpool, Roslin Castle; for Rotterdam, Bengal; for Bordeaux, Prefet Paul Feard; for Falmouth, Carlota Helena; for New York, John Norman.

At PENANG.—For London, Zanzibar; for Liverpool, Monteagle.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea, £2 10s. to £3 per ton; Silk, £4 to £4 10s.

At SHANGHAI.—Suitable vessels for coasting purposes are scarce, and rates have advanced; for London and New York tonnage is abundant, and rates remain at £1 15s. to £2 to United Kingdom, and to the latter port £2 per ton.

At FOOCHOW.—To London, £2 5s; to New York, £2 8s. per ton.

At HONG KONG and CANTON.—A better demand for tonnage exists for general charters, but in home charters direct the quotation is still £2 per ton, and to United States £1 15s. The circular of George Holmes gives the number of disengaged vessels in harbour at 25, representing 13,749 tons.

At MANILA.—The Canaan has been taken up for London at £2 5s. for 700 tons, current Sugar; and £3 per 20 cwt. for 300 tons Hemp. The San Fernandes (Spanish) also loads for the same port at £3 5s. for current Sugar, and £2 10s. Hemp.

At SINGAPORE.—A good demand has prevailed for vessels to load at the Burmah rice ports, which has caused more firmness in the freight market. Rates offered for rice charters: £2 17s. for vessels over 600 tons, and £3 for small ships. The Roslin Castle, loading for Liverpool and Glasgow, has obtained her dead weight at £1 15s., showing an advance of 5s.; light freight, which is scarce, is being taken at £2 per ton.

At PENANG.—There has been a better supply of tonnage, and the demand for the rice ports has led to a few transactions. The following charters have been effected:—The Ingeburg, 345 tons, from Rangoon, Akyab, Maulmain, or Bassein to United Kingdom or Continent at £2 15s., 30 lay days; the Cuba, 390 tons, from any Burmah ports to Falmouth for orders for United Kingdom or Continent at £3 per ton, 35 lay days.

To LONDON.—The Zanzibar is taking tin at £2 10s., and offering to take light cargo at £2.

MAIL COMMUNICATION WITH THE FAR EAST.

The following is the text of the memorial about to be sent to the Treasury on this subject, with the signatures at present attached to it:—

TO THE LORDS COMMISSIONERS OF HER MAJESTY'S TREASURY.

MY LORDS.—We, the undersigned merchants trading with China, Japan, Singapore, Penang, Siam, Borneo, Java, and Manila, observing that notice has been given to terminate the present mail contract with the Peninsular and Oriental Steam Navigation Company, and being deeply interested in the establishment of a more satisfactory system of mail communication with China and the above named places, respectfully urge the following facts on your lordships' consideration.

That under the system at present in force the homeward mails are retarded by unnecessary delays *en route*.

This is extremely prejudicial to the interests of those concerned in the trade, and that it is totally unnecessary is evidenced by the fact that the Messageries Imperiales steamers have during the past year brought the mails from Shanghai to Marseilles, on an average, in seven days' less time than the Peninsular and Oriental Company's.

The annexed table, published in the *London and China Telegraph* of 28th February, shows that during the year 1866 the average number of days taken to convey the mails from Shanghai to London was by the French Company, 44½ days, and by the English, 51½.

The homeward mails and passengers are often detained as much as four days at Galle, waiting for either the Calcutta or the Australian steamer. Again, it frequently happens that on the arrival of the mails at Alexandria there is no steamer in readiness to convey them to Marseilles, and a delay in Egypt on one occasion of five days, and on another of eight, has occurred during the present year.

We therefore suggest that the importance of the trade demands that the service should be worked from Hong Kong direct to Suez, calling at Singapore, Penang, Galle, and Aden, with a branch service between Hong Kong, Shanghai, and Yokohama, calling at the intermediate ports; and that a steamer should be in readiness at Alexandria to bring the mails on to Marseilles. The magnitude of the postal arrangements for India, China, Australia, &c., render it competent for the service to be divided into sections, inviting tenders for the whole, or for each portion separately.

Were these suggestions carried out, we are confident that the distance between Hong Kong and Marseilles might easily be performed in thirty-seven days. The last French mail left Hong Kong on the 28th January, and arrived at Marseilles at seven P.M. on the 4th March, thus occupying only thirty-five days.

A reference to the hand-book of the Peninsular and Oriental Company shows the respective distances to be as follows:—

	Miles.
Hong Kong to Galle	3,031
Galle to Suez	3,442
Alexandria to Marseilles	1,478
Giving	7,951 miles

as the total distance traversed by the steamers. This at an average of ten miles an hour would occupy thirty-three days, three hours, to which the following detentions *en route* have to be added:—At Singapore say twenty four hours, at Penang six hours of daylight, at Galle twelve hours, at Aden twelve hours, and the transit through Egypt eighteen hours; making a total of thirty-six days, three hours, or say thirty-seven days.

In this calculation Malta is omitted, as we consider it inconsistent that this port should be included in the scheme of mail communication with India and China *via* Marseilles, although it may be necessary as a coaling station for the Southampton line.

These facts demonstrate that taking the moderate speed of ten miles an hour as a basis, and adding in June, July, and August an additional four days as a fair allowance for the south-west Monsoon, the transit from Hong Kong to Marseilles need occupy no more than thirty-six to thirty-seven days during nine months of the year, and forty to forty-one days during the remaining three.—We have the honour to be, your Lordships' most obedient humble servants.

LONDON, FRIDAY, MARCH 15, 1867.

THE COMING TEA SEASON.

"IN TE(A) SPES EST"—once the hopeful motto of the "olfactory corps" in China—has now become obsolete, if indeed it be not entirely forgotten by the members of that important body. The remonstrances we have from time to time addressed to purchasers at Foochow and Hankow have been persistently and recklessly disregarded, with what fatal results the present state of the trade but too faithfully indicates; still, the time has now come when it appears to us a duty once more to raise a warning voice, hoping, almost against hope, that it may not pass unheeded on the eve of the campaign of 1867-68. As usual at this season, we hear of extensive credits being sent out to facilitate the purchase of new season's tea; and a little serious thought as to the mode in which these orders are given, the hands they are entrusted to, and the probable manner in which they will be carried out, can hardly, we believe, be considered unprofitable. First, then, as to the nature and extent of the orders. It has of late years become a practice, more and more extensively adopted, to send out to commission houses loose if not altogether open orders for tea. Now here is a thoroughly unsound principle to begin with. We have no wish to bear hardly upon commission houses—in which category, indeed, must be included many of the most respectable and highly esteemed firms in China,—yet we cannot blind ourselves to the fact that when a loosely worded order, or one conferring wide discretionary powers, is entrusted to a commission agent, there is a chance of such powers being strained to their utmost limits to admit of the prompt execution of the order to its fullest extent; while if a safe limit had been strictly enforced, the order would not perhaps have been executed at all. The latter cause might sometimes give rise to disappointment, but seldom to loss; the former can hardly fail to result in both.

We have next to consider the hands into which these orders fall at the tea-shipping ports. Many of them we fear are entrusted to tea-tasters of not very matured experience; men who, however competent they may be considered as judges of the article itself, have proved by their operations during the last two years their lamentable deficiency in the knowledge of how and when to buy it. The temptation to do an extensive business and to load many ships; the certainty of earning a commission without incurring any risk; and the ready facilities offered by competing banks, are all causes that militate against the exercise of that extreme caution that should be regarded as a *sine qua non* in those who are entrusted with the investment of large sums of money belonging to others. Add to these the excessive competition to secure the first and finest chops of the season, and we need be at no loss to discover how it is that the astute Chinese, quick to profit by the palpable eagerness of their victims, continue to enrich themselves at the expense of our merchants. One evil result of this excessive haste to ship, is that the grower is often so hurried in bringing forward his tea, as to place it on the market in anything but a fit state to stand the long sea voyage; in which case the out-turn must necessarily be unsatisfactory, however fine the original quality of the leaf. Eager buyers lay far too much stress on the reports conveyed in circulars of any slight improvement or actual advance in the home markets, and readily advance their offers in a like proportion, although ignorant of the cause and probable duration of the improvement; matters which should be attentively studied by a careful operator.

Of late it has become manifest that the operations even of the large China firms themselves have fared no better than the orders entrusted to commission houses and tea-tasters. Some of the causes of this are doubtless identical with those above enumerated; but in many cases it is in a certain degree owing to the prevalent custom of the firm taking all responsibility off the hands of the tea buyer, by giving positive instructions what to buy and when to buy it; instead of leaving those points to the buyer himself, who has, or ought to have, a thorough knowledge of his business from long experience in the home markets, and who, moreover, in *this* case, has or should have no personal interest in premature or too extensive operations. His orders should be "buy us tea to a certain extent, if you can do so to pay a profit; but not otherwise." And by that test he should stand or fall. A repetition this season of last year's scale of prices must inevitably bring with it a recurrence of last year's losses. Hoping, as we have already said, almost against hope, that such another sad chapter in the history of the China trade may yet be averted, we present these remarks for the consideration of those interested in it. It may be said that none of our arguments are new; that they have all been brought forward over and over again. So much the worse, then, for those who read, and yet ignore them; who hear, but will not heed. Hitherto all words of caution from this side have been treated with contempt by those to whom they were addressed; and we have seen the result in a long list of failures, and in old and honoured firms, whose very names were once held as types of wealth and solvency, now tottering on the verge of bankruptcy. Let but the same reckless disregard be continued through another season, and the houses left standing will be few indeed.

THE DUTCH IN SUMATRA.

THE question of the Dutch aggressions in Sumatra has been mooted in the House of Commons by Mr. WHITE, who asked for papers, and received from Lord STANLEY a promise to produce any "that could be published without inconvenience to the public service." It is to be hoped that at least some may appear that will throw a little light on this much-vexed and long agitated question, the present aspect of which is far from satisfactory. The Dutch have seized all the ports from Assahan to Timor, which belong to the Sultan of Acheen, but which the Dutch claim as belonging to Siak. The Sultan of Acheen complains that he has received no answer to his letters to the Governor, calling on the British Government to mediate between him and the Dutch according to treaty; which communications are alleged to have been left unanswered for upwards of two years. This is certainly a matter demanding prompt investigation, and indicates that a new broom was required in the Straits Government.

THE STRAITS GOVERNMENT APPOINTMENTS.

IT was only natural that the superseded officials of the Straits Settlements should use their influence in the House of Commons to procure an explanation of the apparently uncourteous treatment they have been subjected to; and, as will be seen in our Parliamentary intelligence, a discussion has taken place regarding it. The explanation given, however, clearly shows that no slight was intended, and that in fact the SECRETARY FOR INDIA had in some degree gone out of his way to ascertain the course likely to be adopted by the Colonial-office, and to communicate the information thus obtained to the GOVERNOR-GENERAL of India. The delay was the unavoidable result of this circuitous course, rendered necessary by the Straits officials being under Indian jurisdiction, and is in itself an additional proof of the necessity of the change.

LAUNCH OF A STEAMER FOR RAJAH BROOKE.

On the 5th inst. Messrs. Blackwood and Gordon launched from their building yard at Glasgow a handsome screw steamer for Sir James Brooke, K.C.B., Rajah of Sarawak. The vessel was named the *Royalist*, and is of the following dimensions:—Length, 145 feet, breadth of beam, 22 feet; depth, 11 feet; tonnage (builders' measure), 340 tons. Her engines, which are on the direct acting principle, are being fitted on board in the builders' dock, alongside the yard, and it is expected she will be ready to go to sea in about four weeks. This is the second steamer built by this firm for Sir James Brooke, the former one being the steamer *Rainbow*, with which Sir James in a great measure cleared the Bornean coasts of the hordes of pirates which infested them.

A MEMORIAL to the Lords Commissioners of the Treasury is in course of signature on the subject of improved mail communication with the Far East. The memorial calls attention to the unsatisfactory manner in which the present mail service is performed (as lately dwelt on in our columns), and urges the necessity of an entirely separate service for China and all parts east of Ceylon. A copy of the memorial will be found in another column.

The *Dragon* (Capt. Gibbon) has cleared for Singapore, Nagaski, and Yokohama. The *Hayo-Maro* (Capt. Carnes) sails for Japan about the 20th; the *Coquette* (Capt. Lobneitz) and the *Courier* about the 31st; and the *Lamont*, for Hong Kong (Capt. Castilla) about the 10th April.

MAJOR BRINE, R.E., has been selected by the SECRETARY of STATE for India to proceed overland to Bombay, Madras, and Calcutta in charge of the telegraphic staff.

COUNT LATOUR, the Italian representative in Japan, will leave shortly for his post, proceeding first to Peking with the ratified treaty concluded between Italy and China.

FOREIGN OFFICE, March 5.—The Queen has been pleased to approve of Don Albino Mencarini as Consul at Singapore for Her Majesty the Queen of Spain.

DOWNING-STREET, March 7.—The Queen has been pleased to appoint Edward Wallace Goodlake, Esq., to be Police Magistrate for the colony of Hong Kong.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, MARCH 7.

After a debate that lasted not less than eight days, in which all other subjects were swamped by the discussions about the constitutional question of the former sitting, the Second Chamber at last finished with glancing at the reason by which that Parliament was dissolved, and the consequences of that measure and matters of fact were taken up. During this long debate the Liberals did nothing but protest against the opinion of the Cabinet that Parliament had not the right to disapprove of the appointment of Mr. Myer to be the Governor-General of the East Indies, whilst the Ministers persevered in defending the measures taken by them. It was only when the budget for the Department of Foreign Affairs was taken up that the Second Chamber dealt with material facts and questions. I scarcely need say that nothing created more interest than the discussions about the rumours that deterred the public in such a high degree, and of which I spoke in my last. And indeed such was the uneasiness that was created by the increased warlike rumours spread by the Conservative papers that almost a panic prevailed. Business had come to a standstill; the quotations at the stock markets were lower and lower every day, and even the insurance brokers refused to insure ships without the clause on the policies —"free from molest of war." The Ministers, however, behaved themselves as did they not know anything of that what passed. At last, however, an interpellation took place, and then the Minister van Zuylen declared, but not before he was closely pressed, that there had never been any question of the rumour spread by the *Amsterdam Courant* that Prussia had demanded of Holland that the plan of dismantling Maestricht and Venlo should be given up, and that Prussia should have the right of placing garrisons within these fortified places. "No credit must be given to these rumours," the Minister said; but nevertheless it is necessary to be forearmed for every eventuality. The circumstances of Europe are such that Holland is bound to be cautious, so that we must spare no sacrifices which may be required for the maintenance of our independence. It needs no comments that such an alarming contradiction, that evidently referred to the scheme for the reorganisation of the army, and to invite the Chamber to vote the high estimates for the department of war and navy, did not at all satisfy the members. He again was questioned for further explanations on the subject of the said rumours, and then the Minister only declared most positively that no European Power had menaced Holland. In the meantime the guarded language of the Minister, and his reference to prospective dangers, have produced a very bad impression throughout the country, and generally it is considered that he only was so restrictive to support by underhand means the carrying of the Budgets. The spreading of these rumours, it is loudly said, is only a trick of the Conservatives.

According to the addresses that were sent to the Second Chamber by some Rotterdam and Amsterdam merchants connected with the Japan trade, requesting an indemnification for those traders who experienced losses by the war in 1863, one of the M.P.'s—Mr. Viruly—stated in one of the last sittings that the Minister of Foreign Affairs was in the wrong by denying that our Government should be accountable for these losses. That member was of opinion that the very high indemnification which was paid by the Japan Government to ours did not tend only to pay the damages of the man-of-war, the *Medusa*, but also for the losses experienced by the traders, and therefore he supported the tenor of the address, notwithstanding he thought that the claims of the merchants were too high. Our Government, he concluded, is still more obliged to pay an indemnification, because the Japan Government does not pay the tribute out of its own treasury, but a tax is laid upon the foreign trade. He intimated that a close inquiry will be made by the Government about this question. Other members seconded this wish; they all were convinced that the Japan traders did not have any right to claim for indemnifications, but the Government having encouraged the trade with that country, is obliged, in a moral way, to pay them. Jhr. de Casembroot, who was in Japan during that war, contested the claims. He was of opinion that it would be a very dangerous precedent were the Government to consent, and he said that the merchants had no right whatever, because nobody had ordered the Europeans to leave Japan or to store their valuable merchandises on board of ships. They have done it, he asserted, upon their own instigation, and, therefore, they only have to pay the losses and costs caused by these measures. He stated, finally, that all their valuable papers were put safe on board of the men-of-war. The Minister, answering to these assertions, stated that he had the firm conviction that these traders had no right to claim indemnifications, and therefore he declined to ask that a credit for this purpose should be granted to him now; but he will reconsider the question when the traders shall have given him full information to state that they had experienced, indeed, losses. Since this debate our papers deal with this question. Amongst the defenders of the claims appear Mr. G. F. Plate, former partner of the Japan firm Carst, Lels, and Co., but his motives are strongly opposed by the Captain Lieutenant of the Navy, J. E. de Man, former commander of the Dutch squadron in the Japanese waters, who condemns very severely these claims. He adds that in place of this war having caused losses to the traders, they have made enormous profits out of it. Not only have they gained a great deal of money by providing the men-of-war and by buying the bills of exchange of the commanders, but since they have made such enormous pecuniary advantages that he is of opinion that Japan is now a sort of New California. The more he rejects these claims, because not one of the soldiers who took part in this expedition has profited a farthing, neither of the seized guns or the sum paid by the Japan Government—viz., 3,060,000 dollars.

About the Japan matters the minister further stated that our trade henceforth will duly be represented there by consuls, from which dignities, however, he will not exclude the agents of the Dutch Trading Company, as some members of Parliament wished that he should do. Then passing upon European matters, he stated that the commercial treaty with North Germany was ready, and that also, within a short delay, a new smuggling treaty with Prussia will be concluded. The question about the relation between our province of Limburg with the ex-German League —which is still unsettled—was adroitly fenced, notwithstanding the minister was pressed closely to give ample information. After some pourparlers about the steadiness of the pædagogycal-anti-revolutionry principles of this minister, this budget was carried with 39 against 33 votes. At the last moment of the debate, Mr. van Zuylen experienced an *echec*, because an amendment to decrease the credit asked for the salaries of our *corps diplomatique* with 9,200f. passed.

The budget for the department of Justice was approved of with 44 against 21 votes, a majority, that is of much importance, because a great deal of the members saw in this minister the person who advised to apply the measure which led to the dissolving of the former Chamber. This point excepted, the discussions about that chapter were not of much interest. Like his predecessors Mr. Borret also promised much, but it is the question if he will fulfil one of his words. He promised a revisal of the code penal, but declined to propose the abolishment of capital punishment by a special Bill. A scheme for a new judicial organisation will be laid before the members as soon as possible; the commercial code also will be revised, but he declines to abolish arrests for debts; a new police law is to be created, etc., in one word he made so many promises, he has such good intentions, that Mr. van der Linden warned him with the proverb, *Qui trop embrasse, mal etreint.* The Chamber is now busy with the discussions about the budget of the Home Department, and there is likely to be a very obstinate fight.

When all the budgets have been approved of (?), then a Bill will be laid before the members of Parliament proposing new measures to prevent the spreading of the rinderpest. I am, however, happy that I am able to state that this plague has been decreasing rapidly during the last weeks. According to the last returns, 1,607 head of cattle were attacked in the week ending the 23rd February, against 1,735 and 2,048 in both the former weeks.

Within a month or two the steamer *Gravenhage* will start for Batavia. This is the finest and greatest vessel that, for private account, ever was built here. Not less than 86 passengers (first-class) have taken passage for Java, whilst 300 soldiers will also be transported by this clipper. It is 2,000 tons burthen, and is provided with an engine of 80-horse power. It is thought almost certain that the voyage to Java will be done within 70 days. The owners, Messrs. Zeylen and Dekker, have now ordered another clipper, which will be larger still. Since the resolution of the Trading Company, which abolishes the fixed rates of freights (see my former letter), it is, of course, the only way to win money by building ships of this charter.

For some months past there has been a great deal of false coin in circulation, and likewise Government notes of 10f. (*muntbilleten*). Of course this creates much uneasiness amongst the public. Till now the police did not succeed in catching the falsificators.

Till now the Trading Company made enormous profits by the ½ per cent. that was paid to it, of every amount of silver and copper coin that was sent by the Government to the East India Colonies. Strong objections, however, are made now by some members of Parliament against this very costly privilege, and they urge that this ought to be repealed.

A Bill is brought in Parliament tending to ask a credit in behalf of the India Service for increasing the salaries of the India heads and functionaries in Java and Madeira. Undoubtedly this Bill will be carried by an overwhelming majority.

There is no news about the Scheldt-question; the English and French engineers have already finished their local inspection, whilst Mr. Hagen, the *Ober-Bau-Director* from Berlin, has arrived at the Hague, and will start with the shortest delay to Zealand. The general opinion is that the reports will be in our favour.

The subscriptions in behalf of the Pope, opened by the Catholic Journal *de Tyd*, have produced, according to the last returns, an amount of 110,000 guilders. The lists are not yet closed.

COMMERCIAL.

COFFEE.—The Dutch Trading Company announced its second auction on the 26th ult., at which will be offered 62,008 bales Java, Padang, and Macassar. There is not much passing, but prices of all sorts are fairly

Digitized by Google

supported. Holders decline to operate, waiting for still higher quotations. The private transactions include only 3,500 b. Java ex Kortenaar; 500 b. do. ex Dagmar; 651 b. Padang ex Ramsay; 500 b. Java ex Belle of the South; 1,600 b. Padang ex Ramsay at 45c.; 200 b. do. ex Ione; 728 b. Java ex Joseph Willem at 40c., and 238 b. do. ex do. at 41½c. The stock amounts to 480,000 b., of which 414,783 are of the Trading Company.

SUGAR (RAW).—1,180 mats Passaroeang ex Garibaldi were sold at prices that did not transpire. The market remains unaltered, firm, in consequence of the announcement of the English Government that the modification of the duties and drawbacks will not come into force before the 1st of May, because our Government cannot be ready before that period. Stock of Java Raw Sugar: 105,924 mats and 1,528 bales, against 131,974 mats and 3,539 mats in 1866.

RICE.—There are no transactions to report.

SPICE.—Superior qualities dull but firm. Pepper: 540 b. Padang ex Ramsay were sold at 18c. The unsold stock of spices is as follows:—Nutmegs, 301 casks; Mace, 155 casks; Cinnamon, 154 fard; Pepper, 983 b. Quotations: Nutmegs. 86 to 89c.; Mace, D, 110 to 112c.; LE, 106 to 107c.; Cloves, No. 2, 30 to 31c.

TEA.—The cargo ex Monarchy, say 6,819 quarter and 3,274 half-chests Congou, 1,117 quarter and 283 half-chests Souchow, and 44 three-quarter chests Pekoe, will be sold by public auction on the 21st. The brokers' taxation is as follows:—Congou, ord. to good ord., 95 to 130c.; Souchow, ord., 80 to 100 c., and better quality 125 to 150c.; Pekoe, 130 to 190c. On the same day are to be offered on sale 66 quarter-chests Congou (Java), 280 quarter-chests Java Souchow, 2 quarter and 19 half-chests Pekoe.

TOBACCO (JAVA LEAVES).—In waiting for the auctions to be held on the 14th and 15th, when 5.490 b. will be offered; the market is very inactive. Stock of Java 6,652 b., and 56 b. Manila.

DRUGS.—Camphor: The market is inactive; the nominal quotation is 85c. for China, 88c. for Japan. Cubeben: 497 b. ex Dagmar, and 175 b. ex Joseph Willem, were sold at prices that did not transpire. Cassia Lignea meets with an active demand, and nothing can be bought under 76c. Gum Benzoe: 59 chests Sumatra ex Ione, good seconds, were sold at 110c.; holders now demand 122½c. Japan Wax: Without stock. Gutta Percha: 5,300 k. ex Ione, from Padang, were sold at prices that did not transpire.

RATTANS.—The Trading Company will sell in public auction 85,000 bundles. The private transactions include 860 bundles ex Ymuiden and 150 piculs ex Kortenaar.

MOTHER-O'PEARL SHELLS.—297½ plc. (17,530 p.), ex Petronella Catharina from Macassar, were *tel quel* sold at prices that did not transpire.

JAVA INDIGO.—The tone of the market is very cheerful with an active demand, 70 chests were sold at 20c. above October value. Stock (private, 61 chests.

BANCA TIN.—In the last week of the past month there was but little business doing, as the market has been depressed by a feeling of distrust and despondency which seemed to hang over it. Speculators were disinclined to operate, and consumers, having already supplied themselves in anticipation of their wants, were no longer buyers; the consequence was a dragging market. Another depressing cause, too, was the non-announcement of the Dutch Trading Company's sale; this was expected to be given out very early in this month, but as day after day passed by, and larger arrivals were reported than were expected, the market began to get a little uneasy; that their fears were without ground is now proved by the announcement of the Trading Company's sale, which will take place on the 28th inst., and which will consist of 69,400 slabs Banca and 600 slabs Billiton. The following sale will take place in September. Considering the actual arrivals, the quantity is very small, being 39,300 slabs less than the last sale in September, and 41,800 less than the previous sale in March last, and it needs no comment that these facts have already had a very good effect on the market, and better prices are still anticipated; the market closes very firm, with buyers at 54¼f. Before the announcement of the auction were sold—200 slabs Banca at 52½f., 800 slabs do. at 52f., 250 slabs do. at 51¾f.; then the prices went up, and 600 slabs were sold at 53f., 500 slabs at 53¼f., 300 slabs at 53½f., and 500 slabs at 54¼f. Trading Company's stock 87,764, and floating 13.600 piculs.

HIDES.—The transactions include 467 ps. Rinder, ex Ione; 405 ps. Passaroeang, ex Ymuiden, at 40¼c.; 325 ps. Buffalo, ex Ymuiden, at 22½c. Stock E.I., 8,902 p., against 25,599 in 1866; Buffalo, 1,653 p., against 5,390 in 1866.

COCOANUT OIL.—The market is inactive by want of stock. A direct cargo from Cochin China and Ceylon is, however, waited for.

SILK (RAW).—The Trading Company will sell on the 21st of March 463 b., which are valued as follows:—

171	b	Sodai (bricks)	f.34 to 40	per kilo.
45	„	Sodai (bricks)	32 to 40	„
6	„	Massah (slips)	30 to 35	„
12	„	Maybash (dyepots) ..	39 to 44	„
8	„	Sinshui (slips)	34 to 39	„
37	„	Oshio	32 to 39	„
70	„	Id	31 to 39	„
20	„	Id	35 to 42	„
36	„	Id	33 to 42	„
53	„	China	36 to 42	„
5	coll.	Java	26 to 28	„

MONEY.—A great many unfavourable rumours having been current, there was a general depression; the market, however, closed somewhat firmer, but the transactions were very unimportant. Dutch Two-and-a-Half per Cents., 52¼; Three per Cents., 63¼; Four per Cents., 84⅝. Trading Co., 141½. Central Railway, 49. Spanish Two-and-a-Half per Cents., 31⅛; Portuguese Three per Cents., 40⅛; Russian Five per Cents., 92¾; Austrian Five per Cents., 46½; United States, 1874, Five per Cents., 73½. Netherlands Bank, 259¼; Rotterdam Bank, 1st series, 99¾.

Money meets with a good demand, and in the open market at full rates. Bank discount 3½ to 4 per cent.

'CHANGE.—London: 3 months, f.11.73; 2 months, f.11.76; short, f.11.82½. Paris: 3 months, f.46.60; 2 months, f.46.70; short, f.47.05. Hambro': 3 months, f.34.87½; 2 months, f.34.92½; short, f.35.10. Bremen: 3 months, f.188.

SHIPPING INTELLIGENCE.

ARRIVALS.—Feb. 23, at Brouwershaven, from Batavia, Jedo. Feb. 24, at Texel, from Batavia, Nicot. Feb. 25, at Brouwershaven, from Batavia, Madura; at Texel, from Sourabaya, Jane Avery. March 4, at Brouwershaven, from Passaroeang, Konigin Auguste.

DEPARTURES.—Feb. 28, from Texel for Batavia, Stad Dockum; March 1, from Brouwershaven for Samarang, Vyf Vrienden; for Batavia, Ouderkerk a. d. Amstel; from Hellevoet for Java (*via* Cardiff), Stad Delft; from Texel for Batavia, Aldebaran. March 2, from Texel for Samarang, Quartet. March 3, from Texel for Samarang, Presto; for Sourabaya, Senior. March 6, from Brouwershaven, for Batavia, Aeolus.

PASSENGERS INWARD.—From Java, per Maria Adolfina: Messrs. Fransen, Sienwerts van Reesema, Lacourt. Per Brouwershaven: Mr. Schiebelhout and family, Mrs. Kloppert. Per Madura: Mr. van der Kerkhoff. Per Jedo: Mr. Kanf and family, two Misses Graswinkel.

PASSENGERS OUTWARD.—For Java, per Quartett: Mr. J. W. Landre and family. Per Presto: Mr. L. T. Berlyn and family, H. Leeuwenstein, S. Stam and family, Mrs. van der Stadt, and Mrs. Driessen. Per Ouderkerk a.d. Amstel: Captain Renaud, of the E. I. army, and family, Mr. Epple and family, Mr. van der Adel Lion, Miss M. Cramer. Per Aldebaran: Mr. J. Bruining, Miss J. Haackman.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, MARCH 7.

Senator Kirchenfrauer, Hamburg's Plenipotentiary for settling the draft of the new German Federal Constitution, objected to several parts of the proposal, and these objections are appended to the protocol of the final sitting of the conference held at Berlin on the 7th of February. The following is a summary of his principal remarks.—

Ad. Sec. 51 (relating to the creation of a Federal flag).—If Hamburg consents to the creation of a new Federal flag for all the ships of the States belonging to the Bund, and the abolition of their own hitherto existing separate flags, of which however nothing is said in the Prussian fundamental proposals of the 10th of June last for the constitution of a new Confederation, it can only be on the understanding that the material disadvantages attendant on such an alteration be guarded against as much as possible; and that those States be allowed to use their own flags, not only till the general international recognition of the new Federal flag, but also with reference to the transfer of the rights and privileges enjoyed by those separate flags as secured by treaty with European and non-European States. As a preliminary measure, it will therefore be necessary to make the usual notifications combined with a revision of the treaties of navigation at present in force, and some legal enactment as to the conditions acquired to obtain the right of wearing the new Federal flag.

Ad. Sec. 52 (concerning the appointment of Federal consuls in foreign countries).—If the new Federal consuls are to replace those of the separate States, power must be reserved to the German Maritime Governments to give the Federal consuls instructions and orders, and to receive from them direct reports and despatches. Not only is great stress laid at Hamburg on the reservation of this right, but equally so on enjoying a potent voice in the choice of places suited for Federal consulates, and the appointment of gentlemen competent to fill these offices, as well as the fees permitted to be taken by them, to which privilege Hamburg has an undoubted claim, from the fact that the Hanseatic cities are almost exclusively the mediators of the trade between Germany and transatlantic countries.

The Plenipotentiaries for Bremen and Lubeck having declared their full concurrence with the above, the Prussian Plenipotentiary replied:—

Ad. Sec. 51.—That it was an understood thing that the separate States would continue to make use of their own flags till the international recognition of the new Federal flag on the part of all other maritime States, and till their rights and privileges were legally transferred to the new flag; and

Ad. Sec. 52.—That the seperate maritime States of Germany, would have the undoubted power of giving orders and instructions to the Federal consuls abroad, and requiring Reports from them on all commercial matters within the jurisdiction of such consulates. The Hanseatic cities would moreover have a voice in the establishment of Federal consulates in all countries and places out of Europe, and the appointment of competent persons to fill those offices.

The Russian Postal Department at St. Petersburg gives public notice that in consequence of a new arrangement with the Post-office of East Siberia, dated February 21st, newspapers and other printed matter *sous bande* or in wrappers open at both ends, may now be forwarded to China by the Mongolian land post established between Kiachta and Tientsin. The rates of postage on the above are fixed at 2 copeks per single rate of 3¼ loths weight to Ourga, and 4 copeks for Kalgan, Peking and Tientsin.

COMMERCIAL.

COFFEE.—This market has been more lively than for some time past, and prices were well supported. Sales of the week 25,000 bags.

SUGAR.—No demand for raw or refined, though prices are not lower.

RICE.—There was a fair amount of business done at previous rates for cleaned grain. No transactions in rough.

SPICES.—No alteration in Cassia Lignea. Of Flores 100 chests came to hand *via* London but mostly in bad condition, and will be sold by auction. Ginger, mace, and nutmegs firm. Of pepper 2.000 bags ex Cecrops from Singapore were sold by the importers at 3-13-32 Sch. Bco. per lb.

SPELTER.—A rather better feeling prevails, and 1,000 centners for delivery on arrival were done at 14 mks. 2 sch., 4,000 centners afloat at 14.3, and 500 centners ex warehouse at 14.5.

SHIPPING INTELLIGENCE.

ARRIVED.—March 1, Bernhard Carl, from Amoy.

LOADING.—Macassar and Hong Kong, Ceres; Shanghai, Hugo and Otto; Hong Kong direct, Fetish; Singapore, Bernhard Carl.

Digitized by Google

Monetary and Commercial.

A circular has been issued by Messrs. Hooper, of 32, Great St. Helens, announcing that a partnership has been concluded with Messrs. Alt and Co., Nagasaki, and that the firm will in future be Alt, Hooper, and Co.

The well-known premises at the corner of Lombard-street and Birchin-lane, belonging to Overend. Gurney, and Co., were sold at public auction to Messrs. Glyn, Mills, and Co., bankers, for £29,500.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton on the 4th inst., was, in silver, to Bombay, £17,080. There has been a fair supply, including the bars brought by the *Tasmanian*, which have been disposed of for the Continent at 5s. 0¾d. per oz. standard, being the price obtained for those by the previous packet, and since current. There is still no general inquiry for silver remittances to the East. The large amount of Mexican dollars by the *Tasmanian*, above £500,000 was sold, the early part of the week for transmission to the Continent at 4s. 11½d. per oz., showing no alteration from the price lately current.

MANCHESTER MARKETS.

The following is from Sam Mendels' Manchester Circular of the 12th.

There is little demand here generally, and, compared with some days past prices are weaker. To-day there is more anxiety to make sales, but the offers are mostly too low to find acceptance. Yarns have found rather more favour to-day both for the Home demand and Export, at prices fully equal to those accepted at the close of last week. Quotations are—Grey Shirtings, 7 lb., 10s. 3d. to 10s. 6d.; 8¼ lb., 12s. 6d. Cotton Yarns Nos. 16 to 24, are 17d. to 18d.

THE HONG KONG MINT.

The following are the principal points in the report of the commission appointed to inspect the Hong Kong Mint:—

"It is practicable at comparatively moderate cost to increase the coining and melting power of the Mint so as to insure its becoming profitable if it can only be supplied with silver.

"We have come reluctantly to the conclusion, always provided that the Mexican dollars will be procurable as heretofore, that there are no reasonable grounds for the belief that the public will, under present conditions, supply the Mint with sufficient silver to keep it in paying operation, or, in other words, that the public will pay two per cent. seignorages to have their silver converted into British dollars. Tradal experience has left no room to doubt that so long as the two coins be of the same weight and purity, the Chinese will not account the Hong Kong dollar of more value to them than the Mexican, and the public therefore will not pay two per cent. for the conversion of the latter into the former, nor will it answer their purpose to have their sycee or bar silver so coined into British dollars unless these two forms of bullion should happen to be ruling much below their intrinsic value as compared with defaced or chopped currency, or clean coin happen to be bearing a premium. As to a recurrence of the latter contingency, not overlooking the fact that two coins would now divide its benefit, it must be remembered that the premium borne in 1862 and 1863 by undefaced Mexican dollars over disfigured ones was entirely due to exceptional circumstances at that time prevailing in North China and Japan, which for the past twelve months have altogether ceased to exist. Foreign trade with Japan first rose into consequence in 1860, and speedily led to a vast demand for Mexican dollars, because the Japanese, ignorant then of suitability to their wants of western manufactures, would accept only these coins in exchange for their produce, and because they at that time placed upon gold, as compared with silver, a value far below that which the former metal bore in most other parts of the world.

"In our opinion the pecuniary object of the Hong Kong Royal Mint, namely, the production of British dollars, will not make it a paying concern; but with regard to the subsidiary coinage of fractional parts of a dollar there is so much necessity for that here that we think it will always return a profit upon its own cost to the Mint, but the extent of that profit it will be impossible to estimate until we know how far the colony and the neighbouring parts of China will absorb such coinage.

"We are unable to discern any further circumstances materially affecting the chance of rendering the Hong Kong Royal Mint a paying concern unless it be that the Chinese Government will either make the British dollars the universal currency of China or employ the Mint to fabricate Imperial Chinese coin. For more definite information upon these points we would suggest an application to Pekin or the Home Government. At the same time we would point out that any action on the part of the Chinese Government to prove of real use must comprehend the whole Empire; it will not do merely to authorise the receipt by tael of British dollars at the Treasuries of certain public departments, because they would be as inevitably melted as is the case at present with other coins, when the Chinese customs freely accept them in common with all other coins of similar standard by the old system of weight. Of course similar action on the part of the Japanese would lead to the same beneficial results, and we doubt both that country and the Straits Settlements, under any circumstances would absorb a large amount of the coin in time, if freely procurable, but they no more than China can afford to pay two cents. seignorage for such an advantage.

"We would observe that a change has lately taken place in the coinage of the Mexican dollar. This, together with the influence which the opening of a new line of steamers between Panama, San Francisco, Japan, and Hong Kong early in the ensuing year, may have on the money market in China, are matters which time alone can decide."

ARTICLES OF IMPORT.

TEA.—We have again to report a very dull market, business being on a very limited scale, notwithstanding the very large deliveries in progress. There has been a reduction in price on the fair to good kinds, both of blackish and reddish leaf Congou, but otherwise prices have been fairly maintained. Moning kinds of siftings are difficult of sale at the reduction last quoted; Kaisow kinds remain much as before. There has been a good demand for broken-leaf kinds at from 8d. to 10d. per lb. Fair to good common have sold steadily at from 1s. to 1s. 0½d. per lb. Fair to good flavoury kinds have sold at a decline of ½d. to 1d. per lb. Fine to finish Kaisows have met with a fair demand at former prices. Pak Lings show no alteration. Common to fair blackish-leaf kinds remain as before, the demand being moderate. Fair to good have been sold at a decline of about 1d. per lb. Fine have only been saleable in small parcels, but prices are firmly supported. New-made Canton kinds remain as before. Oolongs continue in request; a few have been taken for export; fine to finest are wanted for home consumption. Flowery Pekoes are still neglected. In Scented Capers there has been a fair business done, and prices have an upward tendency for common to good kinds. Fine are also wanted. Canton-made Orange Pekoes remain difficult of sale at the low prices current. Foochow kinds have sold at previous rates. Green: There has been a steady demand, buyers for the Canada market taking Young Hysons, chiefly Ping Suey kinds, at a further advance of ½d. per lb. Hysons have been inquired for, but are very scarce; fine quality, 3s. to 3s. 3d. per lb. Gunpowders have been in demand for home consumption, fine Moyunes selling at rather higher prices. In Japan leaf the inquiry for coloured sorts has fallen off; of uncoloured leaf there is none in first hands on offer. Public sales, comprising 15,575 packages, of which 12,601 were offered "without reserve," commenced on the 5th and terminated on the 6th inst.; a heavy feeling prevailed throughout, and prices tended in favour of the trade. The stock in the United Kingdom on the 28th ultimo was estimated at 93,300,000 lbs., against 94,500,000 last year, and the cargoes afloat up to last mail's advices are as follows. The reports by this mail will be found in the Tea table in another page:—

* Put into Singapore for repairs. † Put into Cape dismasted.

SILK.—The market was steady with fair sales up to the 4th inst., when the receipt of telegrams announcing a stock of 7,000 caused a general stoppage of business. The telegram was, however, soon found to be an error, and the thousands were hundreds only. Experience has shown how difficult it is to judge of the future of the Silk Trade, but from the symptoms evinced this week of an improved inquiry for good classical Silk generally, both for home consumption and for the Continent, there really does appear a fair reason to expect an improvement in business at the reduced rates. Piece Goods:. Of *Pongee Handkerchiefs* there was a full supply in the sales—3,407 demi-pieces; a large proportion of these were of very poor, thin quality—under 5 ounces in weight,—but there were several lots of good and superior Handkerchiefs, and these found ready buyers at good rates, considering the full quantity brought on the market.

COTTON.—Since the 26th ult. this market has been extremely quiet, with limited business. On the 28th ult. an increase in the demand occasioned an advance of ¼d. per lb., but as inquiry slackened prices again declined, and now remain the same as at our last report. The sales have included 170 bales fair China at 10¼d., and 10 bales very ordinary at 7½d.; also 80 bales fair Rangoon at 8½d. per lb. The stock of China and Japan in London amounts to 906 bales, against 271 in 1866, the total stock being 50,193 bales, against 53,117 in the corresponding period of last year. Since the 26th ult. the sales in London of all descriptions have been 6,200 bales on the spot, and 5,810 to arrive.

COFFEE.—For Plantation Ceylon the demand is steady, and there is a moderate business doing on former terms. The sales of Plantation have amounted to 1,399 casks, 248 barrels, 1,530 bags, realising as follows:—Garblings, 7s. 6d. to 30s.; triage, 35s. to 64s.; fine ordinary small to low middling, 74s. 6d. to 77s.; middling to good middling, 79s. to 84s., fine middling 86s. to 86s. 6d.; pea-berry, 78s. to 91s. 6d.; colory, fine to fine fine ordinary, very small, 72s. 6d. to 75s.; low middling small to middling, 76s. to 80s.; good middling, 81s. to 83s. Of Native Ceylon about 21 casks, 3 barrels, 1,000 bags realised for fine bold 71s.; good ordinary, 64s. to 64s. 6d.; small, 63s. 6d.; triage, 57s.; garblings, 21s. to 40s. The remaining transactions at auction were 1,170 bags Java, from Mauritius, which sold with all faults at 64s. 6d. to 65s. for ordinary greenish, 67s. to 68s. 6d. for pale, and 141 bags Macassar Singapore at 90s. per cwt. The stock in the United Kingdom on the 2nd inst. was:—Of Ceylon 5,680, against 6,490 tons last year; of Java 1,670, against 2,040 tons; and the total of all descriptions 10,020, against 11,800 tons in 1866.

COIR YARN.—There have been large arrivals since our last report, and nearly the whole quantity has been placed on offer at the auctions. The greater portion was held for high prices and withdrawn, the result being a fair amount of competition for the remainder, which was taken at an advance of £1 to £3 per ton. Of Ceylon the quantity offered was 82 tons, which was all sold, fine at £37 10s. to £48, good £33, good middling £30 to £31 15s., common to medium £26 to £28 5s. Subsequently 60 bales fine Ceylon realised £38 5s. to £51 10s., and 4 bales Singapore £20 to £24 5s. per ton.

COIR FIBRE.—In public sales 226 coils (7½ tons) Ceylon Rope sold without reserve, 2 to 2½ inch at £23 10s., 3 in. at £22 5s., 3½ in. at £35, 2½ to 6 in. at £18 per ton. Also 65 bundles sea-damaged Singapore Fibre, Bristles at £40 5s. to £40 10s., and ordinary coarse Mattress at £10 15s. to £12 per ton.

DRUGS.—Cubebs: Of Batavian 204 bags were offered, out of which 55 first-class sea damaged sold at 51s. 6d., the sound portion being bought in at 55s. At a later auction 50 bags second-class Singapore were bought in at 46s., and 155 bags good fair stalky Batavian sold at 51s. 6d. to 52s. per cwt. Stock 1st inst., 1,746 bags. Camphor: No business worth reporting in either China or Japan. Stock 2,031 packages. Dragonsblood: 4 cases fair lump bought in at £9. 5s.; stock 77 chests. Galls: At auction 8 packages Japan were bought in, fair stalky at 60s., much broken at 58s., and 300 cases China sold at the advanced rate of 65s. per cwt. Small private transactions are reported at the same quotation. Rhubarb: Of 78 cases China offered, 19 sold as follows:—Good fair, 6s. 6d.; ordinary, 2s. 6d. to 2s. 7d.; dark wormy, 1s. 4d.; low wormy, 8d. per lb.; stock, 776 chests.

GUMS.—Benjamin: Of 21 cases Sumatra, at auction, 9 cases fair thirds sold at £6. 10s., and 4 cases seconds at £10. 10s. to £10. 12s. 6d. per cwt. Stock, 807 packages. Copal: In public sale 52 cases good bold hard Manila realised 40s. 6d to 41s., and 74 cases ordinary soft 27s. to 27s. 6d. per cwt. Stock not given. Damer: The scarcity continues, and 80s. has again been refused for Batavian. Stock, 953 packages.

JAPAN WAX.—Great irregularity has been observable in the sales, and of 625 boxes 95 sold; good yellowish and white, mixed, at 89s. to 91s. 6d., stained at 76s., badly stained at 74s. Later an offer was made of 1,070 boxes, which were all taken as follows:—Good medium, slightly mixed saucers, 77s. to 78s.; ordinary to medium, 69s. 6d. to 73s.; very ordinary, 61s. 6d. to 65s.; very low discoloured, 55s. to 55s. 6d.; good unmixed cakes, 85s. to 86s.; mixed, 80s. per cwt.

MANILA HEMP.—Previous value is firmly maintained, but the business has been of small extent. At auction 100 bales Sorsagon sold at £51, and of 125 bales sea-damaged, one-half sold at £48. A few private transactions are reported at £51 per ton. Stock, 812 tons.

PEPPER.—Black: Of 4,130 bags Penang at auction, 1,824 bags (including a portion damaged) were taken, good Trang realising 3⅛d., ordinary brown East Coast 2⅞d. Subsequently 1,080 bags Acheen sold at 2⅞d., and 560 bags Singapore were bought in. By private contract 3,000 bags Singapore realised 3⅛ to 3 3-16ths, and 200 bags fair West Coast Penang 2 15-16ths cash. White: Business extremely limited, and of 233 bags middling Singapore about half only were taken at 5⅝d. to 5¾d. per lb. No private business.

RICE.—This market is inactive for all descriptions, the only sale being 4,500 bags—Rangoon at 11s. 9d., Bassein at 11s. 6d. cash. Nothing doing in Java.

SUGAR.—It having been definitely arranged that the new scale of duties and drawbacks will not come into operation before the 1st of May, the home trade have appeared more confident than of late, and showing some inclination to buy at the nominal reduction of 1s. to 1s. 6d. from the highest point which had been established, a total business of a rather improved extent has resulted. The following sales have been all by private contract, there being no transactions at auction; 3,000 bags brown and yellow Penang at 30s. to 34s. 6d., and 26,000 bags Unclayed Manila at 25s. 6d. per cwt. The stock of Sugar in the United Kingdom on the 2nd inst. was:—Of Penang 800 tons, against 1,250 in March 1866; of Manila, Siam, and China, 30,350 tons, against 20,780 tons last year, and 14,570 in 1865.

SPICES.—Nothing of importance.

TAPIOCA.—Of Penang, 125 bags of good quality realised 5d. per lb.

TIN.—Prices have advanced £1 10s. to £2 per ton with large business. On the spot 250 tons fine Straits realised £86 10s. to £87 10s. for cash, and for arrival 500 tons sold at £87 10s. to £88. Banca is firm at £90 to £91 per ton.

MISCELLANEOUS.—Blacklead: About 200 barrels Ceylon sold, ordinary dull lump at 12s.; good bright lump at 25s.; ordinary dust at 8s. 6d.; and medium dust at 9s. 6d. per cwt. Beans: 6 cases Tonquin sold at 1s. Isinglass: At auction 1 case good medium leaf Penang realised 3s. 10d., and 4 bags tongue 3s. 3d. to 3s. 5d. for medium, 2s. 9d. for ordinary. Musk: Of 47 caddies Tonquin 31 sold, ordinary to fair 21s. 6d. to 28s.; inferior, 17s. 6d. Preserves: 400 cases China Ginger sold at 1s. 0½d. to 1s. 1d.; one lot 1s. 1½d. Rattans: 5,478 bundles Singapore sold at 2s. 7d. to 3s. 10d., and 2,723 bundles Penang at 2s. 8d. to 3s. 2d. per hundred. Sticklac: At auction 140 boxes fair unsifted Siam realised 47s. to 48s. 6d., and 140 boxes small woody and very dusty Rangoon were bought in at 30s., except 18 boxes blocky, which were taken at 21s. per cwt. Sapanwood: 7 tons Siam were bought in at £10. Vermilion: 50 boxes China realised 2s. 7d. to 2s. 8d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5. 15s. to £6; nail rod, £7. 10s. to £8; hoops, £8. 17s. 6d. to £9; sheets, single, £9. 17s. 6d. to £10; Staffordshire bars, £7. 17s. 6d. to £8. 10s.; rails, £6 to £6. 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £86 to £89 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£90 for block; £91 for common bars. Tin plates, best charcoal I.C., 32s. to 33s.

LEAD, &C.—English pig, W.B., £20 to £22. 5s.; shot, patent, £23; sheet, £20. 10s.; spelter, £21. 10s. to £21. 15s.; zinc, English sheet, £26 to £28; quicksilver, £6. 17s.

The following is from the circular of Messrs. French and Smith:—

Notwithstanding the abundance of money, metals generally have continued depressed, and sales of any amount have only been effected at prices under general quotations.

IRON.—The Welsh masters are better employed than a month since, but they cannot obtain higher rates. Rails, common specifications, £5. 15s. to £6; bars, £5. 15s. to £6. 5s.; Staffordshire is without change; Scotch has only varied slightly.

COPPER.—As the production continues large, in spite of low prices, any improvement in quotations cannot immediately be looked for. Low prices are stimulating export, but not to an extent sufficient to reduce stocks. We quote to-day's prices:—English tough, £80 to £81; Kapunda, £90; Burra and Wallaroo, £84; ores of high produce, 14s. 9d. to 15s.; Chili bars, £74.

TIN.—The demand for consumption during the past month has been uniformly good, but the price receded a little nevertheless, say from £86 to £84 10s. This was owing in a great measure to the low quotations from the Straits. Since the announcement that the Dutch Company's sale of Banca, to take place on the 28th inst., will only be for 69,400 slabs, we have had very active inquiry, and sales of Straits are reported at £87 cash, and Banca £90 to £91. A few parcels of Straits afloat have been sold at £88. There are one or two ships loading which will probably bring some hundreds of tons more. The quantity of Banca Tin now afloat for the Dutch Trading Company is 850 tons.

TIN Plates continue in fair demand. The shipments for February were 100,000 boxes, against 117,000 same month last year. Exports last year were 71,000 tons, against in 1865, 62,700 tons.

LEAD is very quiet indeed, and the price has receded. The Board of Trade returns give the following:—Imports for the year ending Dec. 31, 1866, 36,946 tons; 1865, 34,903 tons. Exports for the year ending Dec. 31, 1866, 30,422 tons; 1865, 27,278 tons.

SPELTER receded in price to about £21. 10s. The market is now firmer. The stock on the 1st inst. was 4,120 tons, against 5,886 tons 1st March 1866.

QUICKSILVER remains £6. 17s. per bottle.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

We have no alterations to note since our last issue in freights to the Eastern ports. There is still a good demand for tonnage, and previous quotations are well maintained.

Current rates of freight for vessels on the berth:—To Yokohama 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £57. For Saigon: £50. For Yokohama: £50. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 4s. For Singapore: £1 16s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

MISCELLANEOUS.

At SANTOS.—Jan. 21, Andromeda, Ruding, sailed for Batavia.

At RIO JANEIRO.—Jan. 21, Kai-you-mar (s), from Holland, for Japan to coal.

The arrival at Brouwershaven on the 25th Feb., of the Vriendschap, Bruggen, from Batavia, has been contradicted.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 12, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne." on the Government Stamp. Overwhelming medical testimony accompanies each bottle Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.

ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

PRICE.—To Subscribers to the Weekly issue, 8 dols to Non-subscribers, 12 dols. Single copies, 50 cents.

ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

HOLLOWAY'S PILLS.—ALL OUR FACULTIES.—Almost all disorders of the human body are distinctly to be traced to impure blood. The purification of that fluid is the first step towards health. Holloway's Pills recommend themselves to the attention of all sufferers. No injurious consequences can result from their use; no mistake can be made in their administration. In indigestion, confirmed dyspepsia, and chronic constipation, the most beneficial effects have been, and always must be, obtained from the wholesome power exerted by these purifying Pills over the digestion. Persons whose lives were a confirmed series of sufferings have been restored to ease, strength, and perfect health by Holloway's Pills, after the fruitless trial of the whole pharmacopœia of physic.

GRANT'S TRANS-MONGOLIAN TELEGRAMS.

VIA KIACHTA.

This line, which has for its object the most rapid transmission of Telegrams between Shanghai and Europe and *vice versa*, was organised in the spring of 1866, and although during the first two months it did not realise the expectations of the projector, who proposed to forward messages between Europe and China in 12 days, yet, considering the fact of its being a new scheme and one subject to many difficulties at first, it is satisfactory to know that all the Telegrams despatched from Shanghai for London have invariably during the last three months reached their destination long before those forwarded *vid* Galle, and the fact, which is patent to all the large mercantile houses of Shanghai, that many thousands of pounds have been saved by the earlier Telegrams which have been transmitted by this line, is a sufficient proof of its sound and practical utility.

Until recently the undertaking was a monopoly to the original subscribers, who received their private communications by this service long before the public.

The Projector having made a proposal to the original subscribers to take over all their interest in the line and pay up the whole of the outlay, a general meeting was held, at which it was unanimously agreed to accede to the proposal.

THE LINE IS NOW THROWN OPEN TO THE PUBLIC.

There are employed in the service of GRANT'S TRANS-MONGOLIAN TELEGRAMS—280 Ponies, and 40 Couriers. With Agencies at Kiachta (the residence of the Manager), Urga (the Capital of Mongolia), Kalgan or Chang-kia-kow (at the Great Wall), Tien-tsin, and Shanghai.

The days of despatch from Shanghai are advertised in the *North China Daily News*. EXPRESS Telegrams may be despatched by any steamer.

Telegrams for China by the regular weekly courier must be despatched from any Telegraph Station in Europe every TUESDAY, addressed "GRANT, KIACHTA." Express Telegrams may be sent on any day of the week.

Charges from Shanghai to Europe and from Kiachta to China :—

REGULAR COURIERS.

Twenty words	Tls. 15
Thirty words...	20
Forty words ... ... —	25

And for every Ten words in addition Tls. 5 extra.

EXPRESS COURIERS.

Twenty words	Tls. 150
Thirty words	155
Forty words	160

And for every Ten words in addition Tls. 5 extra.

Telegrams from Shanghai must be addressed thus :—

TELEGRAM (20) WORDS
GRANT, KIACHTA.

If Express, the word "Express" must be written on the Envelope. Telegrams from Europe must be addressed "GRANT, KIACHTA." If Express, "GRANT, KIACHTA, EXPRESS."

Courier charges to and from Europe must be paid in China to Messrs. HALL and HOLTZ, Agents, Shanghai, or to Messrs FERGUSSON and Co., Agents, Tien-tsin. Mercantile houses in Japan, Hong Kong, &c., must appoint Agents for the reception of their Telegrams at Shanghai, or Tien-tsin.

SUBSCRIPTIONS FOR 1867.

Annual Subscribers from Europe to China	£120 stg.
Annual Subscribers from China to Europe	100
Annual Subscribers from Europe to China and China to Europe	200

These rates are exclusive of Express Couriers and Telegraph Charges, viz. :—Twenty words, 7 roubles or Tls. 2.50 Shanghai Sycee; and for every ten words extra, Rs. 3.50, or Tls. 1.25 Shanghai Sycee. Annual Subscribers have the privilege of sending Telegrams of any number of words to any *one* person or firm; the name and address of such person or firm must be given on payment of subscription. If an Annual Subscriber or his Agent publishes in any newspaper, or allows the contents of any Telegram to be made public without the special consent of the undersigned, the said Annual Subscriber shall forfeit his subscription.

Telegrams may be despatched from Europe from Tuesday, 19th February, to Tuesday, 19th November, inclusive. From Shanghai, on the departure of the first steamer to Tien-tsin, till the freezing of the river Peiho.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

HAYO-MARO.—The DEPARTURE of this beautiful extreme clipper twin screw steamer for CHINA and JAPAN, via Singapore (also Cape de Verds and Cape of Good Hope, should sufficient inducement offer), has been DEFERRED until the 20th. Can accommodate a few more first-class passengers. Carries an experienced stewardess for ladies' attendance. No cargo taken.

For Passage apply to Captain Carnes, at Mr. John Preston's, 98, Gracechurch-street.

STEAM to YOKOHAMA and NAGASAKI Direct.—To sail from Glasgow on the 25th March, will touch at St. Vincent and Singapore to coal, the splendid new composite, Clyde-built screw steamer COQUETTE, A 1 12 years, 626 tons register, horse power 90 nominal, 380 indicated; W. LOBNITZ, Commander. This beautiful vessel, just launched and built under special survey, is confidently expected to make the passage in 80 days, and is strongly recommended to shippers of fine goods.

For freight apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C. Goods to be consigned to Messrs. ALLAN C. GOW and Co., Glasgow, and to be distinctly marked for which port they are intended.

STEAM from the CLYDE to SINGAPORE and HONG KONG.—The fine, new screw steamer PEI-HO, JOHN BELL, commander, will be despatched about the 10th of April. A few passengers will be taken at moderate rates.

Apply to Capt. Bell, on board; or to Browne and Watson, 80, Union-street, Glasgow.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the well-known clipper, INVINCIBLE, A 1 13 years, 657 tons register, C. BEECHING, Commander; lying in the London Docks. This ship is in first-rate order, having been dry docked and newly metalled. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR HONG KONG and WHAMPOA direct, to sail on the 16th March, the well-known China clipper-ship NORTHFLEET, A 1 14 years, 878 tons register, W. SYMINGTON, Commander, loading in the East India Docks. This splendid vessel, newly coppered, is strongly recommended to shippers.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C.; or to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

With quick despatch.

FOR KANAGAWA (YOKOHAMA), JAPAN, direct, the splendid China clipper ship CARACTACUS, A1, 13 years, 679 tons register, G. MURRAY, Commander, East India Docks, has good accommodation for passengers.

For freight or passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

COLOMBO Direct (warranted first ship), the beautiful British-built clipper ship BOLDON LAWN, A 1 11 years, 551 tons register, now newly coppered; W. B. HOPPER, Commander; is rapidly loading in the West India Docks, and shippers are requested to send their goods down immediately. Has very good accommodation for passengers.

Apply to JOHN C. CAMPBELL, 22, Great St. Helen's, or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St Helen's, E.C.

Has a large portion of her Cargo engaged, and will meet with very quick despatch.

DIRECT for BOMBAY (first ship) the splendid Scotch-built clipper ship JANET MITCHELL, A 1, 13 years, 711 tons register, J. S. BINNEY, Commander; East India Docks. This splendid vessel is well-known in the Bombay trade for the good order in which she has always delivered her cargoes, and will be found a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

FOR YOKOHAMA (KANAGAWA) the splendid clipper barque CASTLETON, ——, commander, 499 tons, A1 at Lloyd's for twelve years, and twenty years in red in the Liverpool registry, only four years old, noted for her good delivery of cargo and rapid passages.

For freight or passage apply to Messrs. J. NAPIER and SONS; or E. C. FRIEND and Co.

From Marseilles, April 12.—To Shanghai: Mr. Hugh Fraser. To Hong Kong: Mr. E. H. Lavers. From Suez to Ceylon: Mr. A. O. Cowan. From Marseilles, April 20. —To Ceylon, via Bombay: Mr. G. G. Thomson.

Per P. and O. steamer, from Southampton, April 20.—To Ceylon: Mr. G. Crowe.

Per P. and O. steamer, from Marseilles, April 28.—To Shanghai: Mr. and Mrs. W. H. Fittock. To Ceylon: Mr. and Mrs. Lewis.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have advices to the 2nd February. The outward mails of Nov. 27, conveying also telegrams from London to Dec. 10, arrived on the 20th January. By the arrival of the *Colorado* (already announced by telegraph) telegrams from London had been received to Dec. 30. The following items of news are from the *Japan Herald*:—

On the 18th January the P. and O. steamer *Azoff*, chartered by the Japanese Government to convey to France the contribution of Japan to the great Exhibition at Paris, arrived here from Yedo and started the following morning for Suez, to touch only at Hong Kong and other coaling stations. The collection was exhibited in Yedo to some of the foreign Ministers and their friends some months since, and we are informed by gentlemen who saw them that it will make a most attractive feature even in that wondrous palace, in which all that is beautiful in nature and art will be represented. Not only has Japan sent specimens of the country's products, manufactures and works of art to the great Exhibition in Paris, but already many of the people have gone, and others are going to be present at the opening. Stosbashi has determined not to be behind other rulers in adding his quota of effect to the occasion. A Prince of his house, a younger brother, is to proceed to Paris, attended by a suite commensurate with his rank and the greatness of the occasion. He is to arrive in Paris some little time before the opening day, and afterwards, it is understood, he will remain in Europe for a time for study and observation. It is quite resolved that ambassadors shall be sent from Japan to the Courts of the principal treaty Powers, but the visit of the Prince has nothing to do with that. He is the special representative of his brother at the great world's meeting, and has no duties unconnected with this object.

Stotsbashi was formally installed into his new office on the 10th of January. Up to that day he was only administering the government as Shiogoon elect. From that day he is fully endowed with the Shiogoonal power. As we have previously stated, he has expressed his wish to invite the foreign Ministers to visit him at Osaca. It only remains for the certainty of their accepting his invitation to be made known to him, when the invitation will be formally delivered. In the meantime it is looked upon as a certainty, and great preparations are being made for a proper reception at Osaca Castle.

On the 12th January H. E., D. de Graeff van Polsbroek, in his capacity of Plenipotentiary for his Majesty the King of Denmark, concluded a treaty of friendship, commerce, and navigation between that kingdom and Japan. The foreign nations having treaties with this country are now England, France, America, Holland, Prussia, Switzerland, Portugal, Belgium, Italy, and Denmark.

On the 25th January at half-past six o'clock a fire broke out in the roof of the house occupied by Sir Harry Parkes, the British Minister. The roof ignited either from the overheating of the flue from one of the stoves, or from sparks falling on the roof and driving in under the tiles, and the flames spread rapidly through the whole building. Lady Parkes calmly gave directions as to the children being placed

Digitized by Google

in safety, and only when she found nothing could be done did she leave the burning house. Much help being at hand a good deal of the furniture was got out, and Sir Harry saved the more valuable of his papers, &c. Several engines were quickly on the spot, and with them everything possible was done; but their greatest use was in keeping the fronts and roofs of opposite buildings wet, so that the showers of sparks fell harmlessly. Much activity was shown by the soldiers of the 9th Regiment, of which a detachment arrived very promptly on the scene, accompanied by Colonel Knox and other officers. Several naval officers and sailors were also present. The Governor of Kanagawa arrived very early, as did also H. E. M. Leon Roches, the French Minister. They expressed their sympathy with Sir Harry and Lady Parkes, a sentiment that is most heartily shared by every person in the settlement. The fire occurred just when all the family were occupied in preparations for an evening party, to which a very large number of guests had been invited. Mr. Hegt's engine was, as usual, amongst the most efficient, and to that gentleman and to all others who assisted are due sincere thanks for their successful efforts in preventing the sparks from catching other approximate premises.

The general meeting of the Yokohama Race Club had been held. The principal business done was the passing of a vote of thanks to the retiring committee for their energetic conduct of the club's affairs, and to the Japanese Government for the excellent manner in which they had completed the course, &c. Messrs. Fraser, Lindau, Wallace, Malcolm, and Bond were elected as the committee for the present year.

On the 30th Jan. a steeplechase match, which had been made between the well-known Japanese ponies Pericles (rider, Lieut. Bond), Boomerang (rider, Captain French), and Sweet William (rider, Captain Roberts), was decided on the steeplechase course adopted at the late races. It terminated in favour of Pericles, who came in fifty or sixty yards ahead of Boomerang, who was second. Sweet William and his rider came to grief in the last descent, and thus lost their chance. At the last races Sweet William came in an easy winner the first day, when Pericles was so distressed that he fell back at the last jump, and had to be led in; the second day Pericles won easily. Besides the steeplechase there were one or two scratch flat races.

A rumour has gained some currency that the Japanese intend to avail themselves of the opportunity which they anticipate will be afforded to them by hostilities on the part of the French against Korea to make war upon that country in retaliation for wrongs inflicted on Japan in old times. The number of gunboats which the Japanese are at present purchasing would seem to lend some colour of truth to the rumour, though, at the same time, it is very doubtful whether the Japanese would so soon after the troubles in their own country undertake an expedition of the kind. Were they, however, disposed to do so, it can scarcely be imagined from the accounts which the French gave of the Koreans, that the Japanese would have much trouble in bringing them into subjection.

CHINA.

PEKING.

The new French cathedral at Peking was opened on New Year's Day, when the French Minister attended in state. It is a fine building and looks especially grand alongside of the miserable China houses. The mission, which it will be remembered was sent by the Emperor to Korea to advise a conciliatory policy, has not yet returned to the capital, a fact which goes to confirm the report that the Regent had thrown the members into prison. Another mission is about to set out for the Loochoos, embarking from Foochow, but what its object is is not explained. From the nomination of Pin as superintendent of the new foreign college, the happiest auguries are drawn as to the intention of Government to support the institution warmly. The three youths who accompanied Pin to Europe have been taken into Government employ.

CHEFOO.

The *Wachussetts* left Chefoo on the 21st January for Korea, it is believed to make inquiries regarding the *General Sherman*, and, if possible, ascertain the real fate of her crew. It is reported that the English, French, and American Ministers have agreed to go there together in the spring, accompanied by their respective fleets, and insist on treaties. This is of course unlikely after the news from home that the British Government will not interfere, but we give the rumour for what it is worth. Another rumour is that the French are likely to take separate action to settle their little account with the Koreans; but the joint action seems much more likely. Chefoo residents, therefore, are looking forward to a lively spring, as that port would in all probability be the basis of operations. Our correspondent expresses himself confidently that the North is destined to have the honour of the first railway. From Chefoo to Peking is the line that will be made first.

SHANGHAI.

Dates from Shanghai are to the 10th February. The French mail of Dec. 17th was received on the 7th February.

A case of piracy has occurred in the interior, northward. Three foreigners forcibly entered a boat near Kin Tsun, in the district of Tsinpoo, and stole therefrom $3,000 in cash and tls. 1,000 in notes, together with one bale of silk. The robbers caught the boat about noon, and going on board intimidated the owners and boatmen, and about 11 P.M. put them on shore at a deserted spot, and made off with the booty. The nationality of the culprits is not known, nor are their names. The *Recorder* also mentions the following case:—A band of native robbers recently entered a bank at Soochow and made away with sycee, dollars, and gold to the value of about tls. 5,000. Only one of the malefactors was captured by the native authorities. He was tried and executed; but the others seem to have got away scot free with the booty.

Another European pirate has just met with condign punishment at Shanghai. The *News* states that at the Mixed Court on February 2, Jesse King was brought up charged with being engaged in the piratical expedition for which Smith and Caleby had been sentenced to two years' penal servitude. The prisoner had already acknowledged his guilt. In consideration of the evidence he gave enabling those two men to be more readily brought to justice, H.B.M. Consul recommended his Excellency the Taotai to pass on him the mitigated sentence of penal servitude for six months, with deportation from China at the expiration of the term. Sentence accordingly.

The Customs return of trade at Shanghai during the month of December is chiefly noteworthy for the great falling off indicated in the imports of shirtings; only 195,405 pieces of grey, and 19,653 pieces white shirtings having arrived, against 403,373 and 44,578 respectively, during the same month of 1865. Camlets also fell from 31,958 pieces in the previous years to 8,490, and Spanish stripes from 11,978 to 6,242. Lustres offer almost the only instance of increase, figuring for 51,370 pieces, against 36,548. Only 6,000 tons of coal were received against 12,000, and only 170 piculs of rice against 36,993. About 4,000 more piculs of green tea came from Ningpo, but 2,000 less from Kiukiang.

Sir Rutherford Alcock has, under date of 14th January, issued a notification to the effect that it shall be lawful for and the duty of Her Majesty's Judicial Officers, when it shall appear necessary, to summon before them and enforce the attendance of all persons who it may be reported to them have no ostensible means of livelihood, and then and there require of such persons to state, and, where expedient to produce, evidence of the means they possess of subsistence; and should it appear that such persons possess no ostensible means of livelihood, it shall be lawful to order such persons to inform the Court of their place of residence, and to report themselves to such persons as the Judicial Officers shall direct, at such times and with such formalities as shall be then directed; and any neglect in obeying any order thus given shall render the person guilty of the disobedience liable to imprisonment for a term not exceeding ten days or deportation from China, and to be detained in custody until a fit time and opportunity for his deportation arrives. In consideration of the urgent necessity for this regulation the Minister further orders that it shall have effect unless and until disapproved of by Her Most Gracious Majesty, and notification of such disapproval is received and published by him in China.

The following additional particulars are given of the recent transfer of the steam traffic on the Yangtsze:—The Shanghai Steam Navigation Company, which has been steadily recovering from the depression caused by its many misfortunes during the early portion of its career, has now completed an arrangement by which it gets nearly the whole of the river traffic into its hands. The directors have bought the whole of Messrs. Dent and Co.'s property on both sides of the river—both wharf and dock—and their two steamers, the *Hirado* and *Fusiyama*, for taels 550,000, payable in instalments extending over eighteen months. They have also arranged for the purchase of a new steamer now being built by Messrs. Jardine, Matheson and

Digitized by Google

Co. in England, and have come to an understanding with these firms that neither will compete with them on the river, while the S.S.N. Company agrees not to ply between Shanghai and Hong Kong. The company further undertakes not to raise the rate of freight beyond taels 5 a ton from Hankow, at which it will, we believe be temporarily fixed, as the present charge of taels 4 does not prove remunerative. The *Tawah* is already in their hands, the *Kiangloong* therefore remains their only competitor.

The Shanghai *Recorder* says:—"We are glad to be able to announce that a despatch has been received from the Postmaster-General, Hong Kong, to the effect that the Duke of Montrose has given his sanction to the proposal that when the regular day for despatching the mail in Shanghai falls on a Monday, the mails shall be despatched on the previous day; an end will therefore be put to the Sunday mail grievance. We presume the regulation will apply equally to Christmas Day. If this be not certain, it would be well to ask the question between this and next Christmas."

The *North China Daily News* contains the following paragraph, relating to the Prussian Consul at Shanghai:—"Mr. Tettenborn is singularly unhappy in his notifications. A short time ago he instructed Prussian subjects to fall into the trap prepared by the Chinese, with the object of making foreigners parties to the collection of squeezes from themselves. Now, because a Prussian carpenter, who proved himself before the Board of Examiners supremely ignorant of almost everything a pilot should know, is refused a certificate, H.P.M.'s Consul-General withdraws from the association of treaty consuls who are endeavouring to place the Yangtze pilotage on a better footing, and declares that he will issue licences himself. Without for a moment questioning Mr. Tettenborn's ability to decide on the competency of his countrymen to pilot vessels in the Hwangpoo and Yangtze rivers, we cannot but regret that he should have seen fit to isolate himself from his colleagues." We understand that Mr. Tettenborn has since relented, and now co-operates with the Board.

A complicated case has been decided in the Mixed Court, of which the *North China Herald* gives the following outline:—

"A more hopelessly confused dispute than that between Messrs. Adamson and Co. and Wong Kin-kee seldom has to be unravelled. It affords, however, a fair sample of the complications likely to arise when business between foreigners and Chinese is conducted on the basis of 'friendly feeling' alluded to by the plaintiff; and mutual understanding, instead of documentary proof, is relied on to bring about a satisfactory settlement. In order to fully understand the case, it is necessary to go back to the action lately brought by Messrs. Adamson and Co. against Kin-kee in the Mixed Court for the recovery of 30,000 taels advanced to get him out of gaol when imprisoned for debt by Messrs. Dent and Co. Judgment was then given against him, as entries in Messrs. Adamson's books attested the advance, and he had continued to pay interest on it up to the present time. Kin-kee, however, repudiates the debt, affirming that they merely paid Dent and Co. with money handed to them by his friends for that express purpose; that that transaction, therefore, is at an end, and that the entry against him in the books of the firm had a totally different origin. Not only is he not indebted to them in the amount stated, but they owe him 35,000 taels on grounds which a whole history is necessary to explain. The case, therefore, stands thus. Messrs. Adamson and Co. allege that Kin-kee owes them 30,000 taels, which they advanced to get him out of gaol, but which Kin-kee asserts have been paid. And he in turn avers that they owe him 35,000 taels, part of which they deny having received, and to part of which they deny his claim. To explain away the debt, and to recover the sum which he claims, was the double object of the present action.

"For the origin of the dispute we have to go back to 1862, when the rebels were roaming through Anhwey, and Kin-kee was sent to purchase Fychow teas on behalf of his foreign patrons. A portion of the teas collected fell into rebel possession, a portion came to grief on their way down country, and a loss of 39,800 taels resulted from the transaction. Kin-kee's story now is that Messrs. Adamson and Co. were disinclined to advise their partners of the loss, and engaged him to procure them funds to cover the deficit. He was only able personally to advance 9,800 taels, but negotiated a loan for them of the remaining 30,000 taels, of which he undertook the responsibility on the understanding that he was to have an opportunity of repaying himself out of future transactions with which the firm would entrust him. The loss, therefore, was entered as a loan to Kin-kee, and he has continued for several years to pay interest on it as though it were a *bona fide* transaction. His refusal to continue doing so was the cause of the action in the Mixed Court; and the loss of that action prompted him to bring a counter claim for the recovery of the 9,800 taels advanced in 1862 of a subsequent loan of 9,100 taels made by him in 1864, and of the interest paid by him during four years on the fictitious loan of 30,000 taels, of which we have—from Kin-kee's point of view—explained the origin. Messrs. Adamson's answer, we believe, is very brief; they deny the whole statement; deny that they ever received the sum paid for Kin-kee's release, and deny that he ever made the advances alleged. They further produce an acquittance signed by Kin-kee of all outstanding claims which might have existed between them on the score of tea transactions, and an acknowledgment of debt which he now repudiates. Their books too are innocent of any entry referring to such transactions. On Kin-kee, of course, fell the onus of proving his statement. He failed to do so, and a nonsuit was the result."

The following legal cases are also reported:—

BANKRUPTCY COURT.

January 16.

(Before Sir EDMUND HORNBY.)

IN RE JARVIE, THORBURN, AND CO.

This meeting had been adjourned from the 28th November. The statement of accounts, filed on the 2nd January, was as follows:—

DR.	Tls.
To unsecured creditors	1,706,435.37
To creditors holding security	130,705.60
To ditto to be paid in full	777.28
To assignees	12,375.76
	Tls. 1,848,506.73
Pendencies:—	
Interest and the exchange	Tls. 249,033.88

CR.		Tls.
By debtors, good		8,831.40
Doubtful...	Tls. 40,963.78	
Bad	743,982.81	
By property given up to my official assignee at Shanghai		336,490.75
By bills in the hands of creditors		175,905.35
By shipments unaccounted for		102,427.33
Deficiency		1,224,851.90
		Tls. 1,848,506.72
Pendencies:—		Tls.
Interdicted funds in England		604,406.62
Probable proportion to this estate		374,040.85

The partners' expenditure from January, 1864, to February, 1866, was Tls. 37,000,00.

Messrs. Dent and Co., per W. Hanssen, attorney for Hamilton, Grey, and Co., of Singapore—Balance of account admitted, tls. 59,155.

A claim of tls. 1,520.84 by the China Insurance Company in respect of unpaid premiums on policies of insurance. Against this the company sought to retain tls. 1,359.18 dividends due on two shares in the above company, and also the proceeds, 1,164 tls. of the two shares sold, they being willing to hand over the balance to the assignees.

The consideration of this claim was adjourned.

Commercial Bank Corporation by the Liquidator claimed tls. 9390.52 in respect of a dishonoured bill for £2,800, tls. 9,020,146 estimated at 6.2½.

This claim was admitted with interest and charges.

Messrs. Smith, Elder, and Co., through the official assignee, claimed £20. 9s. 7d.

This claim was admitted.

There being no opposition to the bankrupt's discharge it was accordingly granted.

MR. MYBURGH said he should not apply for the declaration of a further dividend in consequence of an arrangement having been came to between the assignees of the bankrupt and the trustees of the estate of Buchanan, Hamilton, and Co., which required some consideration to understand, and which would materially affect the amounts which the different bill-holders under the estate of Jarvie, Thorburn, and Co., might have to receive. It appeared that a remittance fund had been created, out of which the bill-holders would have to receive a portion of the amount of their proofs, so that they would be paid a dividend out of the bankrupt's estates and out of this fund. It would therefore be inexpedient to declare a dividend, inasmuch as if too much were paid to firms also in liquidation, it would be difficult perhaps to get the excess repaid.

Mr. MYBURGH also applied for leave to be given to the assignees to make payment for services rendered by a Mr. Barnard, the professional accountant employed by them in the preparation of the bankrupt's accounts, as they were very complicated and extended over a long time.

Leave was granted.

An application was made for remuneration to the creditors' assignees.

The CHIEF JUDGE, however, did not think the Act gave him power to sanction any payment to the creditors' assignees by way of remuneration for services. All he could do would be to sanction any expenses they had incurred in the performance of their duties. If, being professional men, such as accountants, they had acted professionally and such professional assistance had been necessary then he would sanction their being paid. In

Digitized by Google

this case, however, a professional accountant had been appointed and payment for his services had been sanctioned.

January 15.
(Before Sir EDMUND HORNBY.)

RE ROBERT MACKENZIE.

The bankrupt filed his accounts on the 5th January. The following is the statement:—

DR.	
To creditors unsecured	129,153.19
To —— holding security	64,314.00
To liabilities on bills discounted	
To —— accommodation bills, 7,000, ...	
To creditors paid in full	
	193,467.19
CR.	
By debtors, good, ...	
By do., bad,...	23,100.00
By property given up to my assignees—furniture, &c., ...	1,239.50
By property in the hands of my creditors ...	8,100.00
By balance (deficiency)	161,026.69
	193,467.19

Private expenditure for the year preceding bankruptcy about tls. 6,000.

Mr. Rennie appeared for the bankrupt and Mr. Myburgh for the Agra and Masterman's Bank.

Mr. JOHNSTON, on behalf of Messrs. Jardine and Co., claimed tls. 2,412.42 on balance of account, which was admitted.

Mr. BAYNE, on behalf of the Bank of Hindustan, claimed tls. 8,302.49 on balance of account, against which the bank held a share in the North China Insurance Company, which was admitted, subject to an application to sell the share.

The CHIEF JUDGE: An application has been made by the Bank of Hindustan to sell this share. Now, although there is a clause in the Deed of Settlement of the North China Insurance Office that no shares can be sold excepting to such person or persons as the board of directors may approve, I am of opinion that when a shareholder comes into bankruptcy the Court can compel the company to accept the best purchaser, meaning by the best purchaser he who will give the most for the share or shares. It is the duty of the official assignee to look after the interests of the creditors irrespectively of those of the company. The bank who are the equitable owners of the share should make an application in the regular way to the Court who will then direct the legal owner, the official assignee, to sell the share for the benefit of the bank; or it will direct him to make the transfer to the party accepted by the office, on the terms that the tenders made for the share are shown to him, in order that he may judge whether or not the best price offered has been accepted.

Mr. STEWART, on behalf of the Oriental Bank, claimed tls. 27,884.97 on balance of account which was admitted, also tls. 11,183.45 which was admitted, also tls. 24,397.84. Against this last claim the bank held shares in two insurance companies viz. :—one in the North China and three in the China Fire. The consideration of this claim was adjourned until an application for sale of the shares should be made.

Mr. MYBURGH claimed for the Agra and Masterman's Bank on a balance of account, tls. 41,734.45, which was admitted. He stated that he intended applying for the sale of the shares of which his clients held the equitable estate. It was also his intention on behalf of his clients to oppose the discharge of the bankrupt, not so much with the view of preventing the delivery of the order of discharge or its adjournment *sine die*, as with a view of endeavouring to get it given coupled with some arrangements as to future acquired property or income. Mr. Myburgh considered that he should be able to show he was justified, at least, to this extent, in the opposition he proposed to offer. It would be necessary for him to examine the bankrupt, but under the circumstances he should prefer availing himself of an adjournment, suggested as necessary, to enable him to examine the accounts filed, and he should then be prepared to enter into the case fully.

BOURJAU, HUBENER AND CO. V. FOONG-TAE-HONG.

This was a claim for $288.32. Foong-tae-hong in April chartered the *Euxine* for a voyage from Chefoo to Swatow. The vessel was disabled in the river by getting on the North Bank, and was subsequently sold by order of the Supreme Court. The plaintiffs had received $1,000 as advance on the charter party. The plaintiffs now claim from the defendants tls. 258.32 as general average. The Court adjourned the case. The Prussian Consul, we may state, had decided that Bourjau, Hubener and Co. could not be compelled to refund the tls. 1,000.

GLOVER AND CO. V. SHEN-YUE.

This was a claim of 233.12 tls., the balance of freight on 9,541 piculs of millet conveyed by the *Corea* from Newchwang. The defendant said that there were not more than 9,000 piculs, and at the Custom-houses in Newchwang and Shanghai the number of piculs had been passed as 9,000 also. The bill of lading was produced for 9,000 piculs of millet. In the absence of the plaintiff, the Court gave judgment for the defendant with costs.

HANKOW.

Rebel depredations in the surrounding country as usual occupy a prominent feature in the news from this port. It had been hoped that the rebels had retreated on Honan, but the expectation seems to be premature, and their reappearance, to the great discomfiture of the Chinese authorities, is reported.

KIUKIANG.

The only item of news from this port is the laying of the foundation-stone of a new church, which ceremony was performed on the 25th January by Mr. Medhurst, H.B.M. Consul at Hankow. A public breakfast, at which a large number of the community and several guests from Hankow were present, succeeded. The whole proceeding went off most satisfactorily.

HONG KONG.

Dates from this port are to the 15th February. The outward mails of December 26 arrived on the 8th February with London telegrams to the 7th January.

The most interesting topic of conversation at Hong Kong during the fortnight had been the arrival of the *Colorado*. The *Daily Press* says:—The *Colorado*, it appears, will not go away from here empty handed. The agents of the line have already refused to take any more freight for Yokohama, on account of the poor facilities there for promptly discharging a large quantity, and fearful of detaining her too long at that port. For San Francisco a good amount is offering, much more than was expected, which speaks well for the favour with which the line is already beginning to be viewed. It seems however that as far as accommodations go, those of the *Colorado* although of the first description, are better adapted to residents of America or Europe rather than those of Asia. A passenger, writing to the *China Mail* says:—"Here every person takes his daily bath. Only fancy 150 old residents in India bound to San Francisco, all wanting a bath in the morning, and all waiting their turn to get into the one solitary bath that this steamer contains, with the privilege of paying a waiter 50 cents for getting it ready. Another great abuse is that there is no light table drink supplied by the company, which our old P. and O. Company are very liberal of; but on board the *Colorado* such is sold at exorbitant rates. Verily, without these and a few other abuses are altered by the Pacific Mail Steamship Company, the P. and O. will get a long start in the competitive battle."

The half-yearly general meeting of shareholders in the Hong Kong and Shanghai Banking Corporation was held on the 11th February. The Hon. J. Dent occupied the chair. A report and balance-sheet were read, from which it appeared that the net profit for the half-year ending December 31st, including $45,696.86 brought forward from last account, after defraying all outgoings and current expenses, deducting interest paid and due, and making provision for bad debts, amounting to $347,085.07; of which, after taking out rebate on bills not yet due, and allowing for the amount written off preliminary expenses, the remuneration of directors, &c., there remained for appropriation $290,901.44. From the latter sum the directors recommended the distribution of a dividend of $7.50 on the paid-up shares and $1.50 on the new shares, being equivalent to 6 per cent. for the half-year or 12 per cent. per annum, which will absorb $180,000; and of the balance the directors propose carrying $75,000 to the reserve fund, and $35,901.44 to the credit of new account. The report and balance-sheet were unanimously adopted.

The first ordinary meeting of the Hong Kong, Canton, and Macao Steamboat Company was held on the 8th February, and a satisfactory statement of the company's affairs was laid before the shareholders. No dividend was declared, but in view of the exhausting competition on the Canton river, out of which the company only came successfully towards the close of last year, and in view of the high prices they had to pay for the steamers taken over from Messrs. Russell and Co., no dividend was expected. The shareholders will probably have been highly satisfied under the circumstances at finding that the profit and loss account of the year showed a small favourable balance, which the board recommended should be carried forward to new account as undivided profits. The report was agreed to, and the only resolutions brought forward at the meeting related to the remuneration of the directors and the conditions of insurance on the steamers.

We have been requested to contradict the statement which appeared in our last as to Mr. Edward Webb having gone to China to join Messrs. Birley and Co. We find that several letters from Hong Kong mentioned the same thing, but we are assured it is incorrect.

There is still (says the *China Mail*) some business being done at the Mint, if not for the employés, at least for the thieves. A somewhat extensive robbery was committed in that establishment lately. It would seem that Mr. Davies, superintendent of the bullion office, had one night left the key of his safe in the lock, certainly a very convenient aid to any one kleptomaniacally inclined. An individual so touched was found ready-made in the person of one of the coolies whose duty it is to put out the lights early in the morning; and this member of the department, we learn, has disappeared to parts unknown. The sum taken amounted to $180, consisting of notes and silver coins of various values. Scouts are said to be closely upon the

Digitized by Google

fellow's track, and may probably succeed in apprehending him; but in the meantime it might be as well for keys to be left elsewhere than in their locks, and a system of searching Chinamen at the Mint adopted.

With regard to the working of the Mint, the *Overland Trade Report* says:—"In many ways the action of this Government in connection with the Mint has been difficult to comprehend, but in nothing more than in relation to the small coins from which so much was expected and so little advantage has as yet accrued to the colony. One of the queries put by the Governor to the Mint Commissioners related to that subject, and if our readers turn to the report they will see that the paragraph numbered six deals with it. The Commissioners say that while the Mint will not answer on a large scale except by the successful production of Hong Kong dollars, 'with regard to the subsidiary coinage of fractional parts of a dollar, there is so much necessity for that here, that we think it will always return a profit upon its own cost to Mint, but the extent of that profit it will be impossible to estimate until we know how far the colony and the neighbouring ports of China will absorb such coinage.' What efforts have been made to push the subsidiary coins either here or anywhere else? They have it is true been on offer at the Treasury, and anyone who chose to take dollars or bank-notes to that office has been at liberty to obtain ten and twenty cent pieces in exchange, but that is merely suffering the public to obtain them, that is not pushing them into extensive circulation."

Mr. Mitchell, the Postmaster-General, and Mr. Rae, from the General Post-office, London, had started in the *Douglas* on a tour of inspection of post-offices in the North and Japan. The main object of their tour is to make arrangements for transferring the British postal service of China and Japan to the Hong Kong office.

By advices from Canton we learn that the mandarin troops recently despatched against the Hakkas were at first repulsed, but that returning with reinforcements they succeeded in defeating the Hakkas and capturing some prisoners, who were taken to Canton and executed. The body of so-called "Hakkas" is however stated to be composed of a large number of insurgent Puntis, with a certain number of Hakkas, who give their name to the whole force. The new Governor of Canton is said to be exciting some dislike amongst his subordinates by the vigorous way in which he deals with abuses, and still more by his personally seeing his orders executed. It is said that he dispenses too much with form and ceremony, and does not give those under him the chance of gaining the fair perquisites of their office in the way of "squeeze." A few officers like this at the more important posts would almost regenerate China.

Attention has been directed to the subject of railways in China (says the *Overland Trade Report*) by the receipt in Hong Kong of a despatch from Sir Rutherford Alcock to the committee of the China Railway Company. This despatch arrived curiously *apropos* to the statement that the superior diplomacy of the French agents at Peking had obtained for their Government the right to construct a line between Shanghai and Soochow. It has been held that this despatch throws discredit on the statement, but all that it proves is that the application of Sir Rutherford Alcock to the Chinese Government was rejected. This can hardly surprise any one who reads even the present despatch, in which the British Minister epitomises the communication he had sent to Prince Kung. He reports himself as having enumerated the advantages reaped in Western countries from the existence of railways, pointing out that revenue might be derived from them, that they improved commerce, and that they greatly increased the military strength of the Government. The prejudices which had been felt against them at first in other countries, he said, had always disappeared on their introduction. He did not urge Prince Kung to reply immediately, but to wait and hear what the Chinese Commissioner who recently proceeded to Europe with Mr. Hart had to say on the subject when he returned. It is hardly necessary to add that such an application as this, met simply with a verbose negative from the chief of the Tsunle-Yamen. Judging the despatch to Prince Kung by what Sir Rutherford says of it himself, one might imagine that it was purposely constructed for the purpose of indicating that the writer was merely fulfilling an inevitable form in making his application, and that the Chinese Minister was supplied beforehand with excuses to be offered in return, even the excuse dearest of all to the Chinese nature, the excuse for a long delay. Sir Rutherford wrote in July last, but Prince Kung being told that he was not expected to give an immediate reply, did not answer till December. Then he wrote making commonplace references to the vague and undefined "difficulties" of introducing railways into China, the prejudices of the people, and the undeniable fact that China was different from other countries. The difference he appeared to think mainly consisted in the more elaborate cultivation and occupation of the Flowery Land than those of wild and barbarous regions in Europe, where railways had been introduced with success, and in conclusion he declines to have anything to do with the subject. Sir Rutherford appears deeply impressed with his striking and original remarks, and recommends the China Railways Company to give up their project. That they had not the slightest ground for hoping anything from his assistance; that nothing he was likely to do in Peking would in the least degree promote an important measure of progress in China must have been very obvious from the first to any one who had studied the course of recent British diplomacy in this country. That this should be so is a painful and humiliating state of things. That enterprising English capitalists and men of science (*sic vos non vobis*) should exert themselves in laying the foundations for a great scheme like that of introducing railways in the Far East, only to see others reap the reward of their exertions through the feeble and lethargic character of their national representation is mortifying enough, but it can scarcely have been surprising to those who have been familiar for any length of time with the current of events in this part of the world.

The following fortnightly review of the Hong Kong markets is from the *Overland Trade Report*:—

A somewhat unpleasant discovery is thus recorded by the *China Mail*:—"So soon after the explosion which so clearly brought before the mind of every one the terribly destructive power possessed by gunpowder, it may be matter of surprise to learn that a gunpowder manufactory of rather alarming extent has been in working order for a considerable time at the western end of Victoria. Yet such appears to have been the case up till late last night, at which time police constable Johnson (56) pounced upon the entire establishment. The facts, so far as we can at present gather, are something about the following. In the village of Shek-tong-tsui, within a stone's throw of the Pokfolum-road, and at a distance of about 100 yards from the gas company's works, are situated two small Chinese houses. One of these is the mill, and the other was the storehouse of the factory. In the latter, at the time of the discovery, nearly 200 cwt. of gunpowder were found stored in a wooden chest, and tied up in two mat bags, while amongst the loose stones two stone jars were found containing nearly a cwt. more of the 'fire medicine.' So perfectly unconscious or careless were the powder manufacturers of the dangerous nature of the mixture amongst which they were working, that the box in which the powder was kept formed a bed for one of the workers every night. And, as if nothing were left unprovided for to secure an explosion, a fire for cooking, &c., was burning in the same room. A quantity almost equal to that found (which is now stored at the water police station) is said to have been made at the factory every day; but this we suspect to be an exaggeration."

The following vessels were about leaving for home for the purpose of being put out of commission:—The *Barossa*, 21, 400-horse power, Captain H. Boys; and the *Coquette*, 4, 200-horse power, Commander A. G. Rae.

As usual, the Chinese have during the past fortnight universally given themselves up to the observance of their annual festival of the New Year, which began on the 5th inst., to the exclusion of everything else, and business has consequently been restricted and of small amount. During the last few days, however, some inclination has been shown to purchase, but this has only been of staple articles, and mostly for the recuperation of exhausted stocks, and the supply of a small consumptive demand. It is not probable that business will fairly be in progress again for some weeks, as the holidays extend through a greater portion of the current month, and the wants of the country trade, for which Hong Kong is the base of supplies, are not ascertained until about the beginning of next month. There has been little change in the ruling of commercial values, prices continuing at a low range, and the markets are far from presenting a healthy or satisfactory tone for reasons that were assigned in the last issue of this report, and that to a great extent still continue to exist. The disposition to realise on goods at almost any price is still apparent, and it is known that during the past fortnight sales have been made for cash at

Digitized by Google

rates that can Barely pay the freight and charges on the goods laid down here. The Chinese are always the most persistent of "Bears" and seldom fail to appreciate and take advantage of such a state of trade, and in view of this they are now offering for staple goods scarcely their prime cost at home. Intelligence received by the last mail of the enormous exports that had been made of Manchester goods for China created no little uneasiness in this market, more especially when it was understood that a larger portion of these immense shipments had been made on account of Manchester houses, and were not Hong Kong purchases. That there is no profit to be derived from thus flooding an already weak, and depressed market is very clear, and it appears exceedingly unfair that colonial merchants should have to contend against such fearful odds thus thrust upon them. In view of this there is little prospect of any better range of prices being attained, and the losses that must ensue from the markets being stocked so much in excess of the demand will increase the embarrassments already noticed.

SIAM.

BANGKOK.

A great ceremony has just been celebrated in Siam, which drew large numbers of visitors from all parts of the East, namely, the burning of the body of the Second King of that country, who died a year ago. Siam, unlike most Eastern kingdoms that retain pure their native Government, has prospered apace by its connection with the commerce of Europe, and is more wealthy now, probably, than ever it was under the reign of its ancient princes. This wealth was allowed to display itself on the occasion. Over sixty thousand people were gathered round the scene of incremation, and amid the grotesque and gorgeous panoply proper to the occasion the body of the Second King, a prince who self-taught had become an English scholar and a man of parts, was reduced to dust, by a process somewhat more sharp but not less sure than that which awaits the whole of us.

The *Bangkok Recorder* takes farewell of its readers in its issue of the 16th February, it having been decided by the proprietor and editor to stop the publication. The necessity which compels this step will be regretted as much by the East generally as by the people in Bangkok; for the *Bangkok Recorder* —always decorous and moderate in its writings—afforded us a knowledge of the condition and progress of Siam which must now be greatly shut out from us. It served, moreover, to bring the politics and public concerns of that country so before the view of the world as to give, perhaps, a better guarantee of the maintenance of its territorial integrity than could be afforded by the councils of its rulers.

STRAITS SETTLEMENTS.

SINGAPORE

From this port we have advices to the 22nd February. The English mail of January 10 arrived out on the 16th, and the French mail of January 17 on the 19th February. The latter conveyed London telegrams to the 8th February, the only instance in which public telegrams had reached Singapore in eleven days.

The approaching transfer is the leading topic, and on this the *Straits Times* has the following remarks:—

"The time is now rapidly approaching when the public accounts are to be transferred from the Indian to the colonial keeping—the 30th of April being the expiry of the Indian official year—but as far as the public can judge, very few preparations appear to be making towards this end. With respect, too, to the changes of the various offices under Government, there seems to be quite as little evidence of any approach towards the new order of things. Further than that Colonel Ord, our future Governor, will arrive here by the first mail in March, together with his private secretary—that Mr. Robinson, formerly of the Colonial-office is, to follow shortly afterwards to assume the appointment of Colonial Secretary, and that a few days since Mr. Irvine, the new Auditor General, arrived, actually nothing is known here of the institution of the colonial regime. Major General Kavenagh, will, it is believed, leave Singapore before the arrival of his successor; his health is doubtless the cause of this, his Honour going home upon sick certificate; but the public attribute it in some respect to a feeling of just dissatisfaction with the scant courtesy which, after a period of eight years of uninterrupted toil in the settlement, has been vouchsafed to him in connection with the coming change of Government. It is beyond all doubt that as the termination of our connection with India approaches, a feeling of something very akin to regret begins to display itself. This is due in a great measure to the clean sweep of office-bearers which has been determined upon, as the cry for the transfer was one against measures not men."

The British steamer *Agamemnon*, Captain Middleton, from Liverpool (via Mauritius and Penang), arrived on the 21st of February.

The *Agamemnon* experienced heavy weather after leaving Mauritius, which caused a breakdown in her machinery, and compelled her to put back to that port for repairs, where she remained twelve days. She had 352 tons of cargo for this port, and 778 tons for China.

JAVA.

BATAVIA.

From this port an important salvage case is reported, which a correspondent of the *Straits Times* thus describes:—

"There has been a pretty little quarrel getting up in Batavia between a great mercantile firm there and the agent of the Netherlands India Steamboat Company, of which the following are the particulars, and unless some reasonable arrangement is made there is little doubt that a considerable amount will get into the hands of the Dutch lawyers:—The *Lady Louisa*, British ship, from China, and bound to New York, got on shore in the neighbourhood of Lucipara Island, and the Dutch mail steamer *Koningen Sophia* having vainly attempted during twelve hours to get the ship off, for which service a bill for £500 was given, proceeded to Singapore with the mails, undertaking, however, at the *Lady Louisa* captain's request, to return to his assistance as soon as she delivered her mails, which she accordingly did, the remuneration for which service it was proposed I believe to be left to arbitration. In the meantime, however, news of the accident had reached Batavia, and the above firm being Lloyd's agents put themselves in communication with the agent of the steamboat company, and an arrangement was entered into by which the *Minister Fransen van der Putte* was despatched to the scene of the disaster, Lloyd's agents agreeing, it appears, to be responsible for the expenditure of coals should the vessel have been already got off and the steamer's services not be required. Two gentlemen accompanied the steamer, one on the part of Lloyd's agents or the British Consul—the latter position being held by a gentleman also connected with the firm—the other on the part of the steamboat company. No other special agreement, as far as I can learn, was made as to the amount or the manner of settling the recompense for any services rendered. The *Minister Fransen van der Putte* went to the stranded vessel, found her still ashore, and by means of a long stage laid from one vessel to the other lightened her about two-and-a-half feet when the vessel floated off the bank, which it seems was composed of hard sand, and was towed into Batavia. Arrived at Batavia, the above firm constituted themselves agents of the vessel, entered her at the Custom-house, and arranged to store the cargo in a bonded warehouse. So far all was right, but while the cargo was being landed some question was raised respecting remuneration for the steamer, they claiming salvage; this was resisted by the agents of the ship, who offered to pay a certain daily hire for the steamer on which it seems that the same gentlemen who had accompanied the steamer on the part of the company seized some lighters of goods from the ship which had already passed the Custom-house and were discharging into the warehouse, and by some means not distinctly stated, got them transferred from the agents' names to that of the agent of the steamboat company, by whom they are still held.

"It seems by the arguments used by both parties *pro* and *con* the salvage claims are these:—The agents of the ship say that by their or Lloyd's agent undertaking to pay for the coals there was an implied promise to pay the expenses of the ship, which they think authorises them to resist the claim for salvage and pay a fair hire for the use of the steamer. On the other hand, the steamboat company argue that from the fact of the captain's having requested assistance from the company, and there being no special agreement for hire, they are fully entitled to a fair salvage. Opinions in Batavia, as a matter of course, differ on the subject, but as far as I can glean they are not in favour of an excessive reward for services which it seems were not in any way dangerous to the vessel rendering them, and entailed neither risk of life nor any extraordinary amount of skill nor labour to accomplish. Arbitration, I should have thought,

Digitized by Google

would have been a better way of settling such a matter than an appeal to the Dutch law courts, which are not particularly clear on the subject of salvage."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BEIT—On the 4th Jan., at Nelson, New Zealand, the wife of John Beit, Esq., of a daughter.

BOUVERIE—On the 19th March, at Coleshill House, Berks, the Hon. Mrs. Pleydell Bouverie, of a daughter.

DILL—On the 13th March, at 19, Regency-square, Brighton, the wife of Dr. Dill, of a daughter.

ENGLER—On the 21st Jan., at Saigon, the wife of F. Engler, Esq., of a son.

KING—On the 10th Feb., at Hong Kong, the wife of George King, Esq., of a son.

LESSLER—On the 13th Feb., at Bangkok, the wife of Paul Lessler, Esq., of a son.

MAXTON—On the 15th March, at 96, Highbury New-park, the wife of P. Maxton, Esq., of Shaw, Lowther, and Maxton, of a son.

MICHIE—On the 18th Jan., at Shanghai, Mrs. Alexander Michie, of a son.

MOSTYN—On the 21st March, at Buckworth Rectory, the wife of the Hon. and Rev. Hugh W. Mostyn, of a daughter.

PLUNKET—On the 13th Feb., at Penang, the Hon. Mrs. Charles Bushe Plunket, of a daughter.

POWYS—On the 18th March, at 63, Eccleston-square, the Lady Mary Powys, of a daughter.

SCHMIDT—On the 7th Feb., at Singapore, the wife of A. E. Schmidt, Esq., of a daughter.

STEWART—On the 15th March, at 26, Kildare-street, Dublin, Lady Stewart, of a son.

MARRIAGES.

BAKER—LAPRAIK.—On the 2nd Feb., at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, Acting Colonial Chaplain, assisted by the Rev. C. F. Warren, Robert Ellis Baker to Jane Lapraik, niece of Douglas Lapraik, Esq.

BOWRA—ORMISTON.—On the 14th March, at St. Giles', Camberwell, by the Rev. F. F. Statham, Frederick William, only son of the late William Addenbrooke Bowra, Esq., of Durrington Lodge, Surbiton, formerly of Hong Kong, to Emily, only daughter of P. S. Ormiston, Esq., Woodville-house, Gipsy-hill. No cards.

DEATHS.

BARCLAY—On the 22nd March, very suddenly, at No. 137, Westbourne-terrace, W., Elise Josephe, youngest daughter of Charles Malo, late Marquis de Rune, of Warsy, Picardy, the beloved wife of Sir David William Barclay, Bart., aged 57.

DOWNE—On the 20th March, at Bowden Hall, near Gloucester, in her 87th year, Louisa Maria, Viscountess Downger Downe.

HIPPISLEY—On the 20th March, at the Manor House, Mells, Sir John Stuart Hippisley, Bart., aged 76.

HOPE—On the 17th March, at 67, Cadogan-place, the Dowager Lady Hope, widow of Sir John Hope, of Craighall and Pinkie, Bart., M.P.

HORNBY—On the 19th March, at Little Green, in the 82nd year of his age, Admiral Sir Phipps Hornby, G.C.B., Rear-Admiral of the United Kingdom.

JANNUS—On the 12th Feb., at Hong Kong, Edward Jannus, seaman, aged 19 years.

KNOX—On the 24th March, at Dover, Admiral the Hon. Edmond S. P. Knox, in his 80th year.

PITT-RIVERS—On the 17th March, at Torquay, of congestion of the lungs, Henry Peter Pitt-Rivers, fifth Baron Rivers, of Sudely Castle.

PRITCHETT—On the 10th Feb., at Hong Kong, Maria, daughter of John Pritchett, engineer, Hong Kong Mint, aged 1 year and 3 months.

ROMILLY—On the 22nd March, at 29, Wilton-crescent, Lady Georgiana Elizabeth Romilly, wife of Charles Romilly, Esq., and eldest daughter of John, sixth Duke of Bedford.

SCHMIDT—On the 17th Feb., at Singapore, Ann, the wife of A. E. Schmidt, Esq., aged 29 years.

STANLEY—On the 11th Feb., at Hong Kong, George Stanley, seaman, aged 20 years.

STUTCHBURY—On the 15th Jan., at Yokohama, Mr. Joseph J. Stutchbury, aged 28 years.

Dock, 20 to 30 per cent. prem.; Steam Shares, 15 per cent. dis.; Union Dock Company, 40 per cent. dis.; China Traders' Insurance, 70 dols. premium.

The folowing is from Sharp and Co.'s Circular.

GOLD.—The receipts of gold have been quite unimportant, amounting only to $150,000 worth. $310,000 value has been sent away, inclusive of the Salsette's shipments on the 1st inst., and excluding the purchases for this opportunity, and the steamers leaving for Calcutta on the 18th inst., which have swept the market.

SILVER.—Has arrived in large quantities from the North, and has been freely taken at hardening rates. The imports represent $720,000, and the exports $190,000; but this latter sum is exclusive of the three Indian steamers leaving as above, by which over a million dollars go forward.

MEXICAN DOLLARS.—The movements in coin have been confined to the receipt of $130,000 from the Coast, and the departure of $40,000 outwards.

EXCHANGE.—Bills have been very scarce, and remittances have been in great part supplied by Bank drafts. A larger business has been done in rupees than for some time past; the first purchasers getting the advantage in the declining rate.

DISCOUNT AND MORTGAGE.—There is very little money to be had, except upon short discounts; those who have funds available for any length of time preferring to invest them in purchases at present low rates. One or two properties have been bought up during the week which have been upon the market for a length of time.

SHARES.—Some little business has been done, but there is really no important change to note during the last few days, the general want of money preventing the advance which rates would seem to justify.

BANKS.—The annual meeting of the Hong Kong and Shanghai Banking Corporation has been held, when a dividend of 12 per cent. per annum was declared, and $75,000 carried to the reserve fund.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The season is drawing to a close, and the China New Year has interfered with all commercial transactions during the past fortnight, so that there is little to be said of the tea market. The stocks seem likely to hold out longer than usual in consequence of the reluctance of buyers, during the latter part of the season, to operate on the terms demanded.

CANTON.—The settlement of the two chops Country Congou reported last mail, as anticipated, did not lead to any further transactions, and the China New Year's holidays are passing over with an unusually heavy stock of Congou remaining unsold, present stock being as last advised, 33 chops or 21,104 packages. Country Greens: Holders continue firm; there are no further arrivals or settlements to report. Canton-made Teas: Some little attention has been directed during the fortnight to Scented Orange Pekoes and Gunpowders intended for the Australian market, a few Scented Capers have also found buyers; Canton Packed Congou and other Canton Teas have been quite neglected. Rates remain unchanged. Sales, &c., are reported as follows:—Scented Orange Pekoe, 4,200 boxes at Tls. 17.5 to 25.5; Scented Caper, 700 boxes at Tls. 19 to 22; Gunpowder, 3,000 boxes at Tls. 15 to 23. Stock, 33 chops, or 21,104 packages Country Congous, 4,527 packages Country Greens.

FOOCHOW.—Congou: Settlements continued to the 26th ult. at former prices, since when the Chinese New Year holidays have entirely put a stop to all business. Reports differ as to the amount still to arrive, but it is improbable that present receipts will be increased to any extent. The settlements reported include 1,187 chests 877 half-chests and 60 boxes, at tls. 7-5 to 17-2-5, say, 131 chests and 327 half-chests at tls. 7-5 to 13 for Dust and Broken Leaf, 736 chests, 350 half-chests and 63 boxes at tls. 13-5 for Common to Good Common and 320 chests and 200 half-chests at tls. 15-5 to 17-2-5 for Flavory. Pekoe: Fair mixed leaf 125 chests at tls. 24 to 26.

All Teas since 10th May, 1866, and Stocks on 8th February, 1867.

SHANGHAI.—Only 2,000 chests have been sold during the fortnight, little disposition having been shown to purchase at the rates asked. Prices exhibit no actual decline, but the fall in exchange has slightly reduced the laying down cost. Arrivals have maintained the stock at the figure given in the last report, viz., 14,000 chests, and the total supply still due from the river this season will probably not exceed 10,000 chests of all descriptions. The New Year holidays have caused a temporary cessation, but a firmer market is expected when business is resumed. The settlements comprise:—Oonam, 620 chests, common, at taels 16.7.5; Ningchow, 460 chests, common to medium, at taels 16.2.5 to 19.2.5; Hohow, 860 chests, inferior to common, at taels 14.7.5 to 15.0.0; Flowery Pekoe, 60 chests, common, at taels 15.0.0; Re-shipments, 300 chests. Total settlements, with re-shipments from the river ports, from 1st June, 1866, to date, 314,400 chests, against 266,000 chests last year. Green Tea: Up to the last day of the Chinese year (the 4th inst.) a fair business continued to be done, at rates which show a slight decline on last quotations. Teamen generally have not shown the anxiety to sell usual at this period, owing to the increased facilities now afforded them for holding over their annual settling day. Settlements continue to be chiefly for the American market, prices being still considerably in advance of London rates, and the ships on the berth for New York are reported almost full. Fine Teas remain scarce, the stock consisting chiefly of undesirable chops. Though the actual stock exhibits no decrease, it is believed that little is now left to come forward—say from all quarters 20,000 half-chests—and teamen are holding more firmly in consequence. Total settlements, with re-shipments from Kiukiang, from 1st June, 1866, to date, 322,000 half-chests, against 243,000 half-chests last year.

HANKOW.—During the fortnight under report there had been no settlements of Black Tea, but the arrival of 300 chests from the country had raised the stock to 3,000 chests.

KIUKIANG.—In the entire absence of business in either Black or Green Teas the report is confined to the following statistics:—Arrivals, 1866-7: Black, 122,600; Green, 151,700. Settlements: Black, 122,200; Green, 146,600. Stock: Black, 400; Green, 5,100.

YOKOHAMA.—The tea market has been extremely dull during the past fortnight, and buyers are holding off in consequence of unfavourable news from both England and America, the high purchases having shown a heavy loss. The amount of business done has been too small to fix any quotations, and prices must be considered nominal, as, although all are anxious to sell, they do not like to submit to the decline which the few buyers that there are like to operate; and some merchants who are at present sellers under pressure for money, would prefer to hold for further advices. Business will most probably be more settled after the Japanese New Year has fairly set in.

RAW SILK.—CANTON.—The market has continued quiet during the fortnight, and settlements have been on a very moderate scale; the natives affirm that arrivals have ceased, and that present stocks reported constitute the bulk of staple to be settled, to complete the present season, now fast approaching its close. Prices for Tsatlee Reel and Loongkongs remain as last; quoted a decline of about $30 is noticeable in Re-reeled Cumchuck. The prevailing opinion as regards the commoner sorts is that prices will recede, there being too much stock on the market considering the late period of the season. Settlements for the fortnight and stocks are as follows:—Tsatlee, No. 1, 51 bales, $580 to 600; Loong-kong, No. 1, 50 bales, $570 to 600; Kowkong, 20 piculs, $510; Lacklow and Cumchuck, no sales, $570 to 580; Seulam, 20 piculs, $440; Re-reeled Cumchuck, 200 boxes, $600 to 610; Punjum, no sales, $150 to 160; Pierced Cocoons, no sales, $90 to 95; Waste Silk, no sales, $70 to 85. Stock, 150 bales, No. 1, Tsatlee, 150 bales; No. 1, Loong-kong, 380 piculs Kowkong; 400 piculs Lacklow and Cumchuck; 300 piculs Seulam; 1,000 piculs Punjum.

SHANGHAI. — But little has been done in China Silk during the past fortnight, about 130 bales included in the settlements having been shipped by the last mail to Europe, after the previous report was made up. The steamer Aden, which left on the 3rd inst., took 110 bales to Hong Kong, to be forwarded by this mail to England, and it does not appear probable that more than 100 bales of China Silk will be sent by this mail steamer. The transactions being so limited no alteration has been made in the table of quotations, but the tendency of the market would appear to be towards higher prices. Settlements for the past fortnight, 350 bales; total settlements since 1st Jan., 1,500 bales.

YOKOHAMA.—The gradual fall in prices, which is the main feature of this market since the latter part of December, caused a proportionate decrease in supplies, and the unsold stock, which a month ago amounted to 900 piculs, has dwindled to about 350. The approach of the Japanese New Year also interfered with the arrivals, which during the past fortnight scarcely averaged 10 piculs a day, and it is expected that as soon as the holidays are over, that is to say in a week or two, they will be resumed on a more liberal scale. The settlements of the fortnight are about 450 piculs, and prices have further declined; but the reductions obtained scarcely compensate for the inferiority of the goods on offer.

DRUGS, &c.—CANTON.—No transaction have taken place during the fortnight, partly in consequence of the China New Year, partly because of the paucity of stock. Quotations must therefore be considered quite nominal. Cassia Lignea: Quoted $19.50, the market being bare of any supplies. Cassia Buds: 100 piculs continue to be offered at $40. China Galls: $13.50 per picul; stock 60 piculs. Galangal: $1.80; stock 300 piculs. China Root, $3.50. Vermilion, best brands, $39 per box of 50 catties. Cassia Oil: 6 piculs offering at $185 per picul. Rhubarb of low quality remains as already reported on, for which holders ask extravagant prices. Star Anniseed, none.

CHINA GRASS.—SHANGHAI.—In the absence of business, quotations remain nominally the same as before, viz., No. 1, taels 16.5; 2, taels 14 to 15.5; 3, taels 13.5 to 14; Green, taels 11.

CHINA IMPORTS.

Business has been very dull during the fortnight owing to the celebration of the Chinese New Year holidays. Within the last day or two however the dealers have shown a decided inclination to enter the market, and a fair demand for Yarn and 8.4 lbs. Grey Shirtings has sprung up, but although quotations are slightly higher any attempt to establish a further advance is met with coldness. White Shirtings: Continue neglected. For T-Cloths a moderate demand continues. For Fancy Cottons there is no inquiry. Woollens: No improvement has taken place save in Scarlet Long Ells, which are about 25 cents per piece higher. Other kinds are, if anything, somewhat weaker. Metals remain quite neglected.

COALS.—HONG KONG.—The arrivals during the fortnight have been confined to 1,800 tons of Australian coals. For English and Welsh the market continues firm at last quotations, viz., $13.50 to $14. Sydney is quoted $8.50 to $9.

SHANGHAI.—The market has been cleared of all good coals in first hands at the highest quotations, and the small unsold stock on the market consists of undesirable coals. Sales have been made at 12.2.5 taels for English, 10 taels for Australian, and 7.5. taels for Japan coals. Arrivals have been—1,044 tons from Japan, 1,253 tons Australian, and 1,100 tons English; total, 3,397 tons.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, Jan. 20, Capiolani; from Newcastle, 21, Lord Collingwood.

At SHANGHAI.—From London, Feb. 4, Taeping; 6, Taitsing; 6, Fiery Cross; from Sunderland, 4, Lodore; from Newcastle, 4, Ellida; 7, Peru, Maury.

At HONG KONG, CANTON, and MACAO.—From London, Feb. 6, Serica; 7, Her Majesty; 8, Canadian; from Newcastle, 5, Pleiades; 7, Blairmore; 13, Magnolia; from Hamburg, 7, Hieronimus; from New York, 11, Benefactress; 13, Free Trade; from Havana, 9, I. A. U.

At MANILA.—None.

At SINGAPORE.—From London, Feb. 7, Rushing Water; from Liverpool, 20, Agamemnon (str.); 10, Indiaman; from Newcastle, 13, Hertha; 14, Catherina Elizabeth; from Hamburg, 14, Herman and Emma; from Bordeaux, 21, Imperatrice Eugene.

At PENANG.—From Liverpool, Agamemnon (str.).

At BATAVIA.—From Liverpool, Helena Henriette, Jane Kilgour, Engel.

DEPARTURES.

From YOKOHAMA.—For New York, Jan. 19, Chaa-sze; 30, Johanna Maria.

From SHANGHAI.—For London, Jan. 27, James Shepherd; Horatio, for New York.

From FOOCHOW.—For London, Jan. 27, Bucton Castle; 29, Tavistock.

From HONG KONG and CANTON.—For London, Feb. 2, Stornoway.

From MACAO.—For Havana, Jan. 30, Reyna de los Angeles, Nina; Feb. 1, Esperanza, Bankok; 8, Nieman; 10, Victoria.

From MANILA.—For Spain, Jan 20, H.C.M.S. Numancia; 28, San Luis, for Cadiz; Feb. 1, Union; 27, Game Cock, for New York.

From SINGAPORE.—For London, Feb. 7, Gazelle; 8, Agamemnon; 9, Carlota and Aline, for Falmouth; 13, Prefet Paul Feard, for Bordeaux; Robin Hood, for New York.*

From PENANG.—For Liverpool, Feb. 15, Monteagle.

* The Robin Hood left Foochow Jan. 26.

VESSELS LOADING.

At YOKOHAMA.—For London, Carioca.

At NAGASAKI.—For London, Rifleman.

At SHANGHAI.—For London, Burmah, Peter Denny, John Bellamy; for New York, Endeavour, Magellan, Aurora Australis.

At FOOCHOW.—For London, Red Riding Hood (full); for New York, Tynedale.

At HONG KONG and CANTON.—For London, Sea Bird; for New York, Sea Serpent, Ariadne.

At MANILA.—For London, Canaan, Coromandel, San Fernando; for Falmouth, Glendoveer; for Havana, Espana; for New York, Hotspur.

At SINGAPORE.—For London, Willy; for Liverpool and Glasgow, Roslin Castle; for Falmouth, Elias; for Rotterdam, Bengal; for New York, John Norman.

At PENANG.—For London, Zanzibar.

At BATAVIA.—For Channel, Grosswater; for Amsterdam, Bellatrix, Electra, Mentor, Koning Willem II., Tjilingsie, Rota; for Rotterdam, Triton, Prof. v.d. B. Mesch, Eva, Johana, Landbouw, Anna, County of Ayr.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s. per ton. To New York (per sailing vessel): £2 10s. to £3; and per steamer, $45 per ton of 40 cubic feet.

At SHANGHAI.—The China New Year festivities have put a stop to all business. Rates to London remain at £2 per ton of 50 cubic feet. To New York, £2 per ton of 40 cubic feet. Unemployed tonnage in port very small.

At FOOCHOW.—To London: £2 5s. per ton.

At HONG KONG and CANTON.—The demand for small vessels for the northern ports continues. For homewards direct and *via* Manila nothing of importance has been done. The Emille has been taken up for the Continent at £2 per ton, and the Moldavian is chartered for the rice ports and home at £3 per ton. For New York the rate is £1 15s.

The Circular of George Holmes gives the number of disengaged vessels at nineteeen, representing 8,675 tons:—

At MANILA.—The Coromandel has been fixed for London at £2 7s. 6d. for 600 tons current sugar, and £3 for 200 tons hemp. The Glendoveer obtained £2 5s. per ton for a full cargo of current sugar to the Channel, for a port in the United Kingdom, and 10s. per ton extra if to the Continent.

At SINGAPORE.—The disengaged tonnage in the harbour is now very limited, and vessels are in good request to load home from the rice ports. Handy sized crafts are offered £3 2s. 6d. open charter, and for large ships £2 17s. 6d. Vessels on the berth for England are fully engaged at £1 10s. for tin, £1 15s. for other dead weight and £2 5s. for light cargo, and higher rates are expected.

At PENANG.—To London, the Zanzibar, is a full ship, at £1 15s. for sugar and £2 10s. tin and £3 measurement.

BATAVIA.—In freights to the Continent there is no change to report, f.37.50 to f.40 per last, equal to about £1 17s. 6d. to £2 per ton, being the current rates. Ships are wanted to load at the rice ports, to the Channel for orders, at about £3 per ton.

REPORTS AND CASUALTIES.

The Sir John Moore, Cardiff to Hong Kong, has been abandoned.

HONG KONG.

The British ship Serica reports having spoken the British ship Jubilee, in Dampier Straits, on the 29th of January, from London, bound to Hong Kong.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—March 23, at Portsmouth, from Colombo, Whitehall; at Plymouth, from Hong Kong, Don Ricardo; 24, from Batavia, Jessie Jamieson; off Falmouth, from China, Freya; at Nieuwe Diep, from Batavia, Camperdown; 9, at New York, from Manila, Caracan; 10, from Amoy, Florence Nightingale; 23, at Cadiz, from Batavia, Hellevoetsluis; 25, in the Downs, from Singapore, Douglas Castle; from China, Cingala, and Osprey; March 25, at Deal, from Colombo, May Queen; 23, off Dungeness, from Batavia, Fagel; 25, at Liverpool, from Manila, Mercia; 5, at Havana, from Macao, Nina, Gica; 26, at Falmouth, from Japan, Conference; in the Downs, from Foochow, John Temperley; at London, from Singapore, Sree Singapura.

DEPARTURES.—March 24, from Gravesend, for Sunderland and Shanghai, Sydenham; —, from Helvoet, for Singapore, Tonia; —, from ——, for China, Auburn; March 26, from London, for Hong Kong, Solent; 21, from Cardiff, for Japan, Hayamaro (s.); 24, from Swansea, for Shanghai, Georges; from Havre, for Hong Kong, Lord Palmerston; from Jersey, for Shanghai, Virgilia.

LAID ON.—At London, for Colombo, Saladin; for Hong Kong and Canton, Banian; at Liverpool, for Shanghai, Coila.

SPOKEN.—Vicksburg (ship, Manila to Falmouth, Jan. 13, 28 S., 56 E.; Baltimore (Dutch barque), Sourabaya to Amsterdam, Feb. 16, 10 S., 12 W.; Glen Lee, Macao to Jamaica, Jan. 9, 27 S., 57 E.; Naples (American ship), Sourabaya to Boston, Jan. 23, 35 S., 24 E.; No. 9,410, or 9,413, 2nd d.p., Canton to Falmouth, Feb. 1, 29 S., 10 E.; Osprey, Foochow to London, March 5, 17 N., 34 W.; Tree Singapura (ship), Singapore to London, Feb. 22, 2 S., 20 W.; Broadwater (ship), Amoy to New York, Dec. 31, 19 S., 81 E.; Chili, Singapore to Boston, Jan. 9, 24 S., 63 E.; Charger, Hong Kong to New York, Jan. 23, 34 S., 25 E.; Edith Banfield, Shanghai to New York, Feb. 16, off Ascension; John Temperly, Foochow to London, Feb 11, 19 S., 3 W.; Ridderkirk, Sourabaya to Amsterdam, Feb. 19, 5 S., 17 W.; Hollandia, Java to Amsterdam, Feb. 21, 1 S., 21 W.; Geo. Shoton, Foochow to New York, Jan. 3, 10 N., 103 E.; Roxburgh Castle, Singapore to Liverpool, Feb. 20, 18 S., 3 W.; Bothwell Castle, Singapore to the Clyde, Jan. 29, 32 S., 35 E.; Nereus, Bali to Rotterdam, Feb. 4, 35 S., 22 E.; Forerunner, Swansea to Hong Kong, 129 days out, Nov. 1, 4 S., 107 E.; Ottolina (Dut. barq.), Batavia to Rotterdam, Dec. 21, 8 S., 105 E.; Freia (Hamb. barq.), Canton to Falmouth, Dec. 21, 8 S., 105 E.; America (Am. ship), Manila to New York, Jan. 25, 28 S., 48 E.; Schelde (Dutch barque), Java to Zierikzee, Feb. 14, 29 S. 9 E.; Bride, Ceylon to Liverpool, Feb. 10, 35 S., 22 E.; Galilei (ship), from Java, Feb. 4, 32 S., 40 E.; Baron Pallandt v. Rosendaal, from Java, Feb. 9, 34 S., 28 E.; Daniel Draper (American), Boston to Batavia, Feb. 1, 27 S., 23 W.; Julia Ann, Singapore to Boston, Feb. 8, 1 N., 36 W.; Neptunus (Dutch barque), Batavia to Rotterdam, 14 days out, Dec. 16, 11 S., 107 E.; a barque, Macao to Havana, 70 days out, Jan. 21, 32 S., 13 E.; Passing Cloud, Hong Kong to London, Jan. 9, 24 S., 66 E.; Ceylon, Penang to London, Jan. 22, 8 S., 86 E.; Sultan, Colombo to London, Feb. 1, 23 S., 66 E.; Lorton, Japan to New York, Jan. 5, 21 S., 77 E.; Sirius, Sourabaya to Falmouth, Jan. 26, 33 S., 37 E.; Rothley, Sourabaya to Amsterdam, Feb. 13; Samuel, Macao to London, Jan. 23, 30 S., 46 E.; Albatross, Singapore to New York, Feb. 6, 34 S., 28 E.; Congress, from Manila, Feb. 7, 35 S., 24 E.; Aquila de los Andes, Petropaulovski to Falmouth, Feb. 8, 35 S., 21 E.; Royal Bride, Ceylon to London, Feb. 10, 34 S., 20 E.; Southern Cross, Shanghai to London, Feb. 16, 28 S., 9 E.; Launceston, Batavia to Amsterdam, Feb. 19, 26 S., 5 E.; St. Helier, Foo Chow to London, Jan. 7, 23 S., 68 E.; Broadwater, Anjer to New York, Jan. 11, 25 S., 60 E.; Caldbeck, Anjer to London, Feb. 2, 32 S., 15 E., Catharina Jacob Henrietta, Batavia to Rotterdam, Jan. 29, 32 S., 35 E.; The Fredrik Hendrik, van Duyn, from Java to Rotterdam, put into Simon's Bay, Feb. 16, leaky, and will have to discharge a portion of her cargo; she had lost a man overboard the same day. The Gazelle, Le Gros, from Singapore to London, was wrecked on Pau Shoal at the entrance of Rhio Straits, Feb. 8, and afterwards sunk, crew saved.

CASUALTIES.—A telegram from Cadiz, dated 22nd March, reports that the Hellevoetsluis, Rems, from Batavia to Dordt, had put into that place, leaky, with mainmast cut away and other severe damage, and would have to discharge. The Navigator, Bockelmann, from Liverpool to Batavia, which put in at Lisbon, 18th March, with foremasthead gone, &c., has been surveyed, is not leaky, but must discharge a trifle of her cargo. The Cheetah, from Hong Kong to London, with loss of rudder, was spoken 21st March, in lat. 49 N., lon. 10 W.

MISCELLANEOUS.—At Table Bay: John Temperley, from Foochow, and sailed Feb. 2, for London.

At Ascension: Feb. 20, Hendrik Ido Ambacht, from Batavia, and sailed for Rotterdam; 27, Renown, from China, and sailed 29th.

Off Ascension: Feb. 18, John Temperly, from Foochow, for London; 20, Ellen Browse, from Manila; 28, Royal Bride, from Colombo, for London.

At Simon's Bay: Feb. 16, Frederik Hendrik, van Duyn, from Java, for Rotterdam, leaky; Jan. 21, Satellite (s.), Edge, from England, and left Feb. 1, for China.

The Martha, Birne, from Colombo, arrived off Scilly, March 22, with master dead.

Digitized by Google

At St. Helena: Patna, Jones, from Foochow, and sailed 16 for London; 16, Caroline v. Appen, from Macao, and sailed 18 for Hamburg; Johanna Marie, Johansen, from Batavia, and sailed 18 for Rotterdam; 20, Albert Victor, Thompson, from Canton, and sailed for New York; Belvidera, Jackson, from Manila, and sailed for Boston; 21, Nereus, Planten, from Banjoemangie, and sailed for Rotterdam; Assyrian, Mearns, from Shanghai, and sailed for New York; Preston, Donald, from Sourabaya, and sailed for Amsterdam; 22, Bilbaina, Ysaurita, from Macao, and sailed 23, for Havana; 23, H. Vincentius v. Paulo, Nagel, from Batavia, and sailed for Schiedam; Carlshaven, Coler, from Singapore, and sailed for Falmouth; D. S. Visser v.d. Linden, from Batavia, and sailed 24 for Amsterdam; Adelheid, Ehlers, from Singapore, and sailed 25 for Falmouth; Edmund Graham, Davis, from Singapore, and sailed 24 for London. 25, Hollands Trouw, Vos, from Batavia, and sailed 26 for Amsterdam; Corea, Garry, from Yokohama, and sailed for London; Twee Gezusters, Bernelt, from Banjoewangie, and sailed 26 for Amsterdam; 26, Sparkenhoe, Butler, from Sourabaya, and sailed for Amsterdam; Anthony v. Hobokken, Harzewinkel, from Banjoewangie; 27, Schultze Delitsch, Mehn, from [illegible]on; Luisita, Gordia, from Macao; Manila, Alcatena, from Ma[illegible] St. Helena, Feb. 21, Banda, from Japan.

[illegible]: Feb. 4, Patriot, Nordholt, from Singapore, and sailed 7 for [illegible] Alvington, Adams, from Colombo, and sailed 9 for New York, [illegible]ire, Cordonnet, from Macao, and sailed 15 for Havana; 11, Samu[illegible]ll, from Macao, and sailed 15 for London; 12, Advance, Taylor, from [illegible]erpool, and sailed 13 for Singapore; 14, Henri, IV., Alezais, from Macao; 18, Anastasia, Ferreros, from Manila; 6, M. W. Sass, Arentzen, sailed for Singapore; Jan. 29, Glenlee, Dunn, from Macao; Eugene and Adele, Lacroix, from Macao; 30, Caldbeck, Garside, from Singapore.

Off Cape Recife: Jan. 20, No. 0,379, 3rd d. p. (ship), from Macao for Table Bay.

At Algoa Bay: Jan. 29, Verdandi, Lofquist, sailed for Batavia.

The Admiralty have invited tenders for the conveyance of 4 tons (heavy) shells, &c., 25 tons (measurement) powder, cases, sponges, &c., and 20 tons navy provisions, from the Thames to Colombo or Trincomalee; a[illegible] to Hong Kong of 9 tons (measurement) tables, &c.

APPOINTMENTS.—The Queen has been pleased to approve M. Gustave Overbeck as Consul-General at Hong Kong for his Majesty the Emperor of Austria, and of Mr. J. H. Bandow as Consul at Bassein for his Majesty the King of Prussia. The Queen has been pleased to appoint William [illegible]ebburn Rennie, Esq., to be a member of the Executive Council of the Colony of Hong Kong. Lieutenant-General Sir Patrick Grant, G.C.B., Colonel of the 78th Foot, has been appointed Governor of Malta.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, MARCH 23.

The Budget of the Marine Department was carried by the Second Chamber of the States General by a majority of 16 votes (viz., 44 against 26), and perhaps before this letter is posted I shall have to add that the Military Budget has passed also with a similar majority. Indeed, I have but a few words to add to these facts, notwithstanding that the discussions were very long; they regarded, however, only military matters and questions undoubtedly of much interest to those who are delighted with the idea of making a military and maritime State of the Netherlands, but of very little importance to those—amongst whom I belong—who underwrite the *mot* of M. de Girardin—*il n'y a plus bete que la guerre*. The debate about the question, whether we are powerful enough to defend ourselves or not against the agressive designs of any Power, was indeed curious, and you see that the result was that the majority was of opinion that we can, unless those members think it their duty to throw away our millions, or, as Mr. v. d. Putte said, the India millions. The discussions about the manner and means of our defence were as long and perhaps of the same interest as those about the former question, and, notwithstanding, I will suppose that there are some amongst your readers who can find time enough to read these discussions in full. I certainly think that your valuable space cannot be worse occupied than by inserting even an extract of this arid debate, of which I pick up for your English readers that the monitors and ironclads, by which our maritime service will be augmented this year, will be ordered in England, because it is impossible to build them here.

As to the marine, we stay now before a *fait accompli*, unless the First Chamber of the States General rejects this budget. Our millions will go the way of all the millions, not at once, but some twenty from year to year, in order that "we should always be in the mood," as the Minister of the Marine Department stated, perhaps unwillingly criticising his own plans. His explanations about the reasons why our marine is declining were however too new to interest your readers in India. They certainly know that until now it was said that this resulted only from the fact that there was no firm system followed by any Minister; this reason was, however, denied by the actual chief of that department, who said that the true reason—the very cancer—was that the marine for India appeared till now upon the budget. The present Ministry was of opinion that this was an abnormality, and therefore ceased with it. So India will have in future its own marine, and eight millions of gilders will be spent for this aim in the current year. The service will be done alternately by our maritime soldiers. The protests of some Liberals against these plans had no effect whatsoever. Even the endeavour of Mr. de Roo to give to our arming-fever a pure character of defence failed; his amendment to build monitors (to defend our river mouths) instead of ironclads (with power to cross the seas) was rejected by 38 against 29 votes.

The Minister of the Financial Department has made known that a new postal communication is organised with China, *via* St. Petersburg and Siberia. Twice a week, viz., every Tuesday and Friday, a mail is despatched from St. Petersburg for Kiachta, and from there a mail is expected four times a month (the 5th, 12th, 19th, and 26th) to Tien-Tsin, *via* Urga, Kalgan, and Peking. The distance from St. Petersburg to Kiachta is performed within five weeks, and from there to Peking in thirteen days. The letters which are sent by this mail must be addressed "*via* St. Petersburg," and when they are posted in China the address must be provided with the inscription "*via* Kiachta."

The many truths contained in your article, "Java and the Dutch," are read here with a good deal of interest. Indeed, the writer was entitled to say that our colonial policy is but monopoly in its worst form. It is true that the Liberals have since 1849 defended the rights of the natives, and urged that this monopoly should be abolished. But they did not succeed, because even the Radicals were too timid, notwithstanding public opinion has compelled them to place the industry of Java on a more equitable, satisfactory, and stable basis. Now that the Government is again in the hands of the Conservatives, I need not say that we have no hope for any improvement. The Colonial Minister Trabranen, being the leader of the colonial politicians here, and Mr. Myer at Batavia, every hope for any Liberal reform is annihilated. The Liberal papers may insist upon it and warn for the future, but this cry is now only a *vox clamantis in deserto*. Indeed, to keep the natives in a low and servile condition has been and is still the aim of the extortionate Conservatives. Perhaps you are astonished that the Liberals could not force their measures; but they are not supported by the nation, which has been disgusted with colonial matters by a paper war of ten years about measures that never were applied, and, believing the threatenings of the Conservative papers that the colonial returns will be lost by the Liberal measures, the electors support the Conservative candidates, and make it impossible that the Liberals can apply their system of reform.

The question to provide the want of medical officers for the service in India was much discussed during the last days in the papers, and in consequence thereof Mr. Janckbloet urged in Parliament that their petition should be improved, to prevent the manifold demands for dismissal from the service; and to set the Chamber the opportunity to prove that the members were willing to assist the Cabinet in this matter, he proposed to augment the chapter personal of the marine of the budget with 1,600f. which proposal was approved of by 49 against 20.

During the last Parliamentary discussions the Parliament was also interpellated about the desirableness that a steam mail packet service should be organised between India and the Netherlands; the Government, however, was of opinion that such a line should be organised with more success by private persons than by the Government.

In a former letter I told you that Mr. Fransen van de Putte (ex-minister) published in the *Tydschrift voor Ned Indie* some extracts of important but secret Government papers relating to India. A rumour is now current that he will be prosecuted therefore, but as it is only published by the Conservative papers, I think it will be prudent to wait for further particulars before believing it.

The last returns about the rinderpest are again less favourable. For the week ending the 9th of March 1363 heads of cattle were attacked, against 1248 and 1607 in both the previous weeks.

Within a very short time a second edition will be published of the valuable work: "*Fleurs, Fruits et Feuillages*, choises de la Flore et de la Pomone de l'île de Java, peints d'après nature," par Mad. Berthe Hoola van Nooten.

To-day a new story is afloat, saying that France is engaged in forming a confederation, of which she is to be the front and chief, and Holland, Belgium, and Switzerland the other parts. France, by virtue of a plebiscite, is to have Luxemburg, and the alliance is said to be one of the same kind as that between Prussia and the other German States. I need not say that the only object of the alliance should be to counteract the influence of the German League. All that I can say about that improbable story is, that I do not believe one word of it; so much is certain, that the Netherlands never will enter into such an alliance.

Mr. G. F. Plate has asked for his dismissal as Dutch Consul at Kanagawa; Mr. W. van der Tak is appointed in his place.

COMMERCIAL.

COFFEE.—There is not much passing, but prices are fully supported. The transactions since the last auction only include 1000 b. Padang, ex Brouwershaven, at 42½ to 43¼ c.

SUGAR (Raw).—The dull opinion which prevailed for some time in the market had an unimportant influence upon the Trading Company's auction, which was held on the 20th, when 75,845 kranjangs and 1528 b. Java sugar were offered for sale. This important quantity was totally sold, and principally to our refiners; only 7000 kr. were bought for export.

The prices paid were, compared with those of Nov. last, f.¾ to f.2 under Nov. value, viz.:—

Standard No.	5	...	f. 26	f. 26	Standard No.	13	...	f. 32¼	f. 33
,, ,,	6	...	27	27	,, ,,	14	...	33¼	34
,, ,,	7	...	27½	28	,, ,,	15	...	33½	35
,, ,,	8	...	28¼	29	,, ,,	16	...	34¼	35¾
,, ,,	9	...	29	30	,, ,,	17	...	35	36¼
,, ,,	10	...	29¾	30¾	,, ,,	18	...	35½	37¼
,, ,,	11	...	30¼	31½	,, ,,	19	...	35¾	37¾
,, ,,	12	...	31½	32	,, ,,	20	...	36¼	38

Since the auction no private transactions have taken place; holders decline to operate at this quotation; they are waiting for an improvement now that the alterations of the sugar duties are so near at hand. With the 1st of May these duties will be fixed as follows:—Raw Sugar: 1st class, f. 25.38; 2nd, f. 23.76; 3rd, f. 21.60; 4th, f. 18.09; extraordinary class, f. 25.92 per 100 kilo.

The stock of raw sugar on the 15th, 38,980,919 ks.

RICE.—The demand for home consumption has improved; the quotations, however, are unaltered.

SPICES.—There was more inquiry during the latter days. Nutmegs: No. 1, 88f.; No. 2, 78f.; but nothing is offered at these prices. Pepper: a small lot was sold at 17¼ cts.

TEA.—The results of the auction of 6819 ¼-chests 3274 ½-chests Congou; 1117 ¼-chests and 283 ½-chests Souchongs; and 443 ¼-chests Pekoe, imported ex Monarchy, from Foo-chow-Foo, was not very cheer-

Digitized by Google

ful. The greater part was bought in, and the last that sold were under valuation. The prices paid were as follows:—

4665/4 en 1835/12 ch.	Finest Kaisow Congou	...	96c. to	118c.
145/4	„ Superfine Souchong	...	136	138

160/4	„ Extra Curious ...	...	140	141
114/4	„ Extra Curious ...	...	225	230
2358/4 en 1235/12	„ Finest Kaisow Congou	...	95	130

On the same day were offered 66 ¼-chests Congou; 28 ¼-chests Souchong; 19 ½-chests Pekoe; and 7 ½-chests Boei, imported from Java per Ramsay. The prices paid for those lots that were not bought in were:—Congou, 66 to 81 c.; Souchong, 71 to 101 c.; Pekoe, 136 to 191 c.; Boei, 47 c.

MANILA CIGARS.—On the 28th inst. 380 mille 2a Cortados Manila are announced for sale.

ARRACK.—100 cases Sourabaya Alcohol, ex India, were sold at f. 141, and 30/1 7/2 cases do., ex Hollandia, at f. 165.

JAVA INDIGO.—The demand was chiefly confined to the better descriptions, for which fully previous prices have been obtained.

SILK (RAW).—The auctions that were held here gave the following results:—

216 b.	Sodai (bricks)	f. 27¾	to 38	per kilo.
6 „	Mastah (slips)	27 „	29½	„
12 „	Maybash (dyepots)	38½ „	45¼	„
8 „	Sinshiu (slips)	35¾ „	39¾	„
163 „	Oshio	30 „	44½	„
53 „	China	33½ „	36¼	„
13 „	Sinschu (flotillons)	41¼ „	44¾	„
5 coll.	Java	25 „	29	„

There were but a few buyers, and in particular those from France and England failed. The ordinary qualities were sold 5 to 8 per cent. under valuation, whilst the fine qualities were paid above valuation. 50 b. China were bought in; 150 b. were bought for the Swiss; 150 b. for France; 100 b. for Germany; and 50 b. for England and Holland.

BANCA TIN.—After 56f. were paid for 200 slabs last week, the prices declined, according to reports from the English market, and quantities were in vain offered at 55½f. to 55½f. Since then an improvement took place, upon the communication that English tin was paid £2 higher on the London market, so that 1000 slabs were sold at 55½f. and 400 slabs at 55¾f. At the close of the market no better price than 54¼f. could be obtained.

COCOA-NUT OIL.—25 cases Cochin were paid with 38f., and some parcels prima Ceylon with 34f.

INSURANCE PREMIUMS.—For Java and Sumatra, manufactures in bales, 3½ per cent.; in oilcloth, 3 per cent.; in chests, 3 per cent.; in chests with tin plate, 2 per cent.

For China	direct ..	3	per cent.	3¾ do.	4	per cent.	4¾ do.
	via Java..	3½	„	3¾ do.	4½	„	4¾ do.
„ Japan.	direct ..	3½	„	3¾ do.	4½	„	4¾ do.
	via Java..	3½	„	4 do.	4¾	„	5 do.
Australian	.. ..	2¼	„	2½ do.	3½	„	—

MONEY AND STOCK MARKET.—The Stock Market was better supported and the tone was more cheerful, but business was in general very limited. Dutch Two and a-Half per Cents., 55 per cent.; Three per Cents., 64¾; Four per Cents., 86⅜; Trading Company, 144; Spainish Two and a-Half per Cents., 31; Portuguese Three per Cents., 40⅜; Russian 1866, 66; Austrian Five per Cents., 45⅛; United States 1874, 74¼; do. 1882, 77. Money unaltered.

CHANGE.—London: 3 mo., f.11.75; 2 mo., f.11.78; short, f.11.84; Paris, 3 mo., f.46.62½; 2 mo., f.46.72½; short, f.47.05; Antwerp, 3 mo., f.46.50; 2 mo., —; short, f.49.85; Bremen, 3 mo., f.111.50; Berlin f.171.25.

SHIPPING INTELLIGENCE.

DEPARTURES.—March 7, from Brouwershaven, for Sourabaya, Susanna Johanna; for Batavia, Johannes Antonius; 8, from Hellevoet, for Batavia (*vid* Newcastle), Van der Palm; 11, for Batavia, President Plate. 17th, from Texel, for Batavia: Dordrecht; 21st, for Batavia: Nicolaas Witsen.

ARRIVALS.—None. There are many ships in the Channel, which will arrive to-day or to-morrow, now that the wind has altered.

PASSENGERS OUTWARD.—For Java: per Nicolaas Witsen, Mr. G. van Heeteren and family, Mr. J. W. Synja and family, Mr. J. Landman, Miss S. Aernoat, and J. A. van Driel; per Dordrecht, Mr. H. Fontyn.

The Trading Company charternd the following twenty-one ships to convey produce from Java to Rotterdam: Johann Maria, M. A. Overgaauw; Julie, F. J. Cherpion; Helena and Anna, W. van Aalborg; Almonde, M. Pijl. To Amsterdam: Elisabeth, IJ. Feenstra; Alblasserdam, J. 'tHoen; Johannes Lodewijk, P. van Delft; Souburg, M. W Swart; Huydecoper, D. Forbes Browning; IJstroom, A. Hansen; Wilhelmina and Elise, A. K. Wietsma; Gelderland, P. J. Mulder; Vier Gezusters, S. K. Otto; Nicolaas Witsen, J. Portengen; Anna Digna, J. G. Lucas; Kaap Hoorn, L. J. Dik; Jacoba Cornelia, G. Jansen. To Dordrecht: Kinderdijk, J. Verdoes. To Middelburg: Zeelandia, J. Botesz. To Schiedam: Jan van Galen, M. C. Braat; Hendrika, M. van der Valk.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, MARCH 23.

A very important public meeting was held last Saturday at the Exchange Rooms in this city to take into consideration the proposal made for establishing an independent German Institution for the classification of vessels under the name of the "Germanic Lloyd's," in order to emancipate the shipowners from the monopoly hitherto enjoyed on the Continent by the French, "Bureau Veritas." It appears that for a long time past complaints have been made of the heavy charges levied by the surveyors of that company, the unfair and arbitrary manner in which they classify vessels, and above all for the late innovation of prefixing a star before the names of certain vessels which gives them a still better character than A1, or as they call it "3-3rds confidence;" as this is arbitrary and causes much confusion, as well as the payment of a higher premium of insurance on vessels not so distinguished by the star. The agitation has been going on for a long time, until Mr. August Behn, an extensive merchant and shipowner of this city, boldly convened a public meeting to take the needful measures. Hitherto the Marine Insurance Companies and underwriters were opposed to the movement on the ground that the Register of the Veritas was quite sufficient for all practical purposes and deserving of their confidence; but latterly they have withdrawn their opposition, and were numerously represented at the meeting which was attended by more than three hundred shipowners, underwriters, and shipbuilders, mostly of this city; but there were also many delegates from Bremen, Lubeck, Rostock, Kiel, Apenrade, Altona, and many Baltic ports, who unconditionally expressed their perfect concurrence with the object of the meeting, which was eloquently explained by Mr. Behn, who was unanimously called to occupy the chair. After a debate of three hours, there being a good deal of opposition and partiality evinced in favour of the Veritas, the first question, "Is it the opinion of this meeting that an independent German Institution for the classification of ships be formed?' was put to the vote and decided in the affirmative by a very triumphant and overwhelming majority. In consequence of the lateness of the hour, the meeting, on the proposal of the chairman, postponed the discussion of the second and third resolutions to another time, and proceeded to appoint a committee of eleven gentlemen, consisting of two merchants, three shipowners, three underwriters or directors of insurance companies, and three shipbuilders. Among those elected were Mr. Senator Godefroy, shipowner; Mr. Duncker, the manager of an insurance company here; Mr. Edward Ferber, the director of the large shipbuilding and machinery works; and Mr. Behn, all of this city; Mr. Consul Pactow, of Rostock; Mr. Christel Watjen, of Bremen; and Mr, Consul H. H. Meier, the director of the North-German Lloyd Steamship Company at Bremen, and one of the members of the North-German Parliament for that city, a letter from whom to Mr. Behn was read to the meeting, expressing his regret that his Parliamentary duties at Berlin prevented his personally appearing, but assuring him of the deep interest he took in the subject, and promising his most cordial support. The two questions, the discussion of which was postponed to the next meeting were the seat of the new institution and its name; but the former is provisionally located at Hamburg, and it will probably be so confirmed, though Bremen has undoubtedly a strong claim to the honour. And with regard to the name, Mr. Behn proposes and has all along in his newspaper articles, pamphlets and speeches, called it the "Germanic Lloyd's," which sufficiently denotes its character and object. As it is a part of the proposed plan to appoint surveyors of ships and agents at every port of importance all over the world, I would venture to suggest to those of your readers in the Far East who may wish to obtain the appointment in their respective ports, to lose no time in making application to Mr. Behn or any of the the other gentlemen belonging to the Provisional Committee mentioned above.

The much-talked of Austrian Expedition to the Far East is after all to take place this year, and will be sent out in the ensuing autumn, the Emperor having signed the decree on the 27th of February last. The credit of persuading the Emperor to give his consent is chiefly due to the untiring exertions of the municipality and merchants of Trieste, supported by the influence of the Minister for Trade, Admiral Baron von Wullerstorf, formerly in command of the Novara Expedition, Dr. Parouta, the *Podesta* or Mayor of Trieste, having lately received from the Emperor the Insignia of an Austrian Order of Knighthood, repaired shortly after to Vienna to thank his Majesty for the honour conferred on him, and took the opportunity afforded him at his audience of the Emperor to bring forward the subject again, and to urge the importance of the expedition and the benefits that would accrue to the Austrian trade—more especially on the opening of the Suez Canal—from treaties of commerce with China, Siam, and Japan. The result was that the Emperor promised him the expedition should be sent out, but that it could not take place before the autumn of this year, owing to the absence of Vice-Admiral von Tegethoff, who is selected to command the squadron, that officer having been sent on a special mission to the United States to examine their naval institutions, ships of war and latest improvements in steam machinery. The Emperor has royally kept his word, and a very few days afterwards he signed the decree as above stated.

Herr Lesser, hitherto Acting Prussian Consul at Bangkok, is appointed Consul at that port.

COMMERCIAL.

COFFEE.—There is an inquiry for inferior descriptions, but the better qualities are rather neglected. Prices, however, are everywhere well supported.

SUGAR.—Market weak, with a tendency to go lower. Refined decidedly dull.

RICE.—No alteration in quotations nor sales of magnitude to notice; but there was a fair amount of small transactions.

SPICES.—Cassia Lignea continues in favour, and full rates are willingly paid; 2,000 chests lately arrived per *Bernhard Carl* were sold by importers at 11½. sch. bco. Ginger commands more attention. Pepper neglected.

TEA.—Market rules firm. Of Congou 1810 8ths and 224 16ths, ex *Bernhard Carl* from Amoy, were sold at full prices by private contract, as also several smaller parcels of older importation of Congou, Pekoe, Souchong, and Hyson.

SPELTER.—This market is in a rather better condition, and more confidence is felt in the article. The following articles were sold:—

1,000 centners,	special marks, afloat at	14 mks.	4	sch.	bco.
1,000 do.	common „ do.	14 „	2	„
2,000 do.	for spring delivery	14 „	2	„
4,000 do.	do. do.	14 „	2	„
1,000 do.	ex warehouse do.	14 „	3½	„

DISCOUNT.—1¾ to 2 per cent. Money plentiful.

SHIPPING.—Advices received here state that the Bremen brig *Triton* has been sold at Hong Kong for $11,800.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, WEDNESDAY, MARCH 27, 1867.

THE NEW POSTAL SERVICE.

IN our issue of the 16th we published the memorial of the China merchants on the present working of the mail service; the terms, however, of the new contract appear to have been decided on before it reached the Government. Tenders have been invited for the following services by the POSTMASTER-GENERAL:—From Southampton to Alexandria, calling at Gibraltar and Malta, weekly. From Marseilles to Alexandria direct, weekly. From Brindisi to Alexandria, weekly (as an alternative route with Marseilles to be entered on only in the event of the harbour and the rail over Mont Cenis being approved). A fortnightly service between Aden and Yokohama, calling at Galle, Penang, Singapore, Hong Kong, Shanghai, and Nagasaki, with a separate price should Suez be substituted for Aden.

The India-office invite tenders for a weekly service between Suez and Bombay, *via* Aden, and a fortnightly one between Calcutta and Yokohama, calling at Penang, Singapore, Hong Kong, Shanghai, and Nagasaki—this to be an alternative route with that invited between Aden and Yokohama. According to this, our mails would be conveyed to Bombay, thence overland to Calcutta, and so on by steamer. This project is not at all likely to be carried out, and is, we understand, simply an experiment on the part of the Post-office to see how far their ideas can be effected in conveying all the Far East mails through India, thus leaving the Indian Government to manage the whole of the services on the other side of Suez. We must repeat, however, that these views were embodied in the tenders before the receipt of the memorial of the China merchants, to which no reply has as yet been received. We understand that the P. and O. Company are quite impressed with the necessity of having a separate line from Suez to China, leaving the India service to be worked through Bombay, and we expect this is the shape that the new contract will ultimately take. The rate of speed demanded is ten knots and not eleven, as recommended by the committee of inquiry last year.

PROGRESS IN JAPAN.

A YEAR has not yet elapsed since the date of that notable edict whereby the GOROGIO extended the privilege of foreign travel to all classes of Japanese subjects. Although grave doubts were expressed in some quarters regarding the practical value of this concession, we ourselves could not do otherwise than hail it as the probable harbinger of a new era of progress and enlightenment; nor have we been disappointed. A revolution is rapidly taking place, both in the social system and the foreign policy of Japan, the importance of which cannot be too highly estimated. The new SHIOGOON now has properly accredited representatives at several foreign Courts; not sent reluctantly or grudgingly, but evidently in a cordial and friendly spirit, and with a full appreciation of the value and importance of unrestricted diplomatic intercourse. Imperial Commissioners have visited in turn the capitals of England, France, Holland, and Prussia; a special envoy has been sent to Russia, whose credentials set forth the regret of the SHIOGOON that he was unable to visit the Emperor of that country in person; and the *Colorado* has just reached San Francisco with a Japanese Minister and suite *en route* to Washington. Nor are the evidences of increasing liberality on the part of the Government confined to mere official courtesies; for we find that special commissioners are being sent to represent Japan at the forthcoming Paris Exhibition, independent of a large number of gentlemen, some of them of high rank, who are on their way to be present at its opening. The Japanese Government too will be important exhibitors, a large collection of choice specimens of arts, manufactures, and products having arrived by the steamer *Azoff*. KAWAGI, a military officer holding the rank of lieutenant-colonel in the SHIOGOON'S army, has been sent to this country with thirteen younger officers to place themselves under the protection of Her MAJESTY'S Government during their stay here, for the purposes of study &c.; and a few days since *The Times* announced their reception at the Foreign-office by Lord STANLEY, who has appointed the Rev. W. O. LLOYD, Chaplain R.N., to be their "guide, philosopher, and friend." [By the way, *The Times* still keeps up the farce of calling the SHIOGOON "HIS MAJESTY the TYCOON."] SATSUMA, always foremost in the march of progress, has already sent two envoys to Europe, who have expended vast sums in the purchase of machinery, arms, &c., and have left behind them numbers of young men to study and perfect themselves in European knowledge and civilisation; and the two brothers of this Daimio are now on their way to Paris, to be present at the Exhibition. To these significant facts must be added another, which at the first glance may perhaps seem unworthy to be classed with them—the departure of various troupes of native jugglers and acrobats for Europe and America. This is in fact deserving of special notice, as a proof that the permission to travel is not a privilege reserved exclusively for the higher and more powerful classes, but extends equally to all. The existence of a school under French direction at Yokohama, the avowed intention of the Government to establish a college on the English system, and the improvements now being introduced into the IMPERIAL army, are all additional evidences of a firm determination on the part of this brave and intelligent race to assume the first position among Eastern nations, and to strive for that end not only by freely accepting foreign aid, but by putting their own shoulders steadily to the wheel of progress. How long will it take them, we wonder, to reach that stage of civilisation which rejoices in a Reform League, and weekly "demonstrations?"

THE SAN FRANCISCO AND CHINA LINE.

THE Atlantic cable brings us a telegram announcing the arrival at San Francisco of the *Colorado*, the pioneer of the new line, on her return voyage from China and Japan. The actual date of her arrival is not given, but we presume it to have been the 20th, and the telegram reached London on the 21st, thus bringing news from Yokohama in twenty-two days, or forty days later than that by the last P. and O. mail. This voyage of the *Colorado*, although to a certain extent successful has not fully answered the expectations entertained, for she was expected to perform the passage each way in twenty-five days, instead of which thirty days were taken for the outward, and thirty-three for the return trip. She is however less powerful than the new ships *Great Republic* and *Celestial Empire*, and when those vessels are placed on the line they will doubtless achieve a higher rate of speed. From Hong Kong we have no later news, telegrams having long since been received to the 18th ult., notwithstanding the disorganised state of the Indian lines; moreover, the items given as China news would be entirely valueless, even if they were of a later date. No doubt it is very kind of our American cousins to tell us that "the United States Minister at Peking is in high favour with "the Imperial Court," and the announcement is one likely to be extremely gratifying to Mr. BURLINGHAME'S family circle; but a brief summary of serviceable mercantile news would be received here with much greater favour than such unmistakable "bunkum" as this. On the other hand, the Japan news brought by the new route is always likely to be of much later date than that conveyed through any other channel, and the telegrams from Yokohama, if carefully drawn up, will be most valuable. The present one alludes to the death of the MIKADO as having "happened recently," and in a cursory manner which implies that the event would not have been mentioned at all but for its effect on the markets. If true, it is a startling and important piece of news, and should have been made a prominent and distinct clause; but if, as is equally probable, it refers to the recent death of the SHIOGOON, it is entirely superfluous, and indicates gross carelessness or ignorance. The telegrams are as follows:—

Digitized by Google

NEW YORK, March 20.

The Pacific Mail Company's steamship *Colorado* has arrived at San Francisco, with dates from China to the 17th and Japan to the 27th February. The Japanese Embassy to Washington are among her passengers. Her cargo consists of 270 chests of tea.

The American Minister at Peking was in high favour with the Imperial Court.

The Chinese Government resisted all efforts made to obtain authority to construct a railroad through Mongolia. The French were about to make a short road from Shanghai to Leichow (Soochow).

The Russian fleet was to sail for the Mediterranean.

Piece goods were firm at Hong Kong.

NEW YORK, March 21, 5.30 P.M.

Intelligence has been received from Japan by the steamer *Colorado* down to the 26th of February last. Business was dull in cottons, and, indeed, in all kinds of goods, on account of the death of the Mikado, which has happened recently. Teas are nominally lower; the best were sold at from 31c. to 41c. Sterling exchange, 52d. The British steamers *Scylla*, *Basilisk*, *Argus*, and *Foam* were at Yokohama.

We are also informed by telegram that the Pacific Mail Company's steamer *Hermann* had left San Francisco for Yokohama. This vessel is, we believe, intended for a store ship, and to serve as a spare vessel in case of emergency. The ship *Day Dawn* sailed on 1st March for Hong Kong with $234,000 in specie.

THE "ERIN" BARRATRY CASE.

CRIMINAL, as well as civil law, has its "glorious uncertainties." There are wide differences in the manner of its application; it is notorious, for instance, that certain crimes are punished with far greater severity on some of our circuits than on others. This being the case it need surprise no one to find even still wider differences between the way in which the same law may be administered at home and in a distant colony or settlement; and indeed experience goes to prove that in most of the Far Eastern settlements there is a general desire to put a lenient construction on the penal laws. The sentence passed in the case of the *Erin* is, however, strikingly at variance with this, and presents quite a startling contrast with the decision given in a *cause celebre* of the same class lately tried in the Central Criminal Court—we allude, of course, to the notorious *Severn* case. In this last-named trial, the evidence for the prosecution was as complete and positive as it could possibly be. It was absolutely proved that the prisoners BERWICK and HOLDSWORTH, were not only cognizant of the intention of the master and mate to scuttle the ship, but that they themselves had originated the crime, had deliberately planned its details, and had bribed these men to carry it into execution; and further, that this was only one—happily the last they will have the chance of attempting—of a long series of similar offences. The circumstances have been fully reported in our columns, and it is therefore unnecessary to dwell further on them, except to recall the terms of the sentence, by which the originators of the conspiracy were condemned to twenty, and the two lesser offenders respectively to ten and five years' penal service. In the *Erin* case, on the other hand, it is acknowledged that the evidence, although strong, was purely circumstantial in its nature; of the guilt of the master and mate there could be no doubt, and Mr. SCOTT was also implicated, but there was no direct positive evidence (as in the case of HOLDSWORTH and BERWICK) that he was the sole originator of the plot; and the sentence passed on him of penal servitude for life is merciless in its severity. It must be admitted on all hands that a person who is privy to a conspiracy to cast away a vessel, even should he entertain no design of profiting by it, is guilty of a very grave offence; and we would by no means have it inferred that we advocate any relaxation in the stringency of the existing law against such crimes. Still we cannot avoid noticing the manifest inconsistencies that exist in the application of the law. If twenty years' penal servitude be a sufficient punishment for HOLDSWORTH and BERWICK, then the sentence on SCOTT is manifestly far too heavy in proportion. At any rate it is a case in which justice might well be tempered with mercy. An earnest desire is manifested by all who have interested themselves in the case to endeavour to obtain some mitigation of the sentence, and we cannot but hope that the efforts thus directed may be successful.

SIAMESE EMBASSY TO FRANCE.

AMONG the passengers inward by the last French mail steamer might be observed the names of two Siamese gentlemen, with the parenthetic note "Siamese Ambassadors." It appears that the principal of these, PHYA SURUWONGS, is the only son of the KALAHOME, and is accredited by the King of SIAM as a special envoy to the French Court. The object of his mission is at present a secret, but it is well known that he was despatched somewhat hastily, and there is little doubt that he conveys some representation regarding the late extraordinary conduct of Monsieur AUBARET, the French Consul at Bangkok. It is not at present known whether his Excellency will visit this country before returning to the East.

THE French Emperor has commissioned Lieutenant Varennes to proceed to Saigon, to examine into the condition of the colony, and to report on the means of extending its trade with the neighbouring countries.

Correspondence.

TEA SEASON OF 1867-68.

(To the Editor of the *London and China Telegraph.*)

SIR,—Having perused with deep interest your valuable remarks on this engrossing subject of the China trade, I venture, with your indulgence, to point out some further causes for the continued disasters by which it is characterised, which have gained such an unenviable notoriety for a branch of commerce that used to reflect credit on all connected with it, and which intimacy with the trade may perhaps justify me in commenting upon.

With undoubted truth you remark, Sir, that all your advice has been offered year after year and ignored, and that it is almost too much to expect now that prudence will ever again be exercised in China in operations in this great commodity. The subject, however, has now come to a crisis, and the remedies must be applied at once, unless the trade is to pass almost entirely into new hands.

But what are these remedies to be? First of all, let houses in China whose transactions in tea necessitate their employing an inspector of their own, protect themselves by engaging persons in such capacity whose acquaintance with the article is something more than a hurriedly acquired knowledge of how to arrange a dozen samples according to their relative value, who have been entrusted with the conduct of transactions here, and who know the meaning of a letter of credit and the responsibility of negotiating a set of bills of exchange under it. Let an end be put to tea-tasters being allowed to accept credits from brokers whose failing legitimate business necessitates their resorting to such means of support, limiting them to occasional shipments through their employers' books, and then one great evil in the trade will be done away with, competitors will be fewer, and we shall less frequently hear of firms' calculations for operations being frustrated by their own inspectors. Secondly, competition might be much further reduced by resorting more to the brokerage system on the China markets, while it is clear occasional operators could buy to much more advantage through a public inspector whose constant transactions keep him acquainted with the daily fluctuations of the market than by keeping a tea-taster of their own, who when he is instructed to buy is at the double disadvantage of being regarded by the teamen as a compulsory operator and treated accordingly, and of not being posted up in the stock and its exact value. Thirdly comes the evil of the professed commission-houses at the tea-ports, whose execution of orders this season has been the cause of so much discussion—a difficulty which it appears to me could be very easily removed by houses who have no establishments of their own at those ports, refraining from risking operations there—certainly transactions of magnitude—unless they can spare one of their own firm to proceed with the order and protect their interests. Lastly, importers in this country might defend themselves much more than they do, and thus a further protection to the tea trade would be given, if they would transmit their orders to a house in China whose partner or manager has a practical knowledge of tea himself, enabling him to form his own opinion whether the limits with which he is entrusted be practicable, instead of having to be guided by an inexperienced and irresponsible person.

Trusting you may deem these remarks worthy of space in the nex issue of your valuable journal, and apologising for their great length,—I am, Sir, your obedient servant, MERCATOR.

London, March 20, 1867.

(To the Editor of the *London and China Telegraph.*)

SIR,—As the interests of all parties connected with the tea trade are so closely interwoven with the results of the approaching season of 1867-1868, we hand you for re-publication in your esteemed journal a letter which we addressed in our monthly circular of January, 1863, to the "Importers of Tea and their Buyers in China," and although it then failed to realise the object we had in view—of protecting the importers of tea from the ruinous loss they have since sustained by their rash purchases, yet we think the time has now arrived when it may be read with attention, and be productive of fruitful results to those who will adopt its advice.

Although four years have elapsed since it was written, we can find no further corrections necessary than those which bear on the alterations of the duty and the retail prices of tea here, for as the former has been reduced from 1s. 5d. to 6d. per lb. so the latter (influenced by competition) shows a corresponding reduction, and as the general consumption at that time was running upon teas at 3s. 4d., 3s. 8d., and 4s., it has now been reduced to 2s. 4d., 2s. 8d., and 3s.—We remain, Sir, yours truly,

W. S. SHUTTLEWORTH and Co.

34, Fenchurch-street, London, March 26, 1867.

If our memories deceive us not, why, in the time of monopoly, the highest price paid by the Honourable East India Company was 25 taels for Congou Tea, with the trade confined to Canton, and the attendant charges on a long overland transit! &c., &c. And now, with the whole of China open to you, and access to the very centre of the tea districts, you are paying 50 per cent. more, and vieing with each other in the race to ruin.

Digitized by Google

As Congou is the staple article of consumption, we will pass over all other descriptions in this letter, and confine ourselves to that alone, and if we attain our object of rendering you a service, we may on a future occasion draw your attention to other sorts.

It must be clear to every reasonable man that Tea can be produced as cheap (if not cheaper) in China, as in Japan, the culture must be about the same, the cost of transit similar, and yet we have recently bought fine Japan Tea at 1s. 3d. to 1s. 6d., while you require nearly double that sum, you say, to cover cost price.

As it is never too late to amend a foolish course, we hope for better results in the approaching season. Act with unanimity as a body of merchants if you can, but if one rash, headstrong buyer chooses to act the fool, pray do not let the old adage apply of its making many. Abide your time. We shall have a sufficient and working stock to go on with, and shall be well able to wait a few months, if it is to learn that English capital has not been recklessly thrown away, and that our merchants in China have exercised a discretion in the purchase of their Tea, which will ensure them a profitable result, and that the duplicity of John Chinaman has for once been beaten by forbearance.

From the prices that have been paid for the last two or three years, and the capital which the Chinese teamen have no doubt realised, a further stimulus will have been given to a still larger production for the ensuing season, and we expect to hear of its being brought down early to the ports, and in large quantities; and it will thus be a most favourable opportunity for showing a determined attitude, and a determination not to waver.

We have always been led to suppose that China could furnish us with an illimitable quantity of Tea, and present appearances justify the assumption; and we would strongly impress on you at this moment the urgent necessity of vigilance and judgment. If your markets are over-supplied, reject the lowest grades at any price. Confine your selections to fine and good consumable quality, and this will tend to encourage the production of Teas of good quality, to diminish your shipments, and relieve this market of a cumbrous weight of dead stock. Let caution govern your purchases, see your finest Congou laid down here at 1s. 8d., fine at 1s. 6d., and good at 1s. 4d., and by adding the duty (1s. 5d.) to these prices, a little reflection will convince you that they are extreme rates to be safe, and barely showing a sufficient margin for profit to yourselves, as well as to the wholesale and retail dealers.

SALE OF THE STEAMER "SPUNKIE."

(To the Editor of the *London and China Telegraph.*)

SIR,—We shall feel obliged by your correcting an error which appeared in your journal of the 6th inst., namely, "That the *Spunkie* was sold in Japan for five years' credit." Having only just returned from Nagasaki, the writer is enabled to state positively that the steamer *Spunkie* was sold by our firm at Nagasaki for one half cash and remainder in six months, the greater part of which balance was paid prior to his leaving Japan.

Apologising for thus troubling you, we are, Sir, your obedient servants,

ALT, HOOPER, and Co.

32, Great St. Helens, London, 12th March, 1867.

THE PARIS EXHIBITION.

(FROM OUR CORRESPONDENT.)

THE Far East will make some figure at the Exhibition, the doors of which will irrevocably be thrown open to the public, at least to those who are bearers of the necessary *open sesame*, on the first day of April. The adjoining courts devoted to the products of China and Japan are now resplendent with gold and colour, and the porcelain, bronzes, lacquered, silk, and other wares will be seen in a series of suitable compartments. The front of these courts is decorated with pierced woodwork, the walls are covered with the zodaical signs and other decorations, and the partitions and general embellishments and fittings will all be as far in keeping with the articles which are to be exhibited as French ingenuity can make them. In the garden, or park, as it is called, the Chinese building is progressing rapidly, the roof is seen high in the air, and we are promised Chinese cookery, Chinese workmen, Chinese barbers, and I know not what else, the exact extent of which we shall know more about some little time hence. We are told that the authorities at Peking have invited Chinese merchants and others to send their wares to Paris. It is to be hoped that some will respond to the call, and even if the contributions do not arrive for a few weeks they will be very welcome. The collections made by French agents and amateurs will doubtless be interesting, but the appearance of the names of some real Chinese exhibitors in the catalogue will be a characteristic fact in the history of industrial exhibitions.

It is said that the *Azoff* brings 400 tons of goods from Japan, together with a commissioner, two secretaries, two merchants of high standing, and a numerous suite, amongst whom are three females who are to act as attendants in the tea-house in the Exhibition grounds, where we Westerns are to see for ourselves how the Japanese make and serve the cup that cheers but not inebriates. Now that London is amused by Japanese jugglers it is only fair that an exhibition of arts, manufactures, processes, and customs, should have its Japanese and Chinese courts and pavilions. If it be true, as stated, that the Shiogoon has determined to send his brother to represent him at the Exhibition, it will be another proof of the growing interest taken by the Japanese in Western matters, and a further promise of pacific intercourse.

Your readers will be glad perhaps to have a few words concerning the condition of the Exhibition from one who has the pleasure of addressing them from time to time. The preparations are generally well advanced, and although there may be a few corners in the building not quite perfectly arranged, there will be sufficient to occupy the attention of the most industrious visitor for a long time. There is no section of the interior that will not present a tolerably complete aspect, provided the same energy which has heretofore been shown be continued to the end. All the main fittings are done and accessories and decorations proceed so rapidly, that the time that must elapse before these notes are printed will render their news already old. It is pleasant to be able to add that the British Department is certainly not behindhand, and it is more than probable that it will create a surprise in more ways than one. The grounds are divided into the general park and the reserved garden. The former is literally crowded with buildings, some of them of very large size; Russia, Sweden, and Egypt have each several buildings, all finished. The Sultan has a beautiful kiosk. Tunis has a building as large as the Mansion-house, or nearly so. Morocco has a pretty fanciful pavilion. A huge pyramidal building to contain a museum of Mexican and other American antiquities and productions is approaching completion. Spain, Portugal, Austria, Prussia, Belgium, Holland, and Switzerland have erected important structures, and, in several instances two, three, or more. England is completing a very elegant pavilion, entirely constructed of terra-cotta, over her boilers in the Park; a large building, with three high-pitched roofs, which exhibits English bricklaying, roofing, and specimens of various kinds of architectural construction and ornamentations, and a dozen other erections. As to the French side of the Park, the mere list of the buildings would fill a page. The most conspicuous are the Emperor's pavilion, a very beautiful timber-framed house of three stories, with a tower, for the Chief Commissioner; a theatre; a club; a lecture-hall; an immense establishment for storing grain and baking bread for the army, or for large populations; model cottages; machinery and carriage sheds; two or three photographic establishments; and model factories and sheds without end. One very important subject will be admirably illustrated. France has erected an iron lighthouse to show the electric lantern adopted by the Government, and the English Trinity Board is running up a timber scaffold to carry Holmes's magneto electric. Each of these buildings is 150 feet high, so that their lights will not only be seen all over the Park, but for a great distance around. The Trinity House also exhibits two steam fog-horns, which are said to be able to send their warning notes from Dover to Calais. A fine specimen of our lifeboats now stands on its carriage in one of the main roads of the park, and a beautiful steam launch, 40 feet long, lies at Exhibition Pier. The horticultural garden, its twenty-five conservatories and two great aquariums, cascades, lakes, canal, aviaries, plantations, and flower-beds, are nearly finished, and every day shows vast improvements in them. The bad weather has kept the lower parts of the Park in a sad condition, but this is now rapidly improving; the main roads, broad enough for three or four carriages abreast, are now hard through incessant rolling, and the smaller avenues and alleys are being got into good condition; in the horticultural portion the gravel walks are firm and good. In addition to this it may be added that bad weather will not affect the entrance into the building, for there is a complete covered way from the railway on one side, and for those who arrive in carriages or on foot on the other side of the building. Behind the house erected for the Imperial Commission and the juries is a large post-office and telegraph-office, which, I believe, is already in operation. The former includes a *Poste restante*, and letters will be delivered in the building, provided the writer knows whether his correspondent's quarters are in the *Rue de France*, the *Rue d'Angleterre*, the *Rue des Indes*, &c., for all the radial avenues within the building, as well as the avenues and alleys in the Park, are named after the countries or provinces to which they appertain.

Lastly, the necessities of the inner man are not neglected; there are eight or ten restaurants and cafes already open, French, Austrian, and Bavarian, and three English establish-

Digitized by Google

ments and a host of others will be so by the opening day. In company with some of my brethren of the English press, I visited one of the kitchens, a pastry factory, and several cellars, the other day, and in the latter saw reclining in modest grandeur hundreds of barrels from the classic district of Burton-upon Trent. The white jacketed and capped ministers of the cauldron, the spit and the oven, whom I saw at their incantations beneath the service railway that takes steam-engines and tons of granite into the building above with the same ease as the cook's boy places plates in the oven below, served a dinner to two hundred persons the other day and modestly told me that they hoped to be able to do the same service for two thousand next week. To conclude with a few not carefully selected words; there have been a few rows and some blunders, but the Paris Exhibition of 1867 is a great fact—and no *sell*.

Naval and Military.

The Rodney, 78, screw ship, 2,770 tons, 500-horse power, was taken for the official trial of her engines, previous to her departure for the China station. She was not taken to the measured mile off the Maplin Sands, as is generally the custom, but made a run from the Nore to the Mouse Light and back, attaining a mean speed of 10 knots per hour. The draught of water was 23ft. 4in. forward and 22ft. 11in. aft; the pressure of steam was 20lb.; the vacuum in condensers 25in., the force of wind 2, and the direction east. The engines are by Messrs. Maudslay and Co., and the ship is fitted with a Maudslay propeller 18ft. in diameter, 16ft. 6in. pitch, length 3ft., and the immersion of the upper edge 5ft. 3½in. Capt. the Hon. Arthur Cochrane, C.B., had charge of the vessel during the trial. Several cases of small-pox having broken out on board the *Rodney*, Capt. Heneage, at Spithead anchorage, some delay is likely to occur in her sailing for China to enter upon her duties as the flag-ship of Sir Henry Keppel.

An Admiralty order was received at Portsmouth early in the week which promises (says the *Army and Navy Gazette*) to be productive of mischief. It has been decided that all short-service pensioners are to be immediately discharged from the Steam Reserve. Now it is notorious that, notwithstanding the great popularity of Vice-Admiral the Hon. Sir H. Keppel, his flagship, the Rodney, has not yet filled up her proper complement of seamen, or had not a few days back, and we presume that the order in question has been promulgated with a view of preventing any similar occurrence, but we doubt if it will have this effect, and we would rather be inclined to believe that it will only tend to add to the number of the growlers who now throng the "Hard" and the "Corner," and thus deter many a likely young fellow from entering or continuing in the service.

Her Majesty's ship Galatea, Captain the Duke of Edinburgh, arrived at Gibraltar, thirty-two hours out from Lisbon. She will remain ten days, and will then proceed direct to Marseilles. His Royal Highness being one of the commissioners of the Paris Exhibition, he wishes to be present at the opening. The original arrangements as to the voyage of the Galatea to Australia hold good, and his Royal Highness will return to Gibraltar from Marseilles *en route* for the Antipodes.

The following promotions will necessarily take place on the Flag List, owing to the decease of Admiral Sir Phipps Hornby:—Vice-Admiral the Lord Edward Russell, C.B., to be an admiral: Rear-Admiral George St. Vincent King, to be a vice-admiral; Captain Thomas Francis Birch, to be a rear-admiral on the reserved list; and Captain Sir Robert John Le Mesurier M'Clure, C.B., to be a rear-admiral on the active list, provided he has not yet attained his 60th year, of which there appears to be some doubt. Admiral Sir George Rose Sartorius being the next in rank to the late Sir Phipps Hornby, will doubtless be advanced to the rank of Rear-Admiral of the United Kingdom.

The armour-plated converted wooden frigate Royal Alfred, 18 guns, Captain Herbert, fitted at Portsmouth as the flagship of Vice-Admiral Sir George Rodney Mundy, K.C.B., the appointed successor of Vice-Admiral Sir James Hope in the command of the North America and West India station, has undergone her trial of speed over the measured mile in Stokes Bay. This affords a fitting opportunity for again suggesting for the consideration of the Admiralty the propriety of selecting other than fighting ships as the residence of an admiral and his suite when commanding squadrons on active service. It is highly objectionable that a ship of war, completed at immense cost as a fighting machine, should be turned into a floating residence for an admiral, since this cannot be done without sacrificing some portion of the ship's efficiency, and interfering with the drill of her crew. An admiral commanding a fleet in battle should possess the same free means of personal movement as is possessed by a general in directing the movements of his battalions on land. If steam yachts of the Psyche, or even a larger class, were specially fitted as flagships of admirals, not only would the efficiency of the navy be benefited, but an immense sum would be saved to the country in alterations of fittings on board the flagships.

The Whitehall, hired transport, Capt. Johns, arrived at Spithead on the 23rd from Ceylon, whence she sailed on the 29th of December. She has brought military invalids from the Bombay Presidency, consisting of Capt. Jessey, and Lieut. Armstrong, 25th Regiment; Staff-Assistant-Surgeon Massey, M.D.; 50 men, four soldiers' wives, and five children.

The Queen has been graciously pleased to give orders for the following promotions in and appointments to the Most Honourable Order of the Bath:—

To be Ordinary Members of the Military Division of the First-class, or Knights Grand Cross of the said Most Honourable Order, viz.:—Admiral Sir Stephen Lushington, K.C.B.; Lieutenant-General Sir John Lysaght Pennefather, K.C.B.; Lieutenant-General Sir Richard Airey, K.C.B.; Admiral Sir Charles Howe Freemantle, K.C.B.; Major-General Sir Archdale Wilson, Bart., K.C.B.; Lieutenant General Sir Edward Lugard, K.C.B.; General Sir John Aitchison, K.C.B.; General the Hon. Sir Charles Gore, K.C.B.; and General the Marquis of Tweeddale, K.T., K.C.B.

To be Ordinary Members of the Military Division of the Second Class, or Knights Commanders of the said Most Honourable Order, viz.:—

Vice-Admiral Henry John Codrington, C.B.; Vice-Admiral Joseph Nias, C.B.; Vice-Admiral Sir Edward Belcher, Knt., C.B.; Lieutenant-General Edmund Finucane Morris, C.B.; Lieutenant-General Peter Edmonstone Craigie, C.B.; Lieutenant-General John Bloomfield Gough, C.B.; Lieutenant-General George Henry Lockwood, C.B.; Major-General Maurice Stack, C.B., Bombay Army; Major-General Edward Green, C.B., Bombay Army; Lieutenant-General George Brooke, C.B., Bengal Army; Major-General John Rowland Smyth, C.B.; Admiral Frederick Thomas Michell, C.B.; Vice-Admiral Thomas Matthew Charles Symonds, C.B.; Rear-Admiral William Hutcheon Hall, C.B.; Major-General George Bell, C.B.; Colonel Frederick Edward Chapman, C.B.; Inspector-General of Hospitals and Fleets David Deas, M.D., C.B.; Lieutenant-General Thomas, C.B., Royal Marine Artillery; Captain Sir William Saltonstall Wiseman, Bart., R.N., C.B.; Lieutenant-General William Bell; Lieutenant-General John Bloomfield; Lieutenant-General Anthony Blaxland Stransham, Royal Marine Light Infantry; Major-General William Bates Ingilby; and Major-General Trevor Chute.

To be ordinary members of the military division of the third class, or Companions of the said Most Honourable Order, viz.:—

Major-General George Campbell, Bengal Army; Major-General Morden Carthew, Madras Army; Major-General John Christie, Bengal Army; Rear-Admiral Erasmas Ommanney; Rear-Admiral George William Douglas O'Callaghan; Rear-Admiral Sidney Grenfell; Major-General Philip Kearney M'Gregor Skinner, Bombay Army; Captain Michael de Courcy R.N.; Captain Thomas Wilson, R.N.; Captain Arthur Cumming, R.N.; Captain Henry Charles Otter, R.N.; Colonel John Jarvis Bissett, Cape Mounted Rifles; Colonel John Armstrong, half-pay; Captain Rowley Lambert, R.N.; Captain Edward Westby Vansittart, R.N.; Captain William Garnham Luard, R.N.; Colonel Robert Wardlaw, 1st Dragoons; Colonel Alexander Lowe, half-pay; Colonel the Hon. Robert Rollo, unattached; Colonel George Wynell Mayhow, unattached; Colonel Arthur James Herbert, unattached; Colonel the Hon. Leceister Smyth, half-pay; Colonel William Inglis, half-pay; Colonel Hugh Smith, unattached; Colonel Edward William Derrington Bell, V.C., 23rd Regiment; Colonel Fowler Burton, Depot Battalion; Colonel Robert Warden, 19th Regiment; Colonel William Pollexfen Radcliffe, half-pay; Colonel Samuel Netterville Lowder, Royal Marine Light Infantry; Colonel Robert Hume, 55th Regiment; Colonel John Gwilt, 34th Regiment; Colonel Edward Bruce Hamley, Royal Artillery; Colonel Samuel Enderby Gordon, Royal Artillery; Colonel the Hon. Edward Thomas Gage, Royal Artillery; Colonel Charles Stuart Henry, Royal Artillery; Captain Richard Charles Mayne, R.N.; Colonel Henry D'Oyley Torrens, 23rd Regiment; Colonel William Frederick Carter, 63rd Regiment; Col. George Augustus Schomberg, Royal Marine Artillery; Colonel Colin Mackenzie, Madras Army; Lieut.-Colonel Robert Boyle, Royal Marine Light Infantry; Lieut.-Colonel Penrose Charles Penrose, Royal Marine Light Infantry; Captain Henry Bouchier Phillimore, R.N.; Master Attendant (with the rank of Commander) George Biddlecombe, R.N.; Master Attendant (with the rank of Commander) William Thomas Mainprise, R.N.; Master Attendant (with the rank of Commander) George Henry Kerr Bower, R.N.; Inspector-General of Hospitals Arthur Anderson, M.D.; Inspector-General of Hospitals and Fleets John Davidson, M.D.; Deputy Inspector-General of Hospitals and Fleets William Richard Edwin Smart, M.D.; Deputy Inspector-General of Hospitals Thomas Longmore; Deputy Inspector-General of Hospitals William Rutherford, M.D.; Deputy Inspector-General of Hospitals and Fleets Henry Jones Domville, M.D.; Staff Surgeon James Jenkins, M.D., R.N.; Surgeon-Major John Bowhill, M.D., Bengal Army; Staff Surgeon-Major Thomas Esmonde White, M.D., late 65th Regiment; and Deputy Commissary-General Edward Strickland.

OUR NAVAL POLICY.

The following letter on this subject has appeared in *The Times*:—

SIR,—There are some points in our naval policy to which the attention of Parliament might be usefully directed in the discussions which must arise on naval estimates; many of these have been touched on by Mr. Childers in his able speech on Thursday, in the course of which he sketched out a redistribution of our foreign squadrons which would cripple our operations in many quarters where the presence of ample force is of paramount importance.

I will only deal with those places I am professionally acquainted with.

First, as respects China; since the opening of the trade, the number of small vessels, the numerous islands, islets, and bays on a coast line of 2,500 miles in extent which afford ready shelter to the lawless population, and the great value of the cargoes of many of these small vessels, have led to a system of piracy which we must repress or run the risk of crippling one of the most valuable trades in which British subjects are engaged. For this purpose the present force is inadequate, and that proposed by Mr. Childers would be wholly so.

He proposes a hulk at Shanghai for the "senior officer." I should be sorry to be that officer, with an ironclad or corvette as the flagship, and some four despatch vessels and nine or ten gunboats to maintain the police of that enormous coast. He then proceeds to say that the force at Singapore ought to consist of a despatch vessel and a gunboat. This force would have the whole charge of the coasts of Borneo, the Gulf of Siam, he Sooloo Sea, and all those portions of the Eastern Archipelago which are not within the limits of Dutch or Spanish jurisdiction.

If Mr. Childers had ever had any experience of the climate of China he would never have proposed a corvette for a flagship on a station where certain seasons of the year are most unhealthy, and where the climate leads to great debility and low health. The necessity for a large and roomy flagship to which the crews of gunboats can be sent to recruit is undoubted.

A flagship on such stations is a receiving ship; she ought to be a ren-

Digitized by Google

dezvous for the force, a floating depot for stores, large enough to afford airy accommodation for her crew and supernumeraries, and for the Admiral and his staff. In the present transition state of navies such a ship ought not to go into action. The Admiral, in case of war, in face of iron-clad vessels, would shift his flag to a more suitable ship, and the crew would find ample employment in replacing casualties and reinforcing the fighting ships. We have a stock of fine two-deckers, and they are eminently qualified for this service. I have no faith in stationary hulks in bad climates. They get impregnated with disease, as in the case of the *Isis* at Sierra Leone, and I am sure I shall be borne out by the expression of every one qualified to give an opinion as to the importance of roomy flagships on tropical stations.

Passing to India, Mr. Childers appears to think that the force there might be diminished, on the plea that the Government of Bombay are building monitors, and that the troopships lately built are adapted for men-of-war.

I am sorry to hear that the Bombay Government are doing anything of the sort: the proper defence for Bombay harbour would be forts built upon the Oyster Rock, Middle Ground, the point of Colaba, and the other shoals which bound the harbour. The transports which Mr. Childers erroneously says have been employed conveying troops for some years back are not yet launched, and will not be at work till the end of this year at the earliest, and when they are they are not in the least adapted either for offensive or defensive warfare. He is perfectly right in saying that the Government of India ought to defray part of the expense of the naval defence of that country. They not only ought to do so, but they ought to share the cost of the squadron in China. Examine the list of exports and imports in India, and mark the value of the China trade, and to the extent of that trade ought they contribute their proportion. Another point in justice to the squadron in China ought to be seriously considered—that is, the expense of living there, which is enormous; the junior clerks of mercantile houses receive higher pay than a commodore, and the unfortunate naval officer, exiled to an unhealthy climate, is rendered more susceptible to the normal diseases of the station by inability to supply himself with the comforts and luxuries, which are, in fact, necessaries of life there, and the want of which tells most seriously on the health both of officers and men. The trade ought to be taxed for its protection so far as practicable. If that source fail the revenue from the trade with China can well bear the cost. The idea of suppressing the African squadron is gaining ground; that squadron ought to be attached to the Channel Fleet, and no vessel ought to be there above twelve months on any account. The system of stationing a small ill-ventilated ship there for three years is perfectly unjustifiable. That coast has been the grave of many of our finest officers and men; but it is not the deaths alone, but the seeds of disease which drive many a man from the service in after life, and this applies to China also.

Now, as to the building of ships, the necessity for small roomy vessels is urgent, but the policy of building twin-screw gunboats and saving money by putting the engines which were in the gunboats into them is, I think, quite indefensible. These engines ought to be sold for what they will fetch, and new engines of the most recent construction put into them. The hydraulic principle, as adapted to the *Waterwitch*, with such improvements as may be thought advisable, ought certainly to be tried in some of these vessels. In China, where the rivers are full of fishing nets, the twin-screws may be apt to foul, which the hydraulic vessels never would. But I suppose this principle will have to fight its way, as the turret has been fought, before the Chinese tendency of the Surveyor's Department can be overcome. Nevertheless, in twenty years from this time the turret will be the accepted principle; and I am mistaken if the hydraulic does not also prove to be the best propelling power for ships-of-war.

All the *vis inertiæ* of office will, however, be opposed to the change, unless Mr. Corry, who broke through all conventional form in Lord Haddington's Administration, and gave the country the *Arrogant*, a ship which to the last maintained her character—I say, unless he takes the matter into his own hands, Admiral Elliot will be doomed to see the introduction of a method, the most important that has been brought forward since the invention of the screw, and which owes so much to his energy and professional knowledge, laid aside, to be adopted only when foreign Governments have got the start of us.

I look with much anxiety to the line the Government takes in the building of ships. Those who commit us to a broadside fleet incur a very grave responsibility. Whatever may be the opinion of the late or present Government, I believe the private opinion of officers of all classes is that the 12-ton gun cannot be safely carried on the broadside, and I believe the experience of the present Channel Fleet goes to show that in any sea it would be impracticable to open the main deck ports with safety to the ship. They do not rise to the sea like wooden ships; the waves strike the side and run up it.

There are stories about of main decks flooded and guns unmanageable, which ought to be well sifted before we order more broadside ships.

I must not encroach further on your space, but remain, yours truly,

March 22. J. D. H. ELPHINSTONE.

CIVIL SERVICE ESTIMATES.

The Civil Service Estimates for the year ending 31st March, 1868, have been issued, comprising those objects which are necessary for the civil administration, but which are not defrayed out of the Consolidated Fund. When any item of expenditure is certain and uniform from year to year it is made a permanent charge upon the revenue, but when the expenses depend on circumstances which are continually changing, a vote of the House of Commons must be taken and estimates of such expenses presented to the House.

Commencing with the first of the series, the estimates for public works and buildings, the sum required for this purpose is £942,535, showing a decrease of £30,552 upon the estimates for 1866-67. Together with the expenditure for Royal parks, which amounts to £125,326, there is set down £10,000 for erecting a new iron railing and foot-gates round Hyde Park to repair the mischief done by the mob during a recent assemblage there. Under this head are also included items of £120,805 for public buildings, £41,905 for Royal Palaces, £55,137 for the Houses of Parliament, £49,000 for the new Foreign Office, and £32,000 for the enlargement of the National Gallery.

The estimate for Salaries and Expenses of Public Departments is £1,703,230; for Law and Justice, £3,026,942; Education, Science, and Art, £1,487,554; Superannuation Allowances and Gratuities for Charitable Purposes, £352,558; Miscellaneous and Temporary Objects, £183,854.

In the Revenue Department the estimates are—Salaries and Expenses, Custom-house, £801,623; Salaries and Expenses, Inland Revenue, £1,332,707; Salaries and Expenses, Post-office, £2,438,929; Superannuations, &c., of the three above-named Departments, £471,741; and for the Post-office Packet Service, £807,428.

The total amount of these estimates is thus shown to be £8,202,953, and for the Revenue Departments, £5,852,428, making together a sum of £14,055,381. These figures include the supplementary estimates, amounting to £312,330. Under this head we find the following sums specified:—£1,575 for the Burlington House Designs; £3,617 for the Wellington and Franklin Monuments; £50,000 for the Paris Universal Exhibition; £792 for payments under guarantee to the Mediterranean Extension Telegraph Company for the Malta and Alexandria Telegraph; £45,721 for the purchase of the Blacas Collection of Coins for the British Museum; and £101,300 as compensation for the Anglo-Chinese Flotilla.

For the year 1866-67 the total of these estimates was £14,149,648, the amount for the Civil Services being £8,310,786, and for the Revenue departments £5,835,862. The former service will cost this year £107,833 less than in 1866-67, and the latter £13,566 more, showing a total decrease for the present against the previous year of £94,267.

The estimate for the expenses of the establishments in China, Japan, and Siam, presents a total of £135,983 which is an increase of £9,005 on the estimates for the preceding year. The amount to be voted is divided as follows:—China, £85,683, Japan, £37,450, Siam, £4,550, Judicial Establishment for China and Japan, £8,300.

CHINA.

MISSION AND SUPERINTENDENCY.—Envoy and Chief Superintendent, £6,000; Secretary of Legation and Chinese Secretary, £1,200; Second Secretaries, £900; Assistant Chinese Secretary, £600; Assistant and Accountant, £500; Surgeon, £600; Colonial Auditor, £500; and Assistant, £400 (at Hong Kong). Total salaries, £10,700.

CONSULS.—Canton £1,600, Swatow £800, Amoy £900, Foo-chow £1,000, Ningpo £900, Shanghai £1,500, Taiwan, £800, Chinkiang £900, Kiukiang £900, Hankow £1,300, Tientsin £900, Newchwang £1,300. Total salaries £12,800.

VICE-CONSULS.—Tangchow £750, Shanghai (two) £750 each, Whampoa £750, Tamsui £600, Taku £500. Total salaries, £4,100.

INTERPRETERS.—Two First-class £1,400; Five Second-class £2,500; Four Third-class £1,600. Total salaries, £4,500.

ASSISTANTS.—Six First-class £2,400; Six Second-class £2,100; Eight Third-class £2,400. Total Salaries, £6,900.

MISCELLANEOUS.—Student Interpreters, £3,300; Writers or Linguists, £2,475; Consular Agent at Macao, £150; Allowances for Passages for Consular Officers and Student Interpreters, £2,000; Buildings required at several of the Consular Stations, £20,000; Temporary Allowances at Shanghai, £1,350; Temporary Allowances at Hankow, £550; Pay of Legation Guard and Escort at Pekin, £857; Contingencies, £15,000. The Contingent Expenses are:—1st, Wages for public servants, such as Porters, Coolies, Watchmen, Gaolers, Boatmen, Police, &c.; 2nd, Printing, Stationery, Postage, and Messengers; 3rd, Rent of Ground for Consular Buildings, Repairs, and Insurance; 4th, Office Expenses; 5th, Chapels and Chaplains; 6th, Outfit to Consuls and Vice-Consuls; 7th, Journeys on the Public Service; 8th, Allowance to St. Paul's College, Hong Kong, with a view to promoting the study of the Chinese Language.

A sum of £101,300 is required to be voted to enable Her Majesty's Government to make good to the Chinese Government the estimated value of certain ships which belonged to the late Anglo-Chinese Flotilla. This estimate is for the difference between the sum promised to the Chinese Government on account of this property, and the sum realised by the sale of the ships. One of the vessels is still unsold, and any sum which may be hereafter realised by the sale will be paid into the Exchequer. Subjoined are the several amounts for which the ships were sold compared with the estimated value:—

Name of Ship.	Value estimated on leaving China for England or Bombay, to be accounted for to the Chinese Government.	Amount for which sold, or for which Tenders have been accepted.
China	... £32,000 ...	... £12,500
Peking	... 23,000 ...	... 9,600
Tientsin	... 15,000 ...	... 8,000
Twangtung ...	... 20,000 ...	... 10,000
Keangsoo	... 45,500 ...	... 10,000
Amoy	... 9,000 ...	... 1,250
Thule	... 8,000 ...	... —
	£152,500	£51,350

JAPAN.

MISSION AND CONSULATE GENERAL.—Envoy Extraordinary, Minister Plenipotentiary, and Consul-General, £4,000; Secretary of Legation, £800; Interpreter and Japanese Secretary, £700; Assistant, Accountant, and Medical Officer, £550. Total salaries, £6,050.

JUDICIAL ESTABLISHMENT FOR CHINA AND JAPAN.—Judge, £3,500; Deputy-Judge (£1,000, increasing by £50 a year to £1,200), £1,100; Law Clerk (£600, increasing by £25 a year to £750), £650; Interpreter (£450, increasing by £15 a year to £600), £450; Allowances for House-rent until houses are provided, £2,600. Total expenses, £8,300.

CONSULS.—Kanagawa, £1,000; Nagasaki, £1,000; Hakodadi, £800. Total salaries, £2,800.

VICE-CONSUL.—Kanagawa, £500.

INTERPRETERS.—Two Japanese, £1,000; one Japanese, £400; three Dutch, £1,300. Total salaries, £2,700.

ASSISTANTS.—Two First-class, £800; two Second-class, £700; one Third-class, £300; Student Interpreters, £600. Total salaries, £2,400.

SIAM.

SALARIES AND CONTINGENCIES.—Consul, £1,200; Interpreter, £500; First Assistant, £400; Second Assistant, £350; Medical Attendant, £400; Two Student Interpreters at £200 each, £400. Total of salaries, £3,250. Contingent Expenses, £1,800. Total, salaries and contingencies, £4,550.

LABUAN.

The estimate for the amount of aid required for the year ending 31st March, 1868, to defray the charge of Labuan is £2,183. The expenses are as follows:—Governor, £800; Government Secretary, £300; Treasurer and Police Magistrate, £500; Surgeon, £500; Chaplain, £350; Surveyor General, £300; Harbour Master, £300; Gaoler, £175; Establishments for the foregoing officers, £1,000; Contingent expenses of Justice, Police, and Gaols, £2,040; Roads, Works, and Buildings, £1,100; Miscellaneous Expenses, £310; Loss by Exchange on the Bills drawn on the Governor by the Paymaster-General between May, 1865, and October, 1866, £196. These items amount together to £7,871, from which is to be deducted the estimated local revenue of £3,789 and balance in hand of £1,899.

SAM MENDEL'S EXPORT TABLES.

We have been favoured with Mr. Sam Mendel's monthly tables, containing the quantities and value of all Cotton Goods shipped at the ports of London, Liverpool, Southampton and the Clyde during the month and three months ended 16th March of the years 1865, 1866, and 1867, for exportation to Hong Kong, Shanghai, Japan, Singapore, Manila, Batavia, and Ceylon :—

TO HONG KONG AND WHAMPOA.—For month ended 16th March, 1867: Plain Cottons, 691,986; Coloured Cottons, 43,160; Printed Cottons, 50,740 yds.; Cotton Yarn, 124,700 lbs.; total value of Cotton Goods £24,641. For the three months of 1865: Plain Cottons, 4,232,714 Coloured Cottons, 626,038; Printed Cottons, 19,088 yds.; Cotton Yarn, 524,800 lbs.; total value of Cotton Goods, £212,675. For the three months of 1866: Plain Cottons, 10,628,062; Coloured Cottons, 1,149,194; Printed Cottons, 177,850 yds.; Cotton Yarn, 1,070,320 lbs.; total value of Cotton Goods, £403,294. For the three months of 1867: Plain Cottons, 6,606,321; Coloured Cottons, 240,014; Printed Cottons, 184,733 yds.; Cotton Yarn, 629,600 lbs.; total value of Cotton Goods, £190,619. Decrease, 1867 against 1866, £212,675.

TO SHANGHAI.—For the month ended 16th March, 1867: Plain Cottons, 3,180,780; Coloured Cottons, 433,347; Printed Cottons, 394,976 yds.; Cotton Yarn, no return; total value of Cotton Goods, £89,053. For the three months of 1865: Plain Cottons, 13,248,310; Coloured Cottons, 1,105,629; Printed Cottons, 613,689 yds.; Cotton Yarn, 23,000 lbs.; total value of Cotton Goods, £373,097. For the three months of 1866: Plain Cottons, 21,351.555; Coloured Cottons, 1,699,404; Printed Cottons, 800,038 yds.; Cotton Yarn, 5,000 lbs.; total value of Cotton Goods, £588,368. For the three months of 1867: Plain Cottons, 16,141,960; Coloured Cottons, 3,453,057; Printed Cottons, 1,527,442 yds.; Cotton Yarn, 93,132 lbs.; total value of Cotton Goods, £461,827. Decrease, 1867 against 1866, £126.541.

TO JAPAN.—For the month ended 16th March, 1867: Plain Cottons, 2,961,625; Coloured Cottons, 489,914; Printed Cottons, 182,350 yards; Cotton Yarn, 275,500 lbs.; total value of Cotton Goods, £96,808. For the three months of 1865: Plain Cottons, 1,518,361; Coloured Cottons, 340,200; Printed Cottons, 304.117 yards; Cotton Yarn, 210,700 lbs.; total value of Cotton Goods, £77,490. For the three months of 1866; Plain Cottons, 10,610,616; Coloured Cottons, 955,844; Printed Cottons, 1,126,296 yards; Cotton Yarn, 738,500 lbs.; total value of Cotton Goods, £393,201. For the three months of 1867: Plain Cottons, 4,936,196; Coloured Cottons, 778,774; Printed Cottons, 275,950 yards; Cotton Yarn, 625,000 lbs.; total value of Cotton Goods, £172,327; decrease, 1867 against 1866, £200,874.

TO SINGAPORE AND PENANG.—For the month ended 16th March, 1867: Plain Cottons, 10,745,004: Coloured Cottons, 2,107,602; Printed Cottons, 505,628 yards; Cotton Yarn, 402,350 lbs.; total value of Cotton Goods, £310,191. For the three months of 1865: Plain Cottons, 5,580,021; Coloured Cottons, 905,695; Printed Cottons, 312.900 yards; Cotton Yarn, 287,301 lbs.; total value of Cotton Goods, £191,229. For the three months of 1866: Plain Cottons, 14,215,497; Coloured Cottons, 2,036,417; Printed Cottons, 736.441 yards; Cotton Yarn, 304,025 lbs.; total value of Cotton Goods, £448,035. For the three months of 1867: Plain Cottons, 17,808,050; Coloured Cottons, 3,141,244; Printed Cottons, 1,179,567 yards; Cotton Yarn, 582,180 lbs.; total value of Cotton Goods, £513,832; increase, 1867 against 1866, £65,797.

TO MANILA.—For the month ended 16th March, 1867: Plain Cottons, 1,472,596; Printed Cottons, 17,014; Coloured Cottons, 1,003,651 yards; Cotton yarn, 10,100 lbs.; total value of Cotton Goods, £61,769. For the three months of 1865: Plain Cottons, 2,966,050; Coloured Cottons, 3,336.191; Printed Cottons, 550,115 yards; Cotton Yarn, 17,050 lbs.; total value of Cotton Goods, £181,458. For the three months of 1866: Plain Cottons, 1,296,621; Coloured Cottons, 1,981.696; Printed Cottons, 3,720 yards; Cotton Yarn, 6,200 lbs.; total value of Cotton Goods, £92,003. For the three months of 1867: Plain Cottons, 4,387,838; Coloured Cottons, 3,426,844; Printed Cottons, 118,999 yards; Cotton Yarn, 39,789 lbs.; total value of Cotton Goods, £200,676; increase, 1867 against 1866, £108,673.

TO BATAVIA.—For the month ended 16th March, 1867: Plain Cottons, 3,005,842; Coloured Cottons, 2,176,957; Printed Cottons, 2,524,066 yds.; Cotton Yarn, 67,930 lbs.; total value of Cotton Goods, £179,832. For the three months of 1865: Plain Cottons, 1,304,248; Coloured Cottons, 1,098,580; Printed Cottons, 1,393,295 yds.; Cotton Yarn, 83,100 lbs.; total value of Cotton Goods, £110,788. For the three months of 1866: Plain Cottons, 6,861,389; Coloured Cottons, 3,020,862; Printed Cottons, 1,425,600 yds.; Cotton Yarn, 148,410 lbs.; total value of Cotton Goods, £303,043. For the three months of 1867: Plain Cottons, 7,184,432; Coloured Cottons, 4,460,526; Printed Cottons, 5,463.092 yds.; Cotton Yarn, 207,570 lbs.; total value of Cotton Goods, £417,206; increase, 1867 against 1866, £114,163.

TO CEYLON.—For the month ended 16th March, 1867: Plain Cottons, 1,867,637; Coloured Cottons, 202,157; Printed Cottons, 305,662 yards; Cotton Yarn, 5,000 lbs.; total value of Cotton Goods, £43,787. For the three months of 1865: Plain Cottons, 1,758,892; Coloured Cottons, 533,106; Printed Cottons, 347,102 yards; Cotton Yarn, 48,231 lbs.; total value of Cotton Goods, £84,744. For the three months of 1866: Plain Cottons, 3,814,402; Coloured Cottons, 537,552; Printed Cottons, 1,376,056 yards; Cotton Yarn, 85,173 lbs.; total value of Cotton Goods, £163,842. For the three months of 1867: Plain Cottons, 5,883,387; Coloured Cottons, 597,352; Printed Cottons, 1,014,178 yards; Cotton Yarn, 16,500 lbs.; total value of Cotton Goods, £178,691; increase, 1867 against 1866, £14,849.

Monetary and Commercial.

The 22nd annual general meeting of the Delhi and London Bank was held on the 22nd inst., and the accounts submitted showed that the gross profit amounted to £52,795 11s. 2d., against an outlay for expenses of £20,947 12s. 3d., and for interest £11,267 13s. 9d. A dividend was declared at the rate of 7 per cent. per annum. The London office has only been opened about three years, and during this time a satisfactory business has been done without loss on any transaction. They had, like other banks, felt the disturbed condition of commercial affairs, and the losses had been increased by their late manager at Bombay disobeying positive instructions. All such losses had been amply provided for, and the bank now stands in first-class credit, with a daily increasing demand for their bills on India as a remittance to India, and also to Singapore, China, &c. The report and balance-sheet will be found in another column.

The Bank of Hindustan has issued a notice announcing that they are preparing to pay a dividend of 5s. on creditors' claims, and at the same time they offer to pay at once 15s. on all claims under £100 as a compromise. Of course the permission of the Court has to be obtained to the matter.

A general meeting of the shareholders of the Chartered Bank of India, Australia, and China is called for the 17th of April, when a dividend is to be declared.

The next annual meeting of the Oriental Bank Corporation is announced for the 18th April.

The annual meeting of the Chartered Mercantile Bank usually takes place in May, but the day is not yet announced.

Mr. Spencer Price, the managing director of the Labuan Company, proceeds by the present mail to Singapore and Labuan, to make arrangements for new contracts for coal, as the quantity yielded by the mines has considerably increased. Mr. Price will also proceed to China and effect a sale of the company's steamers there—in the event of a sale not having been already effected—and if possible charter or purchase a suitable steamer to run on the Manila and Singapore station, in addition to the *Mona* and *Japan*, which have been found to give a good return.

The subscription to the Ceylon Government six per cent. debentures, to the extent of £250,000, at the price of £108 for each £100, have only reached £90,000, and, in consequence, the remainder has been withdrawn, no doubt in the hope that a renewed application to the market when the Bank rate is lower may be more satisfactory.

In the Silver Market the bar silver brought by the last West India steamer has been disposed of at 5s. 0⅝d. per ounce standard, being a decline of ⅛d. compared with the price previously realised. This downward movement is principally owing to the firmness of the Amsterdam and Hamburg Exchanges, and the very limited inquiry for the metal to send to the East.

It has transpired in connection with the proceedings of the committee of the Defence Association in the matter of Overend, Gurney, and Co. (Limited), that a bill in Chancery has been filed against Messrs. H. F. Barclay, S. G. Buxton, H. G. Gordon, and W. Rennie, as also against the executors of the late Mr. T. A. Gibb, at the instance of the committee, to establish the right of their constituents to recover the whole of the money which they have already paid, or may ultimately lose, through the misrepresentations to which the five gentlemen in question are alleged to have been parties. The active partners in the old firm of Overend, Gurney, and Co. are also defendants.

The biddings for 30,00,000rs. in bills on India were received at the Bank of England. The amounts allotted were—to Calcutta £196,000, to Madras £4,000, and to Bombay £100,000. The *minimum* price was fixed at 1s. 11d. per rupee on all the Presidencies, being a return to the terms of a month ago. Tenders on Calcutta and Madras at 1s. 11⅛d. will receive about

Digitized by Google

54 per cent., and on Bombay at 1s. 11½d. about 11 per cent. Those above these prices will receive in full. An increased demand for means of remittance is thus indicated, consequent, doubtless, on the circumstance that owing to the prohibitive rates fixed on the last occasion no bills were then taken.

The report of the Crédit Foncier of Mauritius (Limited), to be presented on the 28th inst., shows an available total of £7,536, including a previous balance of £484, and recommends a dividend at the rate of 7½ per cent. per annum, which will leave £70 to be carried forward. The mortgage investments of the company at the end of 1866 were £250,450.

The report of the National Bank of India (limited) dated Calcutta, the 18th of February, showed an available total of £26.227, and recommended a distribution equal to 4 per cent. for the half year, absorbing £18,518. The sum of £5,000 was added to reserve, thus raised to £22,000, and £2,708 remained to be carried forward.

The Messageries Imperiales Company announces that from the 1st April a coupon of 15f. will be paid on the first and second series of the 6 per cent. debentures, and one of 12f. 50c. on the 5 per cent.

The following comments on Tea, from the *Daily Telegraph*, are worth the consideration of our readers in China :—

The tea trade is in a transition state. The days of monopoly in importation, of large stocks held back from the market in the hands of a few colossal capitalists, and of limited sales, are over, or nearly so, and the trade is now asserted to be "open" in a sense unknown two years ago. Younger firms have entered it, and introduced a system of more free and frequent selling on arrival, thus supplying the wants of the home dealer, and rendering him less dependent on the old houses, who were accustomed to feed the market by monthly instalments out of their large accumulated stock. One of the principal impelling causes of this revolution was, no doubt, the successive reductions of duty, as the anticipated large additional consumption had the effect, usually witnessed in such cases, of bringing into the field additional caterers for the expected demand. From this, too, another result has followed which is well pointed out by a correspondent who addresses us on the subject. Having the certainty of buying at reasonable prices, and of profiting by the competition which is almost a novelty in the tea trade, retailers do not care about keeping on hand the stocks they formerly did. "It is a fact," we are told, "well known to tea dealers, that a revolution has during the past year been established in the retail tea trade, inasmuch as they now habitually hold not one-fourth the quantity of tea they were in the habit of holding up to the early part of 1866. This reform has rendered the stock held in the United Kingdom uselessly large." Of course it has. To have a stock of at least 90,000,000 lbs. always on hand has been a superstitution in the China trade. As the same correspondent points out, our weekly deliveries, both for home consumption and export, do not exceed 3,000,000 lbs.; and to imagine that when the stock falls below the figure named the price must inevitably rise, is like saying that the stock of cotton in Liverpool must always amount to 1,300,000 bales if we would avoid a sudden enhancement of value. The retailers, at all events, appear to have abandoned that delusion; and hence importers are left with enormous and increasing quantities on hand, the result of shipments having been hurried forward from China under the old system, and of purchases being made here under the new.

The mischief began with the first season's shipments last summer. These were about the heaviest on record, and, arriving on a dull market here, they added to the depression, which from that date to the end of 1866 was almost unprecedented. Stocks were thrown on the auctions without reserve, and at a disastrous loss. Reduced importations would have changed all this for the better, but instead of being reduced they went on increasing, till at the end of the year we had received from China and elsewhere 138 629,377 lbs., against 121,271,219 lbs. of the year before, and 124,359,243 in 1864. But while there was an additional import of over 17,000,000, our increased home consumption was less than 4 500,000 lbs., against which there was a diminished export of about 2,500,000 lbs.; the net result being that, as compared with 1865, we had a surplus on the 31st Dec. last in excess of the usual stock of exactly 15,342,758 lbs. Nor did the mischief cease here. Since the end of 1865 things have gone from bad to worse in the shape of superfluous stocks. In the month of January our import of tea was actually 16 014,030 lbs., against only 2 404,160 in January, 1865, and our consumption did not increase more than 959,085 lbs.; so that instead of the latter, as usual, relieving the bonded stock, the transactions of the month added considerably to the previous relative excess. There is little need, then, to wonder at depression; the present state of matters only exhibits the working of a natural law. It is hopeless to expect any improvement till this system of accumulating enormous dead stock is done away with. To sell teas at once on their arrival, although resulting at first, perhaps, in an immediate loss, could scarcely be worse than losing interest on capital locked up for months, and then being driven to realise on a falling market; while the gradual effect of such a practice would be seen in the regulating of the shipments from China, and so throwing on the Chinese teamen part of the burden of holding the season's supplies.

Messrs. Rangel, Woollett, and Co. have issued the following circular :—

DEAR SIR,—We beg leave to acquaint you that we have entered into arrangements for a fusion of our business and interests with those of Messrs. Gillespie, Churchill, and Co., and that in future the respective firms will be merged and carried on under the style of Rangel, Gillespie, and Co. at 28, Great Winchester-street.

It has been considered that Messrs. Gillespie, Churchill, and Co.'s extensive connections with India would beneficially combine with our own business as China commission merchants.

We may take this opportunity of stating that Mr. William Henry Woollett's interest in our firm ceased from the 31st December last, and that he retires from business.

Begging reference to the signatures at foot,—We remain, dear Sir, yours faithfully, RANGEL, WOOLLETT, and Co.

1, Lime-street-square, London, March 25, 1867.

DEAR SIR,—We beg to refer you to the enclosed circular letter from Messrs. Rangel, Woollett, and Co., and to state that in future our business will be carried on in accordance with the arrangements therein mentioned, under the title of Rangel, Gillespie, and Co.—We are, dear Sirs, your obedient servants, GILLESPIE, CHURCHILL and Co.

28, Great Winchester-street, London, E.C., March 25, 1857.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of January, 1867, compared with the corresponding month of the two previous years, have been issued. We notice several important deficiencies in these returns, one in particular being the absence of the table giving the value of the exports to each foreign country and British possession.

The exports for the month of January show a decided falling off when compared with former years, the value of British and Irish produce exported in January, 1867, being £12,786,842, the smallest amount in any month since April, 1865, when the value was £12,071,111. For January last year the amount was £14,354,748; in 1865, £14,489,339.

We are now in possession of the Import Returns for the month of December and the twelve months of 1866. In our former issue we were only enabled to give the quantities for those periods and the value for eleven months. The principal features in Imports have been a decrease in Raw Cotton from 373,944 cwts. in January, 1866, to 147,032 in January last; in Wool, from 2,025,959 lbs. to 1,120,396; and in Woollen Yarn, from 303,650 lbs. to 111,876 lbs. For the month of December, 1866, the total value of the Imports was £27,174,309, against £38,930,967 in 1865, and £28,609,265 in 1864. For the year 1866 the value was £238,714,094, against £219,393,987 in 1865, and £226,161,840 in 1864. These figures show an increase for the year last past over the previous one of £19,320,107, and over 1864 of £12,552.254.

The following extracts from the Returns refer particularly to our Import and Export trade with China and the Far East :—

IMPORTS.

The total quantity of Raw Cotton imported into the United Kingdom during the month of January, 1867, and its value for the twelve months ended 31st December, 1866, compared with previous years, are thus given :—

From	Quantity for the Month ended 31st Jan. 1865.	1866.	1867.
British India	27,861 ..	91,465 ..	7,779 cwts.
China	17,396 ..	— ..	— „
Egypt	52,501 ..	10,467 ..	70,727 „
Total from all parts ..	151,264	373,944	147,032 „

	Value for the Month ended 31st Dec. 1864.	1865.	1866.
British India	£5,857,263 ..	£4,262.680 ..	£1,270 258
China	543.655 ..	34.153 ..	34 878
Egypt	2 623 975 ..	2.662,872 ..	1.912 052
Total from all parts	11,212,311 ..	16,738,101 ..	6,855,968

	Value for the Twelve Months ended 31st Dec.		
British India	£38,214,723 ..	£25,005,856 ..	£25,270,547
China	6,242.504 ..	1.593.405 ..	231.736
Egypt	14.300.507 ..	13,906 641 ..	9.200.580
Total from all parts ..	78 203,729 ..	66,052,193 ..	77,521,406

The quantity and value of the Raw Coffee imported from British Possessions into the United Kingdom are thus shown :—

From	Quantity for the Month ended 31st Jan. 1865.	1866.	1867.
Ceylon	2,812.099 ..	244.986 ..	1,207.542 lbs.
Other British Possessions	408 669 ..	216.119 ..	419.971 „
Total from all parts ..	3,968,955 ..	1,933,845 ...	2,712.499 „

	Value for the Month ended 31st Dec. 1864.	1865.	1866.
Ceylon	£169,813 ..	£429.956 ..	£330.026
Other British Possessions	86.896 ..	63,699 ..	79.126
Total from all parts ..	301,445 ..	570,816 ..	488 861

	Value for the Twelve Months ended 31st Dec.		
Ceylon	£2,370,129 ..	£3,112 765 ..	£2,702.352
Other British Possessions ..	654 057 ..	746.313 ..	646.060
Total from all parts ..	3,606,152 ..	4,599,793 ..	4,088,677

The following quantity was entered for home consumption during the month ended 31st January.

	1865.	1866.	1867.
Ceylon	1,860,184 ..	2,112.979 ..	2,260.687 lbs.
Other British Possessions	869,071 ..	637,843 ..	907,170 „
Total from all parts ..	2,976,810 ...	2.990,704 ..	3.507.510 „

Returns are given of the quantity and value of the Unrefined Sugar imported from Java and the Philippine Islands :—

	Quantity for the Month ended 31st Jan. 1865.	1866.	1867.
Of 3rd quality	485 ..	— ..	— cwts.
Of 4th do.	20,672 ..	— ..	111 „
Total, all qualities	21,157 ..	— ..	111 „

	Value for Month ended 31st Dec. 1864.	1865.	1866.
Of 3rd quality	£9.897 ..	£18 755 ..	—
Of 4th do.	70 602 ..	15,662 ..	£96.244
Total, all qualities	80,499 ..	34,417 ..	96,244

ARTICLES OF IMPORT.

TEA.—The market is dull and heavy in the extreme. There has been no revival of demand whatever, and where sales have been pressed, prices have been largely in favour of buyers. Fine Teas have been in some few cases fairly maintained, the trade buying them in small parcels for consumption; other descriptions almost without exception show a downward tendency. Congous: Moning kinds of siftings show no change. Kaisow kinds have been sold to a limited extent at little below former prices. Fair to good common have not been saleable, but quotations are unaltered. Fair to good flavory kinds have sold lower. Fine to finest Kaisows have been in moderate demand. Common to fair black-leaf kinds have sold at a reduction of ¼d. to ½d. per lb. Fair to good medium kinds are also ½d. to 1d. per lb. lower. Fine Monings have been sold at from 1s. 10d. to 2s. 2d., but in very limited quantities. In Flowery Pekoes some sales have been made at a trifling advance on the very low prices recently current. Scented Capers have been in some demand, and sales made at an advance of 1d. per lb. Orange Pekoes are still difficult of sale. In uncoloured Japans there have been no new arrivals. In Green Teas there has been a fair business done, the demand for export still continuing, whilst the home trade are also free buyers. Canton-made Gunpowders remain as before. The public sales of China Tea on the 19th inst. comprised 18,213 packages, of which 16,670 were sold, all being without reserve. The cargoes afloat up to last mail's advices are as follows:—

			lbs.

* Put into Singapore for repairs.

SILK.—Since the 16th our market has slightly improved for ordinary qualities of Silk, and a fair business has been done at the advanced rates. Consumption is slightly increasing, but we still have in stock nearly six

Digitized by Google

months' requirements. The quotations for best China and Japan are about 1s. higher. The deliveries have been from 1st to 23rd March, China, 2,415 bales; Japan, 656 bales.

COTTON.—We have no change to report in this market, its tone being still extremely quiet. The total London sales of East India have been 6,520 bales on the spot, and 8,960 to arrive. From this quantity China and Rangoon descriptions are again absent, quotations remaining the same as those last given. The stock of China and Japan in London amounts to 793 bales.

COFFEE.—The demand for Plantation Ceylon has continued steady, and private sales in large quantities have taken place at full previous rates. At auction 86 casks, 12 barrels, 53 bags, sold as follows:—Triage, 59s. to 65s.; fine to fine fine ordinary, 74s. to 77s.; low middling and middling 79s. to 83s.; good middling, 84s. 6d. to 85s.; pea-berry, 90s. 6d. to 91s. per cwt. Although the inquiry is not so active as for Plantation, good private business has been done in Native, also at fully former terms. In public sale 30 casks were bought in at 65s., 404 bags sold at 66s., 178 bags good ordinary at 65s., and 6 casks low ordinary at 64s. Of Singapore 59 bags were bought in at 60s. per cwt. The stock of coffee on the 16th inst. was—Of Ceylon, 5,290 tons, against 5,850 at the same date last year, and of Java, &c., 1,500 tons, against 1830 in 1866.

COIR YARN.—For the small quantity offered at the auctions there was a good demand, and 8 tons common Ceylon realised £25 15s. to £26 per ton.

DRUGS.—Anniseeds: At auction 50 cases mouldy China Star were bought in at £6 5s., and 35 cases sold at £6 10s. per cwt. Camphor: Prices have slightly declined, and private business has been done in China at £6; of 140 tubs Japan from Rotterdam at auction one-half sold at £6 2s. 6d. to £6 5s. per cwt. Cantharides: Prices also lower, and 1 case China sold at 5s. Cardamoms: One bag ordinary Ceylon realised 3s. per lb. Galls: At auction 206 cases fair bold Japan were bought in at 68s. per cwt. Musk: Of Tonquin 6 caddies medium sold at 22s. to 22s. 6d., and 5 tins grain at 50s. 6d. to 52s. per oz. Rhubarb: Of 33 chests fair China at at auction 1 only sold at 7s. per lb. Sarsaparilla: 16 bales first-class damaged Ceylon were bought in at 4¼d.

GUM ARABIC.—Among the offers at auction were 30 bags Senegal, which sold, bold reddish at 105s., small at 95s. per cwt.

GUM BENJAMIN.—Higher rates are obtained, and of 77 chests Sumatra at auction 14 sold; good fair to very good seconds at £11 5s. to £13 5s., the remainder being bought in at £10 10s. to £11 10s.; fair brown thirds at £6 7s. 6d. to £6 10s. per cwt.

HIDES AND SKINS.—There was a fair demand for East India Hides at the sales for export, but only a moderate one for consumption, and the greater part wese sold at from last sale prices to occasionally ¼d. per lb. decline on the best qualities. Of Penang Buffalo 790 hides sold out of 1,252 offered:—Best, averaging 26 to 34 lbs., at 5⅜d. to 5½d.; seconds, at 4⅝d. to 4¾d. per lb. Of 1,106 Java and 644 Manila Buffalo offered none were sold.

JAPAN WAX.—The offers at auction consisted of 121 cases, which were all bought in,—cake, rather mealy, at 80s.; saucers, ditto and stained, at 85s.; and more mealy and dirty, at 55s. per cwt.

MANILA HEMP.—Since our last report a good demand has been experienced and firm prices have been realised for the large quantity offered. Privately the sales on the spot have been about 1,500 bales fair to good roping at £49 10s. to £50, and for arrival 1,050 bales, including 400 bales per Congress, at £49, the price of the remainder not reported. At the auctions 344 bales sea-damaged Tobasco and Albay realised for first class £49 10s. to £49 15s.; second-class, £48 15s. to £49 5s. per ton.

PEPPER.—For Black there is a moderate demand at previous rates, and of 357 bags Singapore at auction, part sold at 3¼d., the remainder being bought in at the same price. Privately, 800 bags Penang have changed hands, fair West Coast at 3d., common at 2⅞d., and Trang at 3⅛d. per lb. for cash. No transactions reported in White.

PLUMBAGO.—All the Ceylon at auction was bought in, fair bright at 23s., medium dusty at 16s. per cwt.

RICE.—A steady demand has continued to prevail, but by reason of the bare state of the market and higher prices required, transactions on the spot have been limited to about 20,000 bags, Rangoon and Bassein at 11s. 9d. to 12s. For arrival important business has been done, viz., 200 tons Ballam at 13s. 3d. landed, a cargo of 500 tons Bassein at 10s. 9d. for the Continent, and three of Rangoon, together 3,200 tons, at 11s. for the United Kingdom, or 10s. 6d. to 10s. 7½d. ex ship, besides which, other cargoes have been placed on secret terms.

RATTANS.—The following have been the sales during the past week:—9,870 bundles Singapore at 2s. 6d. to 3s. 4d., 100 bundles Rangoon at 4s. 6d. per hundred, and 887 bundles damaged Penang at £11 per ton.

ROOTS.—At auction 100 bales ordinary China were bought in at 20s.

SUGAR.—The market of the past week opened with a fair inquiry, and large quantities were disposed of at steady prices. Later the demand became more restricted and a decline of 6d. per cwt. was generally established, buyers showing little inclination to operate even at that reduction. Penang: Privately 3,000 bags good middling brown to good yellow sold at 29s. 6d. to 33s., and at auction 3,118 bags middling to fine brown (duty 9s. 4d.) realised 29s. to 32s., a few lots good yellow 34s. 6d. per cwt. Manila: The only offer at auction, consisting of 4,000 mats unclayed, was bought in at 25s. 6d. By private contract 10,000 bags clayed (duty 8s. 4d. and 9s. 2d.) sold at 28s. 6d. to 30s., and 9,000 bags unclayed at 24s. 6d. to 25s. 6d. per cwt. The stock of Sugar in the United Kingdom on the 16th inst. was, of Penang 670 tons, against 1,300 at the same date last year; of Manlia 29,560 tons, against 20,740 in 1866.

SPICES.—Cinnamon: At auction 26 bales Ceylon sold, first-class at 2s. 1d.; second, 1s. 10d. to 1s. 11d.; third, 1s. 7d.; fourth, 1s. 3d. per lb. Nutmegs: 44 cases Penang of old import, realised as follows:—Fine bold, 66s. to lb. 3s. 6d. to 3s. 7d.; medium, 76—78 to lb. 2s.; 81 to lb. 1s. 7d.; 112 to lb. 1s. 2d. Also 2 cases Singapore, 138 to lb. 11d. to 1s. per lb.

SAGO.—At auction 340 boxes sold at steady prices, good small pearl 18s. 6d. to 19s., fair medium, 17s., and 221 bags fair small, 17s 6d. per cwt. Of Flour, 400 bags Singapore were bought in at 16s. per cwt.

SAPANWOOD.—Of Manila 25 tons sold, sound at £9 7s. 6d. to £9 12s. 6d., dirty at £8 10s., and stained at £7 2s. 6d. per ton.

STICKLAC.—At auction, 120 cases ordinary dusty Siam were bought in at 42s. 6d. per cwt.

SOY.—Of China, 53 casks were bought in at 3s. 3d. per gallon.

TERRA JAPONICA.—Cutch: The market is firm, and 460 boxes fine unmixed Pegue realised 46s. 6d. to 47s. per cwt. Gambier: Private business to good extent is reported at the previous rate of 19s. 6d. per cwt., and 448 bales were bought in at auctien at 20s.

TAPIOCA.—Of Penang, 40 bags realised 5½d. per lb.

TIN.—The market is quiet but no decline has taken place. Small sales of fine Straits are reported at £88 10s. for cash and £89 for two months' prompt. Banca is quoted at £93 per ton.

VERMILION.—Of 10 boxes China offered at auction, 2 boxes sea damaged realised 2s. 1d. to 2s. 2d. and the remainder was bought in at 2s. 8d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to £6; nail rod, £7 10s. to £8; hoops, £8 17s. 6d. to £9; sheets, single, £9 17s. 6d. to £10; Staffordshire bars, £7 17s. 6d. to £8 10s.; rails, £6 to £6 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £86 to £89 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£90 for block; £91 for common bars. Tin plates, best charcoal I.C., 32s. to 33s.

LEAD, &C.—English pig, W.B., £22 to £22 5s.; shot, patent, £23; sheet, £20 10s.; spelter, £21 15s. to £22; zinc, English sheet, £26 to £27; quicksilver, £6 17s.

The following is from the Circular of Messrs. French and Smith:—"We have little change to report in price of metals. Copper remains quiet. Foreign tin gradually advancing, and English firm at full rates.

LIVERPOOL MARKETS.

COTTON.—A fair amount of business has been done in East India descriptions, with a tendency towards improvement in prices; the sales have amounted to 26,000 bales. Middling fair to fair China is quoted 10½d., and good fair to good 11d. per lb. The stock of East India in Liverpool is 98,000 bales, against 100,000 at the same time last year.

GUM COPAL.—The sales have been 20 cases soft Manila at 27s. per cwt.

GAMBIER.—At auction 1,120 bales heated realised 18s. per cwt.

PEPPER.—Of Singapore Black 250 bags realised 3½d. per lb.

RICE.—A good demand has been experienced at an advance in price of 9d. to 1s. per cwt. on the spot, and 3d. for arrival. The sales on the spot comprised, 8,500 bags Rangoon at 12s. 9d., 15,000 bags Necransie at 11s. 6d. to 11s. 9d., and 12,300 bags Bassein at 12s. 3d. To arrive, 2,000 tons new Necransie sold at 10s. 4½d. to 10s. 6d., and 2,800 tons Rangoon at 11s. per cwt.

SUGAR.—The market is quiet with limited demand, and the only sale of East India was 3,300 mats unclayed Manila at 16s. per cwt.

TIN.—Straits is quoted £89 and Banca £93 per ton, with a firm and steady market.

FREIGHTS AND CHARTERS.

Freights to the Eastern ports continue very firm at previous quotations. Coal freights from the Northern outports are somewhat easier.

Current rates of freight for vessels on the berth:—To Yokohama 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £57. For Saigon: £50. For Yokohama: £50. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 4s. For Singapore: £1 16s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

The Admiralty have invited tenders for the conveyance from the Thames to Hong Kong of 23 tons (heavy) shot, shell, iron, &c., and 3 tons meast stores.

CASUALTIES.

The hull of the Taymouth Castle, from the Clyde to Singapore wrecked at Forhead, Jan. 6, is fast breaking up, and parts of the vessel and cargo are washing on shore.

The Felicia, Mavor, from Samarang for Amsterdam, arrived at Falmouth March 13, with loss of foretopmast and jibboom.

The Edinburgh Castle, Erskine, which sailed from Glasgow for Singapore, March 6, was being towed down the river, March 7, when she grounded off Garvel Point, but was got off on the evening tide.

The Agenoria, Scollard, from Singapore, which arrived at Mauritius, Feb. 1, experienced very heavy weather between Jan. 15 and 18, in 18 S. 70 E. during which she lost fore and mizen topgallant masts, &c.

The Percy Douglas, Hamon, from Colombo to London, got ashore west of Dover, March 14, at 3.15. A.M., but was got off at 5.15. A.M. by a tug, which with another tug took her in tow for Gravesend, where she arrived on the afternoon of March 14.

The Montrose, Small, from Sourabaya to Amsterdam, put in at Mauritius, Feb. 15, leaky and for repairs, having lost spars and rigging in a hurricane in 15 S., 85 E.

The crew of the Sir John Moore (ship), Robertson, which sailed from Cardiff, March 4, for Hong Kong, with coal, have been landed at St. Nazaire by the Amelie, which vessel fell in with the former in a sinking state March 10, in lat. 47, long. 13.

The British Banner, Whiteman, from Shields for Singapore, put in at Falmouth, March 19, to stop a leak.

A telegram from Lisbon, dated 19th March, states as follows:—The Navigator (Russian vessel), Brockelmann, from Liverpool to Batavia, sêl (?) yesterday, foremast head gone all above, other spars, sails, and rigging.

MISCELLANEOUS.

AT ST. HELENA.—Feb. 2, Aureliana, Basterra, from Macao, and sailed 4 for Havana; 9, Francina Willemina, v. Winkel, from Banjoewangie, and sailed for Rotterdam; 10, Ridderkirk, Bunk, from Sourabaya, and sailed 11 for Amsterdam; 11, Hollandia, Ruige, from Batavia; John C. Munro, Word, from Foochow; 12, Rotterdam, Janzen, from Banjoewangie; Empress, Penrice, from Canton; Ellen Browse, McDonald, from Manila, and sailed 13 for Falmouth; Neptunus, Lodewycks, from Batavia; John Bunyan, Allen, from Nagasaki, and sailed 13 for London; 13, Almelo, Tjebbes, from Padang; 14, Avon, Vildosolo, from Macao.

OFF ST. HELENA.—Feb. 11, Cissy, from Shanghai.

AT CALLAO.—Jan. 30, Lion, Kelman, from Hong Kong, and sailed Feb. 9, for Chinchas; Feb. 6, War Spirit, Hutchings, from Hong Kong; 5, Fray Ventos, Bollo, sailed for China.

At MAURITIUS.—Feb. 15, Montrose, Small, from Sourabaya, for Amsterdam; 16, Briton, Fleming, from Singapore; 9, Westburn, Coorn, sailed for Galle; Merle, Blanc, Feydt, sailed for Galle; 12, Florence Barclay, Jeffry, sailed for Galle; 17, Jeanne Meyer, Loesewitz, sailed for Singapore.

A report has been circulated of the arrival of the *Taitsing* at Shanghai, but we cannot find any confirmation of it. This was the vessel said to have spoken the *Ariel* on 9th November, in lat. 4 N., long. 23 W., while it appears by this vessel's report that at the time she must have been somewhere about 1 South on 3rd November, or, twenty days from Gravesend

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay.*—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

THE DELHI AND LONDON BANK

(LIMITED).

Subscribed Capital, £675,250. Paid-up, £337,625.

HEAD OFFICE—76, KING WILLIAM STREET, E.C., LONDON.

Directors.

ALEXANDER BEATTIE, Esq., M.D. | Major-General JOHN CLARKE. | Colonel ROBERT A. RAMSAY.
EDWARD CAMPBELL, Esq. | Major-General ALEX. CUNNINGHAM. | DAVID HENRY SMALL, Esq.

Branches.

CALCUTTA, BOMBAY, DELHI, LUCKNOW, MUSSOORIE, ALLAHABAD, JUBBULPORE, LAHORE.

REPORT of the PROCEEDINGS of a GENERAL MEETING of SHAREHOLDERS held in London, on FRIDAY, the 22nd day of March, 1867, Major-General ALEXANDER CUNNINGHAM in the Chair :—

The Directors beg to submit to the Proprietors the Annual Audited Accounts to 31st December last, and to report that after making provision for all bad and doubtful debts, that is all losses both ascertained and estimated, they are able to declare a dividend at the rate of seven per cent. per annum, for the half-year ending 31st December last, free of income-tax.

The Shareholders must be well aware that the business of all Banks for the greater portion of the year has been attended with great anxieties, more especially to those connected with India; and that for a time, subsequent to June, there was very great alarm both in England and in India, consequent on Banking and other failures, which neces-itated a temporary restriction of business, seriously affecting Exchange operations, and thereby lessening the profits of the period under review.

The Proprietors will have been prepared by the General Manager's letter of the 1st September last to learn that the Bank has sustained heavy losses, partly from the failure of Commercial Houses, but chiefly from the reckless and indefensible conduct of their late Bombay Manager, Mr. W. B. Thompson.

These losses have necessitated the appropriation of a large sum from the past year's profits, and the transfer of £30,525 from the Reserve Fund. The Board hope, however, during the current year, to provide for a large portion of the amount taken from this fund by the sale of spare land at Delhi, which, valuable as it was before, has now become more so by the proximity of the Railway Terminus.

A Branch was opened at Debrooghur, but the business was not so profitable as expected, partly owing to the accommodation afforded by the Government to the public, and from the extreme depression of Tea Property in that district. The Board have therefore withdrawn it. The Branches at Darjeeling and Nynee Tal, owing to the restriction of business, have also been closed.

A Branch has lately been established at Lahore with every prospect of success, being well supported by influential parties.

The late premises of the Bank at Calcutta, for which a high rent was paid, not being well adapted for our extending business, the Directors purchased an eligible house in Council House-street, a situation in all respects suitable.

In conclusion, the Directors have pleasure in stating that the business of the Head Office has been very satisfactory, not a single loss having been sustained since its formation. The business is steadily increasing, and promises to be very profitable.

The Directors who, under Clause 65 of the Deed, vacate their seats are Major-General John Clarke and David Henry Small, Esq., who, being eligible, offer themselves for re-election, as do also the Auditors.—By order of the Board,

J. C. PARRY, General Manager.

BALANCE-SHEET of the DELHI and LONDON BANK (Limited), for 31st December, 1866.

Dr.		Cr.	
To Paid-up Capital	£337,625 0 0	By Cash in hands, and Call, at Head Office and Branches	£141,254 4 11

To Dividend at 5 per cent. per annum for half-year ending 30th June, 1866	£7,457 10 0		By transfer from Reserve Fund...	30,525 0 0
To Dividend at 7 per cent. per annum for half-year ending 31st Dec., 1866 ...	11,816 17 6			
		19,274 7 6		
To provision for bad and doubtful accounts		36,507 1 7		
		£87,996 15 1		£87,996 15 1

We have examined the foregoing Statements, with the Books, Vouchers, and Securities at Head Office and from the Branches, and hereby certify to the correctness thereof.

J. T. SMITH,
ALEX. B. GOODALL, } Auditors.

The following Resolutions were duly moved, seconded, and carried unanimously :—

1. That the Report and Accounts submitted to this Meeting, and previously circulated, be accepted and passed.
2. That Major General John Clarke and David Henry Small, Esq., be re-elected Directors.
3. That the mode of distribution of the amount fixed by the last Meeting of Proprietors for the remuneration of the Directors be left to the discretion of the Board until the next General Meeting, when this question will be reconsidered.
4. That Colonel John Thomas Smith and Alexander Brae Goodall, Esq., be re-elected Auditors.
5. That the thanks of the meeting be presented to the Directors, the Auditors, and the General Manager for their zealous and able services during the past year.
6. That the thanks of the meeting be presented to the Chairman for his able conduct in the chair.

A CUNNINGHAM, Chairman.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the block is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., who requiring to discharge them.

HOLLOWAY'S OINTMENT AND PILLS

JUDICIOUS MANAGEMENT.—Though it is impossible, in this climate of changing temperature, to prevent ill health altogether, yet its form and frequency may be much mitigated by the early adoption of remedial measures. When hoarseness, cough, thick breathing, and the attending slight fever indicate irritation of the throat or chest, Holloway's Ointment should be rubbed upon these parts without delay, and his Pills taken in appropriate doses, to promote its curative action. No catarrhs or sore throats can resist these remedies. Printed directions envelope every package of Holloway's medicaments, which are suited to all ages and conditions, and to every ordinary disease to which humanity is liable.

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.

ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various ports of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

MESSINA, ALEXANDRIA, ADEN, POINT DE GALLE (Ceylon), PONDICHERRY, MADRAS, CALCUTTA, SINGAPORE, BATAVIA, SAIGON, HONG KONG, SHANGHAI, and JAPAN.

The 9th of every Month for—

MESSINA, ALEXANDRIA, ADEN, SEYCHELLES REUNION, MAURITIUS

For passage, freight, and information apply to B.W. and H. HORNE, 4, Mcorgate-street, London; G. H. FLETCHER and Co., Liverpool; at the offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles: or to SMITH and Co., Rotterdam.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT. BRINDISI to ALEXANDRIA—Contract Passage, 82 hours It is frequently done in 73 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 2 P.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions, 1st class, 275f.; 2nd class, 200f.; third class, 90f., and *vice versa*

For further particulars apply to the Company's offices at FLORENCE, via Montebello, 42; PARIS, Rue de L'Universite, 108; LONDON, Messrs. PALMER, 44, Eastcheap, E.C.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month.

The COLORADO, 4,000 tons, leaves SAN FRANCISCO with mails and passengers July 3rd, 1867; to be followed monthly by the other steamers of the line.

For particulars of Freight, through passage rates, &c &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

OPENING OF THE NEW CHINA STEAM ROUTE FROM LIVERPOOL.

VIA THE ISTHMUS OF PANAMA AND SAN FRANCISCO.

THE WEST INDIA and PACIFIC STEAMSHIP COMPANY (Limited) have the pleasure to announce that they have concluded arrangements with the PACIFIC MAIL STEAMSHIP COMPANY for the conveyance, by the latter's new mail line of steamers, of Passengers, Goods, and Specie between LIVERPOOL, YOKOHAMA (Japan), HONG KONG, and SHANGHAI.

THE NEXT DEPARTURE WILL BE:—

From Liverpool ...	...	5th May.
Leaving San Francisco ...	...	3rd July.
Due at Yokohama ...	...	23rd July.
Due at Hong Kong ...	...	2nd Aug.

Making a connection at Yokohama to and from Shanghai.

The steamers will be despatched at regular intervals so soon as those building for the Pacific Mail Company, specially for the service, are ready.

RATES OF PASSAGE FROM LIVERPOOL.

To Yokohama ...	...	First Cabin, £110 10s.
To Hong Kong ...	...	,, £120 10s.
To Shanghai ...	...	,, £120 10s.

FREIGHT, FREE OF PRIMAGE.

Liverpool to Yokohama, Hong Kong, and Shanghai, £18 5s. per ton of 40 cubic feet.

The homeward rates of freight will be fixed by the Agent of the Pacific Mail Steamship Company at the above Ports.

ARTHUR B. FORWOOD, Managing Director.

OFFICES:—LIVERPOOL, The Temple, Dale-street LONDON, 117, Leadenhall-street; HAVRE, J. M. Currie.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

CALCUTTA, MADRAS, CEYLON, and ADEN—Overland, 4th and 20th of every month.

CHINA, JAPAN, SINGAPORE, and EASTERN SEAS—Overland, 4th and 20th.

AUSTRALIA, TASMANIA, and MAURITIUS—Overland, 20th.

NEW ZEALAND and AUSTRALIA via PANAMA, 2nd

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope. Clipper Ships, weekly.

Prospectuses, with through rate to a thousand places free on application.

G. W. WHEATLEY and Co. (late Wagnorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W. and 32, Regent-street, S.W.

CHINA AND JAPAN, &c.

ROBERTSON and CO. will despatch the following first-class clipper VESSELS:—

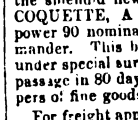
Destination.	Ships.	Class.	Dock.	To Sail.
Hong Kong ...	Chetah ...	A1 10 yr.	W.I.D.	With des.
Kanagawa ...	Swanley ...	A1 13 yr.	W.I.D.	With des.
Kanagawa and Nagasaki ...	Neville ...	A1 10 yr.	W.I.D.	With des.
Singapore	Jant. Fergusn	A1 14 yr.	W.I.D.	With des.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

CHINA and JAPAN.—The following splendid first-class CLIPPER SHIPS will be despatched as under:—

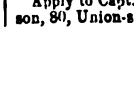
Port.	Ship.	Class.	Dock.	Last Shipping Day.
Shanghai ...	Polmaise...	A1 14 yr.	E.I.D.	April 5.
Hong Kong & Whampoa ..	Ramsey ...	A1 12 yr.	E.I.D.	With des.
Kanagawa and Yokohama	Fontenaye.	A1 12 yr.	E.I.D.	With des.

For Freight or Passage apply to KILLICK, MARTIN and Co., 10, George-yard, Lombard-street, E.C.



STEAM to YOKOHAMA and NAGASAKI Direct.—To sail from Glasgow on the 31st March, will touch at St. Vincent and Singapore to coal, the splendid new composite, Clyde-built screw steamer COQUETTE, A 1 12 years, 626 tons register, horse power 90 nominal, 380 indicated; W. LOBNITZ, Commander. This beautiful vessel, just launched and built under special survey, is confidently expected to make the passage in 80 days, and is strongly recommended to shippers of fine goods.

For freight apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C. Goods to be consigned to Messrs. ALLAN C. GOW and Co., Glasgow, and to be distinctly marked for which port they are intended.



STEAM from the CLYDE to SINGAPORE and HONG KONG. —The fine, new screw steamer PEI-HO, JOHN BELL, commander, will be despatched about the 10th of April. A few passengers will be taken at moderate rates.

Apply to Capt. Bell, on board; or to Browne and Watson, 80, Union-street, Glasgow.

Regular Line of Packet Ship.—To sail on 5th April,

FOR HONG KONG and WHAMPOA, the well-known clipper, INVINCIBLE. A 1 13 years, 657 tons register, C. BEECHING, Commander; lying in the London Docks. This ship is in first-rate order, having been dry docked and newly metalled. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the well-known clipper BANIAN, A 1 14 years, 760 tons register; A. CHASE, Commander; loading in the London Docks. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTOF, 2, Royal Exchange-buildings, London, E.C.

COLOMBO Direct (first ship) the magnificent new clipper ARABELLA, A 1 9 years, 350 tons register, built under special survey; JOHN RAPER, Commander; now loading in the West India Docks. This beautiful vessel has only room for light measurement goods.

For freight or passage apply to F. TALLACK, No. 23, Birchin-lane, E.C.

To follow the "Bolden Lawn."—Will meet with the usual quick despatch.

DIRECT for COLOMBO, the well-known fast-sailing ship SALADIN, A 1 13 years (owned by Messrs. Robert Henderson and Sons), 782 tons register; JAMES RANKIN, Commander; West India Docks. This magnificent vessel has the greater portion of her cargo engaged, and offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

MALABAR COAST.—FIRST SEASON SHIP.

Has a large portion of her Cargo engaged, and will meet with quick despatch.

DIRECT FOR MANGALORE, CANNANORE, CALICUT, COCHIN and ALEPPE, the fine, fast-sailing British Ship LIFE BRIGADE, A 1, 245 tons register, WM. SHEARER, Commander; West India Docks. This beautiful nearly new ship offers a first-rate opportunity to shippers of Season Goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Janet Mitchell."—Has the greater portion of her cargo engaged, and will meet with despatch.

FOR BOMBAY DIRECT, the splendid clipper ship HADDINGTON, A a1 (belonging to the Peninsular and Oriental Steam Navigation Company), 1459 tons register, G. BROWNE, Commander; East India Docks. This vessel is well-known in the Bombay trade for her very rapid passages.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Per P. and O. steamer, from Southampton, May 4.—To Shanghai: Dr. C. Nissen.
From Suez.—To Ceylon: Mr. A. O. Cowan.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Advices from this port reach to the 14th February. The English mail of the 10th and the French mail of the 17th December had arrived out, the latter conveying London telegrams to the 23rd December. All this news had, however, been anticipated by the *Colorado*.

The present mail brings from Yokohama the young Prince of Mito (brother of Stotsbashi, the present Shiogoon), accompanied by Moukoyama, Minister for Foreign Affairs, Yomosaka, Governor to the Prince, and a suite of twenty-eight officers in attendance, together with M. Dury, late French Consul at Nagasaki, and M. Von Siebold, Interpreter at the English Legation.

The *Japan Herald* announces the death of the Mikado from small-pox, but the *Japan Times* throws discredit on the assertion, and says it is disbelieved by the natives. The following items are from the latter journal:—"Instead of going himself to Osaka, Sir Harry Parkes has sent down a couple of young gentlemen attached to the Legation, to inform Stotsbashi that unless he really means business, he can expect no visit from the British Minister. It would be a good card for the new Shiogoon to play in his present difficult game, to show his fellow Daimios that he was of such importance in the eyes of foreigners, that the representatives of the Sovereigns of the West would come at his call to compliment him on his accession to power. But such a trump is hardly likely to be dealt to him.

"It is with the deepest regret that we have to announce the death by his own hand of A. O. Vidal, Esq., of H.B.M. Legation at Yedo. He dined at the Legation mess on the night of Thursday the 7th inst., and was apparently in his usual health. He retired to his own room; not very long after an explosion was heard, and Mr. Vidal was found dead, with a pistol in his hand, with which he had apparently shot himself through the head. No cause has yet been discovered for the act, but he has never been well since his arrival in Japan about a year ago, and has always been remarked for his quiet, almost melancholy, manner. He had been for some time in Peking before he joined the Embassy here, and had made great progress in the Chinese language. Our readers will probably remember a most remarkable translation which we published in July last year of the preface to a rare book printed in Yedo some fifty years ago, called the Nippon Quai Shi. This is a history of the Shiogoons, showing the rise and progress of their power and the decay of that of the Mikados, commencing A.D. 1108. It is written in a singularly difficult Chinese character, and Mr. Vidal had set himself to the task of translating it—the first fruits of his work being given to us in the preface, which we then published. He has since been engaged, also, upon the compilation of a census of Japan, from native sources, the manuscript of which he submitted to us some months ago and took back to check and correct. It is to be feared that the solitary life at Yedo, and the abstruse studies to which he dedicated his time, together produced *hypochondriasis*, in an access of which he has deprived society of a useful life. No other reason can be discovered for his suicide. The few friends he had here have lost in him a companion of great information and gentle, kind temper, and the public service a most industrious and valuable servant."

The following is extracted from a long and important article in the *Japan Times*, on the French Minister's interference with trade:—

"The interference of H.E. the French Minister with the natural course of trade at this port—an interference regarded by all commercial men, except a very small section of his own countrymen, as in the highest degree improper and unjustifiable

Digitized by Google

—has reached such a point as to make it necessary for all who are interested in the expansion of either Japan or European commerce] to unite in a strong effort to check it. It will be remembered that in September last, when it became known that he had influenced the Cabinet of Yedo to entrust the execution of certain large public works to persons appointed by himself or his friends, we called special attention to this evil. We urged the Chamber of Commerce to protest against the initiation of a system which, if fully developed, would infallibly result in the establishment of a gigantic monopoly, to the great disadvantage of the Japanese and the complete destruction of all independent foreign trade. Our anticipations are in a fair way of being realised.

"It was objected at the time by the defenders of M. Roches' policy that the contracts which the Shiogoon's Government were then making were of such magnitude as to be entirely beyond the resources of any private firm; and that it was only by using the aid offered to it by the representative of a friendly Power that it could procure, at a reasonable cost, the docks, arsenal, ships, and machinery which it required. We were also told by his advocates that as soon as these contracts—too important and too large to be entrusted to private firms—should have been executed, and the Shiogoon furnished with his docks, his arsenal, and his fleet, the supply of all needful material would be left to the competition of the legitimate merchants of the place who had risked their capital and employed their time in establishing houses here under the guarantee of treaties which promised a free and unrestricted commerce with Japan. We had no belief at the time that such a promise would be kept, and we expressed our conviction that when the Japanese fleet had been built by the Governmental-Mercantile-Illimitable-Liability Company of Benten, the private merchants of Yokohama would not even be allowed to be its "bumboatmen." No fleet has yet been created, but a batch of experienced French officers have arrived as instructors for the Shiogoon's army, which is to be remodelled on the European system; clothes and arms to a very large amount are required and, though surely cloth, suits of uniform, boots, saddlery, rifles, and other supplies could be furnished without much difficulty by non-official traders, his Excellency the managing director of the Benten G. M. I. L. Company again interferes, and secures the contracts at a rate considerably above ordinary prices. M. Roches must have been perfectly aware that there were numerous firms in Yokohama—French, English, American, German, Dutch—who could and gladly would have undertaken to supply Stotsbashi's reformed army with clothing and all munitions of war, and he might well have abstained from all interference. But he introduced to the Japanese officials in Yedo a French gentleman named Coullet, not ostensibly engaged in trade, but holding the position of inspector or managing director of the Messageries Imperiales Company, with whom large contracts have been made. We may instance as a well-known example one for a considerable quantity of black cloth, variously computed at five, seven, and ten thousand pieces, of which the contract price is confidently stated by merchants who have information on the subject, to be twenty-five cents per yard higher than that at which they would themselves gladly have delivered the description of goods. Nor has the damage done to these, the established traders of the port, been confined to taking from them so large and profitable an operation. A monopoly is virtually established over this particular import. We know of a contract for black cloth made by a foreign house, on which bargain money had been paid, which was cancelled at the urgent entreaty of the native merchant, who stated that the Government had forbidden the purchase of such goods by any private person, and under heavy penalties, on the ground that it intended to procure all that was required through the French Government.

"It remains to apportion the blame due to the parties to this transaction and to seek a remedy for an exil now threatening to attain to such growth as to destroy for the time being all independent commerce in Japan of every nation having treaties with the Shiogoon. We cannot see that any reproach attaches to M. Coullet. This gentleman is a French merchant of high standing and has a European reputation as a writer on finance. Like most prominent commercial men of all countries, he is a director of various companies, amongst others of the Messageries Imperiales—holding in their board the office of Administrateur de Service (or what the P. and O. Company would call an Inspectorate) of the China stations of the line. And it is evident that under the existing rules of the service he has as much right to avail himself of the resources at his command as Messrs. Jardine, Matheson, and Co. of theirs. Besides, it must be remembered that a scheme has been proposed in France for establishing in the East an association similar to the Dutch Trading Company. In the *Economist* which reached us by last English mail is recorded the actual registration in Paris of an association the objects of which are stated to be the 'carrying on of banking, making loans to States, contracting for great public or private enterprises, and undertaking other financial operations.' It is quite possible—and indeed we have heard from several quarters lately that such is the fact—that Mr. Coullet is a director of this new company and preparing for the establishment of a branch in Japan.

"It is the system which allows such assistance to be given that we object to. Ultimately it will fail, no doubt, as it has failed before, and the trade which it is meant to foster it will destroy. As for M. Roches himself, as we have said elsewhere, he acts in perfect good faith according to his lights. He works, as he imagines, for the glory and profit of his country, and for these, we believe, alone. But we hold that he is wrong—that he infringes our treaty rights—and we cannot allow English, American, and Dutch commerce to be sacrificed to the wild theories of a *vieux militaire*.

"We see no signs of a limit to his course. Mr. Coullet has, apparently, the whole supply of clothing for the army in his hands. Native merchants are forbidden to buy an article greatly wanted from any other foreigner. An attempt has been made to stop the trade in arms. The Shiogoon's Government, to pay for its purchases, permits the export of copper contrary to treaty, and we see no reason to doubt that silk will soon be disposed of in the same way. If persisted in, Mr. Roches' policy will lead first to a French monopoly—thence (as has been the case before) to the completion extinction of French trade from the greed of the monopolists and their proved incapacity for commerce in the East.

"The remedy lies partly with the other foreign Ministers, and partly with the merchants themselves. Sir Harry Parkes is bowed down by the yoke of the Anglo-French alliance, but surely he can protest against direct infraction of the treaties, or claim, under "the most favoured nation clause," that English merchants shall also be admitted to trade in Yedo—a threat which would not be ineffective. We can expect no assistance from the Yedo Cabinet. Nor can we greatly blame them. If they choose, with their eyes open, to buy—say black cloth—from a Minister's nominee, twelve or fourteen per cent. dearer than they could get it from a merchant, they may do so. But surely they can be held to the most prominent of their obligations, and prevented alike from making contracts in Yedo and forbidding them here. And cannot the merchants of Yokohama, either through their Chamber of Commerce or by petition to their respective Governments, in some measure aid themselves? Is Manchester helpless? Will the merchants of America consent to see the new trade of the Pacific, which they are stimulating at such cost, pass entirely away from them? Is no other European nation save France interested in silk? Nay, are the merchants of France itself content that the whole of their trade with this country should be managed for them by one oppressive monopoly? We doubt it; but unless an effort, and a strong and united effort, is made, and that quickly, there seems to be a strong probability that all the trade worth having in this port of Yokohama will pass for a time through the hands of the French Minister's nominees."

The Times publishes the following letter on the export of copper:—

Sir,—In the Regulations for British trade with Japan, appended to the treaty between the latter country and Great Britain, the following sentence may be found:—"The Japanese Government will sell from time to time at public auction any surplus quantity of copper that may be produced." In the Yedo Convention of 1866 is further stipulated that copper is "to be sold *only* by the Government at public auction." Unless therefore some error has been made in the translation from the original Dutch, it is clear that Government has bound itself to submit to public competition all the copper produced in the country beyond what is required by the Japanese for home consumption. Now, Sir, I wish to ask you whether you have ever heard of an auction sale of copper in Japan, I, as a British merchant, have occasionally wished to purchase this article, and have sought in vain for any intimation of these public auctions. I have also applied to the Government and to my own Consul, and have

Digitized by Google

received various "evasive answers," but no copper. The question is—Is there a surplus, and if so, what becomes of it? Any one who likes to consult the manifests of the mail steamers, or who reads the valuable market reports issued by your contemporary and yourself, will be readily satisfied upon this point. There is no doubt that a very considerable quantity of unmanufactured copper is being exported from Yokohama, and as we cannot discover that a single picul has been sold by auction, we can only infer, either that the Government has assumed the position of a mercantile firm, and speculates in the article on its own account, or that it favours one particular establishment by privately disposing of a valuable commodity which ought to be offered to the competition of all. In either case the provisions of the treaty are flagrantly violated. We read now-a days a great deal about official trading, ministerial interference, monopoly of trade, &c., and perhaps the British portion of the community feel disposed to plume themselves upon the spotless and reproachless manner in which their representatives conduct themselves, content with the modest stipend allowed by their Government, and unallured by the "good things" which we are told fall to the lot of their brethren. This matter of the copper, however, unless fully explained threatens to tarnish their hitherto unblemished escutcheon. Let them be up and doing or else we shall have some of the papers criticising the new "method of fostering *English* commerce," and it will, I suppose, become your painful (!) duty to accuse our Bayard, hitherto *sans peur et sans reproche*, of being "no better than he should be."—Your obedient servant, C.

The following is the report on the markets:—

IMPORTS.—The Japanese New Year, which commenced on the 5th February, has almost suspended business during the past fortnight, and trade is scarcely yet generally resumed. We have, therefore, little change to report either in the position of the market or in quotations. Sales will be found reported as usual in our tables of Prices Current, but deliveries have been so trifling that we have not recorded them. Cotton Piece Goods continue dull, although one firm has made a considerable sale of Grey Shirtings at full rates. Black Velvets are still inquired for at former extravagant prices. Cotton Yarn 16 to 24 is wanted, and sales have been made at our quotations; other counts are still neglected. In Woollens we notice a considerable falling off in the demand for Black falries, which no longer command high rates, although they are still saleable, with the exception of Cloth, at a decline. Sugar continues in fair demand, and owing to the miscarriage of some parcels sold to arrive, prices will probably advance. Rice has been dealt in to a fair extent, Shanghai grain being much liked, and quoted as high as $5.25. Cotton is in somewhat less demand, but still saleable to a moderate extent; no further supplies have arrived from China.

EXPORTS.—Silk: Business has of course been exceedingly limited, many of the silk men not having resumed business. The tendency downwards which we noticed in our last continued until the market closed for the holidays, but a decidedly firmer tone is now apparent. The general aspect of the market remains the same; fine silks are scarce and much inquired for, and a great deal of the stock is of most inferior character. We have reports of settlements up to 180 piculs, and stocks are estimated at 620. Arrivals have about equalled purchases. Tea: Purchases, confined to a very few small lots of the lowest grades, are so insignificant as to be not worth mentioning. About a couple of hundred piculs have arrived to increase our stock. We leave our quotations unchanged; but for good and fine sorts the market is certainly firmer.

EXCHANGE AND BULLION.—Exchange: The business done for the outgoing mail has been so trifling in amount as scarcely to call for any remark. The Japanese New Year holidays, during which the banks were closed, caused a total suspension of all business, and it can hardly be said to have been revived even yet. Bank rates have again declined; Bank sterling on London has not been in demand, not so much on account of the unfavourable rate, but because of the extreme difficulty experienced in obtaining payment from native merchants for imports purchased. Silk and tea still held firmly at high rates, foreign merchants have been unable to take advantage of the present low rate of exchange for the sale of their bills. The amount of private paper in the market has been very small indeed. Bank paper has been placed at 4s. 5d. for 4 m. st., and 4s. 5¼d. for 6 m. st., and first-class private at 4s. 6d. for 4 m. st., and 4s. 6¼d. for 6 m. st.

NAGASAKI.

A fire broke out at this port on the 7th February which destroyed a great number of native buildings, and at one time endangered the British Consulate. It was only subdued, after raging several hours, by extraordinary exertions on the part of the residents. We have no particulars of the property destroyed. It was reported that the *Spoeyleen* had been sold for $155,000 and the *Novelty* for $40,000, but this requires confirmation. The following is from Messrs. Alt and Co's. circular of February 1st:—

IMPORTS.—The demand for Piece Goods and Manufactures generally, in consequence of the near approach of the Japanese New Year, has manifested a slight decrease since our last month's report; this depression, however, we believe to be only temporary, and, as heretofore, business will assume a more healthy tone after the ten days holidays, ending about the 18th proximo. Grey Shirtings, owing to heavy importations, have somewhat declined in value. T-Cloths: There are none in the market, and much wanted at quotations. Turkey Red Prints and Cambrics continue in good demand, and stocks are low. Taffechellas: Suitable assortments easily realised at quotations. Long Ells, especially scarlet, command ready sales, and supplies limited. Camlets: Stocks are diminishing. Velvets: No stocks, with daily inquiries. Figured Orleans are also in improved request. Shanghai Cotton in small inquiry at reduced rates. Metals: But little has been done in these. Lead continues Saleable at quotations. Nail Rod Iron: Stocks are heavy. Hoop Iron in demand. English Coal: Stock almost exhausted.

EXPORTS.—There has been a steady inquiry for produce during the past month and considerable sales of Camphor, Wax, and Galls, have been made at full rates. For the former, a slight advance upon last mail's quotations has been paid, and a good demand still exists, with only moderate stocks. Wax and Galls continue to be taken freely, but for the latter somewhat reduced figures have been accepted. Operations in Tobacco have been more limited, and though stocks are small, declined a little. Tea: The market for this article continues to be well supplied, and although there are but few anxious buyers, and settlements in some instances have been in favour of purchasers, we do not quote any decided change upon last month's rates. Silk: There have been musters of several parcels on offer, amongst them one of 150 bales, but we do not hear of any settlements as yet.

EXCHANGE.—On London, 6 months' bills, 4s. 7½d. per dollar. On Shanghai, 10 days' sight, par. Itziboos 318 to 320 per $100.

FREIGHTS.—To London, £3 per ton of 50 cubic feet. For New York, £2 10s.—nominal. To Shanghai, $3 to $4; to Hong Kong, $3 to $4.

CHINA.

TIENTSIN.

Our correspondent at this port writes:—

"Of news I have nothing worth giving, except it be that it is rumoured that all the foreign Ministers take up the Korea question in the spring. We had a large fire in the northern suburb (the principal business place) the third time in 11 years. 30,000 ps. of cotton goods and 35 chests of opium were destroyed. The Commissioner of Customs, T. Dick, in his report for December, gives us the following:—Import of grey and white shirtings for the year, 1,053,227 pieces, and other kinds 340,237 ps., making a total of 1,394,464 ps. of the value of 4,255,454 taels,—the quantity falling but little short of that of 1861, while the value exceeds that of 1861 by one-half. The importation of woollens has increased largely since the port was opened, and amounts in 1866 to the value of 886,431 taels. Export of cotton, which began in 1863 with 2,366 piculs valued at 18,928 taels, amounted in 1866 to 136,177 piculs worth 1,770,301 taels. Opium has increased from 1,482 chests in 1861, worth 963,000 taels, to 9,188 in 1866, worth 5,812,600 taels, and yielding half the revenue of the port. The tonnage entered in 1866 was nearly 90,100, against 60,049 tons in 1865.

"From the above you will see our trade is increasing rapidly, but unfortunately it is nearly all in the hands of the Chinese; our shipowners are the only ones who derive much advantage. When affairs get settled at home and in America we may see direct shipments to Tientsin and Chefoo; until then the Chinese will have the best of it. Two or three of our merchants have tried or are trying direct shipments on their own account, and I have no doubt it will pay. Those who have tried it have found it answer upon the whole. There is a great field for trade in the north here, but as yet we really know but little about the country or the trade."

SHANGHAI.

Dates from this port are to the 23rd Feb. The outward mail of December 26 was delivered on the 15th February.

On the introduction of railways into China, the *North China Herald* has the following:—

"Although there appears little immediate hope of the realisation of Sir Macdonald Stephenson's vast railway scheme, the lines indicated by him will, without doubt, be constructed whenever the consent of the Chinese to the introduction of steam carriages shall have been obtained. It is interesting, therefore, in the meantime to know what are the resources and difficulties offered by the country through which they will run. The notes read by Mr. Bickmore before the Asiatic Society, on an overland journey he has just made from Canton to Hankow, point out two great advantages and one serious difficulty. The traffic along parts of the interior is great, and passes through several coal-fields; but the inhabitants appear to entertain a violent antipathy to foreigners. The paragraphs we quote give valuable information regarding the carboniferous resources of the country. Mr. Bickmore fully endorses the opinion that a much better quality of coal than the Chinese use would be discovered by further search. They only collect it in places where it has been upheaved through the superincumbent sandstone, and never attempt to quarry where nature has not thrown it in their way. A more intelligent system would quickly follow on the introduction of railways; so we may be

Digitized by Google

content, for the present, to know that the coal-fields exist; and to infer that they will afford a suitable supply of fuel for the use of our engines whenever the demand arises. The destruction of the Pootung telegraph posts, in a neighbourhood where foreigners are so well known, enables us to appreciate the force of Mr. Bickmore's apprehension of opposition in the interior. At one village, the inn at which he lodged was attacked by the villagers with the expressed intention of killing him because he had been making observations by by the aid of an Azimuth compass, which their fertile imagination construed into an instrument for detecting the hidden riches of their mountains and rivers. Fortunately the threat of his guard that the mandarin would behead all concerned in the riot deterred them from carrying out their intention. In another city not far distant a proclamation was posted up to the effect that it had been determined by common consent that 'if any one had anything to do with the Imps, or rented them a house or any other dwelling place, his house and his family dwelling should be immediately burned to the ground, and his whole family, male and female, old and young, at once put to death.' Here, again, Mr. Bickmore was mobbed and hooted at, though fortunately the crowd did not proceed to actual violence. The prosecution of a railway, until some of this excitement shall have been allayed, will evidently be difficult. In the first place Government would not dare to sanction the enterprise, knowing the hostility it would cause; and even if they did the works would be liable to constant hindrance and workmen impossible to obtain. Evidently the much talked of 'wedge' will have to be driven in very gently at first; and with a prospect before us of so slow a penetration, the sooner the thin end is inserted the better. It is generally admitted that the first essay of the railway system in China will be made on one of three routes—Tientsin to Peking, Shanghai to Soochow or Hangchow, or Canton to Fatshan. The prosecution of one will probably be a signal for the commencement of the others; and these lines having once been established, their gradual progress towards the interior is only a question of time."

We extract the following interesting passages from the paper read by Mr. Bickmore at the meeting of the Asiatic Society:—

"We soon came to Sechang, where some fifty boats were loading with coal.

"This is the principal coal mine on the Siang. It is situated on the left bank, one hundred and forty-five *li* above Hangchau. As shown in the section, the coal beds rest on limestone, and this is also the case in Szechuen, in the coal regions near Peking, and probably in every part of the empire wherever both occur.

"On the coal strata rests red sandstone, which originally covered all the coal deposits in this vicinity, the coal only appearing at the surface where it has been thrust up through the overlying strata of sandstone, or where the sandstone has suffered considerable denudation.

"As we were but six miles from the village where a murder had recently occurred, the mandarin sent to protect me declared he would not allow me to land and travel through the mines; and I was therefore able to note only what could be seen from the river bank. All the 'mines' that were thus observed were merely deep pits in the sides of the hills, and consequently only 'surface' coals are obtained. The engineers of steamboats on the Yangtsze inform me that the coal from this and the neighbouring mines has improved in quality considerably since the first was brought to market. It should be noted here that the best coal usually occurs only below the water level, and the Chinese are obliged to stop when they come to that for want of proper pumping apparatus.

"The best coal in China therefore remains undisturbed, but there is much reason to doubt whether it will ever equal the best coals of England or America.

"Hangchau is the great depot for coal in Hunan, and the military mandarin who accompanied me from that city to Changsha, the capital of the province, stated that, coal is mined at Kweiyang and Saiyang (see Dr. Williams' Map of China), and also at Sinhwa on the Tsz'kiang. It probably occurs therefore everywhere beneath the red sandstone that covers the plains of Hunan, though it is mined only where it outcrops on the borders of these plains, or where it has been brought to the surface by elevations that have taken place since the deposition of the red sandstone. When the present mines become exhausted, no doubt an immense supply may be obtained by boring through the over-lying red sandstone. The wide extent of the coal beds in China promises much for the development of this land in the future. From Lichang, to Moukden, north of the Gulf of Siantung, there is an almost continued series of coal mines on the flanks of the elevations that border the Great Plain.

"A great crowd gathered on the shore at Kweiling when I landed and the boys hooted and shouted, but I could not understand what they said, and only hurried on my chair coolies through the suburbs, which were everywhere perfectly thronged. Two or three times I feared they would block up the street in front of me and thus stop me altogether, but they seemed to have a superstitious respect for the 'barbarian' and allowed me to pass. When we came to the chief gate and were entering the city some officials stopped my chair and drew me into their office from the press of the crowd, while they were instructing my coolies to go round the city and not through it. Here one of the coolies took this opportunity to run away, and it was a long time before another could be obtained, but I finally continued on between the city wall and the river until we came to a great rock round which we were ferried in a boat, and there I was once more free from my persecutors. I also had the pleasure there of being able to walk myself that I might hurry on my chair coolies at the top of their speed, and thus with all possible haste distanced this city of destruction.

"Night, however, overtook us when we were five miles away, and the two policemen guarding us selected an inn in a little village, where we were lodged for the night. After such a tumult it seemed so quiet and safe that I was tempted out into a neighbouring field to note by the aid of an Azimuth compass the direction of the valley we were to travel on the morrow, and also the form of the mountains that bordered it. While I was absorbed in this view a man from the village passed by me and noticed the compass, so I shut it up and went back to rest for fear he might think I was a geomancer.

"Late in the evening the whole neighbourhood began to resound with a heavy beating of gongs, and soon a large crowd carrying torches gathered in front of the inn and began shouting 'Kill him! kill him! kill the white devil!' I plainly saw they had come to rob me and kill me, and feared the worst, but my policemen showed them my pass from their mandarin, and assured them that if they did me any harm the mandarin would behead them all and destroy the whole village. And, after much spiteful discussion, they offered to leave me on the condition that I should leave their village as soon as daylight appeared. The only crime alleged against me was that one of their number had seen me with a mysterious instrument observing the valleys and mountains, and they were all satisfied I had come to carry away the hidden treasures which they were sure their land possessed.

"Almost everywhere, when they saw me breaking the rocks, they at once concluded I was looking for gold, or silver, or precious stones. Another common belief is that a foreigner who has blue eyes has the clairvoyant power of seeing straight through any quantity of solid rock."

We also glean the following items from the *Herald*:—

The question concerning the racecourse property has been referred to Peking. It should be explained that only the land within the racecourse, and not the course itself, is in question. That was bought out and out in the first instance. But the option of abandoning, or paying tls. 40,000 for the cricket and base ball grounds will be sufficiently disagreeable. The original title deeds of the Fives Court property will show clearly the intention of the original purchasers, that it should be reserved for "purposes of recreation" only. A doubt has, we believe, been expressed as to this fact, which the publication of the extracts in question will remove. Clearly, under the other stipulation in the deed, all right and title in the land has been forfeited by the erection of Chinese houses, and we trust that the Taotai will exercise his power to reclaim it, cause the removal of these encumbrances, and, as in the case of the church plot, grant a new title in trust—say to H.B.M. Consul, for the future use of the community.

We mentioned some time ago that the French missionaries were agitating a claim to some land within the city and outside the walls of Nanking, alleged to have been formerly in possession of the Mission. They have, we learn, succeeded in getting their claims recognised, and a plot of land of equal extent, but not identical with that claimed, which is otherwise occupied, has been allotted to them. As will be seen from our leading columns, Li-hung-chang is absent in command of the army in Shantung; but he has not given up the seals of the

Digitized by Google

viceroyalty, and holds both the government of the two Kiangs and the post of Generalissimo vacated by Tsen-kwo-fan.

The occurrence of China New Year's Day on the 5th Feb. made the week a complete holiday, business having only been resumed in a moderate degree on the 8th, on account of the departure of the mail. Nothing of interest occurred in the settlement beyond an additional rowdy escapade of rather unusual boldness. While three gentlemen were on their way up country on a shooting excursion their boat was boarded a short distance from the settlement by two Cantonese and a foreigner, all armed, while alongside was a gig containing four other men. A China boy gave the alarm, and on one of the gentlemen appearing on deck the rowdies made off. The gig had been noticed pulling up the creek about three hours previously, so it would appear they were lying in wait for other game.

A meeting of the British Episcopal Church Society has been held at H.B.M. Consulate. The state of affairs to which the out-going trustees called the attention of the members of the Society affords a satisfactory contrast to the position of matters ecclesiastical which the community were invited to contemplate on the 10th of January, 1866. In the year just over the long-promised church has been actually commenced, and indeed has made marked progress. Those who have taken the pains to examine the portion of the structure already completed must be satisfied with the excellence of the workmanship and the solidity with which the foundation has been laid. The long and tedious process of pile-driving, which occupied so many months, may have seemed a superfluous and supererogatory labour to unpractised eyes, but we who have experience in Shanghai building must acknowledge that the compact basis of operations prepared is a guarantee for the permanence of the superstructure. In these times of impecuniosity the first question which occurs to every one on going to a public meeting is the all-important one of finance. The trustees unfortunately have not enough money to finish the proposed edifice, but they were able to propose a plan by which the design of Gilbert Scott may be carried successfully out without fresh demands on the liberality of the present generation of residents. A loan of the 15,000 taels, in which they are deficient, will, we are assured, be forthcoming whenever the demand arises; and the surplus revenue from pew rents is relied on for payment of the interest and eventually of the principal. The gentlemen who have superintended the temporal matters of the English Church in Shanghai, have not always had pleasant times. Their work has been by no means easy. They have been sometimes accused of rash precipitancy, and at other times branded with a charge of unpardonable slowness. It is, indeed, highly creditable to Shanghai that in a time of extraordinary, and, we may almost say, unexampled depression, money has been forthcoming to build a church for sailors at Pootung Point, and to commence the long delayed structure in the midst of the settlement. These facts speak for themselves, and while they prove that energy and perseverance have distinguished the gentlemen who have directed British church affairs, they also prove that the mind of the community is not so completely employed in material pursuits as it is the fashion to state.

HANKOW.

The *Hankow Times* has the following on the New Year holidays, and the working of the native banks:—Tuesday, the 5th February, was the first of the China New Year, and the natives have for the last few days been giving themselves up entirely to feasting and pleasure-seeking, placing business in abeyance. This festive was, however, as usual, preceded by a trying term—the Chinese settling up and closing all accounts with the year; and the advent of this ordeal has been looked forward to by our merchants with considerable apprehension and anxiety. The result for the majority has been satisfactory; and beyond the weaknesses apparent for some time past, no fresh disasters have transpired, and foreigners have reason to congratulate themselves on such a happy issue. Before resuming business, we recommend the merchants to pause and meditate over the experience of the past year. We have time after time urged on the notice of our readers the dangerous system on which business has been conducted here; and were any additional evidence wanted, the disclosures lately made as to the position of many of the native banks would surely suffice to convince even the most sceptical. The past year has been a disastrous one to Chinese as well as foreigners. Their operations in tea and other native produce, as also in imports, have as a rule resulted in heavy losses, and their resources have thereby been much crippled. If, therefore, the dangers which we had so forcibly brought to our notice in September, 1865, when the cash system was last agitated, were real (and they were generally acknowledged to be so) they must indeed be greater now, and more to be dreaded than at any previous time. The system of business at Hankow is such as does not exist in any other port of China. Goods have been sold to men of whom we know but little, and who generally are mere upstarts, and they obtain delivery on tendering bank orders at dates varying from three weeks to two months. These documents have till but lately been considered by some almost as good as sycee; this delusion, however, has now been dispelled and we have seen that in cases of difficulty many of the orders are almost worthless, and likewise that the buyers of the goods are often interested in the banks. We cannot think that the merchants are sufficiently compensated for the great risk incurred by the prices obtained in comparison with those in Shanghai. The great bane of the trade of Hankow has been the competition among foreigners, many trying to overreach their neighbours, and to do business at any cost. The risks involved, however, we feel convinced could not have been appreciated by the principals in Shanghai, otherwise we should have had a change long ere this. Many, we are given to believe, comfort themselves with the supposed securities of their compradores being responsible for the payment of the bankers' orders, and we hope they may be right; but we opine that in an important case it might occur to the native to repudiate such responsibility, and in a court of law it is not unlikely the decision would be against the foreigner. The evils extend even further than the immediate risk. By giving credit to these needy traders they are virtually supplied with funds, with which they are enabled to compete with the legitimate trader in the purchase of produce in the interior, and thus the merchants raise the price on themselves. A most flagrant example of this is seen in the unprecedented prices at which teas were bought in the country last season.

HONG KONG.

From this port we have advices to the 26th February. The mail of January 11th arrived out on the 23rd February, with telegrams to January 30th. There is little news of importance, the chief event of local interest being the laying of the foundation stone of the new City Hall, which is thus narrated by the *China Mail*:—

The foundation stone of the Hong Kong City Hall was laid to-day by H. E. Sir Richard MacDonnell, with the usual ceremony, in presence of a very limited number of residents. This paucity of attendance is explainable by the somewhat hasty decision of the committee as to the time the ceremony should take place and a rumour regarding three fresh races at Wongneichong. At the eastern corner of the site a sort of platform was raised on which the stone rested; the stone (a common piece of rough Chinese granite) being fixed above to a block-pulley suspended from the top of the platform. Without the least ornamentation, the platform presented a very bare appearance; and had it only been painted black, it would have strongly resembled a rickety specimen of a gallows. Such a notion must have been floating in the mind of one gentleman present, who remarked, while a cluster of onlookers were gazing down into the "level," that they were gathered around the grave of the departed. The English flag was attached to a piece of bamboo on the platform. At the entrance to the enclosure stood a matshed, in which a tiffin was laid out for the regalement of the distinguished party after the stone was laid. Over the door of the matshed were placed the flag of the United States and that of France, thus representing the three nationalities most interested in the erection of the building.

A few minutes before one the strain of the 20th band informed those round the platform that his Excellency and party had arrived. The Governor was accompanied by Lady MacDonnell, the Duc de Penthievre, Comte Beavoir, and Mr. Mercer. Messrs. Rennie, Whittall, Pollard, Ryrie, Forth, the other members of committee and Monsieur Hermitte received his Excellency and party at the door of the enclosure, the band meanwhile playing the National Anthem. A number of ladies were also present, and considerably relieved what was otherwise anything but an imposing ceremony. Previous to the lowering of the stone, the Governor placed in the cavity of the stone specimens of the Hong Kong mintage, representing all the coins, from the mil to the dollar—and the mortar was then spread, his Excellency, silver trowel in hand, lending his assistance. A copy of this morning's issue of the *Daily Press* was also placed in the cavity of the foundation-stone; and also a medal (we were going to say a Hong Kong dollar) struck for

Digitized by Google

the occasion at the Hong Kong Mint. The obverse of the medal is simply the obverse of the Hong Kong dollar; and upon the reverse is stamped a clumsily-cut inscription to the following effect:—"Hong Kong City Hall Foundation Stone, laid by H. E. Sir R. G. MacDonnell, C.B., 23rd February, 1867. A. Hermitte, archt."

The stone lowered, a few finishing touches by his Excellency, and the manual labour of the affair was at an end. All that was said over the stone comprised merely a few words of congratulation from the Governor to Mr. Rennie, touching the inauguration of the undertaking in which they had just taken part. At this stage of the proceedings Mr. Silveira, the photographer, made himself observable with camera and prepared plate, hitting off the group upon the platform in a couple of seconds; and the company adjourned to the refreshment-room, where, we are informed, about forty sat down to tiffin, and congratulatory addresses were interchanged.

The following items are also from the China mail:—The *Kew Kee* steamer was sold at auction on the 22nd February, by Messrs. Morgan, Lambert and Co., and realised the sum of nine thousand dollars.

The *Taitsing* cleared for Hong Kong at Shanghai on the 13th February. She is consigned to Messrs. Birley, Worthington and Co. The Shanghai *Daily News* remarks that the *Taitsing* was in that port only a week, and finished discharging her cargo in exactly 28 working hours at the Union Wharf. We may further remark, to her credit, that she reached this port in three days from Shanghai, passing the steamer *Shaftesbury*, as already reported, off Point Matheson, above Amo

The French steamer *Phase*, Captain C. Hinstin, is intended, we believe, for the Messageries Imperiales' service on the northern route from Hong Kong. The following are her dimensions in French measurement:—Length, metres 86.60; width, metres 10.32; registered tonnage, 719; actual tonnage, 1,200; horse power, 370; speed, 11 knots. She was built in 1857.

The weather is seldom so noteworthy as it has been in Hong Kong during the last few days, partly because it has been more solicitously watched than usual, and partly because it has been as changeable as fickle fortune herself. For the season, and compared with this time last year, it has been very cold, the glass having fallen to 49 and 50. Such a state of affairs, however, appears to be improved upon at Canton. A correspondent mentions that "it was bitterly cold here (20th), thermometer down to 42, and no sun." Three months' time will turn the tables completely.

The *Consular Gazette* gives a return of prisoners sent to Hong Kong from Shanghai, under sentence by the Supreme Court, to undergo their punishment here. There were fourteen altogether in 1866. Two, Ed. Thomas Bolt and John Scott, sentenced each to twelve months' imprisonment for manslaughter, have had their sentences remitted by H. M. Minister at Peking, "on condition that the prisoners return to England." We wonder how far home purists will like this deportation of criminals to the home country. When the Australian colonists threatened to return some of the "expirees" who had graduated in the universities of English crime, if transportation to Australia was continued, the home Government became alarmed, and turned a willing and compliant ear to remonstrances they had previously derided. In the case under notice the prisoners are apparently under an obligation to "return to England," and to go nowhere else for the unexpired period of their sentences. Two persons have lately been deported from Shanghai, one for proceeding into the interior without a passport, the other for enticing two seamen of H.M.S. *Firm* to desert, both prisoners being unable to find security for good behaviour. Sentence of deportation was carried out in another case for "furious driving and drunkenness," coupled also with inability to find surety. Three have been deported from Japan for having desecrated some Ainos' graves at Hakodadi. How many of these deportees find their way to Hong Kong?

BURMAH.

RANGOON.

Three engineers left Rangoon on the 31st of January to explore the country, with a view to the formation of a railway connecting Rangoon with Western China. The names of these gentlemen are Captain C. H. Luard, of the Royal Engineers, consulting engineer of the railways in Bengal; Captain J. M. Williams, superintendent of works; and Mr. d'Avigdor, civil engineer.

The annual exhibition of the Agri-Horticultural Society of British Burmah was opened on the 9th of February, and a number of prizes were awarded to the producers of the best English vegetables (that is, raised from English seed), the best country vegetables, and the finest flowers.

A shock of an earthquake was felt at Rangoon on the 28th January at daybreak. The first wave was decidedly strong, as though there was a great upheaval somewhere; but the second and third were less violent. The *Times* considers it probable that there has been some recent irruption in the volcanic mountains of the north. This is the third earthquake that has been felt in that region during the last ten years. A meteoric shower was said to have been seen three nights previous, but the *Times* says that, not having seen it, they were unable to describe it. On the previous occurrence of an earthquake certain luminous bodies were seen shooting through the atmosphere, preceding the shock.

A geological survey made by Mr. Theobald, under instructions from the Indian Government, has developed the fact that British Burmah is rich in iron ore of excellent quality, and abounds in coal, tin, copper, and antimony. It is very justly observed that the successful working of these branches of industry must depend upon the increase of the population and the amount of capital which can be attracted to the country to be invested in the undertaking. The King of Burmah grants permission to companies or to individuals to work any of the mines in his territory upon payment of a fee to him at the making of the lease, but reserves to himself the right of forbidding the export of the minerals at his Royal pleasure.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BAYLEY—On the 26th Feb., at Point de Galle, Ceylon, the wife of Francis Bayley, Esq., of a daughter.

BIELFELD—On the 22nd Feb., at Hong Kong, Mrs. Alexander Bielfeld, of a daughter.

GILFILLAN—On the 16th Feb., at Shanghai, Mrs. James Gilfillan, of a daughter.

GREENALL—On the 30th March, at 43, Rutland-gate, the wife of Gilbert Greenall, Esq., of a son.

HARPER—On the 15th Feb., at Shanghai, the wife of William Harper, Esq., of a daughter.

LEWIS—On the 27th March, at 14, Carlton-road, Maida-vale West, the wife of W. F. Lewis, Esq., Shanghai, China, of a daughter.

MACKAY—On the 11th Feb., the wife of George Mackay, Esq., of a daughter.

TAYLOR—On the 12th Feb., the wife of John T. Taylor, Esq., of a daughter.

MARRIAGES.

HARCOURT—PLUMRIDGE.—On the 23rd Feb., at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, R.N., Acting Colonial Chaplain, John S. C. Harcourt, Capt. 20th Regt., to Harriet Emma Elizabeth Plumridge.

OGLE—PALMER.—On the 26th Feb., at Singapore, by the Rev. C. J. Waterhouse, Mr. Andrew Alfred Ogle, chief engineer steamer Fair Malacca, to Henrietta Letitia, youngest daughter of Mr. Benjamin Palmer.

PERCEVAL—NORTON.—On the 30th March, at the parish church of St. Margaret's, Horsmonden, by the Rev. Hugh F. S. Marriott, rector, M.A., Spencer Frederick John, eldest son of the late Frederick James Perceval, Esq., J.P. of Middlesex, and grandson of the late Right Hon. Spencer Perceval, to Ellen Anne, second daughter of the late Owens Norton, Esq., of Edgbaston, Warwickshire. No cards.

DEATHS.

BOWEN—On the 28th March, at Addison-road, Notting-hill, Captain Edwin Bowen, late of the China Steamship Company's steamer Moy a.

BRISTOW—On the 17th Feb., at Singapore, Captain Horatio Bristow.

DOLLY—On the 22nd Feb., on board H.M.S. Melville, Charles Dolly, captain of mizentop, H.M.S. Princess Royal, aged 30 years.

FULLERTON—On the 31st March, at his residence, 6, Adelaide-crescent, Brighton, William Elphinstone Fullerton, Esq., eldest son of the late Robert Fullerton, Esq., formerly Governor of Penang.

GUERIN—On the 21st Feb., at Canton, Eugene Guerin, Knight of the Legion of Honour, in the 38th year of his age.

MAGNIAC—On the 31st March, at 2, Bolton-row, Piccadilly, Hollingworth Magniac, Esq., of Colworth, Bedfordshire, in his 81st year.

ORD—On the 29th March, at Streatham-hill, Surrey, Marietta, infant daughter of George Rice Ord, Esq., aged 7 months and 12 days.

PERREAU—On the 26th Feb., at Singapore, Mr. D. C. Perreau, aged 25 years.

SLATE—On the 24th Feb., at Hong Kong, Richard Brewster Slate, Esq., of New York, U.S.A.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London, Feb. 14, Jubilee.

At HONG KONG and CANTON.—None.

At MANILA.—From Glasgow. Feb. 9, Jose y Maria; from Havana, Margarita.

At SINGAPORE.—From the Clyde, Nemyss Castle (reported by telegram).

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From HONG KONG and CANTON.—None.

From MANILA.—For London (via Cape of Good Hope) Feb. 18, San Fernando; for Spain, 12, H.C.M. St. Berenguela.

From SINGAPORE.—For London, Feb. 21, Sophie.

VESSELS LOADING.

At YOKOHAMA.—For London, Carioca, Lord Collingwood.

At SHANGHAI.—For London, Burmah, John Bellamy, Peter Denny; for New York, Endeavour, Magellan, Aurora Australis.

At HONG KONG and CANTON.—For London, none; for Hamburg, Emilie, Ficciola; for New York, Windward, Ariadne, Sea Serpent.

At MANILA.—For Falmouth, Glendower; For London, Canaan,

Digitized by Google

Coromandel; for Havana, Eulalia; for Barcelona, Nievo Santaro; for New York, Hotspur, Earl Dalhousie, Mindoro.

At SINGAPORE.—For London, Willy, Der Sud, Ellen Radford; for Falmouth (for orders), Elias; for Liverpool and Glasgow, Roslin Castle, for Rotterdam, Bengal; for New York, John Norman.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—The quotations, which are nominal, remain at £3 to £3 10s. for Cotton and Tea, and £4 to £4 10s. Silk. To New York there is no vessel on the berth.

At SHANGHA.—To London, £2. To New York, £2 per ton of 40 cubic feet.

At MANILA.—The Earl of Dalhousie has been fixed for New York, with a full cargo of Hemp at £4 per 20 cwt. The Eulalia has been taken up for Havana at £3 10s. per ton for a cargo of Rice and Coffee.

CASUALTIES.

SINGAPORE.

The Gazelle, Le Gros, from Singapore to London, was wrecked on the Pan Shoal, at the entrance of Rhio Straits, on 8th of February, and afterwards sunk. Crew saved.

COMMERCIAL POSTSCRIPT.

A meeting of the proprietors of the Commercial Bank Corporation of India and the East was held yesterday, Mr. J. J. Lowndes in the chair, to consider a project prepared by Messrs. Chadwick and Co., for the resuscitation of the business of the bank on the basis of their scheme which was carried out successfully in the case of the Agra Bank. The examination of the accounts was stated to show a probable surplus of about £200,000, for which it is proposed to credit 40,000 B shares with £5 each. It is likewise proposed to raise £300,000 new capital by the issue of 30,000 A shares, at £10 each, to be paid up within the year, and also to obtain the assent of the creditors to receive the remainder of their debts (10s. in the pound having already been paid) by four half-yearly instalments of 2s. 6d. each. At the end of the two years it is proposed to free from liability the shareholders, and convert the 40,000 £5 shares into 20,000 £10 shares with limited liability, the same as those of the new company. The fresh capital is to receive a preference dividend of £10 per cent. out of the first profits, and promissory notes are to be given to the creditors for the amount of their instalments with interest. After considerable discussion and inquiry, unanimous resolutions were passed in approval of the scheme and for the appointment of a committee of shareholders to give effect to it. Assistance afforded by Mr. Holyhead, the liquidator, was at the same time acknowledged.

ARRIVALS NOT IN THE TABLES.—March 20, at New York, from Canton, Powhatten.

DEPARTURES.—April 4, from London, for Manila, Ercilla; 3, from Liverpool, for Singapore, Bella; 2, from Sunderland, for Hong Kong, Belle of the South; 3, Malvern.

SPOKEN.—Iris, Nagasaki to London, Feb. 3, in the Java Sea.

CASUALTIES.—The Edendale, of Glasgow, from Samarang to Rotterdam, which was abandoned Feb. 26 (?), struck on a reef off the coast of Madena (? Madeira), but little of the cargo was saved.

BANK OF HINDUSTAN, CHINA, AND JAPAN, v. SMITH.—This was an action on a guarantee given by the defendant on the occasion of an amalgamation between the company and the Imperial Bank of China, India, and Japan. A similar guarantee was signed by three other gentlemen, against whom there were three other actions, and the defence in substance was that the guarantee now sued upon had been vitiated by striking out the names of persons who were parties to it, and also (as an equitable plea) that the guarantee was intended to secure the payment of the amount by the defendant and the other parties to it, in certain proportions; and that the defendant had paid his share. Mr. J. Brown and Mr. Simson were for the plaintiffs, Sir George Honyman and Mr. Archibald were for the defendant. At the close of the plaintiff's case the legal objections were taken, and in the result the Lord Chief Justice directed a verdict for the defendant, with leave to the plaintiffs to move to enter it for them for £1,170.

THE CHINESE IN CALIFORNIA.—The Chinese in California have had a hard life of it. Until very recently they have been practically without protection by law in that State; and even at this time in some counties a Yankee Californian thinks as little of killing a Chinaman as a cat. But as Americans have learned to tolerate them, and even to value their services in San Francisco, the Irish of that city have characteristically inaugurated a war upon them. As in New York the Irishmen are jealous of the negroes, and seek to keep down the coloured population by an occasional massacre, so in San Francisco the Irish strive to thin the ranks of the Celestials by bloody riots and ferocious raids. Lately a gang of Irishmen attacked the Chinamen employed by the Pacific Mail Steamship Company, drove them from the wharves, followed them into their houses, and ejected them therefrom, burning the buildings, and even going so far as to destroy the provisions accumulated by the poor Johns and their families. A Chinaman was killed. If we do not mistake the temper of the American residents of San Francisco, this sort of work will inevitably lead to the summary strangulation of some score of the Irish ruffians. San Francisco is a city of "vigilance committees," and the records of its history show that its people do not hesitate to apply to Judge Lynch when lawlessness becomes formidable.

NEW STEAMER FOR THE MESSAGERIES IMPERIALES.—The Messageries Imperiales Company of France launched a few days back, from its building yard at La Ciotat, a splendid iron steamship called the *Hooghly*, destined for navigation in the Indo-China seas. The length of the vessel is 376 feet; the breadth, 30 feet 3 inches; the draught of water, 19 feet. She is a screw. Her displacement is 4,000 tons, her engines are 600-horse power, and she is barque-rigged.

THE ESTERHAZY JEWELS.—This valuable collection of gems has been disposed of at public auction by Messrs. Christie and Manson. They had been purchased from the trustees of the late Prince Paul Esterhazy by Mr. Boore and Mr. Attenborough, the well-known jewellers, who it is said were immediately offered £10,000 profit on their bargain, but refused it, expecting to make a much larger amount by the speculation. In this, however, they have been disappointed, for the prices realised were unexpectedly low, and the total proceeds, £37,760, will, after paying all expenses, hardly leave any surplus at all.

Parliamentary Intelligence.

HOUSE OF COMMONS.

POINT DE GALLE.

(March 29th.) Mr. OLIPHANT asked the Secretary of State for War whether it was the intention of Her Majesty's Government to build fresh barracks for European troops at Point de Galle.—Sir J. PAKINGTON replied that in consequence of the recent transfer of the Straits Settlements it would be necessary to have a wing of a European regiment at Point de Galle, for whose accommodation it was intended that barracks should be built. The proportions in which the expense of their construction was to be borne by this country and the colony was a question which would, of course, be duly considered.

THE NAVY ESTIMATES.—THE CHINA SQUADRON.

(April 1st.) The House then went into Committee on the Naval Estimates, and on the first vote for the men and boys, Mr. STANSFELD reviewed the Estimates at length, commenting chiefly on the shipbuilding scheme, which he maintained secured only the *minimum* of efficiency at the *maximum* of cost, and criticised sharply the building of small ships, which could not fight but could only run away.—Colonel SYKES contrasted the expenditure on iron shipbuilding in the French and English navies, greatly to our disadvantage, but argued that we had placed ourselves so far in advance of other nations that the increase in the Estimates in this respect was unnecessary. Particularly he blamed the retention of 36 gunboats in the China seas, where 10, at the outside, were sufficient. The Chinese squadron consisted on the 1st of February of 44 vessels, 8 of them being hospital and store ships, or without captains. What were the remaining 36 doing? A single gunboat was able to destroy a whole fleet of pirate junks. Why, then, were 36 required, or why should there be 12 lying in Hong Kong harbour, and spending the taxes of the country and rendering no service, except sallying out when there was an intimation of pirates? France, America, and other countries were carrying on an increasing trade with China, and ought to bear a share in the maritime police. He thought we ought only to keep six or ten there. He would conclude by expressing a hope that the increase of our iron-clad navy would not be hastened, and that the Admiralty would return to the policy of reduction which they had pursued for four years.—Mr. GRAVES regretted that the question of national policy had been mixed up with the minute details to which their attention had been called both on that and on a previous evening. As to our foreign squadrons, they were, he apprehended, intended as much for the protection of our commerce as for the maintenance of our national honour, and he thought that this view had been somewhat overlooked by the hon. gentleman (Mr. Stansfeld). With regard to our ships in the China seas, the utility of which had been questioned by the hon. member for Aberdeen, the reason why they were required there was that we had more to guard there than all other nations put together; and it was notorious that those seas were infested by pirates. Indeed, notwithstanding the presence of that squadron, 25 ships were attacked by pirates last year, so that piracy had not been suppressed. Possibly our ships were too slow for the purpose, and it was with a view of supplying faster vessels that the construction of so many gunboats was now proposed. He found by a return moved for last year that 71 pirate junks were destroyed and 220 men captured and handed over to the Chinese authorities. As long, therefore, as piracy existed we must maintain a force there for the protection of our commerce. He admitted, however, that other nations ought to co-operate with us, since ten of the vessels attacked belonged to foreigners; but instead of withdrawing our squadron, we ought first to induce other Powers to enter into an arrangement, and then consider to what extent we could reduce our force. As to Japan, where a reduction had also been proposed, it was well known that we were forcing a trade, there being large inland seas in which our commerce required protection; and until we were on terms of greater amity with that country, we were more likely to command respect by maintaining a good force at that station.—Mr. LEFEVRE said the China squadron had been doubled within the last twelve years. Its efficiency was also very greatly increased by the substitution of steamers for sailing vessels. No doubt our trade had vastly increased during the same period, but he thought the time had come when we should endeavour to secure the co-operation of America, Germany, and France against the pirates. The Chinese Government should also be required to pay for keeping the pirates in order. Piracy could not, in fact, be put down externally; it was a disease, and arose very much from the character and action of the Chinese Government itself.—Mr. CORRY replied to the various objections, pointing out that the strength of our foreign squadron was mainly determined by the policy of the Cabinet or by the necessity of protecting important commercial interests, and defended the shipbuilding police of the present board. He observed that the ships on foreign stations did great service in acting as the police of the seas, and if they were to be withdrawn the greatest misfortunes would fall upon our commerce, especially in the China seas. It would be a most unsatisfactory thing if eight or ten of our finest merchant vessels were burnt in consequence of our leaving the police of the seas to the Chinese. The following votes were then agreed to:—67,300 men and boys, £1,900,962 wages and allowances, £1,241,614 victualling and clothing, and £176,018 for salaries and expenses of the Admiralty-office.

LONDON, FRIDAY, APRIL 5, 1867.

DEATH OF THE MIKADO.

"*Le roi est mort. Vive le Roi!*" Scarcely has the successor of the recently deceased SHIOGOON been formally installed when the death of the MIKADO—the actual Sovereign of Japan—is announced. The first intimation of this portentous event was carried to San Francisco by the *Colorado*, on her return voyage, and was flashed across to us by the Atlantic Cable; but the message was couched in such vague and unsatisfactory terms as to rouse a suspicion that the words "death of the MIKADO," so carelessly introduced, contained an obscure allusion to the late SHIOGOON, rather than a new and startling fact. We are not yet accustomed to the channel through which this telegram came, and may perhaps be excused a little incredulity, in consideration of the extraordinary farrago of nonsense included in it. A telegram since received *via* Galle states—in brief and unmistakable terms, as a telegram should do—that "the MIKADO has died of small-pox." And although the advices received by the French mail just delivered do not decisively confirm the sad tidings, we have little doubt that in the end they will prove to be correct.

True it is that monarchs must die as well as subjects, and it may be surmised that of all monarchs there is none whose demise would be of so little importance to the world at large as the ruler of Japan. But such an event, at such a time, cannot be regarded with indifference. Its consequences, and more particularly its effects on the amicable relations recently existing between our Government and that of Japan, may prove to be of the greatest importance. The impending conference at Osaka will perhaps be deferred; the arrangements for the improvement of Yokohama may remain in abeyance for an indefinite period; and possibly a political crisis may be precipitated which will again bring to the surface the still powerful Conservative party, who would gladly avail themselves of any opportunity to counteract the liberal policy of the present SHIOGOON and his supporters. Moreover there is reason to believe that even the party of progress is still somewhat averse to the immediate opening of Hiogo, and that the numerous concessions lately made in other quarters may be intended to serve presently as a ground for postponing that event, in which case the MIKADO's death will be eagerly seized as an additional excuse. We have but lately had an example of the political and social deadlock produced by the death of a SHIOGOON; Government offices closed, public works stopped, and trade suspended. It will readily be seen that a still greater degree of confusion would result from the decease of the thrice sacred MIKADO. The "divinity" that "doth hedge a king" in this Western world is as nothing compared with the sanctity in which the MIKADO's person is held. He is religiously guarded from all contact with the outer world. Articles once used or garments once worn by him are rendered sacred, and must not be used again either by himself or any inferior person. The very road he has travelled on becomes hallowed ground, and must be broken up and remade ere it is pressed by the foot of an ordinary mortal. In these and similar reverential observances originated the idea, once prevalent among us, that the MIKADO was an object of actual worship, or at least a sort of Pope—"Spiritual Emperor" he was called, while the SHIOGOON was supposed to be the "Temporal Emperor." It might have been expected that such a rigid system of seclusion as this would have defied the approach of almost any contagious disease; but small-pox is as insidious as it is deadly, and although the only real safeguard against it—vaccination—is extensively practised in Japan, it was probably thought unnecessary in the case of the Sovereign; perhaps, indeed, such an operation would have been considered sacrilege.

THE CHINA SQUADRON.

AN unusually warm discussion has taken place on the Navy Estimates, and in the speeches of Mr. CHILDERS, Mr. STANSFELD, and Colonel SYKES—the self-appointed champions of naval retrenchment,—the dimensions and efficiency (or otherwise) of the China squadron were matters largely dilated on. The debate assumed a widely discursive character, and the strictures of these and several other honourable members extended to nearly all our foreign squadrons, as well as to the home administration of the present Board of Admiralty; we must, however, confine our remarks to that part of it which is of special interest to our readers. Mr. CHILDERS' plan for the reconstruction of the China squadron is charmingly simple. We have only to send out an ironclad for a flagship, leave a receiving-ship, a hospital-ship, a corvette, and three gunboats at Hong Kong "to suppress piracy" (!), put the senior naval officer at Shanghai into a hulk (!), with two gunboats, or despatch boats attached; leave one gunboat at Foochow, one at Amoy, and one at Swatow—withdraw all the rest,—and the thing is done! As for Japan, a corvette at Yedo and another at Nagasaki (Mr. CHILDERS seems to place great reliance on corvettes) would be ample, and the Gulf of Pecheli "might be visited periodically." In this way Mr. CHILDERS concludes a "reasonable reduction" might be easily effected. Mr. STANFELD would go probably a step farther than this and do away with the gunboats altogether; for he criticises them as "small ships that are useless as they "cannot fight but can only run away." Colonel SYKES, who never fails to distinguish himself when China is on the *tapis*, appears on the other hand to have the most implicit faith in the prowess of the gunboats; yet he would all but abolish them, though for a widely different reason. "A single gunboat," says the gallant Colonel, "is able to destroy a whole fleet of pirate junks. Why, "then, are thirty-six required?" Of course it is clear to the meanest comprehension that if one gunboat can destroy all the pirates, the other thirty-five must be entirely superfluous. Some further arguments brought forward were more sensible, if not very practicable in their nature. It was urged that France, America, and other countries had a large and increasing trade with China, and ought therefore to bear a full share of the maritime police; and that the Chinese Government should be required to pay at least a portion of the expense of suppressing piracy.

Theoretically, these latter suggestions are well enough; but how are they to be put in practice? So gigantic an evil as piracy cannot be dealt with on a narrow basis. It is a stain upon humanity, to war against which is the common duty of all civilised nations. If some are unable, and others unwilling to take their share in the needful crusade, that does not absolve us from the task. It is only reasonable and just, when our share in the China and Japan trades so greatly exceeds that of all other nations, that we should take a leading part in the protection of it. True, America, France, and Germany *ought* to contribute their proportions of the requisite force, and China *ought* to aid with money, if unable to provide ships. But will they do so? At some recent important operations by the "allied fleets" in Japan, the United States flag was borne by a wretched hired tug. Cochin-China and the impending Korean operations, will doubtless for the present provide full employment for the entire French force on the station. When the North German Fleet becomes a reality, it will be time enough to ask that a portion of it be sent to the Far East for police purposes. As regards China, repeated efforts have been made to procure the co-operation of its Government; the first experiment, in the shape of the LAY-OSBORN fleet was a failure which cost us something over £100,000, and later attempts to extract a money contribution have so far proved unavailing. Surely Colonel SYKES would not have our just demands enforced by another China war! The only conclusion we can arrive at is that the squadron so far from being reduced, must be strengthened. The old gunboats have done good service in their time, but are now inefficient, and instead of blame all praise is due to the Admiralty for hastening the construction of a new and more powerful class to supersede them. While piracy is still rife, and the police of the Eastern seas is left en-

Digitized by Google

tirely on our hands; while our relations with Japan are in an unsettled state, and the great question of the opening of Osaka is still pending; while the temper of the Chinese Government is somewhat uncertain, and the irrepressible NIENFEI are again cropping up; and while the Korean difficulty is yet awaiting a solution, any sudden diminution in the strength of our naval force in China waters would most certainly prove in the end to be a measure of false economy, and a worse time for proposing it could hardly have been chosen.

IT has been decided by Government that the transfer of the Straits Settlements will render it necessary to station a wing of a European regiment at Point de Galle. Barracks will be built for their accommodation, but it has not yet been settled how the cost of their erection is to be defrayed.

THE SUEZ CANAL—ITS ACTUAL CONDITION.

(PALL MALL GAZETTE.)

The last trustworthy account which we possess of the maritime canal across the Isthmus of Suez is contained in a paper by Lieutenant-Colonel Merewether, who visited the works in progress on his return to Aden about four months ago. The report is not written very lucidly, but it suffices to convey to those already acquainted with the different localities a tolerably clear idea of the actual condition and prospects of the undertaking. The fresh-water canal, which is, so to speak, a lateral extension from Zagazig of the Bahr Mo'ez drawn from the Damietta branch of the Nile a little below Benha-ool-'Asel, has been completed to Suez—an incalculable advantage to that town and harbour. From Zagazig it takes an easterly course towards the desert for a distance of fifty miles, passing by Ismailieh, the central station on the line, one mile before its junction with the maritime canal. Two miles before reaching that station it takes a southerly bend to Suez. It was at the above-named junction that the vessel of eighty tons, which was so exultingly reported as having passed through the canal from the Mediterranean to the Red Sea, was admitted by a lock from the maritime into the fresh-water canal. The average surface breadth of the latter is thirty-six, and its depth from five to six feet. Passenger boats leave Zagazig regularly one hour after the trains arrive. They are towed by a couple of mules at the rate of four miles an hour, so that it takes twelve hours to reach Ismailieh from Zagazig. This may be, as Colonel Merewether styles it, "an easy means of transit," but its "cheapness" may fairly be questioned, and its expedition scarcely likely to compete even with the slow speed of Egyptian railways.

After so many flourishes of trumpets the public were certainly justified in expecting a much greater progress in the grand maritime canal than is shown in the report of Colonel Merewether, if anything, rather a partial witness. In order fairly to estimate what has been and what still remains to be done, we must first give an outline of the original scheme. The canal, as all know, is to extend from Port Said on the Mediterranean to Suez at the head of the Red Sea, a course of about ninety-six miles. Its dimensions, as generally proposed are:—Surface width, 260 feet; depth, 26 feet; but, according to Colonel Merewether, the width must have been reduced to 195 feet. As regards length, it appears that the canal has been partially made from Port Said to Ismailieh, a distance of forty-eight miles or just one half the distance across the Isthmus. Below Ismailieh, onward towards Suez, "the canal may only be said to be now fairly commenced." With respect to the engineering operations on that part of the line, the prospect is not encouraging, for "the first ten miles to Serapeum is like the portion through El-Gisr, very heavy, first through the edge of the Lake Timsah, then through high drift sandhills. These last are a great difficulty. Below Serapeum the line of canal passes through the Bitter Lakes. Between that and Suez, except at Chalon, ten miles from the latter place, there is little heavy work. At Chalon, rock has been met in the bed which has to be removed by blasting."

Turning to the northern portion, we find that for the first nine miles from Ismailieh, running through the high ground of El-Gisr, the canal is excavated to "about half its future complete width." Beyond that, and the whole way to Port Said, "there are two channels, each about thirty-five feet, or one-third of the complete width, the centre portion being left for the present. This is to allow of one channel being deepened by dredging, while the other is used for traffic. Openings are left at intervals through the centre part in order that the dredges may change channels as required. . . The average depth throughout is at present only seven feet."

The works at Port Said, though progressing, are still in a very backward state. "Eight dredges are at work inside the harbour. What earth is not required for excavation (?) or block-making is carried by steam lighters out to sea in a north-easterly direction, whence there is no fear of its being returned. There are two side basins on the west, within the port, for shipping. Much has been dredged out, but still nothing compared to what has to be done. Small steamers run inside now, but large vessels have to lie off in the open road. The depth in the port has to be made over thirty feet."

Taking the foregoing as a correct statement of what has hitherto been done, it is clear that at least two-thirds of the original scheme remain to be accomplished, and that after a lapse of seven years and an outlay to be reckoned by millions. Colonel Merewether may be correct in his opinion "that there are no physical difficulties to prevent the completion of the canal provided money is forthcoming;" but his anticipation that "even then it can scarcely be ready before five more years have passed" appears to exhibit some credulity. He adds, "Whether the returns will prove remunerative to the shareholders time only can prove." In all these points, however, the projectors seem to entertain the same unswerving confidence.

Ismailieh is described as a perfect oasis in the surrounding barren wilderness, and its municipal divisions as quite cosmopolitan. "There is the French quarter, the Greek quarter, Arab quarter, and miscellaneous;" and for conflicting creeds, "a Roman Catholic Church, Greek Church, and Mussulman Mosque." Anglicanism and Protestantism are still unrepresented there.

Intending visitors to the canal will be glad to know that a small steamboat leaves Ismailieh for Port Said every day at 6 A.M., a similar boat starting at the same time from Port Said. The distance from point of embarkation is forty-eight miles, done in eleven hours, including one hour for breakfast at Kantara. The boat is about 50 feet long by 9 feet broad, propelled by one screw astern, driven by a high-pressure engine set in the middle. In the forepart are two compartments for first-class passengers, each holding eight in tolerable comfort. Astern are two similar places for second-class passengers.

Naval and Military.

The Rodney, 78, wooden screw-liner, sailed from Spithead for the Channel and Plymouth Sound on the afternoon of the 29th ult. The Rodney will make a stay of some days in the Sound before finally sailing from England for her station. In the meantime it is hoped that the fresh air of the Channel will effectually clear out the sickness which has been prevailing on board of her.

The screw steam sloop Zebra, 7, from Portsmouth, put into Plymouth for coal, and, having had some defects made good, sailed for the Cape and China on the 2nd instant.

Her Majesty's ship Chanticleer, 950 tons, and 200-horse power, reduced to an armament of 8 guns according to Mr. Reid's improved principle, was docked at Woolwich for the usual final survey. Commander William W. S. Bridges has been appointed to the command. Her station is announced to be the Pacific.

The armoured iron screw frigate Minotaur, 26, 6,621 tons, 1,350-horse-power, has received the whole of her armament at Portsmouth, and was removed from under the sheers to the large south jetty, where she is to be formally commissioned, by Captain James G. Goodenough, as the flagship of the Channel Squadron for 1867.

The 48 hours' cruise which has just been made by the Royal Alfred in the Channel appears to have been attended with very satisfactory results, except on one point. The ship proved wonderfully manageable under sail as well as steam, and the gun-carriages and slides of the 12-ton guns gave no signs of weakness with the guns firing, singly and in broadsides, 40lb. powder charges, with shot. The exception lies in the damage caused by the tremendous concussion from the explosion of such charges. A large hole had been made in the bottom of the lifeboat, and all light wood about the ship's bulwarks or deck fittings had suffered more or less. The boilers are having some 180 of their faulty tubes replaced by new ones, and when this has been completed the ship will make a second trial of her speed over the measured mile in Stokes Bay.

Instructions having been received at Chatham Dockyard from the Admiralty to sell the fine unarmoured screw frigate Chesapeke, 35. 2,377 tons, 400-horse power, attached to the third division of the Steam Reserve, she has accordingly been surveyed by the officials connected with the Master Shipwright's staff, and a report as to her value has been forwarded to the Admiralty. The engines and machinery, which have been but little used, have been taken out and removed into the steam factory, where they are undergoing a thorough overhaul and repair, in readiness for being fitted on board another steamer. The Chesapeke was one of the last of the 50-gun sailing frigates converted into screw steamers, but since her alteration has seen but little service. Although in pretty good repair, she is unadapted for the present state of naval warfare, and instead of allowing her any longer to encumber the entrance to Chatham harbour, the Admiralty have wisely determined upon disposing of her. Her dockyard stores and other gear will be removed from her before she is sold.

The armoured iron frigate Warrior, 32, 1,025-horse power, is ordered for commission at Portsmouth. It is understood that Captain Lord Gilford will be entrusted with the command of this famous frigate.

Major Anson's committee on the introduction of Oriental troops into the regular imperial general service is sitting assiduously. Sir Hope Grant, Quartermaster-General, was examined last week, and expressed strong opinions against the policy of the proposed plan.

We regret to hear that Mr. Duncan Gordon Boyes, the only midshipman who had gained a Victoria Cross, has been sentenced by a court-martial at Bermuda to be dismissed the service.

We believe that it is intended by the Admiralty to equalise the pay of chaplains and naval instructors. This will only be fair to an ill-paid, and, for a long time, a very neglected set of officers.

Major Frederick Brine in charge of the detachment of Royal Engineers that left Southampton on the 12th March *en route* overland to Bombay, Madras, and Calcutta, arrived at Gibraltar on the 12th and Malta on the 21st March.

WAR-OFFICE, MARCH, 30.—The Queen has been graciously pleased to give orders for the appointment of the following officers for the Royal Engineers, viz.—Lieut.-Col. Wilbraham Oates Lennox, V.C., Lieut.-Col. Gerald Graham, V.C., and Lieut.-Col. Anthony Charles Cooke, to be Ordinary Members of the Military Division of the Third Class, or Companions of the Most Honourable Order of the Bath.

EXPORTS TO THE FAR EAST.

We are indebted to Mr. Sam Mendel's Price Current for the following account of the export of Cotton Yarn and Manufactures from the ports of London, Liverpool, Southampton, and the Clyde to China, Japan, Singapore, Manila, and Ceylon, from the 17th March to the 1st April, 1867, and also for the periods of Twelve Months ended the 17th March, 1865, 1866, and 1867:—

TO HONG KONG and WHAMPOA.—From March 17 to April 1, 1867: Plain Cottons, 1,431,874; Coloured Cottons, 74,793; Printed Cottons, 15,280 yards. For the Twelve Months ended 17th March, 1865: Plain Cottons, 22,699,022; Coloured Cottons, 2,057,037; Printed Cottons, 523,262 yards; Cotton Yarn, 1,637,080 lbs. For the Twelve Months, 1866: Plain Cottons, 41,578,859; Coloured Cottons, 3,746,700; Printed Cottons, 535,450 yards; Cotton Yarn, 1,739,550 lbs. For the Twelve Months, 1867: Plain Cottons, 36,571,756; Coloured Cottons, 2,912,288; Printed Cottons, 864,331 yards; Cotton Yarn, 4,228,900 lbs.

Digitized by Google

To SHANGHAI.—From March 17 to April 1, 1867: Plain Cottons, 2,477,966; Coloured Cottons, 400,940; Printed Cottons, 97,204 yards. For the Twelve Months ended March 17, 1865: Plain Cottons, 42.514,950; Coloured Cottons, 5,962,993; Printed Cottons, 3.010.896 yards. Cotton Yarn, 155,111 lbs. For the Twelve Months, 1866: Plain Cottons, 90,269.000; Coloured Cottons, 6,361,800; Printed Cottons, 2.675,746 yards; Cotton Yarn, 81,000 lbs. For the Twelve Months, 1867: Plain Cottons, 117,596,051; Coloured Cottons, 12,481,189; Printed Cottons, 6,673,254 yards; Cotton Yarn, 158,932 lbs.

To JAPAN.—From March 17 to April 1, 1867: Plain Cottons, 149,574; Coloured Cottons, 250,840; Printed Cottons, 15,280 yards. For the Twelve Months ended 17th March, 1865: Plain Cottons, 4,176,338; Coloured Cottons, 1,837,446; Printed Cottons, 1,172,487 yards; Cotton Yarn, 72,350 lbs. For the Twelve Months, 1866: Plain Cottons, 25,319,150; Coloured Cottons, 1,848,300; Printed Cottons, 2.542,150 yards; Cotton Yarn, 1.216,500 lbs. For the Twelve Months, 1867: Plain Cottons, 17,785,808; Coloured Cottons, 2,540,169; Printed Cottons, 1,531,375 yards; Cotton Yarn, 1.366,760 lbs.

To SINGAPORE AND PENANG.—From March 17 to April 1, 1867: Plain Cottons, 477.124; Coloured Cottons, 317,927; Printed Cottons, 15.280 yards; Cotton Yarn, 44,600 lbs. For the Twelve Months ended 17th March, 1865: Plain Cottons; 18,887,697; Coloured Cottons, 2,780,424; Printed Cottons, 1,867.939 yards; Cotton Yarn, 1,282.193 lbs. For the Twelve Months, 1866: Plain Cottons, 40,646.980; Coloured Cottons, 6,472.650; Printed Cottons, 2,186.750 yards; Cotton Yarn, 1,161,500 lbs. For the Twelve Months 1867: Plain Cottons, 51,646,171; Coloured Cottons, 9,575,588; Printed Cottons, 4,881,646 yards; Cotton Yarn, 2,095,932 lbs.

To BATAVIA.—From March 17 to April 1, 1867: Export not given. For the Twelve Months ended 17th March, 1865: Plain Cottons, 6,098,318; Coloured Cottons, 4,277,522; Printed Cottons, 6,045.578 yards; Cotton Yarn, 196,295 lbs. For the Twelve Months, 1866: Plain Cottons, 20,022,050; Coloured Cottons, 7,288.650; Printed Cottons, 6,991,100 yards; Cotton Yarn, 561,600 lbs. For the Twelve Months, 1867: Plain Cottons, 35,333,906; Coloured Cottons, 13,753,654; Printed Cottons; 15,314,470 yards; Cotton Yarn, 803,576 lbs.

To MANILA.—From March 17 to April 1, 1867: Plain Cottons, 286,835; Coloured Cottons, 1,063,478; Printed Cottons, 393.833 yards; Cotton Yarn, 10,100 lbs. For the Twelve Months ended March 17, 1865: Plain Cottons, 10,007,140; Coloured Cottons, 11,493,918; Printed Cottons, 1,335,712 yards; Cotton Yarn, 117,630 lbs. For the Twelve Months, 1866: Plain Cottons, 11,553,600; Coloured Cottons, 12,749,900; Printed Cottons, 577,650 yards; Cotton Yarn, 93,650 lbs.

To CEYLON.—From March 17 to April 1, 1867: Plain Cottons, 1,475,125; Coloured Cottons, 88,600; Printed Cottons, 162,950 yards; Cotton Yarn, 26,000 lbs. For the Twelve Months ended March 17, 1865: Plain Cottons, 5,991,874; Printed Cottons, 2.338.571 yards; Cotton Yarn, 197,570 lbs. For the Twelve Months, 1866: Plain Cottons, 14,397,883; Coloured Cottons, 1,242,043; Printed Cottons, 3.192,479 yards; Cotton Yarn, 339,092 lbs. For the Twelve Months, 1867: Plain Cottons, 21,685,132; Coloured Cottons, 1,633,951; Printed Cottons, 4,121,057 yards: Cotton Yarn, 744,249 lbs.

Monetary and Commercial.

At the meeting of the Oriental Bank on the 18th of April a dividend of 6 per cent. for the half-year ended the 31st Dec. last will be proposed, making with a previous distribution 12 per cent. for 1866.

Under the head of "A Single Bank of India," the *Economist* says:—"We learn on the best authority that arrangements have been made to amalgamate the banks of Bombay and Bengal, and thus found one single bank for all India. The capital is to be £10,000,000 half of which is to be called up, which is to be divided nearly equally between the two amalgamating banks. Madras will be included in the operation of the scheme. The above news comes by telegraph, and the agreement it contained must be sanctioned by the shareholders in both the amalgamating banks and by the Government of India. But it is impossible to exaggerate the importance of the intelligence in reference to the banking system of India, for the credit of the Bank of Bengal is deservedly one of the best in the world, and that of the Bank of Bombay has, by recent events, not unnaturally been somewhat shaken."

The silver market has been active, owing to the important rise in the Bombay exchange, and the quotation for bars rose to 5s. 1d. per ounce, at which a large amount has been bought for transmission to Bombay. It is stated that a large supply of cotton has reached the coast of India from the interior, but by some it is thought that the movement in the exchange has been caused rather by the announcement there that only a few Council bills were disposed of here on the 6th inst., in consequence of the high rates fixed by the Government. The supply of silver in London is very limited, and the market is now quieter, but the quotation for bars remain firm, at 5s. 1d. per ounce. Mexican dollars have improved to 4s. 11½d. in sympathy with the movement in bars.

Constantinople letters state that the rivers Euphrates and Tigris have overflowed, and the telegraphic communication with India will be interrupted for at least a month. Messages, however, can go *via* Russia and Persia.

The biddings for £325,000 in bills on India took place on the 3rd instant. The amounts allotted were—to Calcutta £155,000, to Madras £50,000, and to Bombay £120,000. The *minimum* price was fixed at 1s. 11½d. on Calcutta and Madras, and at 2s. on Bombay, being an advance of 2 per cent. in the former case and 4 per cent. in the latter. Tenders on Calcutta and Madras at 1s. 11⅞d. will receive about 61 per cent., and on Bombay, at 2s., about 31 per cent. Those above these prices in full. A considerable increase of demand for means of remittance to the East is thus indicated.

The steamer *La Plata* has arrived from the West Indies with £258,500 in specie, of which £210,500 is silver, and £48,000 gold. The *Tanjore*, from Alexandria, has brought £3,000.

The shipments of specie to the East show a large increase, owing to the recent rise in the Bombay exchange. The steamer *Pera*, which left Southampton yesterday, took £239,829, of which £18,629 is gold and the rest silver. The particulars are as follows:—For Aden, gold, £2,000; Point de Galle, gold, £816; Bombay, gold, £15,000; ditto, silver, £199,400; Madras, gold, £813; Hong Kong, silver, £6,000; and for Shanghai, silver, £15,800.

The advices from Manchester report the failure of Mr. W. Horsfall, of Albert Mill, Hebden-bridge, with liabilities computed at £20,000, chiefly due to mortgagees. It is also mentioned that Mr. C. Leeming, spinner and manufacturer, of Glossop, has called his creditors together.

In the matter of Overend, Gurney, and Co. a summons has been issued in Chancery, at the instance of Mr. Charles Oppenheim, asking that the liquidators may be directed to make a call of £10 per share, pursuant to the resolution passed at the late meeting of creditors. It is understood that this course has been taken by Mr. Oppenheim in consequence of the liquidators having declined to make the call. Considering the length of time which has elapsed since the failure of the company, the small dividend as yet paid, and the extent to which the delay in calling up the unpaid capital has enabled many shareholders to evade their liabilities, it cannot be said that this action on the part of the creditors is at all unreasonable.

Messrs. Christopher Newton, Brothers, and Co., an old and respectable firm in the Australian trade, whose difficulties have been currently referred to in City circles of late, have stopped payment. Their liabilities reach £240,000, but the assets are estimated at £430,000, including £50,000 on the way to the colony, thus showing an apparent surplus of £190,000. The embarrassments of the house have arisen from the difficulty of disposing of goods in Australia, where a large portion of the assets are lying, as well as from the magnitude of the amount due from Messrs. Goodyear and Co. (who lately failed) on account of advances made to that firm. It has been reported that some large accommodatiun bill transactions have been carried on by Messrs. Goodyear and Co. and Newton and Co., but this statement, as regards the latter establishment, is distinctly denied.

At a meeting of the creditors of Messrs. F. Goodyear and Co. straw plait and foreign warehousemen, of Old Change, who stopped payment on the 18th ult., the liabilities were stated by Messrs. Ladbury, Collinson, and Viney, the accountants, at £202,169, and the assets at £60,647, showing a deficiency of £141,522. A long and angry discussion took place, in the course of which it was mentioned that the firm had entered into some large accommodation bill transactions, but it was eventually agreed to accept a composition of 5s. 6d. in the pound, payable in instalments extending over twelve months, the last instalment of 1s. to be secured.

As evidence of the late inflation of the circulation of the country arising from fictitious credit and the manufacture of financial paper, the following remarkable calculation has just been prepared. It appears that the decrease in the sale of inland bill stamps by one firm in comparison with the average of the two previous years is at the rate of £15,000 per annum. Taking each shilling as representing £100, the withdrawal from the bill circulation, as shown by this one firm alone, is £30,000,000 for the year, and looking at this house as doing a 1-30th part of the trade in stamps, which is somewhat near the truth, the falling off in the bill circulation would appear to be at the rate of £900,000,000 for the year, representing a loss to the revenue of £450,000. What proportion this bears to the returns of the London bankers can at present be only a matter of conjecture, but by the system of statistics of the Clearing-house about to be introduced by Sir John Lubbock it will be ascertained.

TEA.

At the public sales, which commenced on the 3rd, 15,024 packages were offered, and 13,644 packages sold, nearly all without reserve. The sale passed off heavily. Common blackish leaf Congou at 11½d. to 11¾d. showed no material alteration in value, but fair qualities of recent import went heavily at a further decline; 1,600 packages red-leaf Congous ex *Banian* fetched moderate prices. Canton scented Orange Pekoes brought 1s. 1½d. to 1s. 5¾d.

SILK.

There is a slight tendency to improvement in the silk market, but without much alteration in prices. In China silk transactions have been on a fair scale, but more for speculation than actual requirements. Japan silk has been rather more in favour. The deliveries for the month of March were—China, 2,990 bales; Japan, 782 bales. The following is from the circular of Messrs. Arles, Dufour, and Co., of Lyons:—"Prices of Asiatic sorts have recovered most of the ground lost during the two preceding months, and European silk in all superior classes has shown a slow but uninterrupted advance. With regard to the coming silk crop, all that can be stated thus far is that the temperature, which last year was considered as one of the chief causes of the failure of the hatching, has been the same this season, and is feared to have again resulted in more or less injury to the eggs, a fact which assumes increased importance from the circumstance that the existing supply of seed is considerably under that of last year."

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of February, 1867, and the two months ended 28th February, as compared with those for the two preceding years have been published. They show further evidences of the depression lately existing in trade generally, the total value of the exports being only £14,446,072, against £15,116,063 in February, 1866. This deficiency appears to be spread equally over almost every branch of industry. For the two months the decrease amounts to £2,237,897, the figures being £27,232,914 for the two months of 1867, against £29,470,811 for the corresponding period of the previous year. For 1865, however, the value of the two months' export was only £21,865,553, which is considerably less than in either the present or past year.

In a former issue we gave returns purporting to contain the total of the imports for 1866. It now appears that the tables had not undergone the revision necessary to ensure perfect correctness, the result being a partial inaccuracy. By the amended returns we find that the total value of the imports during the concluding three months of 1866 was £82,494,149, against £101,099,861 in 1865, and £81,099,501 in 1864. For the twelve months the import returns present a very favourable appearance, the value for 1866 being £295,204,553, showing an increase of £24,132,268 over the previous year, and of £20,252,381 over 1864. This increase does not appear to be confined to any particular class of goods, but is extended to all imports in a nearly equal ratio. The only disproportion is in wool, the importation of which, chiefly from the South African Colonies, has increased to the extent of 85 per cent.

The following is a summary of those figures relating to our export and import trade with China and the countries in the Far East:—

IMPORTS.

The total quantity of Raw Cotton imported during the month and two months ended 28th February, and the value for the month of January are thus given:—

From	1865.	1866.	1867.
	Quantity for the Month ended 28th Feb.		
China	28,256	—	2,041 cwts.
British India	158,243	214,442	88,730 „
Egypt	270,162	137,801	154,407 „
Total from all parts	660,337	780,178	784,347 „
	Quantity for the Two Months ended 28th Feb.		
China	45,652	—	2,041 cwts.
British India	186,104	305,907	96,509 „
Egypt	322,663	148,268	225,134 „
Total from all parts	811,601	1,154,122	931,379 „
	Value for the Month ended 31st Jan.		
China	£111,624	—	—
British India	211,431	£683,002	£42,655
Egypt	588,011	111,125	544,598
Total from all parts	1,530,194	3,341,901	1,076,616

The quantity and value of the Raw Coffee imported into the United Kingdom from British Possessions are thus shown:—

From	1865.	1866.	1867.
	Quantity for the Month ended 28th Feb.		
Ceylon	573,370	3,218,974	3,429,471 lbs.
Other British Possessions	1,515,094	443,109	795,241 „
	Quantity for the Two Months ended 28th Feb.		
Ceylon	3,385,469	3,463,960	4,637,013 lbs.
Other British Possessions	1,923,763	659,228	1,215,212 „
	Value for the Month ended 31st Jan.		
Ceylon	£97,921	£8,203	£40,970
Other British Possessions	12,971	6,054	12,212

The following quantities were entered for home consumption:—

	1865.	1866.	1867.
	In the Month ended 28th Feb.		
Ceylon	1,673,103	1,526,315	1,584,037 lbs.
Other British Possessions	765,506	434,530	563,906 „
	In the Two Months ended 28th Feb.		
Ceylon	3,533,287	3,639,294	3,844,724 lbs.
Other British Possessions	1,634,577	1,072,373	1,471,076 „

Returns are given of the quantity and value of the Unrefined Sugar imported from Java and the Philippine Islands:—

	1865.	1866.	1867.
	Quantity for the Month ended 28th Feb.		
Of 2nd quality	1,154	—	— cwts.
Of 3rd do.	16,216	—	— „
Of 4th do.	32,360	—	1 „
Total, all qualities	49,730	—	1 „
	Quantity for the Two Months ended 28th Feb.		
Of 2nd quality	1,154	—	— cwts.
Of 3rd do.	16,701	—	— „
Of 4th do.	53,032	—	112 „
Total, all qualities	70,887	—	112 „
	Value for the Month ended 31st Jan.		
Of 3rd quality	£460	—	—
Of 4th do.	21,533	—	£98
Total, all qualities	21,993	—	98

The following were the quantities entered for home consumption:—

	1865.	1866.	1867.
	In the Month ended 28th Feb.		
Of 3rd quality	4,106	3,141	10,601 cwts.
Of 4th do.	19,739	18,625	29,173 „
Total, all qualities	23,845	21,766	39,774 „
	In the Two Months ended 28th Feb.		
Of 3rd quality	16,778	8,071	30,593 cwts.
Of 4th do.	38,673	33,342	51,469 „
Total, all quatities	55,451	41,413	82,062 „

There were no importations of Hemp from the Philippine Islands during the months of January and February, either of the present or past year. The import in the two months of 1865 was 29,576 cwts.

The total quantity of the several Imports named brought into this country from all parts during the month and two months ended 28th February, and their value to the 31st January of the years 1865, 1866, and 1867, together with the quantities entered for Home Consumption during the month and and two months ended 28th February are returned as follows;—

	1865.	1866.	1867.
	Quantity for the Month ended 28th Feb.		
Coffee (lbs.)	3,261,302	5,140,955	5,349,277
Raw Silk (lbs.)	540,527	516,321	608,846
Thrown do. (lbs.)	948	2,781	4,263
Waste, Knubs, & Husks, do. (cwts.)	2,471	3,888	2,356
Tea (lbs.)	6,574,364	11,055,989	11,115,635
Unrefined Sugar (cwts.)	538,228	636,017	782,838
	Quantity for Two Months ended 28th Feb.		
Coffee (lbs.)	7,230,257	7,074,800	8,061,776
Raw Silk (lbs.)	1,137,154	1,080,157	1,386,172
Thrown do (lbs.)	5,727	6,000	7,319
Waste, Knubs, & Husks, do. (cwts.)	4,076	5,357	3,096
Tea (lbs.)	9,486,098	13,460,149	27,129,665

* Appeared to be a temporarily rigged screw steamer.

FREIGHTS AND CHARTERS.

A large fleet of vessels having arrived, and some few having been taken up to load on the berth for the Eastern ports, freights are a little easier. Coal freights also have a slight downward tendency.

Current rates of freight for vessels on the berth:—To Yokohama 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £57. For Saigon: £50. For Yokohama: £50. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 16s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

CASUALTIES.

The Georges, of London, from Swansea to Shanghai, has put into Kingstown, with loss of jibboom, bulwarks, and rails, having been in collision, 60 miles west of Lunday Island.

The Chanticleer, which sailed from London, March 16, for Nagasaki, arrived at Queenstown 27th, with loss of sails, bulwarks, and sails split, having experienced very heavy weather.

A telegram from Singapore reports that the Agamemnon (s.s.), from Liverpool to Shanghai, was at Singapore seriously damaged, and would be detained some time for repairs, having been in collision with the Mona (s.)

The Pasaroeang, Hollander, from Batavia, which arrived at Texel, March 26, had experienced heavy storms between the 9th and 17th March, which caused her to make much water, lose sails, hatches, bulwarks, &c., and receive damage to rigging.

The Galilee, Van der Mei, from Banjoewanjie to Amsterdam, was assisted into Table Bay, Feb. 19, leaky, having touched the ground off Houtbay, and would probably have to discharge.

The materials and a portion of the cargo of the Conheath, Phillips, from Singapore to Liverpool, which was wrecked in Banca Straits Jan. 10, have been saved.

Advices from Rotterdam, dated March 31, stated that the Concurrent, from Java, was on shore at Brouwershaven, but she has since been towed off.

The Titania (British ship), from the Clyde to Shanghai, put in at Rio Janeiro, Feb. 28, with damage.

Advices from Rotterdam, dated March 31, stated that the Jessie Jamieson, from Java, had stranded at Goeree, mouth of the Maas, previous to April 1, during a gale, and was being discharged, preparatory to attempts being made to get her off.

The Van der Palm, Woude, which sailed from Shields, March 28, for Hong Kong, put back for Deal, April 2, with loss of bowsprit, jibboom, and gear attached, having been in collision with a brig off Fairlight.

The Edendale, of Glasgow, from Samarang to Rotterdam, was abandoned Feb. 6.

The Jonkheer Mr. v. d. Wall v. Puttershoek, Lammerts, laden with coffee, sugar, spices, and arrowroot, &c., and bound from Java to Rotterdam, was totally wrecked near Penzance March 26; one seaman only saved; the bodies of two ladies have been washed ashore.

MISCELLANEOUS.

At TABLE BAY.—Feb. 9, Rover (s.), sailed for Japan.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

HONG KONG AND SHANGHAI BANKING CORPORATION.

REPORT of the COURT OF DIRECTORS to the ORDINARY YEARLY GENERAL MEETING OF SHAREHOLDERS, held at the Banking House of the Corporation, WARDLEY HOUSE, HONG KONG, on MONDAY, the 11th of February, 1867.

TO THE PROPRIETORS OF THE HONG KONG AND SHANGHAI BANKING CORPORATION.

Gentlemen,—The Directors have now to submit to you the general statement of the Corporation's affairs and balance-sheet for the half-year ending on 31st December last.

The net profits for that period, including 45,696 dols. 86c., brought forward from last account, after defraying all outgoings and current expenses, deducting interest paid and due, and making provision for bad debts, amount to 347,085 dols. 07c.; of which, after taking out rebate on bills not yet due, and allowing for the amount written off preliminary expenses, the remuneration of directors, &c., there remains for appropriation 290,901 dols. 44c.

From the latter sum the Directors recommend the distribution of a dividend of 7 dols. 50c. on the paid-up shares, and 1 dol 50c. on the new shares, being equivalent to 6 per cent. for the half-year, or 12 per cent. per annum, which will absorb 180,000 dols.; and of the balance the Directors propose carrying 75,000 dols. to the reserve fund, and 35,901 dols. 44c. to the credit of new account.

If the foregoing appropriation of profits be confirmed by the meeting, the amounts paid as dividend for the whole year 1866 will represent 280,000 dols., being equal to 10 per cent. on the paid-up shares, and 12 per cent. on the new ones (the latter participating in the dividend only from the 1st of July last); the amounts carried to the reserve fund during the same period will aggregate 141,700 dols., raising that account to 175,000 dols. on 31st December, 1866, independent of the sum of 35,901 dols. 44c. undivided profits carried forward on the above date as already mentioned; thus making up a total of 457,601 dols. 44c. for the net profits of the year, after deducting charges, expenses, and allowances of every description, and without including the rebate on bills maturing after December 31st.

The Directors have no doubt that the result thus shown of the bank's working for the last twelve months will be considered extremely satisfactory by their co-proprietors; the more so as the past year has been far from being one of general prosperity amongst mercantile and banking establishments.

The Directors feel that the difficulties and onerous responsibilities attendant upon the carrying on of an extensive business in such a manner as to ensure safety for the bank's funds, while realising a remunerative return from them for the shareholders, during a period of such almost unprecedented commercial disaster, require no comment. They are glad, however, to congratulate the proprietors upon the bank having come unscathed through this trying period, which they can justly attribute to the efficient management of its officers.

The growing credit of the Corporation, the steadily increasing confidence and support of its numerous constituents, and the disappearance from China of no less than six banks, warrant the Directors, they believe, in assuring the proprietors of the immediate prospects of the Corporation being as promising for the future as the past has been undeniably confirmatory of the hopes and anticipations entertained by the board when this local undertaking was first brought before the public.

INCORPORATION.

The ordinance alluded to in the last half-year's report has been passed, and though not yet formally confirmed, has, the Directors believe, received the substantial approval of the Lords of the Treasury, and of the Secretary of State for the Colonies in all important details.

NEW CAPITAL.

The present paid-up capital being considered by the Directors sufficient for the requirements of the bank, especially as it has been decided that the extension of the Corporation's business to India is to be postponed for an indefinite period, the board do not anticipate that it will be necessary to make any call upon the 20,000 new shares during the current year.

REMUNERATION OF DIRECTORS.

According to the resolution passed at the general meeting of 16th August last the sum of 25,000 dols. (including the special amount voted to the late deputy-chairman as per previous balance-sheet) has been appropriated for the remuneration of the court from the formation of the bank up to the 30th of June, 1866, comprising a period of eighteen months.

For the services of the Directors during the half-year ending the 31st December last, the sum of 7,500 dols. is charged in the accounts submitted to the meeting.

ELECTION OF DIRECTORS.

In accordance with clause 60 of the deed of settlement the term of office of the Directors expires on this date.

Messrs. Edward Cunningham, Albert F. Heard, Geo. J. Helland, H. B. Lemann, Woldemar Nissen, Arthur Sassoon, Caleb T. Smith, and Thomas Sutherland offer themselves for re-election, and by the deed of settlement are eligible.

AUDITORS.

Messrs. W. H. Rennie and P. Ryrie, the auditors selected by the proprietors at the last half-yearly meeting, have ably discharged their duties, and the Directors recommend them for re-election.

ABSTRACT OF ASSETS AND LIABILITIES, HONG KONG AND SHANGHAI BANKING CORPORATION, 31st December, 1866.

ASSETS.

	Dols.	c.
Cash on hand and at bankers	1,944,515	90

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the block is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., who requiring to discharge them.

The CHEAPEST INK.
The BEST INK.
The PERMANENT INK.
The 1d. Packet equal to a 6d. Bottle.
The 1s. Bottle makes Two Quarts.

PERRY and CO.'s PATENT ESSENCE OF INK.

This preparation produces Extemporaneous Ink of the finest quality in one minute with cold water, and instantly with hot water, by simple solution as salt or sugar. Sold in packets 1d. each, and in glass bottles 1s. each. Sample free, per post, for two stamps. Sold by all Stationers. Wholesale, 37, Red Lion-square, and 3, Cheapside, London.

PERRY and CO.'s PATENT BOSTONITE GOODS.

PERRY and Co. have much pleasure in introducing their new patent BOSTONITE to the Public, and they do so with the full conviction that it will supply a want long felt, viz.: perfect Lead or Coloured Pencil Tablets, Slates, &c.

P. and Co. call special attention to their Bostonite being much better adapted to all the uses that Ivory Tablets and Porcelain Slates are now applied. The smooth and pleasant nature of the writing upon Bostonite will not fail to secure it the preference over all other articles of a similar nature now in use. The Bostonite Slates possess the great advantage of being very light, and at the same time are not liable to be broken.

PERRY and CO.'s PATENT BOSTONITE PLAYING CARDS, 2s. 6d. per pack.

BOSTONITE TABLETS and SLATES from 6d. each.

WANTED, by the Advertiser, an APPOINTMENT in a STORE or GENERAL MERCANTILE HOUSE. Ten years' experience in several of the first Wholesale Houses in the City. References of the highest order.

Address, Mr. DE'ATH, 26, Grove-end-road, St. John's-wood.

HOLLOWAY'S PILLS.—With the weather

so cold and the winds so keen what is to be done to keep the human body healthy, to protect the weak, to renovate the diseased? The reply is, supplant the suppressed action of the skin through an alterative like these Pills, by a freer action on the liver, bowels, and kidneys. This will preserve the delicate internal structures from congestion, irritation, and inflammation, and carry off those noxious matters ordinarily transmitted through the integument. A course so natural must commend itself, and must elicit the unqualified approbation of all who think and understand how nature invariably aids a defective organ by accomplishing its unperformed functions by means of increased activity elsewhere.

Due at Yokohama	...	22nd July.
Due at Shanghai	...	27th July.
Due at Hong Kong	...	29th July.

The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

RATES OF PASSAGE FROM LIVERPOOL.

To Yokohama	... First Cabin,	£110 10s.
To Hong Kong	... ,,	£120 10s.
To Shanghai	... ,,	£120 10s.

FREIGHT, FREE OF PRIMAGE.

Liverpool to Yokohama, Hong Kong, and Shanghai, £18 5s. per ton of 40 cubic feet.

The homeward rates of freight will be fixed by the Agent of the Pacific Mail Steamship Company at the above Ports.

ARTHUR B. FORWOOD, Managing Director.

OFFICES:—LIVERPOOL, The Temple, Dale-street; LONDON, 117, Leadenhall-street; HAVRE, J. M. Currie.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and ASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

CALCUTTA, MADRAS, CEYLON, and ADEN—Overland, 4th and 20th of every month.

BOMBAY and ADEN—Overland, 12th and 27th.

CHINA, JAPAN, SINGAPORE, and EASTERN SEAS—Overland, 4th and 20th.

AUSTRALIA, TASMANIA, and MAURITIUS—Overland, 20th.

NEW ZEALAND and AUSTRALIA via PANAMA, 2nd

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope Clipper Ships, weekly.

Prospectuses, with through rate to a thousand places free on application.

CHINA AND JAPAN, &c.

ROBERTSON and CO. will despatch the following first-class clipper VESSELS:—

Destination.	Ships.	Class.	Dock.	To Sail.
Hong Kong ...	Chetah ...	A1 10 yr.	W.I.D.	With des.
Kanagawa ...	Swanley ...	A1 13 yr.	W.I.D.	With des.
Kanagawa and Nagasaki ...	Neville ...	A1 10 yr.	W.I.D.	With des.
Singapore	Jant. Bergusn	A1 14 yr.	W.I.D.	April 25.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

CHINA and JAPAN.—The following splendid first-class CLIPPER SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	Last Shipping Day.
Shanghai ...	Weymouth	A1 12 yr.	E.I.D.	April 25.
Hong Kong & Whampoa ..	Ramsey ...	A1 12 yr.	E.I.D.	With des.
Kanagawa and Yokohama	Fontenaye.	A1 12 yr.	E.I.D.	With des.

For Freight or Passage apply to KILLICK, MARTIN and Co., 10, George-yard, Lombard-street, E.C.

INDIA, CHINA, AND AUSTRALIA.

SHAW, LOWTHER, & MAXTON will despatch the following first-class SHIPS as under:—

Destination.	Ships.	Class.	Date of Sailing.
Shanghai	Invincible...	A1 13 yrs.	Sailed.
Shanghai	Douglas Cstl	A1 14 yrs.	25th April.
Hong Kong & Whampoa	Banian ...	A1 14 yrs.	25th April.
Ditto	Ospray ...	A1 10 yrs.	10th May.
Melbourne	Lanarkshire	A1	25th April.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

STEAM from the CLYDE to SINGAPORE and HONG KONG.—The fine, new screw steamer PEI-HO, JOHN BELL, commander, will be despatched about the 10th of April. A few passengers will be taken at moderate rates.

Apply to Capt. BELL, on board; or to BROWN and WATSON, 80, Union-street, Glasgow.

AT GLASGOW.—For Singapore, Hong Kong and Japan, (Yokohama and Nagasaki), proceeds under steam, and will sail from Glasgow on 20th April, the splendid new Clyde-built screw steamship COURIER, A b1 at Lloyd's, 326 tons register; horse power, 29 nominal, 380 indicated; — CHRISTENSEN, Commander. Has been built under special survey, and is expected to make a very rapid passage.

For freight or passage apply to ALLAN C. Gow and Co., 87, Union-street, Glasgow. Goods to be consigned to ALLAN C. Gow and Co., Glasgow, and the port of destination to be distinctly marked on each package.

SINGAPORE, with immediate despatch, the regular trader, SREE SINGAPURA, A 1 15 years (built at Dundee in 1866), 586 tons register; loading W. I. Docks. Has excellent accommodation for passengers.

Apply to Messrs. MACTAGGART, TIDMAN, and Co., 34, Great St. Helen's; or to TIDMAN, LANGMORE, and Co., 2, Great St. Helen's.

COLOMBO Direct (first ship) the magnificent new clipper ARABELLA, A 1 9 years, 350 tons register, built under special survey; JOHN RAPER, Commander; now loading in the West India Docks. This beautiful vessel has only room for light measurement goods.

For freight or passage apply to F. TALLACK, No. 23, Birchin-lane, E.C.

To follow the "Bolden Lawn."—Will meet with the usual quick despatch.

DIRECT for COLOMBO, the well-known fast-sailing ship SALADIN, A 1 13 years (owned by Messrs. Robert Henderson and Sons), 782 tons register; JAMES RANKIN, Commander; West India Docks. This magnificent vessel has the greater portion of her cargo engaged, and offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

MALABAR COAST.—FIRST SEASON SHIP.

Has a large portion of her Cargo engaged, and will meet with quick despatch.

DIRECT FOR MANGALORE, CANNANORE, CALICUT, COCHIN and ALEPPE, the fine, fast-sailing British Ship LIFE BRIGADE, A 1, 245 tons register, WM. SHEARER, Commander; West India Docks. This beautiful nearly new ship offers a first-rate opportunity to shippers of Season Goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Janet Mitchell."—Has the greater portion of her cargo engaged, and will meet with despatch.

FOR BOMBAY DIRECT, the splendid clipper ship HADDINGTON, A a1 (belonging to the Peninsular and Oriental Steam Navigation Company), 1,459 tons register, G. BROWNE, Commander; East India Docks. This vessel is well-known in the Bombay trade for her very rapid passages.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

* Telegrams to the 20th March have been received from Hong Kong via Calcutta, and to the 18th from Shanghai, via Kinchta.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O. steamer China, arrived April 10.—From Hong Kong: Mr. Banbury, Mr. and Mrs. Walker, Mr. Lloyd, Mrs. Maynard, child, and servant, Mr. Burmeester, Dr. Legge, D.D., Mr. and Mrs. Urrejola, Mr. and Mrs. Moreno, Mr. Broman. From Singapore: Professor Bushell. From Penang: Mr. and Mrs. Ventre and three children. From Galle: Mr. Stewart. From Shanghai: Mr. Fraser.

By last Bombay mail, to Marseilles, per P. and O. steamer Syria, arrived April 3.—From Singapore: Mr. Crunn.

To Southampton, per P. and O. steamer Delta, arrived April 9.—From Hong Kong: Mr. and Mrs. Chapman, child, and servant, and two second-class passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Pera, from Southampton, April 4.—To Yokohama: Mrs. Dunwoodie. To Shanghai: Mr. Burt. To Hong Kong: Mr. Richard Amos, Comdr. Swann, R.N., and servant. To Ceylon: Mr. and Mrs. Dunlop, two children, and servant, Miss Layard, Mr. W. C. Iliff, Miss Potter, Dep.-Ins.-Gen. of Hospitals Innes, Mr. Maxwell, Dr. and Mrs. Brighouse, Mr. C. A. Leechman, Mrs. Theobald, Barrack-Master Lambe, Mrs. Lambe, child, and servant.

To Calcutta: Mrs. Skipton and child, Mr. R. Richardson, Mrs. Southward and child, Surgeon Major H. Gordon, Mrs. and Miss Gordon, Dr. J. H. and Mrs. White, Mr. McRae, Sir C. H. Leslie, Captain B. C. Speke, Mrs. E. Fegg, Dr. and Mrs. Jephson, two children and servant, Surgeon Drysdale, Mr. Pearce, and one second-class passenger. To Madras: Mr. A. Fletcher, Assistant Surgeon R. Buchanan, Assistant Surgeon H. T. Chapman, Mr. and Mrs. E. G. Stewart, Staff Assistant Surgeon James, Assistant Surgeon McCrystal, Surgeon Major Barclay, Mr. W. M. Clarke, and one second-class passenger. To Bombay: Mr. L. E. Smith, Mr. H. A. Constance, Mrs. Coles, Mr. C. B. Luddy, Mr. Baugh, Ensign Daubeny, Mr. Gadd, Mr. H. Higginson.

From Suez to Hong Kong: Rev. E. Klitzke.

From Marseilles, April 12.—To Shanghai: Mr. Boardman, Mr. Hugh Fraser, Mr and Mrs. Dow, Mr. and Mrs. Maxwell, Mr. J. R. Green. To Hong Kong: Mr. Warden, Mr. E. H. Lavers, Mr. Mackrill Smith. To Ceylon: Mr. A. Hood.

To Calcutta: Captain and Mrs. Tanner, Mrs. Graeme, Ensign G. H. Ferrier, Captain H. Douglas, Mr. A. T. Palmer. To Madras: Lieut. Colonel W. White, Mr. J. H. Tweedy, Captain de Vignes. To Bombay: Major S. C. Law, Mr. W. Keswich, Captain Hicks, Mr. Sutherland, Mr. Chisholm, Major Bannerman, Mr. C. H. Alsen, Captain J. J. Martin.

Per P. and O. steamer Ceylon, from Southampton, April 12.—To Hong Kong (via Bombay): Mr. H. B. Tomes.

From Marseilles, April 20.—To Ceylon (via Bombay): Mr. G. G. Thomson.

Per P. and O. steamer Tanjore, from Southampton, April 20.—To Ceylon: Mr. G. Crowe, Lieutenant Rathbone, R.E., Mr. and Mrs. Vanderspar and four children. To Hong Kong: Mr. J. B. Ewart, Mrs. E. Peate.

From Marseilles, April 28.—To Yokohama: Mr. John Clarke. To Shanghai: Mr. and Mrs. W. H. Fittock. To Ceylon: Mr. and Mrs. Lewis. To Penang: Mr. and Mrs. W. L. Hill.

Per P. and O. steamer, from Southampton, May 4.—To Shanghai: Dr. C. Nissen.
From Suez.—To Ceylon: Mr. A. O. Cowan.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The latest advices from Yokohama are still those of 15th February, brought by the last French mail. We have therefore no news to record, but the *Japan Herald* has the following interesting remarks on the lately announced death of the Mikado:—

"Scarcely has Japan had time to cast off her mourning for the death of the late youthful Shiogoon—Minamoto Iyemochiko—when she has been called upon to don her deepest weeds to mourn the death of her venerated sovereign—the Mikado whose reigning name was Kingo Koo Thei. He died on the 3rd instant at Kioto in the thirty-seventh year of his age and the 25th of his reign. He leaves a son sixteen or seventeen years old, who in all probability will succeed to the throne.

"Physically powerless and passive as the occupants of the sacred throne have long been, still they have maintained their great moral sway over the nation, and the mass of the people regard the Mikado with superstitious veneration. The death which we announce would, therefore, in any case deeply affect the nation; but in this instance we hear that the death of the Mikado is held to be peculiarly deplorable and unfortunate, inasmuch as that he died of smallpox—a disease, which, although quite common to the country since the time of the first Mikado, Jingmoo Ten-o, who reigned 2,563 years ago, has never been known to attack the sacred person of a Mikado until now.

"All nations have their superstitions, and we shall not find fault with the Japanese for having a superstitious regard for their ancient institutions. They have for thousands of years believed their Mikados to be of heavenly descent, and to be so hedged by divinity as to be entirely beyond the reach of most human misfortunes. This seems to be the popular belief, and it has served to preserve the Mikados a powerful influence over the minds of the people, of which the Shiogoons have never been able to deprive them. Even the eighteen independent princes called Kokushiu Daimios yield respectful obedience to the wishes of the Mikado, when they would treat those of the Shiogoon with utter contempt. It is not surprising, therefore, that many simple people now shake their heads, and give one to understand that since the Mikado's divinity has departed and left him a prey to smallpox like any ordinary mortal, there is no telling what dreadful calamities may befall the country.

"Some intelligent people, however, whose notions have been modified by intercourse with foreigners, readily admit that Kingo Koo Thei was a man of very mediocre character. They represent him as avaricious and time-serving; a man who greedily accepted all he could get from all parties, and who had not sufficient force of character to identify himself thoroughly with any party. Many believe that the late Mikado was guilty of great duplicity in the wretched Chosiu feud. He had not ability or force of character enough to distinguish himself in any way; and on the whole, judging by the opinions of intelligent men who have moved about the country a good deal, it would appear that Kingo Koo Thei was a very ordinary mortal, who would readily lend his influence in any quarter from which he could derive immediate benefit for himself or his needy courtiers.

Digitized by Google

"The usual period of mourning for the death of a Mikado is now fifty days; at the end of which time the ceremonies appertaining to the accession of a successor are proceeded with, and they generally occupy thirty days. In the meantime no governmental or other business of the country, requiring a reference to the Court of the Mikado, can be transacted. The visit of the foreign representatives to Osaka is postponed until the expiration of the mourning, which, however, will not be allowed to interfere with the visit of the Shiogoon's brother to Europe."

The comment of the *Japan Times* on the above is as follows:—"Our contemporary, the *Herald*, has killed the Mikado with an attack of smallpox. The rumour is disbelieved by the natives. Smallpox, however, we regret to say, is very prevalent in Yokohama at this moment, and the Japanese state that in the native cases, it is unusually fatal."

The brother of the Shiogoon Stotsbashi, Prince Mimbotayou, proceeded to France by the last Messageries mail. He is a quiet, intelligent looking youth, of about sixteen years of age. His Highness, who will be the Japanese representative at the Paris Exhibition, intends to remain for three or four years in France, there to finish (or rather begin and complete) his education. Stotsbashi, his elder brother, has been the prime mover of this undertaking, and every requisite for assisting its accomplishment has been provided for. He is accompanied by a numerous staff, and a competent interpreter, who is, we believe, an accomplished linguist. Nominally, the young Prince is custodian and curator of the Japanese contributions forwarded for display at the forthcoming Exhibition; at which universal fair, doubtless, he will learn a few things not generally known in this country, and gain an impression of Western influence and power not altogether without its effect upon foreign relations with Japan.

CHINA.

TIENTSIN.

From this port we have advices by the Russian postal service to the 21st January—seventy-six days *en route*. Our correspondent says:—"Winter has set in. We have five vessels now prisoners at Tientsin. There are some three or four more on the way down the river, and it is doubtful if they will get out. All quiet here. The Rev. Mr. Alexander Williamson, of Chefoo, and the Rev. Jonathan Lee, of Tientsin, have just returned from a lengthened tour in Chile, Shansi, Shenso, and Honan, bringing with them fine specimens of coal and iron from Shansi, and other mineral stones. The rebels were at Shantung and Honan, destroying—except young men, whom they caused to join them—every living creature, and breaking all the fruit trees—quite desolating the country through which they passed. They were travelling from Tse Naifoo to Honan-fu, but were likely to be surrounded by the Imperial troops."

The following commercial items are furnished by Messrs. Platt and Co.:—

The export of cotton, which began in 1863 with 2,366 piculs, last year amounted to 136,177 piculs, worth 1,770,301 taels. We quote 8 lb. Grey Shirtings at taels 2.85; T-Cloths, 7 lbs., taels 2.50. The total value of last year's imports, after deducting goods re-exported to find a market elsewhere, in foreign goods, was 12,009,222 taels; in Chinese produce, 4,574,235 taels; total, 16,583,457—at 6s. 4d. per tael sight, £5,251,428. The exports amounted to 2,687,962 taels; treasure exported, 6,175,788 taels.

SHANGHAI.

From this port we have no later date than that brought by the last French mail, namely, to the 23rd February. The local papers now received, however, supply a few additional scraps of intelligence.

Politically there are but two items; the first being that, according to the Shanghai *Daily News*, Tsen-kwo-fan's objection to return to Nanking has at length been overruled, and that he has consented to resume the viceroyalty of the two Kiangs, protesting only against being also burdened with the Commissionership of Foreign Affairs. The duties appertaining to that office are accordingly to be entrusted to Li's intimate friend and *protege* Ting, whilome Taotai of Shanghai.

A report has reached the *Recorder* that General Lee, who recently passed through Shanghai and stated that he was about to join the Imperialist forces near Hankow, has gone over to the rebels. His troops it seems became mutinous, and in order to make an example he decapitated one of them, and as this caused further disturbance, and we understand a reprimand from his superior officers, the General cut the matter short by joining the Nienfei. This is as much of the story as has come to our knowledge. It is not improbable, should it turn out to be true, that a portion of General Lee's troops has accompanied him. This is the old story with regard to the Imperial forces, who seem quite as much a source of trouble as of assistance to the Government.

The Shanghai Steam Navigation Company held a meeting. Despite the loss of the *Huquang*, the purchase of steamers and wharf, expenses of repairs, &c., the directors declared a dividend of 8 per cent., there being a net profit of taels 148,113.96 on the transactions of the year.

Mr. Seward, the late U.S. Consul-General, received a very gratifying letter from the American residents at that port on his leaving for home.

The native Chinese are beginning to avail themselves pretty extensively of foreign steamers. In connection with this subject, we hear that the steamer *Ta Yung* has been chartered by the Salt Guild to take the place of the *Cricket* in protecting the junks. The sum to be paid monthly is 940 taels. The *Recorder* understands that Messrs. Russell and Co. are expecting a steamer called the *J. R. Ingersol* from San Francisco. She is intended to be placed on the Tientsin and northern line at the opening of the season. She is, we understand, a paddle boat, somewhat similar to the *Kiangse*. The Chinese gunboat *Paou Shun*, Captain Hoare, left Chinhai on the 15th February last for a cruise among the islands, and while off the Siesbans came up with a piratical junk, and discharged several guns at her, she running close in shore and escaping. The next day, while off the Volcanoes, she encountered two others, and after a pretty smart brush they also ran in shore, landed, and began returning the fire with small arms.

During her voyage from Ningpo on the night of the 20th February, the *Szechuen* came into violent collision with the steamer *Express* within a few miles of the Ruggeds. The latter was cut down to the water's edge, and her fore compartment immediately filled. A cry was raised that she was sinking, and the *Szechuen* was requested to stay by her and prepare to receive her 300 Chinese passengers. Boats were lowered to effect this, but owing to the high sea it was considered that the transhipping would be attended with serious risk as each passenger showed so great disinclination to be parted from his baggage that it would have been necessary to use force to have got them into the boats without their boxes. The two captains accordingly decided to run for Pirates' Bay, where the *Express* could be beached. This was safely accomplished; and at daylight the next morning the transhipment of the passengers and baggage to the *Szechuen* was commenced, and, by the aid of some fishing boats, was completed at noon without an accident. The Ningpo letter box was forwarded by a native craft, in which also the only European passenger for Ningpo went on. When the *Szechuen* left, attempts were being made to repair the *Express*, and Captain Whitelaw expected to be ready to return in two days. The *Szechuen* was slightly damaged in the stem only.

Advices from Nanking report that Li Footai's brother has gone from that place to Nanking for the purpose of making new arrangements for conducting the campaign against the Nienfei and Mahommedan rebels. Captain Soame's force of four hundred men, with thirty guns and mortars, have also moved up the river, and Captain Doyle will proceed to join Li Footai in the North.

From the extreme north of China nothing of importance has come to hand. Even the operations to be undertaken by the French in the spring against Korea have ceased to be discussed and Peking is (as usual) absolutely dumb.

HANKOW.

From Hankow we have of course "rebel" news, though not of a very important or exciting nature. The *Hankow Times* of February 2 says:—"There is but little news of the Nienfei during the past week. They are said to be within the limits of the district of Hiao-kan on the north, but not inside the city. The proximity of this place to Hankow, it being only some 100 le distant, would drive the Chinese here into the utmost consternation; but the Nienfei have been so roughly handled during this campaign, having been beaten with a loss of eight hundred men at Kewkow by Tan eight days ago, that their spirit is said to be quite broken. Their funds too are at as low an ebb as those of the world in general, and their only desire appears now to be a safe return to their dens. They were on the retreat when they were encountered by Tan at Kewkow. Turning back from him they were met by two other leaders of the braves, who gave them

Digitized by Google

battle, but with no particular success. The Nienfei, however, thought it better to secure a retreat to the north of Hiao-kan, whence to Honan the road is more open. The New Year festivities, which no Chinaman thinks of omitting, have much to do with their present movements; and the provincial government, which at first declared its intention of never letting these robbers escape alive out of its limits, has thought better to modify its line of action, and allow them to go if they will."

FOOCHOW.

From Foochow a "growl" comes respecting naval arrangements in the following extract from the *Foochow Advertiser*:—"We have at the present time in Foochow so gross and flagrant an instance of the successful pursuit of the art of 'How not to do it,' that it would be a pity to pass it by. For a long period the Foochow station, which includes the port and settlement of Foochow, and also the Formosan ports of Tamsui and Keelung, has been entrusted to the charge of a single gunboat. H.M.S. *Icarus* is clearly neither useful nor ornamental to Foochow. Her tonnage is 580 with a armament of one 100-pounder smooth-bore, two 40-pounder Armstrongs; horse-power, 150; complement of men, 130; and she draws 14 feet of water, which most effectually prevents her coming up to Foochow, or from crossing the bar to reach the Formosan portion of her station."

HONG KONG.

Dates from this port are to the 1st March—three days later than brought by the French mail delivered on the 5th instant. No later advices had been received from England in the interim. The following items are from the *Overland Trade Report*:—

Immediately after the last mail departed the managers of the Pacific Mail Steamship Company gave an entertainment to the community of Hong Kong at large, on board their pioneer steamer, the *Colorado*, which was then in the harbour. The sympathy which everyone interested in the China trade must of course feel with the undertaking on which the company is engaged, the establishment of a regular mail line between Hong Kong and San Francisco, was shown by the attendance on board of twelve hundred persons, including of course a vast number of Chinese and others besides Europeans. The crowding which ensued and the want of appropriate arrangements detracted very considerably from the pleasure of the short trip, but people here had at any rate an opportunity of seeing the steamer in motion and appreciating her power and resources.

During the last fortnight the races have taken place, and if not attended by quite as many persons as usual have, nevertheless, been remarkably interesting from a racing point of view. To notice them amongst the events of the past fortnight in a commercial periodical might seem strange if it were not for the fact that the races in Hong Kong, during the few days they last, take precedence here over everything else which may be going forward. This is the only occasion during the year on which the Hong Kong community abandons itself entirely to amusement, but certainly, on this occasion, the thing is done completely. The mercantile houses are closed after an early hour in the morning, the banks, if kept open, are merely so nominally, and left in the charge of one or two clerks, the daily paper appears shrunk to a quarter of its usual size, and with little but shipping intelligence, advertisements, and a record of the previous day's racing. All Hong Kong goes down to the course at one o'clock and remains there till dark, entertained at tiffin in the liberally appointed tents put up on the ground by the chief mercantile firms. This year the race for the Challenge Cup, the principal event of the meeting, lay between Exeter, his stable companion Pathfinder, Sir William, and Haddington. Exeter was the winner of last year, and by the terms of the race, if he or any other horse belonging to the same owner should win this year, the cup would become the property of that gentleman. Exeter being a Shanghai horse, a good deal of anxiety was felt in Hong Kong for the result, and the victory either of Sir William or Haddington would have been greeted with a great deal of satisfaction. On the day of the race, the owner of Exeter declared to win if he could on Pathfinder his second horse, and he very nearly succeeded in accomplishing this. Sir William, unfortunately for the Hong Kong partisans, came on to the course suffering from some temporary ailment in his hind legs. He ran in the most splendid manner during the first round, as also did Haddington, but the pace and distance was too much for the old horses. Exeter drew ahead when within half a mile of the winning post, and retained his head till the last. In coming up the straight, his rider saw that Pathfinder also had "collared" Sir William, and tried hard to pull up; but he did not begin pulling soon enough, and could not check Exeter's speed sufficiently to let Pathfinder pass him, though this was so nearly managed that the race was only won by Exeter by a head. The pony racing of the meeting was exceedingly good, and all the chief pony races closely contested. Unfortunately the weather during all three days was the reverse of what could have been wished—cold, wet, and depressing. On the two first days pelting showers came on in the middle of the afternoon seriously interfering with the pleasure of the spectators.

A somewhat amusing incident has transpired near Canton. An officer of the Imperial Customs was detached with some tidewaiters and Chinese to intercept some smuggled opium at a certain point on the river. Instead of capturing the opium, however, the whole party were captured by the villagers, and kept as prisoners for two days until rescued by a party sent in the *Cumfa* specially chartered for the purpose. Thus the shearers came home shorn. It would be as well we should imagine to send a somewhat stronger force when it again becomes necessary to deal with the truculent natives of the seaboard of the province.

As the captain of a vessel in the harbour was passing the P. and O. office about six P.M. on the 27th Feb., he was suddenly struck on the head by a Chinaman with a large stone and thrown to the ground insensible. He remained in this state for some little time, being picked up by two Europeans passing at the time and carried into a Chinese shop close at hand. For some hours he was unable to do anything, considerable bleeding from the internal part of the ear continuing for some time. The only thing stolen from him was his umbrella, the thief being probably disturbed by the approach of the Europeans above referred to. The scoundrel has not yet been identified.

We learn that the authorities at Swatow have seized a cargo boat, in the hold of which four-and-twenty coolies were found confined, who had been kidnapped from that district. A disgraceful system of kidnapping has been going on in and around Swatow for some time back; and it is to be hoped that this may prove a check on the movements of the coolie agents so engaged.

The "International Match" of the Hong Kong Rifle Association, between six a-side of England, Ireland, and Scotland, concluded in favour of the "Sons of the Emerald Isle," but only by a small majority. Seven shots each at 200 and 400 yards, with any rifle carrying Government ammunition, the first distance standing and the latter in any position, were the conditions agreed on by the respective captains. The shooting on the whole was good, and contrasts very favourably with home meetings, while Messrs. Harris and Phelan for Ireland, Dr. Hensman for England, and Messrs. Kerr and Urquhart for the "Land o'Cakes," worked as hard for their respective countries as might reasonably be expected.

The Hong Kong Fire Insurance Company held a first ordinary meeting of shareholders at the offices of the company in Queen's-road on Saturday, Feb. 16. The financial statement submitted showed a nett profit, after deducting losses and charges, of $53,431.93 up to 31st December, 1866. The report stated:—"Since the date of these accounts a sum of $50,000 has been transferred from current account to deposit account with the Hong Kong and Shanghai Banking Corporation to bear interest at the rate of 7 per cent. per annum. Three more shares were allotted in January, and the capital account with the Hong Kong and Shanghai Banking Corporation now stands at $73,500. The premiums collected in Hong Kong alone during the past month amount to $4,928.56."

The following return of licences issued under Harbour and Coasts Ordinance during the first two months, is interesting:—Return for January:—Junk Licences—Annual, 79; monthly, 44. Fishing Licences—Annual, 99; monthly, 345. Anchorage Passes—1,101. Special Permits—493. Clearances—Day, 904; night, 48. Return for February:—Junk Licences—Annual, 40; monthly, 23. Fishing Licences—Annual, 92; monthly, 180. Anchorage Passes—562. Special Permits—464. Clearances—Day, 693; Night, 19. Totals: Junk Licences, annual, 119, monthly, 67, Fishing Licences, annual, 191; monthly, 525. Anchorage Passes, 1,663. Special Permits, 957. Clearances, day, 1,597; night, 67. The total number of documents issued and entered from the Harbour Master's office, under the Ordinance, for the period named, is 5,186; amount of fees received, $6,102.

[FROM OUR OWN CORRESPONDENT.]

The usual annual suspension of business during an entire week in honour of the Hong Kong Races has just come to an end, and it cannot be said that the result of these time-honoured Saturnalia has done anything to cheer up the colony after its recent run of ill-luck. On the contrary, throughout the three days of the races, nothing but misfortune attended the colonial horses. *Sir William*, Jardine, Matheson and Co.'s crack racer, lamed himself, and was shot, entailing a dead loss almost as serious as the decline of sixpence per pound on the value of a "chop" of tea; *Oregon John*, a wretched Yankee hack, won a leading race by a bit of congenial "dodging;" and, worst of all, *Exeter*, a well-known racer belonging to a professional coterie from Shanghai, after winning four or five cups in succession, carried off the magnificent Challenge Cup, which by almost prescriptive right should have graced the sideboard of either Messrs. Dent and Co., or the rival house at East Point. The weather, gloomy, wet, and chilly, was worthy of such doleful events as these; and Hong Kong has some reason for saying that the "run of luck is against us." In commercial misfortune there is, at the same time, a lull, succeeding the complete stoppage of transactions during the Chinese New Year period; but the expectations formed with respect to probable difficulties on the arrival of the 28th January mail from England, which is expected to bring public advices of "bills returned," are gloomy enough.

Another of the Bourbon Princes—the Duc de Penthièvre, son of Prince de Joinville, has passed through the colony lately, on his way to Japan, whence he proceeds to San Francisco. His Royal Highness is last from Australia, via Siam. Travel appears to be the only occupation to which these "banished dukes" can settle down.

Admiral King arrived last week from Japan in his flagship the *Princess Royal*, but as the vessel had nearly sixty cases of smallpox on board (chiefly mild, however), she has been put in strict quarantine. The Admiral will soon proceed to the Straits, and there await the arrival of his successor. Roving commissions appear to be the order of the day. An agent of the General Post-office, Mr. Rae, has recently arrived here from London for the purpose of inspecting the various post-office agencies in China and Japan, and has just set out on a tour of inspection in company with the colonial Postmaster-General. The branch agencies at the ports, with the exception of Shanghai, are conducted by junior officers of the British Consulates, as the small allowance made for the service is not sufficient to compensate an independent agent for undertaking the work; but at some ports no agency of any kind is established, and mails arrive and depart in a sort of providential or happy-go-lucky manner. The action of the Hong Kong Post-office is to some extent embarrassed by the establishment of no less than two rival offices at Shanghai, one called the Local Post-office, established under the superintendence of the Municipal Council, and very inefficiently conducted, and the other a magnificently despotic concern entitled *Postes Imperiales*, which used (a few years ago at least) to be a perfectly insatiable monster in the way of devouring letters entrusted to its care. The omission of any postal clause in the treaty of 1858 has prevented the British Post-office from exercising legal functions on Chinese soil, and hence much confusion which can now scarcely be remedied.

An amusing instance of Yankee administrative ways was instanced on the recent arrival here of the *Colorado*, the pioneer of the trans-Pacific line from San Francisco to Hong Kong. As a "mail steamer," she of course brought a mail for delivery, but as no steps whatever had been taken by the Washington Post-office to negotiate a convention with St. Martin's-le-Grand on the subject, the colonial post-office could of course only treat letters so arriving as ordinary "ship letters," and similarly could make up no regular mail for despatch on the return voyage. The "mail agent" of the steamer, who had received his appointment as a reward for military services, confessed to having no idea of what he was expected to do in discharge of his duty, but excused himself by opining that his superiors at home had even less.

Notwithstanding these little *laches*, which will doubtless soon be remedied, the line now inaugurated is a very popular one, and will deprive the careless P. and O. and dubious Messageries of an immense amount of passenger traffic.

Very sad news has just arrived from Japan to the effect that Mr. O. Vidal, a student interpreter in H.M.'s Consular service, who came out early in 1864, after taking high honours at Oxford, has committed suicide by shooting himself through the head. No reason beyond discontent is assigned for this act.

STRAITS SETTLEMENTS.

SINGAPORE.

From Singapore we have advices to the 8th of March—two days later. The outward mail of the 28th of January was delivered on the 2nd of March. The following items are from the *Straits Times*:—

General Cavenagh, who has been Governor of the Settlements from 1859 to the present time, and will be the last of our Indian rulers, leaves this in a week hence, and the residents have determined before his departure to mark their sense of his conscientious discharge of duty. A public dinner will be given to him on the 12th of March, at the Hall, which will be very numerously attended; and it has further been resolved, as a mark of esteem which, it is understood, has his Honour's approval, that his portrait be obtained at the public cost, and be hung up in the Townhall beside those of Sir Stamford Raffles, the founder of the Settlements, and General Butterworth, the only other Governor who has been similarly honoured.

Sir Benson Maxwell, the Recorder, returned from his circuit to Malacca on the 7th, and will open the next criminal session on the 15th March, a fortnight sooner than usual, so as to dispose both of the criminal and civil business before his departure for Europe by the first mail in April. Sir W. Hackett, the new Recorder at Penang, will officiate at Singapore during his absence. One case that will occupy the civil side of the Court, is that of the collision of the steamer *Agamemnon*, one of the new Ocean liners, and the steamer *Mona* belonging to the Labuan Company. The two steamers met about twelve miles from Singapore harbour—the *Agamemnon* proceeding to China, the *Mona* on her return from Manila,—and the former struck the latter on the starboard quarter, cutting her down to the water's edge, and leaving her own stem in the gap. Both vessels were enabled to reach harbour in safety, and are now in course of repair. It is impossible to say yet where the blame lies, actions have been brought on either side. The *Agamemnon* is by far the most severely injured.

Births, Marriages and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

ENGLER—On the 21st January, at Saigon, the wife of F. Engler, Esq., of a son.
GIBBON—On the 31st March, at Woodland Villas, Lee, the wife of Captain Richard Gibbon, of a daughter, prematurely.
GILFILLAN—On the 16th Feb., at Shanghai, Mrs. James Gilfillan, of a daughter.
LESSLER—On the 13th February, at Bangkok, the wife of Paul Lessler, Esq., of a son.
MARTIN—On the 2nd March, at Singapore, the wife of Alex. Martin, Esq., of a son.

MARRIAGES.

DA SILVA—OUTEIRO.—On the 17th February, at the Roman Catholic Parish Church of St. Lawrence, Macao, Cortella Genuino Augusto, second son of the late Joaquim Peres da Silva, of Macao, to Sophia Ricardina, second daughter of the late Jose Maria do Outeiro, of Oporto.
JONES—COSTON.—On the 3rd April, at Stanton Lacey, by the Rev. Dr. Bowles, George Thomas Jones, Esq., formerly of Shanghai, to Annie, only daughter of R. Costen, Esq., of Hayton, Salop. No cards.
PRIOR—BRYANT.—On the 10th April, at the parish church, Redgrave, Suffolk, by the Rev. Richard Cobbold, rector of Wortham, assisted by the Rev. John Wilson, vicar, Edward Prior, late of China and Japan, to Emily, eldest daughter of John Bryant, Esq., the Grove, Redgrave, Suffolk.

DEATHS.

BOWEN—On the 28th March, at Addison-road, Notting-hill, Captain Edwin Bowen, late of the China Steamship Company's steamer Mona.
DAWSON—On the 26th February, at Hong Kong, Miss Annie Dawson, aged 24 years.
engineer, H.M.'s gunboat Haughty, aged 32 years.
FRENCH—On the 29th March, at Lampits, Lanarkshire, Dr. James French, C.B., Inspector-General of Hospitals.
FUSSELL—On the — March, at Hong Kong, R. S. R. Fussell, Esq., of Foochow (reported by telegram).
GROSE—On the 27th February, at the Seamen's Hospital, Richard Grose, seaman, H.M.S. Princes Royal, aged 26 years.
HARTMAN—On the 19th February, at Hong Kong, G. A. Hartman, Captain 2nd Battalion 13th Light Infantry, Deputy Assistant Quartermaster General in China.
HOUGHTON—On the 27th February, on board H.M.S. Melville, Wm. A. Houghton,
PRITCHETT—On the 10th February, at Hong Kong, Susan Maria, youngest daughter of John Pritchet, Esq.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months' sight.	4s. 5½d.	4s. 6½d.
,,	4 ditto	4s. 5d.	4s. 5½d.
At Shanghai	6 ditto	6s. 1½d.	6s. 0½d. to 6s. 1½d.
,,	4 ditto	5s. 11½d. to 6s. 0d.	6s. 0½d. to 6s. 0¾d.
At Canton	6 ditto	4s. 4d.	4s. 4½d.
At Hong Kong	4 ditto	4s. 3½d.	4s. 4d.
At Macao			
At Singapore	4 ditto	4s. 4d.	4s. 5d.
At Manila	6 ditto	4s. 3d.	4s. 4d.

At Shanghai, bills on India, Rs. 300 per 100 taels. At Hong Kong, Rs. 219 per $100. Bar Silver at Shanghai, tls. 111·30; at Hong Kong, 10¾ per cent. prem. Mexican dollars at Shanghai, tls. 78 per 100; and exchange on Hong Kong, 27¾ discount. Hong Kong and Shanghai Bank shares (ex div.) new, 4 per cent.; old, 11 per cent. dis.; Gas Company, par; Hong Kong and Whampoa Dock, 20 to 25 per cent. prem.; Steam Shares, 10 per cent. dis.; Union Dock Company, 35 per cent. dis.; China Traders' Insurance, 1½ per cent. premium.

The following is from Sharp and Co.'s Circular:—

GOLD.—The receipts of the fortnight have been very trifling, only $70,000, the exports, including last mail steamer and excluding to-morrow's, are $640,000, leaving no gold of any kind in the market.

SILVER.—Imports, $350,000; exports, inclusive and exclusive, as above $1,550,000. The same remark as previously made applies, also, to silver bullion, of which there is now little or none on hand.

DOLLAR CURRENCY.—The shipments of coin to India still continue, consequent upon the low price of rupees and the scarcity of silver bullion; amounts inwards $140,000, and outwards $620,000.

EXCHANGE.—The closing of the Tea season and the general indisposition to lay in funds for fresh operations have caused great scarcity of remittance, and rates have again declined.

DISCOUNT AND MORTGAGE.—Money for short discounts is comparatively cheap, but loans for any considerable period, whether upon produce or estates, have in pay from 10 to 12 per cent.

SHARES.—Bank are a trifle lower since the dividends came off. Dock and steam are rather better for sellers. There is no speculative business.

HONG KONG FIRE INSURANCE COMPANY.—At the first ordinary meeting of the shareholders on the 16th instant, the accounts produced showed a net profit of 53.431,91 dols.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—At almost all the ports the stocks on hand appear to be larger than usual at this time of year, a natural consequence of the effect, in checking the operations of the buyers, which has been produced by the state of the tea market at home. During the past fortnight the business has been on a limited scale and chiefly for America.

CANTON.—The market continues in a very dull state, and for the English market not a single transaction is reported to have taken place throughout the fortnight. Country Congous: One of the commonest chops has been taken by a Parsee firm at 21½ taels; there appears to be no inquiry for these teas for the European markets at present, and stock on hand is 32 chops or 20,582 packages. Country Greens: The Hysons reported settled are, it is said, intended for the Bombay market. Present stock is 4,440 packages, and there are no further arrivals to advise. Canton-made Teas: Not a package of scented tea has been taken during the fortnight; a small parcel of packed Congou eas been settled for India, and the settlements reported in Pouchong and Canton Greens are intended for the Continental markets. Sales, &c., are reported as follows:—Country Congous, 522 ½-chests at 21.5 tls.; Country Greens, 137 ½-chests at 52 to 55 tls.; Canton Packed Congou, 309 boxes at 22 to 23 tls.; Canton Gunpowder, 1,000 boxes at 17 to 19 tls.; Canton Young Hyson, 2,000 at 18 to 25 tls.; Pouchong, 500 ½-chests at 16.5 tls. Stock, 32 chops or 20,682 packages Country Congous; 4,440 packages Country Greens.

FOOCHOW.—A few settlements have been made at very full quotations The season may be considered to have closed, but there is about sufficient tea waiting shipment for another cargo. The settlements reported amount to 3,566 chests, 2,600 half-chests, and 782 boxes at taels 8 to 17.5, say 546 chests and 1,063 half-chests at taels 8 to 12.7 for dust and broken-leaf; 332 chests, 853 half-chests, and 782 boxes at taels 13 to 15 for common to good common, and 2,668 chests and 684 half-chests at taels 15.25 to 17.5 for flavoury. Souchong: Fair, 220 chests at taels 23. Oolong: Common cargo, 300 half-chests at taels 12 to 14.

SHANGHAI.—Black Tea: As anticipated, the fall in the Exchange, and the slightly better accounts from home, have led to an increased business being done during the past fortnight. Settlements, which commenced at about former rates, now exhibit a rise of fully one tael. Teamen show much anxiety to profit by this advance, and an easier market is expected after the mail in consequence. Owing to the holidays having barely expired in the country, no arrivals have come to hand, and the stock is now estimated not to exceed 10,000 chests, against 700 chests at same date last year. The settlements comprise—Oopack, 600 chests, common to medium, tls. 20.5 to 22.5 Ninchow, 2,200 chests, common to fair, tls. 15 to 23. Oonam, 300 chests, common, tls. 18. Hobow, 700 chests, common to fair (1st crop), tls. 16.7.5 to 24. Total, 3,800 chests. Reshipments, 54 chests. Total settlements, with reshipments from the river ports, from 1st June, 1866, to date, 318,000 chests, against 268,000 chests last year. Green Tea: A small business, confined almost exclusively to good Moyune Teas for America, has been done at gradually stiffening rates. Teamen, generally, are anxious to clear their holdings for the new season, and common teas, of which the bulk of the stock consists, can be bought on easier terms in consequence. Holders of fine teas, however, show great firmness, but, as the ships on the berth for New York are all full, and no fresh vessel has been put on, they will probably have to make a concession to induce much business.

Digitized by Google

The export to Great Britain compares favourably with last year, but the ships in port have over one million and a quarter pounds on board, and prices are fully three taels above the last London value. The stock shows little diminution, being estimated at 36,500 half-chests, against 24,000 half-chests at the same date last year. The subsequent arrivals up to the end of the season last year amounted to 22,000 half-chests, but the future supply of this season is not expected to exceed 15,000 half-chests. The settlements comprise 6,900 half-chests Moyne, common to fair at 34 to 41 taels; 2,800 half-chests Fychow, common to fair at 29 to 34 taels. Total settlements, with re-shipments from Kiukiang, from 1st June, 1866, to date, 332,000 half-chests, against 245,000 half-chests last year.

HANKOW.—There had been neither shipments nor arrivals of Black Teas during the fortnight, and the stock remained at 3,000 chests.

KIUKIANG.—Advices are to the 18th instant. There have been no settlements either of Black or Green Teas, but the shipments on native account have reduced the stocks to 1,000 half-chests Black and 300 packages Green Tea.

YOKOHAMA.—Owing to the occurrence of the Japanese holidays which have been taking place during the interval which has elapsed since the last report, the amount of business has been limited, and the few transactions that have been effected since the turn of the New Year have been at an advance, and in some cases, parcels of tea bought at a low price before New Year, and rejected for being out of condition, have been re-bought at an advance of $2 per picul without any apparent cause; with the exception of these irregularities which can hardly be said to show the state of the market, or to establish any price whatever, there is no change to notice, and until the teamen return from Yedo, and regular buyers enter the market no alteration is to be expected. In the almost entire absence of business quotations must be considered nominal. Settlements are estimated at about 600 piculs.

RAW SILK.—CANTON.—There are no further arrivals to report during the fortnight, and the settlements that have taken place show no change in prices; within the last few days, however, holders have evinced rather more desire to realise their various parcels, and with the mail news (dated London 10th January) to hand showing a decline in prices at home, rates here are more likely to recede than advance. As before noticed stocks of the commoner classes are far too heavy for this late period of the season. Stock 100 bales No. 1 Tsatlee, 100 bales No. 1 Loong-kong, 400 piculs Kow-kong, 300 piculs Lacklow, 290 piculs Seulam, and 1,000 piculs Punjum.

SHANGHAI.—The smallness of the stock on this market, coupled with the firmness of holders, has prevented business being done to any extent, though an anxiety to purchase appears to be very general. Prices both here and in the country have a decidedly upward tendency, there being so very little more silk to come forward this season. Settlements for the past fortnight, 400 bales; total settlements since 1st Jan., 1,900 bales. The quotations are:—Tsatlees, market, No. 3, 535 to 540 tls.; do., No. 4, 520 to 530 tls.; do., No. 5 and com., 430 to 480 tls.; Taysaams, chops No. 1, 505 to 525 tls.; do., No. 2, 480 to — tls.; do., No. 3, 450 to — tls.; Yuenfas, No. 1, 530 to 540 tls.; No. 2, 525 tls.

YOKOHAMA.—Hard pressed for cash, many of the Japanese dealers have had recourse, in order to settle the accounts of the year ending on the 5th instant, to loans against deposits of silk with foreign houses. The disposable stock has thereby been much reduced and transactions having as usual been interrupted by the Japanese holidays, the settlements of the fortnight scarcely amount to 150 piculs. A few parcels of fine Mybash, Oshio, and Sodai, have been settled at very full prices; but there is not much change to notice in prices which close rather firm at quotations. The unsold stock, including the unredeemed deposits, may be estimated at 600 piculs. Total settlements since 1st July, 1866, amount to nearly 9,500 bales, and referring to early reports on the crop of 1866, it may be conjectured that 2,500 or 3,000 bales is about all there is to expect till the end of June proximo. Total export for 1866-67 might thus be reckoned at from 12,000 to 12,500 bales. According to Japanese reports it would be less. Quotations are—Mybash and Sinchu best, $850 to 900 per picul; do. medium, $780 to 830; Ooshio best, $790 to 820; do. medium, $720 to 760; Koshio best, $750 to 800; do. medium, $690 to 730; Echizan best, $690 to 720; do. medium, $640 to 680; Sodai best, $680 to 710; do. medium, $630 to 660.

DRUGS AND OTHER EXPORTS.—CANTON.—Cassia Lignea: The season's supplies seem to be quite exhausted, and the quotation of $19.50 must be considered quite nominal. Cassia Buds, $40, as before of stocks, 100 piculs. Cassia Oil: 6 piculs left at $185. China Galls: 50 piculs quitted at $13.50, and 100 piculs remaining on offer. Galangal, $1.85, but no demand; stock 300 piculs. Vermilion, $39 per box of 50 catties of genuine quality. Rhubarb: The market is very poorly supplied, both as regards quantity and quality, and it does not appear that any change for the better can be expected at present. Star Anniseed and oil, none.

MACAO.—Cassia Lignea: The stock of 150 piculs inferior found buyers at $17 for shipment to the Straits. Of good Cassia the market is bare, and the quotations remain unchanged at $19. Cassia Buds: The only sale to report is one of 15 piculs, not very stalky, at $32.50. The remaining 40 piculs on stock are mixed with twenty to twenty-five per cent of stalks, for which dealers refuse to make an allowance, and, consequently, have as yet found no buyers. Cassia Oil: This article is slow of sale, but at somewhat improved prices. 7 piculs have been placed at $173, and 23 more remain on offer. New Star Anniseed has advanced to $24, at which price the stock of 150 piculs has been taken, leaving 300 piculs of old on the market held firmly at $22. A supply of 17 piculs of Star Anniseed Oil has come forward, and is offered at the extreme price of $260, but at this figure there are no buyers. China Galls have receded 50 cents, and 100 piculs in stock are offered at $12.50. Galangal $1.20, no transactions, and 3,200 in stock. China Root: Nominally quoted at $3.50, but no transactions or stocks. Vermilion, per 900 packages, $33.50, per 1,000 packages, $37.50.

CHINA GRASS.—SHANGHAI—No business has been done in this article since the holidays, and quotations must therefore be considered as nominally the same as before, viz.: No. 1, 16.5.0 tls.; No. 2, 14.0.0 to 15.5.0 tls.; No. 3, 13.0.0 to 14.0.0 tls. Green, 11.0.0 tls. per bale. At these prices, shipments to Europe would, according to late quotations, leave extremely heavy losses; and it seems, therefore, probable that transactions will be confined, for some considerable time at any rate, to supplying the native requirements.

CHINA IMPORTS.

There has been a somewhat better feeling in the import market during the fortnight, although little or no improvement in rates can yet be reported, and any attempt to establish an advance puts a stop to transactions. 16-24 Yarn has been in demand, and sales would have been much larger but for the firmness of holders; other kinds are not wanted. 8.4 lbs. Grey Shirtings have also been in fair demand, and of T-Cloths large sales have been effected, but at a slight reduction. More notice has been taken of Fancy Cottons, but the market for these goods must still be called dull. Woollens: Long Ells, Camlets, and Lastings have all met with some inquiry, and quotations are slightly better. Other kinds unchanged. Metals have also been more noticed, as will be seen by sales and quotations. Lead is firmer, probably owing to tolerably large sales in Canton. None are reported in Hong Kong. Coals.—Hong Kong: There are no arrivals of English or Welsh coal to report, and they remain firm at last quotations. Of Australian 478 tons have been sold at $8.75 from ship's side. Shanghai: Transactions during the past fortnight have been few. The market has a downward tendency for most descriptions. Arrivals have been 825 tons from Australia, 500 tons from Japan, and 100 tons from Great Britain. Sales have been: Australian, at taels 8.7.5. to 8.5.0. per ton; Japan, at taels 6 to 7 per ton, according to quality, from ship and godown; American Anthracites, at taels 12.0.0. to 12.2.5. per ton from godown. The quotations are:—English, taels 11.0.0. to 12.0.0. per ton; Cardiff, taels 12.0.0. to 13.0.0. per ton; Welsh, taels 11.0.0. to 12.0.0. per ton.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.
At SHANGHAI.—None.
At FOOCHOW.—From Newcastle, Feb. 11, Ecliptic.
At HONG KONG and CANTON.—From Newcastle, Feb. 23, Etienner and Laurence.
At MANILA.—None.
At SINGAPORE.—From Glasgow, Feb. 28, Wemyss Castle; from Rotterdam, March 2, Minister Thorbecke.
At PENANG.—From Bordeaux, March 6, Yvonne.

DEPARTURES.

From YOKOHAMA.—None.
From SHANGHAI.—None.
From FOOCHOW, for London, Feb. 12, Red Riding Hood, for New York, 18th, Tynedale.
From HONG KONG and CANTON.—None.
From MACAO.—For London, Feb. 12, Sea Bird; for Havana, 17, Josephita Almira.
From MANILA.—None.
From SINGAPORE.—For Falmouth, March 1, Elias, for Rotterdam, Bengal.
From PENANG.—For London, March 2, Zanzibar.

VESSELS LOADING.

At YOKOHAMA.—For London, Carioca, Lord Collingwood.
At NAGASAKI.—For London, Rifleman.
At SHANGHAI.—For London, John Bellamey, Burmah, Peter Denny; for New York, Magellan, Endeavour, Aurora Australis, all full.
At FOOCHOW.—For London, Shakespeare (expected); for New York, General Havelock.
At HONG KONG and CANTON.—For London, none; for New York, Windward.
At MANILA.—For London, Canaan, Coromandel; for Falmouth, Glendoveer; for Barcelona, Nuevo Lantaro; for Havana, Espana, Eulalia; for New York, Earl of Dalhousie, Hotspur, Mindoro.
At SINGAPORE.—For London, Der Sud, Ellen Radford, John Cobbold, Octavia, Willy; for Liverpool and Glasgow, Roslin Castle; for New York, John Norman.
At PENANG.—For London, James Patan, Mathilde

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s. per ton of 50 cubic feet. To New York, £2 10s. to £3 per ton of 40 cubic feet.

At SHANGHAI.—Rates to London are without improvement, viz., £2 per ton. The vessels on the berth for New York are all full, and no other ship has been fixed. Suitable tonnage for coasting purposes is much wanted and freights have advanced.

At FOOCHOW.—The Shakespeare is chartered to load for London at £2 5s. per ton of 50 cubic feet.

At HONG KONG and CANTON.—The following charters for U.K. have been effected:—Picciola (200 tons), Whampoa, Hong Kong, and Macao to Hamburg at £2 per ton. Perle (442 tons), Rice Ports to United Kingdom or Continent at £3 per ton. Dr. Peterman (703 tons), Rice Ports to United Kingdom or Continent at £2 17s. 6d. per ton, if Gottenburg or Copenhagen at £3 per ton. The rates to Saigon and back is 42½ cents. To Tientsin and back 80 cents per picul. The number of disengaged vessels and tonnage in harbour, according to the circular of George Holmes (exclusive of Siamese), is, 8 vessels representing 5,933 tons.

At PENANG.—The James Paton, 396 tons, is loading with only tin engaged at £3. There is little or no freight offering. The Mathilde, 148 tons, is taking cargo for London fully engaged at £3 for tin.

At MANILA.—The Earl of Dalhousie has been fixed for New York, with a full cargo of Hemp, at £4 per 20 cwt. The Eulalia has been taken up for Havana at £3 10s. per ton for a cargo of Rice and Coffee.

At SINGAPORE.—Tonnage is exceedingly scarce, and suitable vessels are in fair request to load home from the Burmah Rice ports. Large sized ships are wanted at £2 15s. to £3 per ton, and small at £3 to £3 2s. 6d.

Digitized by Google

The rates offered for Saigon to Hong Kong are 42½ to 45 cents per picul.

Vessels on the home berth are loading at £2 per ton for dead weight, and £2 5s. for light cargo. Rates generally are very firm.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

The Mexican dollars brought by the last West India steamer (about £150,000) have been disposed of at 59½d. per oz., showing an advance of ⅛d. upon the previous rate. Bar silver is at present quiet, pending the receipt of further telegrams from India.

The annual meeting of the Singapore Gas Company will be held at the London Tavern on the 30th inst., when a dividend is to be declared.

ARRIVALS NOT INCLUDED IN THE TABLES.—April 9, at Deal, from China, Tamerlane; from Hong Kong, Chetah; 10, in the Downs, from Shanghai, Tyburnia; from Ceylon, Skimmer of the Waves; from Shanghai, Dundonald; 7, at Helvoet, from Batavia, Jessie Jamieson; March 29, at New York, from Amoy, Brothers; April 9, off Falmouth, from Canton, Orion; from Singapore, Carlshaven; 11, at London, from Yokohama, Corea; 10, at Deal, from China, Patna; 10, at Cowes, from Sourabaya, Joan; 7, at Zierikzee, from Batavia, Luconia; 11, at Falmouth, from Canton, Schulze Delitsch; 8, at Texel, from Padang, Almelo; 9, off the Start, from Shanghai, Southern Cross; from Singapore, Edmund Graham; 11, at Liverpool, from Singapore, Isabella; 12, at Deal, from Java, Anthony v. Hoboken; 11, at Falmouth, from Manila, Vicksburg; from Singapore, Adelheid; 13, at London, from Singapore, Caldbeck; at Falmouth, from Manila, Ellen Browse; in the Downs, from Sarawak, Johanna and Ohiffa.

DEPARTURES.—April 9, from London, for Shanghai, Polmaise; 10, from Liverpool, for Mauritius, Singapore, and Hong Kong, Thales (s.); 9, from London, for Shanghai; Polmaise; 5, from Sunderland, for Galle, Bells; 11, from London, for Yokohama, Swanley; 7, from Shields, for Hong Kong, Glenroy; 10, for Ceylon, Britannia; 10, from the Clyde, for Singapore, Lochleven Castle; 13, from Liverpool, for Shanghai, Coila (s.); 11, for Singapore, A. H. Willie.

LAID-ON.—At Liverpool, for Yokohama, Castleton; at London, for Colombo, Memento; for Hong Kong, Korea; for Nagasaki, Adeline; for Shanghai, Tyburnia, Tamerlane; at Liverpool, for Batavia and Sourabaya, Tahti; for Singapore, Bonnie Lassie.

SPOKEN.—Dorothea (Hamburg barque), Singapore to Bristol, off the Cape of Good Hope; Burdwan, London to Hong Kong, March 8, on the Equator, 24 W.; Maalstroom (Dutch barque), Batavia to Amsterdam, March 18; a ship bound from Sunderland to Shanghai, Jan. 29, 21 S., 31 W.; Copernicus (barque), Rotterdam to Batavia, Feb. 16, on the Equator.; Gemini, Singapore to New York, March 10, 2 N., 31 W.; Thos. Lee, Shanghai to London, March 19, 20 N., 41 W.; Assyrian (ship), Shanghai to New York, March 13, 10 N., 38 W.; George Shotton (barq.), China to New York, Feb. 18, 23 S., 1 E.; Mary Whitbridge, New York to Shanghai, Feb. 2, off Fernando de Noronha; Lorelz (Prussian barque), Swansea to Sing., Feb. 16, 26 S., 25 W.; Star of China, Lon. to Shanghai, Mar. 15, 4 N., 22 W.; Mavourneen, Sing. to Fal., Mar. 30, 31 N., 33 W.; Eliza Grant (barque), Canton to Falmouth, 38 days out, Jan. 23 S., 71 E.; Iron Queen (ship) Shanghai to London, 83 days out, March 24, 23 N., 35 W.; Louise, Amsterdam to Batavia, March 28, 11 N., 26 W.; Hetty Lizzie (Eng. barque) Batavia to Rotterdam, Feb. 6, 28 N., 52 W., with master dead; Ellen, Manila to Queenstown, Nov. 11, 2 N., 105 E.; a vessel from Colombo to London, April 3, 44 N., 24 W.; Forfar Castle, Singapore to Liverpool, Feb. 19, 20 S., 1 W.

MISCELLANEOUS.—At St. Helena: Feb. 28, Dos Hermaos, Tuton, from Macao, and sailed March 2 for Havana; Baron v. Pallt. v. Rosendaal, Kramers, from Banjoewangie, and sailed March 2 for Amsterdam. March 1, Isaac da Costa, Klein, from Java, and sailed 2 for Rotterdam; Rinaldo, Liston, from Mantla, and sailed for Liverpool. 2, Recife, Blanford, from Yokohama, and sailed for New York. 3, Schelde, Hoffman, from Banjoewangie, and sailed 6 for Middelburg. 6, Hong Kong, Iriberri, from Macao; Kosmopoliet, Groot, from Batavia.

We understand that Lieutenant-Colonel Anson, the Lieutenant-Governor of Penang, takes his departure by the first mail in May.

Mr. W. W. Cairns (who was presented at the last levee, on his appointment as Lieutenant-Governor of Malacca) proceeds to his post by the mail of the 26th of May.

THE ORIENTAL BANK COPORATION.

The following is the report of the Oriental Bank Corporation, to be presented at the general meeting on the 16th :—

The directors, in submitting the general statement of the corporation's affairs and balance-sheet for 1866, have to congratulate their co-proprietors on the favourable result of the operations, the nett profit (including £5,137. 13s. 8d. from the last account) amounting to £193,687. 8s. 4d.

An interim dividend of £90,000 was distributed in November last, and it is now proposed to divide a like amount of £90,000. This will be equal to a dividend of 12 per cent. for the year, and after providing for the present payment of £1. 10s. per share there will remain a balance of £13,687. 8s. 4d. to be carried to the credit of the next account.

Since the directors' last report this country, and the field of their operations generally, have been convulsed by a financial crisis of unparalleled severity and duration, and the corporation has not escaped considerable loss. The directors, however, have the satisfaction to state that the increase of profitable business during the past year has enabled them not only to provide amply for every ascertained loss and probable contingency, but to pay a dividend 2 per cent. larger than that for 1865; whilst the lessened competition, consequent on the withdrawal of so many Indian banks, holds out a fair prospect for the future.

Mr. J. Binney Key, Mr. L. R. Reid, and Mr. A. Mackenzie are the directors who retire by rotation. These gentlemen, being eligible, offer themselves, and the court with pleasure recommend them for re-election.

The meeting will have to appoint two gentlemen as auditors for the present year, and the court cannot give this intimation without an expression of regret, that the death of Mr. T. A. Gibb has deprived the shareholders of the services of a gentleman who was in every way most highly qualified for the trust which he has held ever since the incorporation of the bank in 1851.

H. G. GORDON, Chairman.

MARRIAGE OF MR. ROBERT JARDINE, M.P.—The marriage of Mr. Robert Jardine, of Castlemilk, with Miss Seaton Buchanan, which took place at Leny, on the 4th instant, has been made the occasion of great rejoicing among his numerous tenantry, and the account of the festivities fills some half-a-dozen columns in the local paper. The thriving little town of Lockerbie—which from its proximity to the estates of Castlemilk and Corrie was selected as the principal rallying point of the festivities—wore the stirring and animated appearance of high holiday, and owing to the well-merited popularity of the Jardine family throughout the district, all classes appeared to take an interest in the various demonstrations of the day. In these the Lockerbie Rifle Volunteers, of which Mr. Jardine is captain, took a leading part. In the afternoon the Volunteers dined together in the Crown Inn, and wound up the festivities by a grand ball in the new Town-hall, which was a great success. Shortly after five o'clock a large part of the tenantry on the estates of Castlemilk and Corrie and other gentlemen dined together in the Blue Bell Inn in honour of the auspicious event. The rejoicings at Castlemilk and in that neighbourhood were of the most enthusiastic description, and carried out on a scale of imposing magnitude. A party of 200, composed of servants, workmen on the estate, and tradesmen at the new mansion, sat down to dine in a large tent at half-past one o'clock in the old stable yard. A procession was formed from the new garden to the place, and there was a most lavish display of banners and devices. A ball was given in the evening to the people on the estate, at which the workmen's wives were present. The tenantry on Mr. Jardine's estate of Castlemains and other gentlemen dined together in the Crown Hotel, Lochmaben, to the number of fifty. The *Plymouth Mercury* gives an account of the rejoicings at Ashburton, which is represented by Mr. Jardine in Parliament. As Mr. Jardine has since his connection with Ashburton made himself very popular, the rejoicings were of a most general and hearty character. Mr. Jardine has bought between £20,000 and £30,000 worth of property in the neighbourhood, and is, with Lord Churston, the joint lord of the manor. He has also brought the water into the town, so that there is scarcely a house without a supply. The most gratifying feature in the rejoicings was the distribution of £105 in various sums to the poor, the gift of Mr. Jardine.

THE MONT CENIS TUNNEL.—The *Journal de Savoie* gives some interesting particulars concerning the present state of the works in the tunnel of Mont Cenis:—"The excavations had been for the last two years delayed on the French slope by a vein of quartz, which did not admit of an advance of more than from two to two and a half feet a day. That layer has now been got through, and one of much softer stone having succeeded, the perforating machines are able to accomplish double that distance each day. In a short time, when certain improvements shall have been effected in the machinery, from six to seven feet will be perforated every twenty-four hours. After the section now worked a portion of schist, equally friable, will be entered on, and this has already been reached on the Italian side. The united progress will then amount to a total of thirteen feet per diem, and in four years the tunnel will be completed. In the meantime, the English company of Mr. Fell is actively pursuing for the State the restoration of the Imperial road between St. Michel and Modane, which was carried off on several points, as may be remembered, by an inundation of the Arc in autumn last. More than 1,500 men are employed on that work. The same firm is also proceeding with the railway over Mont Cenis, which it hopes to be able to open for traffic before the end of the present year." The *Jura* says some English engineers have been during the past winter studying the pass over Mount St. Gothard, with a view of establishing a railway across it. According to their report the line could be completed in five years: it would be 400 metres above the level of the one first projected, and would cost five millions less. The longest tunnel would be six kilometres (¾ of a mile each). These gentlemen were sent out by Mr. Fowler, the engineer of the Metropolitan Railway of London.

THE RUSSIAN POSTAL SERVICE TO CHINA.—In a recent letter of our Hamburg correspondent (see issue of 15th March) allusion was made to a reduction in the rate of postage on printed matter sent to China *via* Russia. Having applied to the General Post-office for information on the subject, we have received the following reply:—"Sir,—With reference to your letter of the 12th and to my reply dated the 18th ult., I am now directed by the Postmaster-General to acquaint you that a letter has been received from the Prussian Post-office replying to the inquiry made by this department in regard to the transmission of printed papers to China *via* Russia. From this reply it appears that although newspapers and other printed papers can be sent from Russia to China at reduced rates of postage, the stringent regulations under which alone such articles can be sent to Russia from England effectually prevent newspapers and printed papers being forwarded from this country to China *via* Russia.—I am, Sir, your obedient servant, F. HILL."

THE MURDER ON BOARD THE "RABY CASTLE."—At the Central Criminal Court yesterday the Swedish seaman, Karl Anderson, was brought before Baron Channell, charged with the murder of James Marachien on the high seas during a voyage from Penang to London. The facts of the case have been fully brought under the notice of our readers in previous issues, and it only remains for us to say that the charge having been completely proved by the facts adduced in the evidence given by the witnesses, the jury found a verdict of guilty, and the judge passed sentence of death upon the prisoner in the usual form.
